Labors of Love in Paris.

(Special Correspondence of the Am. Railroad Journal.)

PARIS, Sept. 8, 1881.

Paris is to most Americans a holiday city. The average New Yorker, Philadelphian and Bostonian on a European tour "does" London with its Westminister Abbey, St. Paul's and Houses of Parliament just about as seriously as though he were walking down Broadway, Market Street, or State Street. When on the Rhine he ticks off the castles and Felsen in as methodical a manner as though he were checking his butchers' bill. When in Italy he wanders through the galleries with the air of a man performing a painful but necessary task, and when, say at Leghorn, he is carefully prospecting his plans for seeing Pisa's crooked tower, its Baptistery and its Cemetery, between one train and the next so that he may reach Genoa the same night. It is only upon reaching Paris that he gives himself up to the enjoyment of the situation. He comes there in search of recreation, amusement and pleasure and in nine cases out of ten he will have laid aside two or three extra hundred dollar bills for "casual expenses" in Paris. To the credit of Americans let it be stated that these extra $100 are not seldom spent in a manner that gives their owners a far higher satisfaction than if merely laid out in the pursuit of pleasure. The MacAll evangelic mission to the workmen of Paris is now known all over the United States, and there are but few Transatlantic visitors who, when appealed to, do not give something towards it. The trouble is that those engaged in the work are so absorbed by their labors that they have scarcely time to call on tourists and invite them to visit some of the meetings. There are now no less than 27 lecture halls in and around Paris in most of which religious meetings take place once or twice a week; and the mission is gradually working its way into other large centres of France such as Havre, Rouen, Bordeaux, &c. Everywhere the working people seem to hail with pleasure the coming among them of Mr. McAll, Mr. Dodds and their lieutenants. The services are always interesting and many professed atheists attracted to the meetings by the singing, have there seen occasion to change their views. In this gay city a great step is accomplished when the people can be brought to think of the future. Besides the purely religious work a free medical dispensary has been established which is immensely popular. There are also book rooms for women, where they are taught sewing, and where they get materials sometimes for nothing and sometimes on payment of a trifle. They also receive vegetables at considerably less cost than at the public markets. All this is in the direction of ameliorating the social condition of the very poor, which, as everybody knows has a good deal of influence even upon their spiritual condition.

The new broad thoroughfares of Paris, while beautifying the city and benefitting the better classes of society, have simply relegated the poorer classes to the outskirts of the city. Mr. McAll and his friends are extremely desirous of collecting funds sufficient to enable them to erect dwellings for the laboring classes which can be let out at the rate say of 200 fcs. a year for two or three rooms. Such apartments would of course not pay over 1 or at the outside 2 per cent. annual interest on the outlay, but they would at least tend, by ameliorating the poor man's physical and moral condition, to prepare the soil for the reception of religious seed. The Rev. Geo. Theophilus Dodds, who visited America last fall with M. Eugene Reveillaud enjoys the confidence of vast numbers of Americans. He is intimately associated with the McAll work, and subscriptions for the same, or any branch thereof, may be addressed to him at 11 Rue Pierre-Guerin, Auteuil, Paris.

Less extensive although scarcely less interesting is Josephine DeBroen's Belleville Mission, which is carried on partly at the Iron Room 32 Rue Bolivar, and partly at Miss DeBroen's residence, 3 Rue Clavel, Paris. At the latter there are at present 18 children who eat, drink and sleep on the premises. The average attendance at the day school is from 60 to 65, and the night schools are also well attended. The Sunday School attendance averages about 60. The Medical Mission which is attended by persons from all parts of Paris, is one of the leading features of Miss DeBroen's work. Last year the total attendance thereat was 19,029, and as religious meetings always precede the dispensing of medicines it is to be hoped that the patients find relief for their spiritual as well as for their bodily ills. The attendance at the general meetings from Jan. 1, 1881, to June 9, reached 8,044, and the number of Bibles and Testaments sold during the same period in the various districts of Paris reached 1,046. A number of ladies are associated with Miss DeBroen in this labor of love, and persons desirous of seeing something of the work, and at the same time convincing themselves that Belleville is by no means so wretched a district as sensational writers frequently describe it, can get very comfortable quarters with board at No. 25 Rue Clavel. The house, which belongs to the Mission, is generally pretty well filled up with American and English visitors, and it must be acknowledged that the view from the upper windows over Paris is as fine as any to be had in the North Eastern part of the city. Both of these Missions date from the time of the Siege of Paris. In connection with the McAll Mission, religious lectures are givene very Sunday night, under Dr. Gibson's auspices by some of the most eminent pastors in the city at the Salle des Conferences, Boulevard des Capucines.

C. H. H.

THE Governor of Minnesota issued on the 19th inst. a proclamation convening the Legislature in extra session Oct. 11, to take such measures as it shall deem proper to provide for the payment of the old Minnesota Railroad bonds. The plan provided by the last Legislature was upset by the recent Supreme Court decision, which, however, fully empowers the Legislature to pay bonds that mature before the next regular session.

THE Hanover Junction and Susquehanna Railroad, in progress from Landisville, Pa., to Hanover Branch, Pa., 44 miles, was sold at public sale on the 15th inst. at Lancaster, Pa., for $20,-C09. The sale took place under an order of court, and the road was bought in by a committee of the bondholders.

Philadelphia Stock Exchange.

AMERICAN RAILROAD JOURNAL.

Financial and Commercial Review.

THURSDAY EVENING, Sept. 22, 1881.

In the money market this morning the quotations for call loans were 5 to 6 per cent, which were also the nominal figures for time loans and prime mercantile paper. In the afternoon the quotation was 6 per cent, but finally closed at 4 per cent to the stockbrokers.

The posted rates for prime bankers' sterling are 4 81½@4 85; the actual rates are 4 80½@4.81 and 4.84@½. Cable transfers 4.84½@4 85, and prime commercial bills, 4.78¾@4 79¼. The actual rates for continental exchange are as follows: francs, 5.2[illegible]5/8 and 5.22½@5.21¾; marks, 93¾@7/8, and 94½; and guilders, 8[illegible]5/8 @39⅞.

The proclamation of the Governor makes next Monday a legal holiday, so that the banks, the various Exchanges and all places of business will then be closed as on Sunday.

That part of President Arthur's inaugural address which touches business questions is regarded as an assurance that no change will be made in the Treasury policy; and this assurance has given confidence, which is reflected in the advancing prices at the Stock Exchange this afternoon.

At the close the general market was strong to buoyant, with the prices ¼@4¼ above yesterday's closing.

The closing quotations on Thursday were: Adams Express, 137@138; American Express, 87½@89; American District Telegraph, 55@55; Chicago, Burlington and Quincy, 160¾@161; Canada Southern, 64@64¼; Chicago and North-

western, 127@127¼; do. pref., 138@139; Central of New Jersey, 96@96½; Chicago and Rock Island, 137@137½; Central Pacific, 93⅝@93¾; Chicago, Milwaukee and St. Paul, 114¼@114½; do. pref., 124@126; Cleveland, Columbus, Cincinnati and Indianapolis, 97½@98; Columbus, Chicago and Indiana Central, 21½@22; Delaware and Hudson Canal, 109⅛@109¼; Delaware, Lackawanna and Western, 126⅛@126⅜; Hannibal and St. Joseph, 100@200; do. pref., 115½@115¾; Illinois Central, 131⅞@132⅛; Lake Erie and Western, 54@54¼; Lake Shore and Michigan Southern, 126⅞@127; Metropolitan Elevated, 86@87; Manhattan Elevated, 22@22¼; Michigan Central, 94@94¼; New York Elevated, 109⅝@110; New York, Lake Erie and Western, 46½@46⅝; New York Central and Hudson River, 143@143¼; Ohio and Mississippi, 44¼@44½; Ohio Central, 28¾@29; Texas and Pacific, 52⅞@53; Union Pacific, 122¾@123; United States Express, 68½@70; Wells Fargo Express, 131@134; Western Union Telegraph, 87½@88; Wabash, St. Louis and Pacific, 52¾@52⅞; do. pref., 94¼@95⅜.

Checks for the payment of the quarterly interest on the four per cent bonds will be mailed on the 30th inst. to the holders of the bonds. They aggregate 55,000 in number, and the amount of interest money represented is $7,387,039.

The comparative statement of the Philadelphia and Reading Railroad Company and the Philadelphia and Reading Coal and Iron Company shows the profits of both companies for the month of August to have been $1,155,265 55, and for the year to date, $6,934,858 14, against $859,948 32 and $5,560,551 05 respectively for the same periods last year.

The exports of petroleum and petroleum products from New York for the month of July amounted to 34,945,020 gallons, from Philadelphia 12,285,054 gallons, from Boston 1,107,028 gallons, and from Baltimore 2,609,407 gallons. The total exports from all the ports for July was 51,019,204 gallons, against 36,367,961 during the same month last year. The total for the seven months ending July, 1881, was 250,799,086 gallons, against 185,266,955 for the corresponding period of 1880. Of this seven months' product of 1881, 216,372,000 gallons were illuminating oil; the rest were napthas, lubricating oil, residuum and crude oil. The total values of the exports of petroleum products from the United States for July, 1881, were $4,684,801, and for July, 1880, $3,660,955; for the seven months ended July 31 1881, $24,227,288, and during the same period the preceding year, $17,384,491.

The Governing Committee of the Philadelphia Stock Exchange has decided that hereafter no unlisted mining stocks shall be called or sold in the room of the Mining Annex. This does not, of course, preclude dealings in stocks listed in New York or other exchanges.

The stock of the Mutual Telegraph Company has been listed on the New York Stock Exchange. It is said the amount of stock to be issued may exceed $10,000,000.

The Board of Public Works of Virginia have ordered a surrender to the Richmond and Allegheny Railroad Company of one hundred thousand dollars in bonds held by the board as a pledge, &c., on account of the completion of the main line to Williamson's. There still remains in the hands of the board $50,000 in bonds to be surrendered upon the completion of the Lexington branch. This will be finished about the 15th of October. The contract requires the road to be fully completed in twenty months from its date, which will be on the 4th of November next.

The exports of domestic provisions, tallow and dairy products for August were $10,396,992; for August, 1880, $10,905,319; for the eight months ended August 31, 1881, $93,111,444; same period in 1880, $93,191,665. Exports of provisions and tallow for the ten months ending August 31, 1881, $103,144,914; same period, last year, $96,250,500.

The following quotations of sales of Railway and other securities, for the week, are in addition to those given elsewhere in our columns:

The piers of the railroad bridge of the Pittsburgh and Western (narrow gauge) at Pine Creek have been finished.

Montreal and Sorel Railway.

The Montreal Daily Witness says that the work on the Monfreal and Sorel Railway is being pushed with extraordinary vigor, and that one-third of the grading has already been completed, and then adds:

The first section of fifteen miles from St. Lambert to Varennes is under contract to Messrs. Perrault, Globensky & Co. This firm has one hundred and fifty men and fifty horses at work at present. They expect to double this number next week. They have gangs at work at St. Lambert, Longueuil, Boucherville and Varennes. The second section from Varennes to Contrecœur is under contract to Mr. Z. Perrault. He has over two hundred men employed, and this section of the road being very level, he is making very rapid progress. The last section is being worked by Mr. L. G. J. Fostrooke, of Sorel. On this section there is a very large embankment, which is being constructed by Mr. Lapierre, of Montreal, who has two hundred men and forty horses at work. Between Contrecœur and Sorel Mr. Fosbrooke has 700 men employed, and he is now grading at the rate or nearly a mile a day. It is expected that the whole line will be graded by October 15th, by which time the rails are expected, and the track-laying will be commenced at once. The company hope to run a train through to Sorel before the end of the year.

The Coal Trade.

The leading coal carrying companies make the following reports of their tonnage for the week ending September 10, and for the year to the same date, compared with their respective amounts carried to the same time last year:

	Week.	1881.	1880.
Reading Railroad...	185,350	5,912,021	5,120,098
Schuylkill Canal....	21,378	898,173	302,428
Lehigh Valley.....	120,670	4,277,682	3,344,808
Del., Lack. & Western	89,105	2 858,291	2,275,399
Shamokin Valley....	23,257	733,467	567,230
Central New Jersey.	96,080	2,929,301	2,367,734
United R. R. of New Jersey.....	35,054	1,052,641	747,924
Pennsylvania Coal ..	32,341	912,198	707,842
Delaware and Hudson	78,842	2,413,183	1,972,755
Huntingdon & Broad Top Mt.....	12 775	358,519	307,619
Penn. and New York.	29,523	1,122,439	833,590
Clearfield, Pa.....	45,785	1,656 451	1,104,904

The total tonnage of anthracite coal from all the regions for the week ending Sept. 10, as reported by the several carrying companies, amounted to 604,128 tons, against 655,708 tons in the corresponding week last year, a decrease of 51,580 tons. The total amount of anthracite mined for the year is 18,721,185 tons, against 15,007,057 tons for the same period last year, an increase of 3,714,128 tons. The quantity of bituminous coal sent to market for the week amounted to 91,317 tons, against 99,704 tons in corresponding week last year, a decrease of 8,387 tons. The total amount of bituminous mined for the year is 8,325,366 tons, against 2,901,743 tons for the corresponding period last year an increase of 423,623 tons. The total tonnage of all kinds of coal for the week is 695,445 tons, against 755,412 tons in corresponding week last year, a decrease of 59,967 tons, and the total tonnage for the coal year is 22,046,551 tons, against 17,908,800 tons to same date last year, an increase of 4,137,751 tons. The quantity of coal and coke carried over the Pennsylvania Railroad for the week ending Sept. 10 was 178,615 tons, of which 141,018 tons were coal and 37,597 tons coke. The total tonnage for the year thus far has been 6,200,517 tons, of which 4,524,531 tons were coal and 1,675,986 tons coke. These figures embrace all the coal and coke carried over the road, east and west. The shipments of bituminous coal from the mines of the Cumberland coal region during the week ended Sept. 10 were 43,908 tons, and for the year to that date 1,408,939 tons, a decrease of 43,646 tons as compared with the corresponding period of last year. The coal was carried to tidewater as follows: Baltimore and Ohio Railroad—week 29,075 tons; year, 912,133 tons; increase compared with 1880, 17,675 tons; Chesapeake and Ohio Canal—week, 5,726 tons; year, 308,927 tons; decrease as compared with last year, 91,017 tons. Pennsylvania Railroad—week, 8,910 tons; year, 186,851 tons; increase compared with 1880, 28,667 tons. The Reading Railroad tonnage for last week ending Sept. 17, was 187,000 tons, of which 63,300 tons were sent to and 55,900 tons shipped from Port Richmond, and 12,500 tons sent to and 12,000 tons shipped from Elizabethport.—[Phila. Ledger, Sept. 19.

New York, Lake Erie and Western R. R.

The gross earnings, working expenses and net earnings of the New York, Lake Erie and Western Railroad for the months of July, 1880 and 1881, were as follows:

	1880.	1881.
Gross earnings.....	$1,580,975 83	$1,787,080 59
Working expenses.....	1,014,658 20	1,114,672 89
Net earnings.....	$566,317 88	$672,407 00

—showing an increase in gross earnings of $206,104 71, in working expenses of $100,014 69, and in net earnings of $106,090 02.

From October 1, 1880, to July 31, 1881, the gross earnings, working expenses and net earnings were:

	1879-80.	1880-81.
Gross earnings.....	$15,299,817 86	$17,208,511 09
Working expenses.....	9,657,940 65	11,008,189 87
Net earnings.....	$5,641,877 21	$6,200,321 22

—showing an increase in gross earnings of $1,908,693 23, with an increase in operating expenses of $1,350,249 22, making the increase in net earnings $558,444 01.

Cincinnati Iron Market.

REPORTED BY E. L. HARPER & Co.

Cincinnati, Sept. 20, 1881.

The movement in Pig has increased during the past week and especially for Forge Iron there has been a big demand. Consumption continues very heavy and the movement shows further increase. We quote as follows:

FOUNDRY.

	No.	Mos.
Hanging Rock Charcoal.....	1 26 00@27 00	4
Strong Neutral Coke.....	1 22 50@23 50	4
American Scotch.....	1 20 00@21 50	4

GREY FORGE.

Neutral Coke.....	20 00@21 50	4
Cold Short.....	19 00@20 00	4

CAR WHEEL AND MALLEABLE.

Hanging Rock Cold Blast.....	36 00@38 00	4
" Warm Blast.....	30 00@32 00	4
Lake Superior 1 and 2.....	32 00@33 00	4
Lake Superior 3 to 6.....	34 00@36 00	4
Southern Car Wheel.....	34 00@35 00	4

The new Welland Canal has been successfully opened by the passage of the American steamer D. M. Dickinson. She was towed through from Port Dalhousie to Lock 24 by the tug Harvey Nielson, both vessels being gayly decorated. The average time of lockage was twenty eight minutes.

The first blast furnace west of the Missouri River, which was recently lighted at South Pueblo, Col., is turning out 54 tons of pig iron per day.

The Meadville and Linesville (Penn.) Railroad has been completed, and regular trains commenced running this week.

THE RAILWAY TIMES
AND JOINT-STOCK CHRONICLE.

The *Railway Times* was established in the year 1837, and has consistently maintained the purpose for which it was started—to give an independent account of all matters of importance to railway shareholders, not neglecting, at the same time, the duty of keeping its readers well informed on all matters of commercial interest.

It is published every Saturday. Price 5*d*. The price of subscription for one year is £1 1s.

No. 2 Exeter Street, Strand, W. C., London.

NEW YORK, LAKE ERIE & WESTERN RAILWAY.

TO THE TRAVELING PUBLIC.

During the Centennial Season six months, closing November 10, 1876—the Erie Railway carried almos 3,000,000 passengers, without a single accident to life or limb, or the loss of a piece of baggage.

And for a whole year, the official records of the United States Post-Office Department show the arrivals of Erie Railway trains in New York, on time, to be from 15 to 27 per cent. ahead of competing lines.

Facts well worthy the consideration of travelers.

RAILWAY TRAVEL IN RUSSIA.

IF there is a country in the world for whose special benefit railways may be said to have been invented, that country is decidedly Russia. From St. Petersburg to Moscow the distance is six hundred and four versts, or four hundred and three English miles, and the night train travels over it in fifteen hours, or at the rate of twenty-six miles an hour, not reckoning stoppages, which is considered fair average speed on the Continent. In posting times all that horseflesh by the most strenuous efforts had been made to achieve was the conveyance of the imperial mails between the two cities in five days and five nights, or one hundred and twenty hours, the rate being three and a half miles hourly. The gain in time was, perhaps, greater in this than in any other country; but in no country has that speed, which is after all the only real advantage of railway traveling, been less counteracted by its undeniable drawbacks. In England, for instance, the railways have robbed us of all the charms of the road—the shady park, the breezy common, the crowding villagers, the chaff of driver and hostler, the ingle nook at the wayside inn, the foaming ale of the stirrup cup; in France and Italy, of the sight of the hundred minor towns, with their cathedrals and town halls in the market place, the luscious fruits, the lively faces, the quaint costumes which enlivened us at every stage. We traveled then through the life of the country. All we enjoy now is the blank dead wall of the station, the thronged platform, the piles of luggage, the engine shriek, he stale sandwich, the hurry-skurry, thet sour look of fellow passengers, more thankful for our room than our company, and from station to station two hours' prison, boxed up, locked up at the guard's discretion, the express tearing away deaf to our sufferings or dangers, cooped up with bears or bores, and with the chance of falling in with a Muller or a Lefroy.

In Russia alone railway traveling may be said to have been all gain and no loss. There is no line in either hemisphere that comes up to the comforts an luxuries of the Moscow and St. Petersburg line: roomy and lofty saloon carriages; a wi dow seat, a *fauteuil lit*, a light luggage net for every traveler, a toilet-room at the carriage end; regular halts at convenient intervals, the finest stations, the best supplied and cheapest refreshment-rooms, and loftiest, widest, cleanest platforms to stretch one's legs in; and everything everywhere contrived to protect you from winter cold or summer heat—a great improvement, all this, upon the cramped open sledge, with the thermometer 30 degrees below zero, and the cold creeping in and curdling your blood under your fur coat, cap and boots, the snow and fleet pelting your face, a pack of wolves howling in your rear ready to catch the hindmost, and the motion of the sledge over snow furrows causing you to look up and down in your seat like a log on the waves, with an upset now and then, and "many passengers regularly sea-sick;" yet even all these miseries preferable to summer traveling with the stifling heat and blinding glare of a twenty-two hours' day, and the dust both stifling and blinding, and the jolting that broke every bone in your skin.

The Russian travels fast and with the happy consciousness that neither in town nor country does he leaves anything behind him worth loitering for. Even Murray, who is bound to say something, has but little to tell us about Chudowa Volkhova, Tyer, Klin, and other localities the train stopped at on our route. And as for the country—the panorama is almost everywhere the same dreary flat from end to end, the earth spreading far and wide like a broad dish all around to the horizon, and the blue vault of heaven encompassing it like a dish-cover—the very idea of the universe as man conceived it before Galileo put spectacles on his nose and made him see "more worlds than one."—*Correspondence London Times.*

THE TELEGRAPH IN JAPAN.

THE telegraph was introduced into Japan in 1871, and since that year it has experienced there, as elsewhere, a remarkably rapid growth. At the beginning of last year the Japanese telegraphic system comprised 3,929 miles of line and 9, 345 miles of wire. During last year the total number of telegrams reached 1,272,756, of which about 96 per cent were in Japanese. Including the five submarine cables, the total receipts were £108,323, and the expenditures £101,674. It was the first year when the lines returned an excess of revenue. Operators are trained from among the youths of Japan in a special school recently opened for that purpose. During this year 227 were appointed to positions and 77 still remain under tuition. They are taught to write English and French. For 20 characters in the Japanese language, for a distance of 60 miles, the average rate is about 3 sen, or a little less than 2 cents. This is taking the entire line from Tokio to Nagasaki as a basis. But for shorter distances the rates are higher. From Tokio to Yokohama messages are transmitted for 7 sen, or about 4½ cents. There are 112 offices open for general traffic, besides 70 other connected with the Government, the railways, or the police. About 350 Morse instruments are used and 29 telephones.

THAT the railroad is counted as one of the chief allies of the governments throughout the world is emphatically and curiously shown by the measures just being taken by the Chinese Government for the construction of railroads and the reasons for doing so. In the past, as is well known, a strong prejudice has prevailed in China against railroads. So strong was this prejudice that not long ago the Emperor bought up a railroad that had been constructed by foreign capitalists and had it removed. The recent fears of a Russian invasion, however, have greatly changed the sentiment, the Ministers who had to prepare for war being greatly hindered by the absence of means for the transportation of troops and supplies. The Empire has been convinced that it is defenceless without railroads and telegraphs, and preparations are now under way for the construction both of important railroad and telegraph lines. About a year ago the Emperor or his counsellors gave their sanction for a telegraph between Pekin, Tientsin and Shanghai, which will probably be completed this year, and but little doubt exists that all the great cities of the empire will shortly be united by telegraph. Imperial permission has also been obtained for a railroad from the capital to the

port of Tientsin, a distance of 70 miles, and from there to the river Yang-tze-Kiang, 500 miles further south. The movement is a significant one, as showing the forces which are ever at work compelling antiquated prejudices and unfounded superstitions to yield before the advancement of modern ideas and the demands of progress.

A Family of Inventors—The Brothers Siemens.

It would be difficult to find a family more richly endowed with intellectual power and inventive genius than that of the late Ferdinand Siemens, of Lenthe, near Hanover. The sons of this gentleman numbered eight, of whom five are still living. As eminent engineers, as men of enterprise, they stand in the first rank, and three of the brothers have, through their inventions, attained a world-wide fame.

The eldest brother, Werner Siemens—the "Berlin Siemens," as he is generally designated—was born at Lenthe, near Hanover, in 1816. He received his education at the Gymnasium of Lubeck, from whence he went to Berlin, and entered the Prussian artillery as a volunteer. His eminent talent soon opened to him the doors of the Military School in Berlin; but the theories of velocity and the effects of projectiles seem not to have had much attraction for him, and he turned his attention mainly to practical chemistry and physics. Thus his first invention (1841) was eminently a peaceful one—namely, a new method of gilding and silvering by galvanic deposit. A few years later he constructed, along with his brother William, a new "governor" for steam engines which attracted much attention, and had an extensive application. In 1845 he brought out—also in conjunction with his brother—the well-known process of anastatic printing, which also met with similar success. On the introduction of electric telegraphs, Werner Siemen's name took a prominent place. The conducting wires, being at that time laid under ground, required an insulating covering. For this purpose Werner Siemens employed gutta percha; and the machine constructed by him for covering is even now used in the manufacture of cables. In 1850 he left the army, and with the valuable aid of Mr. Halske, a practical mechanical engineer, founded the far-famed firm of Siemens & Halske. This establishment soon grew to large dimensions, and became one of the chief centres for the application of electricity and magnetism to the industrial arts, while at the same time affording a means of practical training for many young engineers. In 1865 Werner established the pneumatic dispatch system, which his brother William in 1871 introduced into England. Since 1854 Siemens Brothers have had in St. Petersburg a large manufactory for telegraph apparatus, and this business was, till 1869, conducted by Carl Siemens. Werner Siemens is a partner of the London firm of Siemen Brothers; indeed, the three firms of Berlin, London and St. Petersburg are the common property of the brothers Werner, William and Carl. From these three centres issue forth many branch establishments; even in the far Caucasus the brothers possess copper works and oil springs. From this may be gathered the magnitude and importance of their undertakings.

Werner's newest invention is the electric railway, a model of which, exhibited at the late Berlin Industrial Exhibition, gave as much pleasure as it called forth appreciation. Many honors have been conferred on this most fertile inventor.

Here we may now say a few words with regard to Carl Siemens, born 1829. As an inventor he does not come much into the foreground, but the brothers owe much to him for the energy with which he has helped to further the extension of their inventions, more especially in Russia. As formerly in St. Petersburg, so lately in London he conducted the telegraph business with eminently practical results. He has now returned to St. Petersburg, to be at the head of the establishment there.

The London brother, William Siemens, was born at Lenthe, 1823, and he also received his preparatory education at the Gymnasium of Lubeck. His practical work began at the engine works of Count Stolberg. In 1843 it was arranged with his brother Werner that he should visit England, in order to introduce the method of gilding and silvering by galvanic deposit. A year later he returned to England to patent the brothers' joint invention of the differential governor for steam engines. In the same year was brought out the process of anastatic printing, also an invention of the two brothers.

Between the years 1844 and 1847, William Siemens was engaged in railway works, in improving Hoyle's calico printing, and in the invention of his chronometric governor. Several of these governors are in use at the Royal Observatory at Greenwich, for controlling the motion of transit and recording instruments. In 1846 he introduced the double-cylinder air-pump, which even to the present day is extensively used. In 1851 he introduced his celebrated water-meters (beautiful through their simplicity), which are exclusively used in this country and on the Continent. As regards practical importance and economy in fuel, the invention of the regenerative gas furnace, which he worked out in conjunction with his brother Frederick Siemens, may be looked upon as his greatest discovery, and one which should alone secure for the brothers a world-wide reputation. For the laying of submarine cables, William Siemens planned and had built by Messrs. Mitchell, of Newcastle, the well-known steamer Faraday, which has proved itself perfectly adapted for the work. The Indo-European lines, as well as several Atlantic cables, were manufactured at the telegraph works of Siemens Brothers at Woolwich. The most important of these submarine telegraph enterprises was the Direct United States Cable, for which the Faraday was constructed, and with the laying of which Carl Siemens was entrusted.

The fourth of these highly-gifted brothers Frederick—the Dresden Siemens, as he is called—was born in 1827 at Menzendorf, near Lubeck, a large property rented by their father. Frederick, like his brothers, was intended to pass through the classes of the Gymnasium of Lubeck, but having reached the third class, the desire of liberty urged him to abandon his place on the school bench and to go forth into the world. He went on board a merchant ship when scarcely sixteen years of age, and there this youth, whose mental capacities afterward proved so great, had to work as a common sailor. After two years of this seafaring life, his brother Werner tried at Berlin to get him into the Prussian marine service. In the meantime Frederick was allowed to assist in the manifold experiments of his brothers. This chained him with a very different power from that which bound him to the ship, and out of the young sailor there was soon formed a clever, industrious assistant, who was also an originator.

In 1848 Frederick went to England, and continued his practical studies with his brother William. The principal interest was the newly discovered regenerative system, and he was so fortunate as to make this system practical by its application to the ordinary furnaces, where a very high temperature is required. In 1858 Frederick built, in the works of his brothers in Berlin, the first regenerative gas furnace, which was the precursor of the many now employed in Germany, Austria, etc. The second brother, Hans, possessed a large glass manufactory in Dresden, and on his death in 1867 Frederick undertook the management of this establishment, and concentrated his great talents on perfecting the manufacture of glass. His works at Dresden, as regards the quantity exported, may be considered the most important in Germany. He has established three other factories in Bohemia and Saxony, which give employment at present to 2,000 workmen. The application of gas furnaces to glass making was a marked epoch in this branch of industry. Important, also, is his invention of the continuously working glass furnace, in which the materials are inserted, and flow out thoroughly melted and ready for working. A further discovery is a new method of cooling glass quickly, and thus producing "toughened glass." This material will soon compete, for many purposes, with wood and iron. Its power of resistence is extraordinary, and even surpasses that of cast-iron. Frederick has also turned his attention to the possibility of producing a "motor" to perform cheaply and efficiently those small operations in workshops and households which have still to be done by manual labor—such as turning the grindstone, churning butter, driving sewing machines, etc. Although his idea has not yet been realized, his hot water "motor," devised on a new scientific principle, has come near the fulfillment of it, and obtained for him at the Vienna Exhibition of 1873 the medal for progress. The newest invention of Frederick Siemens is known as the regenerative gas-burner, one of the most important improvements in the system of illumination. The effect produced by this gas-burner approaches very nearly that of electric light.—*Cassell Magazine.*

Population of Great Britain.

According to the decennial census, which was taken on the 3d of April last by the agents of the Registrar-General in England, Ireland, Scotland and Wales, the grand total of the inhabitants of the United Kingdom living at midnight on the date mentioned, including the army and navy, and the Channel Islands, was 35,246,562; the excess of females over males was was 738,668. The total increase of population since the census of 1871 has been 3,401,181. The population of England alone is 24,608f391. London has a population of 3,814,571 and Scotland of 3,734,370, so that the population of London exceeds that of Scotland by 80,201. Wales has a population of 1,359,895, the Isle of Man 53,492, the Channel Islands 87,731. The army, navy and merchant service give an aggregate return of 242,844. The population of Ireland, estimated by the retures previously reported, is 5,159,838, as against 5,412,377 in 1871, showing a decrease in the ten years of 252,548.

PRESIDENT BOND, of the Philadelphia and Reading Railroad Company, states that the Board of managers of that company will make a report to the annual meeting of stockholders in January next, covering the history of the corporation for the year. Some statement of the affairs of the Railroad and Coal and Iron Companies may be made prior to that time, but this will depend entirely upon circumstances. Material has been prepared for any publication that may become necessary, but the expediency of making such a review in advance of the annual meeting has not yet appeared.

AMERICAN Railroad Journal. ESTABLISHED 1831.

PUBLISHED WEEKLY BY THE
AMERICAN RAILROAD JOURNAL CO.,
At 23 Liberty Street, New York.

Subscription, per annum, in advance..... $5 00
Foreign Subscription, including postage..... 6 00

Purchases for the AMERICAN RAILROAD JOURNAL Co. are authorized only by the written order of Geo. F. Swain, Treasurer; and the Company will not be responsible for the payment of bills unless accompanied by such order.

Payments for advertising and subscriptions should be made by check payable to order of the Treasurer.

BRANCH OFFICE:
53 Devonshire St., Boston, Mass.

Mr. FREDERIC ALGAR, Nos. 11 and 12 Clements Lane, Lombard Street, London, E. C., England, is the authorized European Agent for the JOURNAL.

New York, Saturday, October 1, 1881.

Entered at the Post Office at New York City as Second-Class Mail Matter.

A RECENT decision in Kentucky goes a little farther in defining the status of telephone companies than any we have yet seen. The leading case (American Union Telegraph Company vs. The Bell Telephone Company) decided that telephone companies could not make contracts to deliver messages to and for a single telegraph company, but must deliver such messages whithersoever their customers ordered. The case we have cited elsewhere extends the rule a little farther by declaring that although a telephone company may exercise *dual* powers and carry on two distinct kinds of business, that it cannot escape its liability to the general public and must be considered as acting in both relations and must act with perfect impartiality toward all its customers.

THE parties who have been particularly urgent in asking Congress for appropriations for improving the Mississippi River have obtained many interesting facts concerning the increase in barge shipments within the past two years. Their figures show that in 1879 there was shipped in this manner 176,511 tons of freight direct from St. Louis to foreign ports, while in 1880 the amount was 453,381 tons. Of bulk grain, the amount of shipments in 1879 was 6,164,838 bushels, and in 1880, 15,762,664 bushels. The question naturally arises, Does a trade which more than doubles its business in a single year appear to be in serious need of assistance from Congress. The figures, however, are interesting, as recalling the fact that notwithstanding the greatly increased facilities of both the water and the land routes during the past two years, both routes have had about all they could handle in the way of grain traffic. The figures are also suggestive on account of representing the enormous amount of business done on the water routes in 1880 without affecting the railroads materially, for, 1880, when this vast amount of grain was going down the Mississippi, was one of the busiest years our railroads have ever known. There will naturally be something of a falling off this year in the shipment of grain, owing to the shrinkage of the crops, and the results upon the land and water routes relatively will be watched with much interest, and doubtless with something of anxiety here and abroad.

CANADIAN DEVELOPMENT.

CANADA'S public debt has been the occasion of considerable apprehension of late among those who seem to have given more thought to the size of the debt than to the importance of the cause for which it has been created. The fact is the indebtedness of Canada now is an indication of an increased interest and a freshly awakened enterprise developed in matters looking to her future growth in commercial and agricultural affairs. The large amount of money invested in the construction of her great Canadian Pacific Railway will prove like seed thrown in the rich but heretofore undeveloped grain-growing section of her great Northwest, while in addition, through this money Canada is reaching out toward our own Minnesota and Dakota grain-fields, and it may not be many years before the current of grain traffic of that section will be strongly attracted towards the Canadian route. Still, the increased productiveness given to the entire Northwest by means of the penetration of this road will doubtless be sufficient to overbalance any falling off of grain carrying that our roads might otherwise experience. Among other Canadian enterprises which have been the means of adding to the debt, but which are to have no small effect upon the carrying trade, are the water highways constructed to connect the lakes with the Atlantic, and the constructing of the railroad from Quebec to Halifax, by which the blockade to winter transportation is largely overcome. In short, Canada's debt is largely the result of enterprise looking directly to an increase in her productiveness and commercial strength, which is being manifested in such a way that our own leading seaport is beginning to realize that Montreal is likely in the future to prove a stronger rival in shipping affairs than she has been accounted in the past.

RECENT ILLUSTRATIONS OF RAILROAD ENTERPRISE AND GENEROSITY.

THE railroads throughout the country have been especially conspicuous, during the past weeks of trouble and anxiety, for enterprising work in measures looking to the relief and comfort of our lamented President and those most nearly related to him, as well as in taking precaution for the safety in travel of the physicians and those Government officials upon whose security has depended so much of our country's stability and freedom from business disturbances in these trying days. There have been many flying trips made by the consulting physicians to the bedside of the President, which, but for the care and untiring devotion of the railroad men having the special trains in charge, would have been fraught with danger, at the rate of speed maintained for long distances.

That wonderful feat of railroading exhibited in the removal of the dying President from Washington to Long Branch, performed with such skill that the sufferer while in the most critical and sensitive condition actually found relief in the trip, will be recorded as a most interesting event in general history, while in railroad history it has already been ranked as the most brilliant illustration of modern enterprise, depth of resources, and advancement in railroad working and skill in railroad management that this age of wonderful achievements has given. The resources of our railroads and their managers were further illustrated in the magnificent accommodations and the perfection of arrangements bestowed upon the funeral trains which bore the illustrious mourning party and our honored dead to Cleveland.

While these great public duties are being performed by the railroads a call comes to them for charitable work, and they are among

the first to come to the relief of the Michigan sufferers by generous offers of free transportation of goods to them. In every emergency of our country since the existence of the railroads, they have been looked upon as a chief reliance for practical aid, and have never been found wanting. When localities have been swept by fire or pestilence the railroads have always hastened to tender speedy relief, and many of the grandest works of assistance which one section of our country has performed for another section in time of suffering have found their strongest basis and stimulant in the fact that the railroads have first offered their important aid.

The railroads penetrating into smitten districts have first made known the wants of the sufferers to others, and then by starting movements for relief have originated striking exhibitions of public charity and sectional sympathy, and in thus acting have played no small part in the grand work of strengthening the unity of our people. Surely the railroad has proved itself the benefactor of the people and the strong support of our Government, in ways that are fresh in the public mind.

Personal.

JONAS H. FRENCH has been elected a Director of the Sonora Railway Company in place of William J. Rotch, resigned.

MR. MASON, with whom Mrs. Garfield and family made their home during their stay in Cleveland, is the attorney of the Lake Shore and Michigan Southern Railway. He has a fine residence on Cleveland's famous Euclid Avenue.

DAVID GRAHAM DRUMMOND OGILVY, Earl of Airlie, Representative Peer of Scotland and Member of Her Majesty's Household, died suddenly of a congestive chill at the Windsor Hotel, Denver, Col., on the 25th ult.

KING ALFONSO, of Spain, presided at the recent inaugural sitting of the American Society, founded at Nancy, France, in 1873, for the promotion of investigations into the antiquities and history of America before and after its discovery by Columbus.

THE Americans attending the Geographical Congress at Venice are Captain George Wheeler, representative of the War Department; Commodore Baldwin, representative of the Navy; Judge Field and Judge Daly, President of the Americal Geographical and Statistical Society.

THE Mexican Central Railway Company has published for the use of subscribers to the company a voluminous document, giving full details of the history of the enterprise, the Massachusetts laws under which the company has been organized, Mexican concessions, in both Spanish and English, and the by-laws of the company. The document states that the cash subscriptions made to the company's securities to date amount to $16,827,500. This was taken under two subscriptions, the first of $5,397,500, 65 per cent of which has been called in, and the second of $11,430,000, 20 per cent of which has been paid to the company.

Organization.

ARTICLES were filed in the County Clerk's office on the 27th ult. incorporating the "Mamie R. Gold and Silver Mining Company" The capital stock is $100,000; the trustees are Louis Kellar, Everard deRenne and Joseph L. Redfern. The operations of the company are to be perform d in Cochise County, Arizona.

THE directors of the Gold and Stock Telegraph Company, elected on the 27th ult, are: Norvin Green, J. O. Green, Tracy R. Edson, James H. Banker, Augustus Schell, Jay Gould, William M. Bliss, D. D. Morgan, John Van Horne, Thomas T. Eckert.

THE Old Dominion Copper Mining Company has increased its number of trustees by adding to the list James Baily, of Utica, and George W. Hughes, of this city.

THE Effingham, Ramsey and St. Louis Railroad Company filed articles of incorporation in the office of the Secretary of State of Illinois on the 27th ult. The proposed railroad is to be constructed from the city of Effingham to or near the place where the Toledo, Cincinnati and St. Louis Railroad crosses the Illinois Central Railroad, or some point on the Toledo, Cincinnati and St Louis Railroad east of said road-crossing not exceeding fifteen miles. The capital stock of the company is $200,000. The incorporators and Board of Directors are: John C. Black, of Danville; Samuel W. Osgood, of Effingham; John W. Funkhouser, of Effingham; E. Pratt Buell saw, and John J. Funkhouser, of Effingham.

A COMPAN yhas been chartere l in this city for the erection of a magnificent casino at the corner of Broadway and Thirty-ninth street, with a capital of $1,000,000, of which $90,000 have already been raised. Among the subscribers are Cyrus W. Field, J. Pierpont Morgan, U. S. Grant, Jr., Chauncey Depew, Robert B. Minturn, H. K. McTwombly and C. L. Tiffany. The edifice is to be 100 by 200 feet, four stories high, with colonnade architecture. The basement will be fitted up as a thoroughly European cafe, and above this the theatre will be situated. A novel feature will be a summer garden, to be constructed directly upon the roof, sixty feet from the ground, and covering the entire area.

Interest and Dividends.

At a meeting of the Directors of the Lake Shore and Michigan Southern Railway Company, held at the Grand Central Depot on the 27th ult., a quarterly dividend of two per cent was declared, payable on the 1st of November to stockholders of record October 1. No statement of the operations of the road for the quarter was made public. The directors of the Michigan Central Railroad Company also met and adopted the following preamble and resolution: Whereas, the expenses of the company during the past quarter of the year have largely increased, while the rates for transportation have been materially reduced; and whereas, the net earnings for the present quarter are less than one per cent and there is no surplus on hand applicable to dividend purposes; therefore resolved, that it is not expedient to declare a dividend for the quarter ending 30th of September instant.

The coupons of the Central Pacific Railroad Company (San Joaquin Valley Branch) and of the Land Bonds, due Oct. 1, will be paid by Fisk & Hatch, 5 Nassau street.

The coupons of the First Mortgage Bonds of the Southern Pacific Railroad Company (of California), due Oct. 1, will be paid at the offices of the company, 9 Nassau and 11 Pine streets.

Manufacturing.

IRON is picking up at all points. The demand for hardware and other articles of advanced manufacture has spread to the raw material. Furnaces are resuming work in Pennsylvania, and steel rail works are being extended. Next year the manufacturers promise to turn out rails for 12,000 miles of road. At present, however, the supply does not equal the demand, and rails are imported under a tariff of $28 per ton.

THE following method for the prevention of the escape of sparks from the chimneys of locomotives has been proposed by Mr. Albert Flocks: A conical tube is fixed centrally within the chimney, with its large end extending down just into the blast-pipe and its small end reaching about half way up the chimney. Above this conical tube is fixed another and shorter tube, in the form of an inverted cone, above the mouth of which there is a metal disc. Part of the exhaust steam which issues from the blast-pipe passes up through the lower conical tube into the upper one, and is deflected by the disc outward and downward into the annular space between the tube and the chimney. Sparks that are carried up the annular space by the exhaust steam from the blast-pipe are met by the counter-current and are thereby extinguished.

C. H. & E. ODELL'S iron circular for September, in speaking of the trade for the past month, and of the present condition of the market, says: "Manufacturers of finished iron have every reason to be satisfied, their works being well supplied with orders at good-paying figures, which, however, are kept low enough to prevent any quantity of foreign iron coming in to compete. The furnaces are not so well off; the old drawbacks of high-priced ore, fuel, and labor not being adequately accounted for at ruling prices. They continue to be well supplied with orders; and concessions, except on large contracts extending over some time, are rarely made. The stock of foreign iron at Atlantic ports is enormously decreased, and the amount remaining, while it would have been considered a large stock in 1878, is really a small one at the rate of consumption in 1881. The stock of old rails and scrap iron particularly is reduced so much that unless the American roads can supply sufficient for the wants of manufacturers, they will have to import from abroad again or use mill iron and muck bar. This, of course, providing the present enormous consumption continues. The foundries generally report plenty of orders, and have lately purchased largely again of Scotch and English pig iron. The advance in ocean freights has restricted this business somewhat, making cost too close to that of domestic iron. If consumers have to pay an advance, they prefer paying a dollar more on American rather than on foreign. The country is evidently consuming very close to the present actual production, if, indeed, it is not exceeding it. There are several indications of this. Manufacturers are fully supplied with orders for some time ahead, the stock here is daily decreasing, and orders for new material and for pig iron have been and are being sent abroad. There is also no stock to speak of at furnace bank, nor in dealers' hands. It is naturally manifest that the country cannot continue to absorb the amount of iron it is now doing; but still the population, both in the natural way and by emigration, is increasing so rapidly, and the area of consumption enlarging so greatly, that the needs of the country in 1881 cannot be gauged by any former experience.

A GOOD name for a locomotive would be Cinderella.

Telephone Companies.

LOUISVILLE CHANCERY COURT.

LOUISVILLE TRANSFER CO. v. AM. DIST. TEL. CO.

A telephone company is governed by the same principles of law as are applicable to common carriers. Its employment is public, and it must treat all the public alike.—ED. CHICAGO LEGAL NEWS.

EDWARDS, Chancellor.—Plaintiff and defendants are corporations doing business in the city of Louisville, under the laws of the State of Kentucky. The principal business of plaintiff is in operating omnibuses and other carriages for transferring persons and baggage to and from hotels, residences, railway stations and steamboat landings, and in transferring persons and property to and from different points in said city.

The principal business of defendant is in managing and operating a telephone exchange, and it has organized as part of its business a system of carriage and coupe service, by which it undertakes to furnish to the public transportation to any part of the city in carriages and coupes.

If there is any equity in the petition, the motion must be overruled.

The real contention between the plaintiff and defendant is confined to their carriage and coupe services; defendant insisting that, as against plaintiff, a rival in that business, it has the right to a monopoly in the use of its own telephonic methods of communicating and receiving orders for coupes; that a mere rival in one branch of its business cannot force it to afford it the facilities which it has provided for another branch of its business.

Upon the facts appearing upon the petition and affidavits of plaintiffs, it is the opinion of the court that defendant is engaged in two distinct employments—one in operating a telephonic exchange, and the other in operating a carriage or coupe service. Plaintiff and defendant are not rivals in the former business, and as to that part of defendant's business, it occupies the same position toward plaintiff as it does toward the rest of the public; that defendant is a *quasi* poblic servant, and, as such, is bound to serve the general public, including plaintiff, on reasonable terms, with impartiality; that defendant is governed by the principles of the law of common carriers; See Bennett v. Dutton, 10 N. H. 581; New England Express Company v. Maine Central R. R. Co. 57 Maine, 188; Sanford v. Railroad Co. 24 Pa. Stat. 381; and McDuffie v. Railroad, 52 N. H. 447; Munn v. Illinois, 4 Otto, 113.

The principles announced in an opinion by Judge Thayer, found in 10 Central Law Journal, page 438, in the American Union Telegraph Co. v. The Bell Telephone Co., should determine this controversy. The mere fact that defendant may possess *qual* powers, and is operating or carrying on two distinct kinds of bvsiness, cannot exempt it from the general rules governing such corporations, with reference to the general public; and, to determine the rights of the plaintiff, defendant must be considered as a telephone Co. and as a transfer Co. See Claxton's Adm. v. Lexington and Big Sandy R. R. Co. 13 Bush. 638. The law must adapt itself to the new subjects that are brought within the range of judicial action. And courts must reason by analogy from things that are settled, in order to establish principles to govern things that are unsettled; 4 American Law Register, new series, page 193. The rule that defendant is bound to serve all the public alike, under like circumstances, is the one applied by the court in this case, and plaintiff is a part of the public, and defendant, as to its telephonic business, is a distinct person from itself as a transfer company, so far as the rights of others are to be determined. The rights of plaintiff do not depend upon contract, but the general principles before stated. Defendant had a right to terminate its contract with plaintiff, but as it holds itself out as the servant of the public, it must act with perfect impartiality towards its customers.

Motion overruled.—*Condensed from the Chicago Legal News.*

Georgia Railroad Legislation.

A bill has lately unanimously passed the Georgia Senate amending the State laws in reference to the powers of the Railroad Commission which was created several years since. The first section of the bill provides that the duty and powers of the commission shall be the same over and in relation to joint rates for freight passing over two or more roads as they now are under said act over and in relation to rates for freight on each separate road. The second section provides that connecting railroads, which are under the management and control, by lease, ownership or otherwise, of one and the same company, corporation, individual or individuals or association of individuals, shall be considered and treated as one and the same road, and the rates of freight upon such roads shall be computed as upon parts of one and the same road; but the said commissioners may and shall have due regard for the terms and circumstances under which such roads are operated, in exercising their powers and performing their duties under this section changes the manner of advertising, the maximum expenditure for which is fixed at $1,500. The fourth section provides that the decision of a majority of the commission shall be as binding as that of the entire body.

The Coal Trade.

The leading coal carrying companies make the following reports of their tonnage for the week ending September 17, and for the year to same date, compared with their respective amounts carried to the same date last year:

	Week.	1881.	1880.
Reading Railroad	189,896	6,101,858	5,326,417
Schuylkill Canal	16,040	414,223	326,947
Lehigh Valley	147,904	4,425,586	3,454,794
Delaware, Lackawanna and Western	89,762	2,948,053	2,367,927
Shamokin	24,433	757,900	589,655
Central R. R. of New Jersey	101,950	3,031,252	2,476,782
United R. R. of New Jersey	37,222	1,089,864	782,176
Pennsylvania Coal	31,672	943,871	746,195
Delaware and Hudson Canal	74,475	2,487,659	2,037,557
Huntingdon and Broad Top Mountain	11,653	370,173	316,387
Penn. and New York	31,813	1,154,242	854,461
Clearfield, Pa	42,009	1,698,460	1,151,557

The total tonnage of anthracite coal from all the regions for the week ending Sept. 17, as reported by the several carrying companies, amounted to 647,200 tons, against 639,394 tons in the corresponding week last year, an increase of 7,806 tons. The total amount of anthracite mined for the year is 19,372,880 tons, against 15,649,451 tons for the same period last year, an increase of 3,723,429 tons. The quantity of bituminous coal sent to market for the week amounted to 86,972 tons, against 104,917 tons in corresponding week last year, a decrease of 17,945 tons. The total amount of bituminous mined for the year is 3,412,338 tons, against 3,006,660 tons for the corresponding period last year, an increase of 405,678 tons.

The total tonnage of all kinds of coal for the weekis 734,172 tons, against 741,311 tons in corresponding week last year, a decrease of 10,139 tons, and the total tonnage for the coal year is 22,785,218, tons, against 18,656,111 tons to same date last year, an increase of 4,129,107 tons. The quantity of coal and coke carried over the Pennsylvania Railroad for the week ending Sept. 17 was 177,438 tons, of which 132,144 tons were coal and 45,294 tons coke. The total tonnage for the year thus far has been 6,377,644 tons, of which 4,656,675 tons were coal and 1,720,969 tons coke. These figures embrace all the coal and coke carried over the road east and west. The shipments of bituminous coal from the mines of the Cumberland coal region during the week ended Sept. 17 were 42,643 tons, and for the year to that date 1,451,582 tons, a decrease of 51,425 tons as compared with the corresponding period of last year. The coal was carried to tidewater as follows: Baltimore and Ohio Railroad—week, 31,745 tons; year, 943,878 tons; increase compared with 1880, 21,151 tons; Chesapeake and Ohio Canal—week, 3,838 tons; year, 312,766 tons; decrease compared with 1880, 108,442 tons. Pennsylvania Railroad—week, 6,985 tons; year, 193,835 tons; increase compared with 1880, 30,762 tons. The coal was brought from the mines as follows: Cumberland and Pennsylvania Railroad—week, 35,275 tons; year, 1,300,211 tons. George's Creek and Cumberland Railroad—week, 5,503 tons; year, 99,896 tons; Baltimore and Ohio Railroad—week, 1,648 tons; year, 47,377 tons. The Reading Railroad tonnage for last week, ending September 24, was 186,500 tons, of which 59,000 tons were sent to and 53,900 tons shipped from Port Richmond, and 12,300 tons sent to and 11,900 tons shipped from Elizabethport.—*Phil. Ledger, Sept.* 26.

Railroad Earnings.

THE earnings of the St. Paul, Minneapolis, and Manitoba Railway for the three weeks ending September 21, 1881, were $342,847.85, against 191,144.91 for the corresponding three weeks in September, 1880, an increase of $151,703.94. For the current year to September 21, 1881, the earnings were $3,093,571.45, against $2,133,815.11 for the corresponding period of the previous year, an increase of $959,756.34.

THE earnings of the Flnt and Pere Marquette Railroad for the week ending September 21, 1881, were $36,280.80, against 34,075.70, for the corresponding week in 1880, an increase of $2,205.10. From January 1 to September 21, 1881, $1,307,114.40; do. 1880, $1,085,472.45—increase, $221,641.95.

THE estimated earnings of the Hannibal and St. Joseph Railroad Company for the third week in September, 1881, were $44,616, and for the corresponding week in 1880, $54,334—decrease, $9,718. From January 1 to September 21, 1881, $1,267,565; corresponding period in 1880, $1,761,949—decrease, $194,384.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An *asterisk* (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "§."

Railway Accidents in Great Britain.

From the report of Mr. Henry G. Calcraft to the English Board of Trade, on the accidents which have occurred on the railways of the United Kingdom during the year 1880, and which was read to both houses of Parliament, we learn that the total number of passenger journeys during the year amounted to 603,884,000, exclusive of 110,000,000 journeys by season ticket-holders, being an increase in the case of the former of 41,000,000 over the preceding year, and representing upward of twenty passenger journeys each for every man, woman, and child in the Kingdom. Out of these 714,000,000 passengers during 1880, only 29 were killed and 904 injured from accidents to trains, being a proportion of one death in about 24,000,000 passengers, and one injury in about 780,000. The total number of persons returned to the Board of Trade as having been killed in the working of the different railways was 1,136, and the number injured 3,958; but the figures we have quoted above refer to passengers killed or injured from accidents to trains when in motion, the remaining fatalities and injuries being due to casualties of various kinds. As things stand, it is evidently safer to travel in a railway carriage than to walk the streets of London, where, as has often been shown, there are more deaths caused by accident or carelessness than on all the lines of railway in the country. In fact, out of the 118 train accidents during 1880, the number in which passengers were killed was only 10; while since 1872 the length of the railway lines has increased by 12 per cent, the miles traveled by the trains 22 per cent, and the passenger journeys 32 per cent.

THE Directors of the Paramore Narrow Guage Railroad met at Little Rock, Ark., on the 27th ult., and consolidated the Missouri and Arkansas lines. The length of the line will be over 1,600 miles, its terminus being the City of Mexico.

A BRIDGE is to be erected on the line of the Bradford branch of the New York, Lake Erie and Western Railroad, across a ravine through which runs Kinzua Creek, that will be 301 feet high and 2,250 feet long. The structure will cost $500,000.

THE report of the Grand Trunk Railway Company of Canada for the half year ending June 30th shows gross receipts amounting to over $1,000,000, and the profits to $358,000. First and second preference stockholders receive dividends at the rate of 5 per cent.

A CORRESPONDENT writing from Concord, N. H., under date Sept. 22d, says that there has been for some time more or less discussion concerning the building of a beach railroad on the New Hampshire coast. One proposition, which has a considerable number of supporters, is for a narrow gauge line from Hampton to Rye. W. S. Hills, of Windham, and others, advocate the construction of a road which should start from the Exeter depot on the Boston and Maine route, proceed to Hampton station on the Eastern, and thence, 2½ miles, to Boar's Head; then turning along the coast to the Rye beaches and beyond, terminating at Portsmouth. There seems to be a general demand for more extensive railway facilities along New Hampshire's Atlantic line.

Anthracite Coal Tonnage.

The following is an official statement of the anthracite coal tonnage for the month of August, compared with the same period last year:

	1880.	1881.
Reading Railroad	470,242	707,819
Lehigh Valley Railroad	368,928	530,606
New Jersey Central Railroad	277,027	367,471
Del., Lack. and Western	280,247	417,957
Delaware and Hudson Canal	183,578	305,638
Pennsylvania Railroad	204,937	200,145
Pennsylvania Coal	81,465	161,125
N. Y., Lake Erie and West. R. R.	29,107	42,783
Total	1,895,515	2,733,547

The following is the statement for the first eight months of the current year, compared with the same period last year:

	1880.	1881.
Reading Railroad	3,494,882	4,272,485
Lehigh Valley Railroad	2,619,546	3,521,043
New Jersey Central Railroad	2,020,051	2,577,516
Del., Lack. and Western	2,118,728	2,748,313
Delaware and Hudson Canal	1,608,838	2,007,681
Pennsylvania Railroad	1,100,022	1,440,586
Pennsylvania Coal	631,009	892,993
N. Y., Lake Erie and West. R. R.	251,354	312,523
Total	13,844,431	17,733,144

The stock of coal on hand at tide-water shipping points, August 31, 1881, was 652,943 tons; on July 31, 1881, 674,716 tons; decrease, 21,773 tons.

Philadelphia and Reading Companies.

The following is the comparative statement of the Philadelphia and Reading Railroad Company and the Philadelphia and Reading Coal and Iron Company for the month of August, 1881 and 1880:

	1881.	
GROSS RECEIPTS.	*Profit for mo.*	*Year to date.*
Railroad traffic	$900,431 74	$5,836,065 81
Canal traffic	64,368 69	239,068 86
Steam colliers	37,404 11	176,327 47
Richmond coal barges	1,558 05	297 50
Total Railroad Co.	$1,003,762 59	$6,251,759 64
Reading Coal & Iron Co.	151,503 06	683,098 50
Total of all	$1,155,265 65	$6,934,858 14
TONNAGE & PASSENGERS.	*Month.*	*Year to date.*
Tons of coal on railroad	818,890.06	5,647,080.10
Tons of merchandise	665,203.06	4,789,830.05
Passengers carried	1,043,413	7,625,501
Coal transp by stm colliers	56,039.00	410,104.00
TONS OF COAL MINED.		
By Coal and Iron Company	434,643.02	2,679,640.08
By tenants	142,229.00	1,051,224.01
Tons mined from lands owned and controlled by Co. and from leasehold estates	576,872.02	3,730,864.15

	1880.	
GROSS RECEIPTS.	*Profit for mo.*	*Year to date.*
Railroad traffic	$740,900 92	$5,248,366 78
Canal traffic	32,927 67	157,373 97
Steam colliers	14,252 23	139,050 34
Richmond coal barges	11,442 48	1,526 30
Total Railroad Co.	$786,638 34	$5,546,317 39
Reading Coal & Iron Co.	73,309 98	14,233 66
Total of all	$859,948 32	$5,560,551 05
TONNAGE & PASSENGERS.	*Month.*	*Year to date.*
Tons of coal on railroad	557,614.08	4,785,760.04
Tons of merchandise	483,571.06	4,403,360.19
Passengers carried	500,147	7,125,556
Coal transp by stm colliers	54,752.00	408,692.00
TONS OF COAL MINED.		
By Coal and Iron Company	244,335.12	2,265,788.01
By tenants	105,311.07	799,663.17
Total mined from lands owned and controlled by Co. and from leasehold estates	349,646.17	3,065,451.18

Total of both companies for month of August, 1881: Gross receipts, $3,522,426 07; gross expenses, $2,367,160 42; profit, $1,155,265 65.

THE Pittsburg and Western and the Youngstown and State Line Railroads have been consolidated.

AMERICAN RAILROAD JOURNAL.

Financial and Commercial Review.

THURSDAY EVENING, Sept. 29, 1881.

The quotation for call loans in the money market this morning was 5 and 6 per cent. Time loans were 6 per cent on stocks and 1 and 1½ per cent lower on Government bonds. Prime mercantile paper was 5½ and 6½ per cent. In the afternoon the quotation for call loans at the Stock Exchange was 6 per cent; but in the last hour the rate fell to 4 and 5 per cent.

The posted rates for prime bankers' sterling were 4.80¼ and 4.84; the actual rates were 4.79¾ and 4.80 and 4.83¾ and ¼. Cable transfers were 4 83¾ and 4.84¼, and prime commercial bills were 4.78 and ¼. The actual rates for Continental exchange are as follows: francs, 5.26¼ and 5.22½; marks, 93¾ and 94½, and guilders, 39⅝ and 39¾.

The Governors of the New York Stock Exchange have admitted to dealings at the Board the following securities:

Louisville and Nashville Railroad Company—$1,500,000 six per cent. bonds of the Lebanon and Knoxville Branch, dated March 1, 1881, and due March 1, 1931, numbered 1 to 1,500, inclusive, for $1,000 each, and secured by mortgage to the Central Trust Company of this city, on 172 miles of road.

St. Paul and Duluth Railroad Company—$1,000,000 first mortgage five per cen coupon bonds, Nos. 1 to 1,000, inclusive, ror $1 000 each, the whole representing $1,000,000, dated Aug. 1, 1881, and payable Aug. 1, 1931. These bonds are secured by a mortgage to the Central Trust Company on the St, Paul and Duluth

Railway. Interest is due on Feb. 1 and Aug. 1, and the bonds may be registered at the option of the holders.

Pittsburg, Bradford and Buffalo Railroad—$500,000 first mortgage gold six per cent bonds, dated March 17, 1881, and due April 1, 1911. These bonds are of the denomination of $1,000, and pay interest at the rate of six per cent., the coupons being due April 1 and Oct. 1. Eight hundred of them have been issued, but only those numbered from 1 to 500, inclusive, have been listed.

Carolina Central Railroad Company—$2,000,000 first mortgage six per cent bonds, Nos. 1 to 2,000, inclusive, dated Feb. 1, 1881, and payable July 1, 1920. These bonds are of the denomination of $1,000 each, and bear interest at six per cent, payable in January and July. Of these bonds $1,800,000 were issued under the agreement of reorganization, and the remainder, $200,000, reserved for construction of new road, additional equipment, or other income producing property, and for no other purpose.

Northwestern Telegraph Company—$1,250,000 seven per cent bonds, dated June 1, 1874, and payable January 1, 1894; also, 50,000 shares of the capital stock, $50 each ($2,500,000). The bonds are numbered from 1 to 2,500, inclusive, and are for $500 each. This is a Wisconsin corporation which owns 8,000 mile of line and 15,000 miles of wire, and is operated by the Western Union Telegraph Company under a lease. By the terms of the lease the latter company pays the interest on the bonds, and guarantees the payment of dividends on the stock as follows: Four per cent per annum for the first year, four and one quarter for the second year, and an increase thereon of one-eighth of one per cent for each succeeding year so as to reach six per cent per annum for the sixteenth year, and continue thereafter at the rate of six per cent per annum during the term of the contract, such payments to be made on the first days of January and July in each year, commencing January 1, 1882. It is also stipulated that whenever, and as often as requested by the owner and holder of this stock, the Western Union Telegraph Company will indorse on the certificates an agreement to pay such proportion of the annual sum above stated as belongs to the amount of stock contained in the certificate.

International and Great Northern Railroad Company—additional $450,000 first mortgage bonds, making total amount of first mortgage bonds "listed" $7,154,000, and $6,234,000 six per cent coupon bonds due September 1, 1909, to be issued in exchange for assented second mortgage income bonds that were listed June 4, 1881.

Atlantic and Pacific Railroad Company, Western Division—$5,000,000 first mortgage six per cent coupon gold bonds of $1,000 each, and $3,750,000 income bonds with interest attached, in denominations of $50, $100, $500 and $1,000.

Sterling Mountain Railway Company—$476,000 income (not exceeding seven per cent) bonds, interest payable February 1 each year, numbered from 1 to 476, of the denomination of $1,000 each, dated May 2, 1881, and due July 7, 1895; issued to take up the same amount of unengraved bonds dated July 7, 1864. These bonds are indorsed or guaranteed by the Sterling Iron and Railway Company.

Kentucky Central Railroad Company, $5,500,000 capital stock, embracing 55,000 shares at $100 each; and $4,500,000 mortgage bonds. The bonds are numbered from 1 to 4,500, are of the denomination of $1,000 each, and bear interest at six per cent, payable semi-annually. They are dated July 1, 1881, and due July 1, 1911, with the option on the part of the company to pay them in five years.

Evansville and Terre Haute Railroad Company—$3,000,000 capital stock, in 60,000 shares of $50 each; and $3,500,000 first consolidated mortgage bonds. The bonds are numbered from 1 to 3,500, of the denomination of $1,000 each, and bear interest at six per cent in gold. They are dated July 30, 1881, and mature July 1, 1921.

The Illinois Central Railroad Company has appointed the National Park Bank of New York registrar of its stock.

The following circular, calling in for redemption on the 24th of December next contain bonds of the loan of July 17 and August 5, 1881—continuous at 3 per cent from July 1, 1881—was issued from the Treasury Department at Washington on the 24th ult:

By virtue of the authority conferred by law upon the Secretary of the Treasury, notice is hereby given that the principal and accrued interest of the bonds herein below designated will be paid at the Treasury of the United States in the City of Washington, D. C., on the 24th day of December, 1881, and that the interest on said bonds will cease on thpt day, viz:

Registered bonds of the Acts of July 17 and August 5, 1861, continued during the pleasure of the Government under the terms of Circular No. 42, dated April 11, 1881, to bear interest at the rate of 3½ per cent per annum from July 1, 1881, as follows: $50—No. 1,749 to No. 1,810, both inclusive; $100—No. 12,431 to No. 12,700, both inclusive; $500—No. 9,005 to No. 9,220, both inclusive; $1,000—No. 44,573 to No. 45,720, both inclusive; $5,000—No. 15,311 to No. 15,300, both inclusive; $10,000—No. 25,790 to No. 27,860, both inclusive; total, $20,000,000.

Many of the bonds originally included in the above numbers have been transferred and canceled, leaving outstanding the amount above stated. Parties transmitting bonds for redemption should address to the "Secretary of the Treasury, Loan Division, Washington, D. C." and all the bonds called by this circular should be assigned to the Secretary of the Treasury for redemption.

Where checks in payment are desired in favor of any one but the payee the bonds should be assigned to "The Secretary of the Treasury for redemption for account of———(here insert the name of the person or persons to whose order the check should be made payable."

The following circular for redemption of the United States three and one-half per cent bonds has also been issued:

Notice is hereby given that duting the weeks ending October 1, 8, 15, 22 and 29, 1881, the Department will redeem at the office of the Assistant Treasurer of the United States, at New York, paying par and interest accrued to the date of redemption, any of the United States bonds continued to bear interest at three and one-half per centum per annum, called or uncalled, to an amount not exceeding two millions of dollars (2,000,000) in each week.

All the bonds specified in the above call are sixes extended at three and a half per cent interest, and, as we learn from Washington, it is the intention of the Secretary of the Treasury to continue the purchase of bonds as the state of the finances may warrant, and to call in all the extended sixes before beginning upon the fives. Of the sixes there are now outstanding and bearing interest three and a half per cent $178,000,000. The present call will reduce this amount to $158,000,000, with a still further reduction depending upon the proportion of uncalled sixes which may be included in the weekly $2,900,000 purchases. The reason given for the purchase of these bonds is that the Government can obtain them upon better terms than any other bonds, and prefers to let the banks pay the premium upon the four and a half per cents, rather than that the Treasury should do so.

It will be noticed that the above call for bonds embraces only those originally issued under acts of July 18 and August 5, 1861, and does not include any of the bonds issued under the act of March 3, 1863—though they may be of corresponding numbers.

The first $2,000,000 of the extended six per cent bonds which the Secretary of the Treasury offered to purchase for the week ending October 1st have been supplied by Messrs. Fisk & Hatch at par and accrued interest—equal to 100⅜.

THE Sewanee Coal Company, lately organized at Nashville, Tenn., is the third company of this kind that has been organized in the past three months to work the Southern coal and iron fields, the others being the Birmingham Coal, Coke and Iron Company of Alabama and the Rising Fawn Company of Georgia. All these enterprises have a large capital to back them, the Sewanee having $225,000, the Rising Fawn $255,000 and the Birmingham Company $2,000,000. Besides these another corporation, the Bethlehem Steel Works, of Pennsylvania, proposes to invest $800 000 at Birmingham in works for the manufacture of Bessemer steel.

THE Dedham (Mass.) *Transcript* says that surveys are now being made for a proposed new railroad through the country lying between the Woonsocket branch of the New York and New England Railroad and the Providence Railroad. The line now being surveyed starts from Dedham, running through the northerly part of Brookline, near Jamaica Pond and Brook Farm. Near the line between Newton and West Roxbury it crosses the Charles River into Needham, over what is called the Broad Meadows, passing up the valley of the Charles for some distance. It will thus run through Dover and Medfield, connecting at the latter point with the Mansfield and Framingham Railroad. Whether or not the survey will extend beyond Medfield, future movements of the surveyors will reveal.

Dividend Notices.

COUPONS OF THE CENTRAL PACIFIC RAILROAD Company (San Joaquin Valley Branch) and of the LAND BONDS, due October 1, 1881, will be paid at the Banking House of FISK & HATCH, No. 5 Nassau street, New York.

C. P. Huntington, *Vice-President.*

COUPONS OF THE FIRST MORTGAGE BONDS OF the SOUTHERN PACIFIC RAILROAD COMPANY (of California), due October 1, 1881, will be paid at the office of the Company, Nos. 9 Nassau and 11 Pine sts., New York.

C. P. HUNTINGTON.

THE LAKE SHORE AND MICHIGAN SOUTHERN RAILWAY COMPANY,
TREASURER'S OFFICE, GRAND CENTRAL DEPOT,
NEW YORK, September 27, 1881.

The Board of Directors of this Company have this day declared a quarterly dividend of TWO Per Cent upon its capital stock, payable on TUESDAY, the first day of November next, at this office. The transfer books will be closed at 3 o'clock, P. M., on Saturday, the first day of October next, and will be reopened on the morning of Friday, the fourth day of November next.

E. D. WORCESTER, *Treasurer.*

THE RAILWAY TIMES
AND JOINT-STOCK CHRONICLE.

The *Railway Times* was established in the year 1837, and has consistently maintained the purpose for which it was started—to give an independent account of all matters of importance to railway shareholders, not neglecting, at the same time, the duty of keeping its readers well informed on all matters of commercial interest.

It is published every Saturday. Price 5*d*. The price of subscription for one year is £1 1*s*.

No. 2 Exeter Street, Strand, W. C., London.

NEW YORK, LAKE ERIE & WESTERN RAILWAY.

TO THE TRAVELING PUBLIC.

During the Centennial Season six months, closing November 10, 1876—the Erie Railway carried almos 3,000,000 passengers, without a single accident to life or limb, or the loss of a piece of baggage.

And for a whole year, the official records of the United States Post-Office Department show the arrivals of Erie Railway trains in New York, on time, to be from 15 to 27 per cent. ahead of competing lines.

Facts well worthy the consideration of travelers.

E. S. BOWEN, General Superintendent. JNO N. ABBOTT, General Passenger Agent

Superheated Steam for Marine Engines and Locomotives.

Prepared for the American Railroad Journal by Prof. [S. N. Carvalho.]

The vast and continuous increase in the use of steam for motive purposes, particularly during the last twenty years, and the consequent enormous consumption of coal (85,000,000 of ~~pounds~~ per annum) have furnished an incentive to inventors in this direction second to no other of modern times. The well understood fact that the most economical form of steam engine yet devised—considering the boiler and engine as a whole—renders us in useful energy but about 15 per cent of the true energetic value of the fuel consumed therein, present, the considerations of any improvement that may transmute into useful power some greater proportion of the heat evolved by the combustion of fuel, as the most important problem of the present day.

Superheated steam has been demonstrated by the most distinguished engineers, from Watt down to the present day, as the best means of preventing "cylinder condensation," to which has been attributed the true cause for the enormous loss sustained in the use of the steam-engine by the present method of using saturated steam. The way this loss occurs is exemplified as follows: With a cylinder in which steam at halfstroke or 50 per cent cut off is used—say at any pressure—imagine the steam admitted until the piston reaches half stroke, the boiler communication closed, and the steam allowed to expand through the rest of the stroke, the exhaust opened, and the piston returned—then upon the steam coming in on the next stroke, we should expect to find the internal surfaces in the same condition as they were at first. But experiments and all experience have shown us, that in the operations which have gone on during the first stroke, the internal surfaces have become chilled to a certain extent, and that a considerable portion of the steam entering is condensed by them, and converted into water. This fact has been shown by "Isherwood in his experiments, made with great care and expense, and the result has been found to be nearly thirty-nine per cent loss, at half cut off—and the best engineers now estimate that about one-third of the fuel is wasted in this way. The only known remedy for the prevention of cylinder condensation" is the proper use of superheated steam, by which one-third of 85 millions would be about twenty-seven millions of tons of coal per annum, amounting to nearly $100,000,000 per annum.

Let us give an example of the manner in which superheated steam acts in the cylinder. Firstly—it follows a different law from saturated steam; it is governed by Marrotte's Law of gases and air. You can by the addition of 480 deg. of heat to the steam in a separate vessel, or superheated, double its volume and also its pressure, if it were attempted to raise steam in a boiler to 692 deg. it would have to be strong enough to stand pressure of 2500 lb. to the square inch. Superheated steam is the safest and most economical method of using steam.

One lb. of water heated in a boiler to 212 deg. is by the addition of 966 units of heat converted into 1720 volumes of steam at atmosphere pressure. The 1720 volumes may be taken as the measure of the available mechanical force—the 966 units of heat are worth 1720 volumes of steam. Now if these 1720 volumes of steam at 212 deg. be raised 480 deg. higher or to 692 deg. you will have 3,440 volumes of steam at *double the pressure*, or 15 lb. to square inch. The 480 deg. used upon the steam has given you the same quantity as 966 units used upon the water.

How much heat is required to raise 1 lb. of steam 480 deg? The specific heat of water is 1,000—the specific heat of steam is 0.475. or a unit of heat will raise 1 lb. of water 1 deg.—and 1 lb. of steam 2 deg. But in our case, suppose the steam was raised 480 deg., and now it is evident at a cost of 240 units of heat, the 240 units of heat used in superheating have done the work of 966 units used upon water; heat goes *four times further* on steam than it does on water,—if the heat costs the same as when used upon water,—the clear gain is 25 per cent.

The primary causes of cylinder condensation are, external and internal radiation of the metallic surface;—conversion of heat units into work—and conversion of heat into work done during the first rush of the steam from the cylinder after the opening of the exhaust. A further economic effect is produced by the great increase of volume of steam caused by the addition of superheat. If 400 deg. is required in the cylinder (which it is perfectly safe to use) at one half cut off, it would be necessary to have your steam in the superheater at about 596 deg., so that having it expanded down to 400 deg. at the half cut off, you not only suppress entirely cylinder condensation —with its enormous save—but you increase your power about one-sixth.

The modus operandi of superheated steam in the cylinder is this. All superheat is given off *before condensation commences*—the moment the superheated steam enters the cylinder the superheat is absorbed by the metallic surfaces. The piston is now propelled—with steam less the superheat —to the point of cut off. When a portion of the steam is converted into work—and the balance expanded into the remaining half of the cylinder—now the superheat absorbed by the metallic surfaces (upon the principle that all things in nature seek their equilibrium) gives out its superheat to the devitalized steam;—revivifies it to a condition to enable it to perform the other half stroke; and the exhaust, is then discharged at saturation. Steam used in this way makes the modern steam engine the most perfect in the world —it enables the maker to exhibit it as a real steam engine and not one working half water.

Relieving the Money Market.

The country will have reason to be thankful if the day ever comes when the Treasury Department of the United States will give up its charge of affairs in Wall street. We do not think it is one of the functions of the Government to "relieve the money market" every time there is sufficient demand for capital to put up the rate of interest. The natural laws which regulate the market value of any commodity are written with a Divine finger upon the nature of things, and they will work beneficently if human government will not undertake to limit, restrain or repeal them.

Money has been too cheap throughout the year for the common good. It has been difficult to invest capital at profitable rates in first class securities, and the supply has been beyond the need of ordinary trade. This has led to the most reckless speculations in enterprises that have no reasonable prospect of success. More than one hundred million dollars have been put into new projects that would have attracted no attention but for the superabundance of money.

The periodical demand for available funds at the opening of the fall trade found much of the capital which is usually ready to answer it loaned upon these visionary securities. The rate of interest was therefore advanced to the legal standard, and 6 per cent was easily obtained for the accommodation. If it had gone

higher, and there had been a little pinch in the street, so that only the most desirable securities could obtain the needed help, the effect would have been most excellent. The wild-cat projects would have been compelled to let go their hold on the capital lent to them upon call, and legitimate trade would have been greatly benefitted.

The collapse of a great variety of these schemes must come sooner or later, and better now, when the shock would create no panic, and before they have absorbed any more of the money that will be hopelessly sunk in their bottomless maw.

The clamor for Government help every time there is the least pressure in the money market leads to the establishment of most dangerous precedents. The answer of the Department in disbursing a portion of its surplus in payment of bonds is already deemed insufficient, and not a few of the needy are urging, as a more effectual remedy, that the entire Treasury balance shall be loaned to the banks for the use of borrowers. In short, that the sub-treasury system shall give place once more to the old pet bank scheme, with all its train of certain bankruptcies.

One of the objects of the independent treasury was to use its accumulations as a natural check upon over-importation. An excessive foreign trade piled up the customs in the Treasury vaults, and this, like the governor on the steam engine, regulated the pace and brought the importations within safer limits.

The hand of authority is an unsafe guide to commercial affairs, even when employed with the utmost human wisdom. The laws of trade have a better executive, and are wholly honest and unpartisan in their natural outworking. Once let it be understood that the Government shall have supreme rule in the channels of commerce, regulating the supply of currency at its will, and we shall have established a partial tyrant whose oppressions will soon know no bounds. A State Church may be tolerated, although it is the prolific mother of a brood of very sore evils, and a hard rule for a tender conscience ; but a State monopoly of the right to regulate the money market will soon rest like a heavy nightmare on all proper enterprise, and crush out the life of legitimate trade. —*Journal of Commerce.*

Mortgage by Railroad Company of After-Acquired Property.

MISSISSIPPI SUPREME COURT, APRIL, 1881.

MISSISSIPPI VALLEY RAILWAY CO. v. CHICAGO, ST. LOUIS AND NEW ORLEANS RAILWAY CO.

A mortgage given by a railroad company upon all its property and franchises, including "all its present real and personal estate and franchises now owned, or hereafter to be acquired, without any exception or reservation," held, to include only such after-acquired property as was appurtenant to and necessary for building and operating the road and carrying out the purposes for which it was created. A hotel, vacant town lots and three hundred acres of farming land acquired by the company after the mortgage was made, not used in connection with the railroad or its business, held, not included in such mortgage.

CHALMERS, C. J. This is an action of ejectment in which plaintiff claims title by virtue of an extension sale under a judgment against the former owner of the property, and defendant claims under a mortgage executed by the same owner. The mortgage was prior in date to the judgment, and if operative on the property here involved, takes precedence to it. The property was not owned by the mortgagor (The New Orleans, Jackson and Northern Railroad Co.) at the date of the mortgage, but it is claimed that it passed as after-acquired property by virtue of the terms of the instrument.

Whether it did so pass is the question presented. The granting clause of the mortgage conveys, or attempts to convey, all the property of the railroad then owned or subsequently acquired, in these words: "All of its right of way, lands, property, franchises, rights and appurtenances, and also all the buildings, structures and improvements thereon, and all and singular the cars, locomotives, engines, warehouses, depots, machine shops and machinery, fixtures, utensils and effects of every kind, nature and description whatever in use upon said railroad way, or in any wise attached or appurtenant to the same, intending hereby to include all its present real and personal estate and franchises, now owned or hereafter to be acquired, without any exception or reservation whatever." Are the words "intending hereby to include all its present real and personal estate and franchises, now owned or hereafter to be acquired, without any exception or reservation" sufficiently definite and inscriptive to pass the after-acquired property of the corporation? Certainly they are broad and comprehensive enough; but are they not too much so? That a natural person or a corporation may mortgage property to be subsequently acquired is now too well settled to require elucidation or citation of authorities. But neither by one nor the other can this be accomplished, by words of a character so vague and general as to afford to creditors and subsequent purchasers no notice whatever of the property to be embraced. A very different rule obtains where future acquisitions are attempted to be mortgaged, from that which exists with reference to property then owned by the grantor. A man or a corporation may well mortgage "all its property then owned" without further words of description, because the fact of present ownership serves as an indicator to point to and identify the property. But neither a man nor a corporation by general terms only can mortgage, so far as subsequent purchasers and creditors are concerned, everything that it may thereafter acquire through all time ; for this would be a mere pledge of its capacity of acquisition, and would afford no sort of indication of what was to pass under the instrument. A deed "of all my estate," or "all my property," is good. *Wilson v. Boyce*, 92 U. S. 320. But a deed "of all the estate that I may hereafter acquire" is a nulity, and while a court of equity might perhaps enforce a mortgage of such a character as between the parties after the acquisition of the property, it would be utterly void as to third persons.

A distinction is made by some of the authorities between mortgages of future acquisitions executed by railroad companies, and similar instruments made by natural persons. It is said that a mortgage of a railroad and its future property will carry all after-acquired property appurtenant to and necessary for building and operating the road, and carrying out the purposes for which it was created; while a similar instrument will be inoperative if executed by a private person. This is true, if the mortgage executed by the private person is upon a specified piece of property without reference to any accretion or addition to it ; because there can be no accretions of property appurtenant to the person of the mortgagor ; but it is untrue, if the individual has mortgaged his business and the property there appurtenant to, or afterward to grow out of and be added by accretion to the particular business that is pledged. Thus, a natural person equally with a corporation can execute a valid mortgage of a ship and the profits of its voyage, or of a factory and the machinery then in it and be placed in it, or of a farm and the products to be produced upon it, or of a flock of sheep and its natural increase and future grown wool. And so a railroad company can execute, in general terms, a valid mortgage of its road-bed and franchises, and all of its real and personal property then owned or thereafter acquired; provided, the future acquisitions be such as belong naturally to the business of constructing and maintaining the road and its primary end as a common carrier of passengers and freights. The things which may be deemed essential or useful, and therefore appurtenant to the great work of building and operating a railroad, will frequently be more extensive and varied in their character, than those which can properly be regarded as accretions to the business of a private person; but the principle is the same, and where the facts concur, the law must be the same as to both. The mortgage in the present case would be clearly void as to after-acquired property, for uncertainty of description, if it had been executed by a private person, without reference to some enterprise, undertaking or venture as to which the future property could be deemed an accretion. It is equally so when executed by a railroad company, if the property to which it is sought to apply it was not appurtenant to the business of the company. When property is to be deemed appurtenant to a railroad enterprise, is discussed in many cases, a few of which we cite. Mobile, etc., R. Co. v. Mosely, 52 Miss. 127; 12 Wise, 649; 25 Barb. 284 ; 47 Penn. St. 465; 24 Ohio St. 28 ; 22 N. Y. 494. In Pierce v. Emery, 32 N. H. 484, it was held that after-acquired property, where appurtenant, would pass by a mortgage of a railroad and its business, although there was no provision as to future property. This doctrine is denied, and we think properly, by the better considered cases.

The property involved here does not fall within any well-considered definition of the term appurtenant, nor can it possibly be regarded as either necessary or legitimate to the business of a railroad corporation. It consisted of a hotel, a brick storehouse, some vacant town lots and a farm of three hundred acres. The hotel was not used as a railroad eating-house, there being no station-house or depot at the town, but seems to have been used as an ordinary hotel for the entertainment of guests. The other property was rented out for the several purposes for which it was adapted. It was used for these purposes by its former owners, before its acquisition by the railroad company, and continued to be so used after that acquisition. It was applied to no new use, and except that after its acquisition the several tenants occupying it paid rents to the railroad company, it served no beneficial purpose whatever to the railroad. Clearly, it was not appurtenant to it.

Under these circumstances, as the property was not embraced in the mortgage, the purchaser at the execution sale got a good title.

Judgment reversed, and judgment here on the agreed state of facts for plaintiffs.—*From The Albany Law Journal.*

BRANCH OFFICE:
53 Devonshire St., Boston, Mass.

Mr. FREDERIC ALGAR, Nos. 11 and 12 Clements Lane, Lombard Street, London, E. C., England, is the authorized European Agent for the JOURNAL.

New York, Saturday, October 8, 1881.

Entered at the Post Office at New York City as Second-Class Mail Matter.

THE opening of the great cotton exhibition at Atlanta, Ga., Wednesday, is a notable event indeed in the industrial history of the South. It marks a new era in Southern affairs, and is a strong indication of awakening enterprise in agricultural, manufacturing and commercial interests in that section. The original plans of the exhibition were expanded to such an extent that the perfected arrangements cover a broad field of much more than local importance, and this expansion is in keeping with the broadening spirit of the New South.

A RECENT opinion of the Supreme Court of Mississippi decides that a mortgage given by a railroad company upon all its property and franchises will not hold after-acquired property, except so much as is appurtenant to and necessary for building and operating the road, although the mortgage includes "all its present real and personal property and franchises now owned or hereafter to be acquired, without any exception or reservation." The decision rests upon the ground that neither a man nor a corporation can mortgage, so far as subsequent creditors are concerned, everything that it may acquire through all time. The manner in which a railroad mortgage is drawn is of the greatest importance to the bondholders interested in it. The doctrine, advanced by one or two States, that after-acquired property, where appurtenant, would pass by a mortgage of a railroad and its business, though not provided for in the mortgage, finds no favor in most of our courts, and the tendency is to a closer construction of such conveyances.

AMERICAN ENTERPRISES IN MEXICO.

THE railroad enterprises which are being so vigorously pushed in Mexico, while they promise fair results in the perhaps not far distant future, will find at the outset much to retard and discourage their work of development in the deplorable state of commercial and agricultural affairs that has fastenened itself upon that country through the instability of its government in the past, and the natural apathy and lack of progressive ideas in its people. Recent Mexican consular reports certainly do not indicate a field to be easily worked, or in which may be expected an eager or speedy adoption of measures which American capital is doing so much to introduce, in the interests of trade and transportation.

Concerning the condition of the import trade, the consul at La Paz writes, that, while the government, about fifteen years ago, built a very good wharf at that port, it has since refused to allow wharfage to be collected and has not furnished funds for repairs. The wharf has recently broken down and become useless, and as the prospects of its ever being rebuilt are slender, the result will probably be that the only facilities afforded vessels for the discharge of cargoes will hereafter be limited, to the old-time lighters. Trade at that port has diminished rapidly of late years. About a year ago it was stated that no foreign vessel had entered La Paz in a period of four months, excepting the monthly mail steamer, and foreign trade was considered virtually at an end. Last April the consul wrote that the duties imposed had placed meats beyond the reach of the people, and that flour was selling at ten cents a pound, sugar twenty to twenty-five, and butter fifty to seventy-five cents. This decay of trade and the exorbitant prices prevailing, with their crippling effect upon local business generally, are attributed to the enormous tariff, its obnoxious regulations and the alleged unjust penalties enforced for any violations of the peculiar rules; among the recent laws being one exposing the importer to imprisonment as well as heavy fines.

A commercial increase is shown by reports from the consul at Vera Cruz for that locality, but there is something sarcastically and almost ominously suggestive in his explanation of this state of trade, which he attributes "to the long period of peace the country has enjoyed, it being almost three years." The ominous feature of the explanation is fortunately relieved by the present unusual indications of a longer continuance of peace than Mexico has enjoyed in the long past. In this fact is found one of the most promising inducements offered for the lavish application that is being made of foreign capital to Mexican enterprises, or rather to American enterprises being started in Mexico.

The Mexican agricultural resources, while of great wealth, are hidden away under years of unfortunate neglect and want of ability or inclination on the part of the natives for their development, and a speedy change from these conditions can hardly be expected, though it remains to be seen how long it will take American enterprise to overcome the influence of prejudice and antiquated customs in this respect. The agricultural implements used, as described by our consul at Vera Cruz, are of the rudest and most primitive kind, and the efforts that have been made in the past to modernize them have thus far met only with signal failure. As an illustration, it is mentioned that a Vera Cruz hardware firm have had an American plow on sale for years without a purchaser, and that probably no native could be found to take it as a gift under an agreement to use it.

Such facts as these concerning the condition of trade, agriculture and the people, are certainly not of a character to stimulate enthusiasm as to the immediate returns to be realized from work underway there, and it will be well enough for American tradesmen not to be over sanguine or too venturesome in efforts to place their goods in the Mexican market until the way has been opened for them by the projected railroads. It must be admitted, too, that apparently unwarranted expectations have been created among investors as to the future of some of the many proposed railroads in Mexico. Before turning capital with undue haste in this direction it will be the part of wisdom to give a more careful study to the natural influences that must affect these enterprises. The customs of the

people may be changed by the introduction of American ideas, but the climate which enervates the natives will operate quite as adversely upon foreigners. A proper estimate of the results to be obtained by this vast work of railroad construction cannot be made until it has been fully demonstrated, as it has not yet been, to what extent American energy and enterprise will withstand the natural influences of that section when transplanted there, or to what extent it will be possible to induce the men having such energy and ability to go into that strange country.

Organization.

At a meeting of the Board of Trustees of the Highland Junction Railroad and Bridge Company, recently held in this city, Vincent C. King was elected President, Augustus T. Docharty Treasurer, and Charles H. Swan Secretary and General Manager. As noted elsewhere, the plan of this company under its charter is the construction of a railroad from a point on the New York, Lake Erie and Western Railroad, near Cornwall on the Hudson, to Matteawan on the New York and New England Railroad; also the construction of a bridge over the Hudson River in connection therewith. The route has already been surveyed and maps and profiles have been filed. It is claimed that the construction of this road and bridge, whereby the coals of Pennsylvania can be conveyed in bulk to the Eastern States without transshipment, as is now done at Elizabethport and Perth Amboy, will effect a saving of 80 cents per ton.

Articles of incorporation of the Trinity and Sabine Railroad Company have been filed with the Secretary of State of Texas. The proposed line extends from the town of Trinity through the counties of Trinity, Polk and Tyler to a point on Niches River, near the junction of Angelina River, a distance of seventy miles. The capital stock is $1,125,000. The incorporators are R. S. Hayes, H. M. Hoxie, D. S. H. Smith, of St. Louis; Ira H. Evans, John W. Armstrong, G. J. Gooche, Allen McCoy, George M. Dieley and A. R. Howard, of Palestine, Texas.

The Waxahachie-Tap Railroad has filed an amendment to its charter in the State Department at San Antonio, Texas. It changes the name to Central Texas and Northwestern; it also extends the line of road to a junction with the Texas Central in Childress county, a distance of 280 miles.

A charter has been granted at Harrisburg, Penn., to the Seaboard, Pittsburg and Great Western Railroad Company to extend a line from Pittsburg to a point in Franklin County, near Chambersburg. The capital stock is $2,100,000. Thomas E. Shoemaker, of Philadelphia, is President. It is said that this is a link of the line which will connect with the road now being built down the Cumberland Valley to cross the Susquehanna at Steelton, two miles below Harrisburg, and connect with the branch of the Reading Railroad at that point.

Railroad Earnings.

The earnings of the Great Western Railway of Canada for the week ending September 23d, 1881, were $108,094; corresponding week of last year, $115,545—decrease, $7,451.

The earnings of the Denver and Rio Grande Railway for the fourth week in September, 1881, were $191,617; same week last year, $142,373—increase, $49,244. Total for the month of September; $620,642; same week last year, $400,990—increase, $219,652. Total since January 1st, $4,340,977; do. 1880, $2,236,480—increase, $2,104,498. Total construction since January 1st, $152,413. Miles now operated, $963; miles operated last year, 541.

The earnings of the St. Louis and San Francisco Railway for the fourth week in September, 1881, were $81,000; same week in 1880, $86,000—decrease, $4,900. From January 1 to September 30, 1881, $2,278,000; do. 1880, $1,811,591—increase, $466,409.

The earnings of the Mobile and Ohio Railroad for the month of September, 1881, were $209,044; do. 1880, $184,246; increase, $24,798; July 1, 1881, to Sept. 30, 1881, $503,940 75; do. 1880, 456,461 37; increase, $47,479 38; Jan. 1, to Sept. 30, 1881, $1,621,842 66; do. 1880, $1,470,168 68; increase. $151,673 98.

The earnings of the Burlington, Cedar Rapids and Northern Railroad for the week ending Sept. 21, were: 1881, $62,595 45; 1880, $42,990 07—increase, $9,605 38.

The earnings of the St. Louis, Iron Mountain and Southern Railway for the third week in September, 1881, were $191,400; do. in 1880, $184,305. From January 1, to September 21, 1881, $4,893,955; do. in 1880, $3,980,310—increase, $913,045.

The earnings of the Louisville and Nashville Railroad for the third week in September, 1881, were $222,700; do. in 1880, $213,100—increase, $9,600. From January 1 to September 21, 1881, $7,857,115; corresponding period of 1880, $6,261,238—$1,595,878.

The earnings of the Missouri, Kansas and Texas and Leased lines for the third week in September, 1881, were $204,741; do. 1880, $130,131—increase, $74,610. From January 1, to September 21, 1881, $5,319,901; do. 1880, $4,014,850.

The earnings of the Wabash, St. Louis and Pacific Railway for the third week in September, 1881, were $397,141; do. 1881, $315,996—increase, $81,145. From January 1 to September 23, 1881, the earnings were $10,056,944, against $8,429,110 for the corresponding period in 1880, an increase of $1,627,834.

The approximate earnings of the Indiana, Bloomington and Western Railway and leased lines for the week ending Sept. 30, 1881, were $46,633 31; for the week ending Sept. 30, 1880, $40,713 53—increase, $5,919 78.

The earnings of the Chicago and Northwestern Railway Company for the month of September were $2,217,700, against $2,020,200 last year, an increase of $197,500.

The earnings of the Chicago, Milwaukee and St. Paul Railway Company for the fourth week of September were $484,000, against $397,364 last year, an increase of $86,636, and for the month ot September, $1,645,000, against $1,157,677, an increase of $387,323.

The earnings of the Union Pacific Railway for the month of September were $2,844,357, against $2,270,179 last year, an increase of $574,178.

Interest and Dividends.

The Woodruff Sleeping and Parlor Coach Company has declared a quarterly dividend of 1½ per cent., payable October 1 at 4 Market street., Pittsburg, Penn.

The Receiver of the Philadelphia and Reading Railroad Company will pay, on and after October 18, 1881, the unpaid January, 1881, coupon of the general mortgage bonds of said company. The receivers are now paying the coupons of the 7 per cent. bonds of the Pickering Valley Railroad at the rate of 4 per cent. per annum.

The Housatonic Railroad Company has declared a quarterly dividend of $2 per share on its preferred stock, payable at Bridgeport, Conn., on the 15th of October.

The Boston, Clinton, Fitchburg and New Bedford Railroad Company has declared a semi-annual dividend of 3 per cent. on its preferred stock, payable October 15.

The Pullman Palace Car Company will increase its capital stock 25 per cent. ($8,020,900 to $10,026,100), and every holder of four old shares September 8 is entitled to one new share at par up to October 15, the new stock to draw dividends February 15. The company paid an extra dividend of 1½ per cent. September 20.

Personal.

Impressive memorial services were held at Houston, Texas, on the day designated for the national funeral services over our late President. Among the prominent speakers at Houston was Mayor E. W. Cave, Treasurer of the Houston and Texas Central Railway Company, who, although not knowing until a late hour in the morning that he was to speak in the afternoon, delivered an eloquent and peculiarly fitting address, which we see quoted at length by the press of that locality. Mayor Cave closed his address as follows: "The lesson of the life of President Garfield is full of promise to the American youth, full of hope to the patriot and statesman. Labor, energy, thought, manhood and public virtue will shine conspicuous in life's record long after party rancor has passed away. The lesson of his death is fraught with earnest resolve, that if there be lurking in our midst that fanaticism which points the frenzied brain to a deed like this which has laid our President low, it shall be stamped out beneath the feet of justice, and if any have been so foolish as to believe that one mad act can eve disturb this nation's repose, their folly will be made conscious by the present sublime unity of the American people."

Capt. Eads, who has just returned from Europe, says he "found the greatest encouragement among eminent English engineers, who agreed that his plan for a ship railway is perfectly practicable." He is about to cross the Isthmus and re-survey the route.

New York Stock Exchange.

THE ROTUNDA FURNACE.—Prudent people are now preparing for the cold weather. Furnaces, pipes and flues are being cleaned for use during the winter. This last is a matter of great importance in the dwelling, school, church and office. Alexander M. Lesley, 380 Sixth avenue, New York, has introduced a new and improved furnace, called the "Rotunda," whose merits include the absolute prevention of the escape of gases into the surrounding air; durability, simplicity, ease in use, and economy. Mr. Lesley's "Rotunda" furnace is the result of twenty-four years' experience.

Cincinnati Iron Market.

OFFICE OF E. L. HARPER & CO.

Cincinnati, Oct. 3, 1881.

The market continues to grow steadily stronger. Stocks in the hands of sellers are very light and some grades have been sold at advance of 50c. to a $1 per ton. We quote as follows:

AMERICAN RAILROAD JOURNAL.

Financial and Commercial Review.

THURSDAY EVENING, Oct. 6, 1881.

The quotation for call loans at the Stock Exchange this afternoon was 6 per cent, plus 1-16th of 1 per cent a day. In the last hour the rate fell to 6 per cent for a few moments; but late borrowers were obliged to pay a commission of 1-32 of 1 per cent a day. The highest rate paid during the day was ⅛ of 1 per cent, plus 6 per cent.

The posted rates for prime bankers' sterling were 4.79½@4.83½; the actual rates being 4.78 to 4.78¾ for 60 day and 4.82 to 4.83¾ for demand drafts. Cable transfers on London were 4.83¼ to 4.84. Prime commercial bills were 4.76½ to 4.77½. The actual rates for Continental exchange are: francs, 5.26⅞@5.23⅛; marks, 93½@9⅜ and 94⅜@⅝, and guilders, 39½@39¾.

At a meeting of the Trustees of the Brooklyn Bridge Company, held on the 3d inst., a statement of the Treasurer was presented, showing the receipts to have been $13,224,128.99, and the expenses $13,166,792.44, leaving cash on hand $57,336.55.

There were twenty proposals to sell bonds to the Government on Monday, aggregating $6,770,500, nearly all extended sixes. Fisk & Hatch offered $2,000,000, Mr. St. John $2,000,000 and the First National Bank $756,000. The Treasury accepted the fixed weekly amount, $2,000,000, in equal proportions among the offerers.

The coinage at the several United States mints during the month of September amounted to 6,450,000 pieces, of the value of $7,847,300. There were $2,400,000 silver dollars, $2,630,000 in gold eagles and 3,230,000 cents.

According to the report of the Comptroller the net funded debt of the city of New York on the 31st of December, 1880, was $101,509,891.56; August 31, 1881, $99,399,939.73, and September 30, 1881, $98,999,306.97. The amount of revenue bonds issued under special acts of the Legislature in anticipation of taxes was December 31, 1880, $5,524,244.58; August 31, 1881, $18,911,589.79, and September 31, $20,055,589.79. The city treasury account to August 31, 1881, was $367,776.71; sinking fund redemption, $705,303.24; interest, $428,302.09; total, $1,501,328.04.

The closing quotations on Thursday were: Adams Express, 137@139; American Express, 90@100; American District Telegraph, 49¾@52; Chicago, Burlington and Quincy, 154@154½; Canada Southern, 59¼@59¾; Chicago and Northwestern, 122½@122⅝; do. pref., 133½@134; Chicago and Alton, 127@128; Central of New Jersey, 91½@91⅝; Chicago and Rock Island, 132@132½; Central Pacific, 92¼@92½; Chicago, Milwaukee and St. Paul, 109⅜@109½; do. pref., 121@122; Chicago, St. Louis and New Orleans, 78@79; Cleveland, Columbus, Cincinnati and Indianapolis, 90½@92; Columbus, Chicago and Indiana Central, 19⅜@19¾; Delaware and Hudson Canal, 107⅛@107⅜; Delaware, Lackawanna and Western, 122⅜@122½; Hannibal and St. Joseph, 100@200; do. pref., 113¾@114; Illinois Central, 129@129½; Lake Erie and Western, 42¾@43¼; Lake Shore and Michigan Southern, 118½@118⅝; Metropolitan Elevated, 84½@85; Manhattan Elevated, 22⅛@22¼; Michigan Central, 87⅛@88; New York Elevated, 109@110; New York, Lake Erie and Western, 42⅞@43; do. pref., —@—; New York Central and Hudson River, 137⅜@13⅞7; Ohio and Mississippi, 41⅜@41½; Ohio Central, 26@26⅛; Texas and Pacific, 47⅛@47⅜; Union Pacific, 118@118⅛; United States Express, 69¾@70½; Welsl-Fargo Express, 129½@130¼; Western Union Telegraph, 84¼@84⅝; Wabash, St. Louis and Pacific, 47⅝@47⅞; do. pref., 87⅞@88¼.

Highland Junction Railroad and Bridge Company.

A new railroad connection between the Pennsylvania coal fields and the East is promised by the Highland Junction Railroad and Bridge Company, recently organized to build a road from Cornwall on the New York, Lake Erie and Western Railroad, to Matteawan on the New York and New England Railroad. The necessary surveys have been made and maps and papers filed. The length of the proposed road is ten miles, and includes a bridge 2,800 feet long across the Hudson above West Point, from the Storm King to Buck Neck, and 150 feet above tide water. The New York, Lake Erie and Western Railroad Co. has during the past summer completed its connection with the East by a ferry between Newburg and Fishkill, which will soon be in operation, but the freezing of the river in winter will demand the bridge in order to meet the increasing requirements of transportation. Besides this the grades to the ferry are heavy both ways, and this will be avoided by the great elevation of the bridge, which will be constructed in conformity with existing laws without special charter. This project of bridging the Hudson at the only point where navigation cannot be interfered with will doubtless have a considerable influence upon the coal trade of New England, as it will enable the Pennsylvania, the Central of New Jersey, the Delaware, Lackawanna and Western, the Lehigh Valley, the New York; Ontario and Western, and the Philadelphia and Reading Railroads to ship coal East without breaking bulk: To complete the link thus connecting with the New England States a project is on foot and near completion to establish a direct line betwcen Belvidere on the Delaware; and Newburg on the Hudson, which will lie over the Warwick and Greycourt branches of the New York, Lake Erie and Western, and over the Sussex Railroad between Andover and Hamburg. A per rate arrangement is contemplated with these roads, and so confident are the projectors of this new enterprise of its importance that they propose to commence operations at an early day and expect to complete the work within two years.

THE London, Ont., Free Press thinks "it is time the Dominion Government ceased contributing to the immense profits of the Pullman Car Company of Chicago," and that "a Canadian built sleeper should take the place of these foreign cars."

WORK on the Nicaragua Railway is progressing very favorably. The bridge over the Paso de Caballos is approaching completion and will soon enable trains to run through from Corinto to Chinandega. Twelve miles of rails have already been laid.

Dividend Notices.

THE LAKE SHORE AND MICHIGAN SOUTHERN RAILWAY COMPANY.

TREASURER'S OFFICE, GRAND CENTRAL DEPOT, NEW YORK, September 27, 1881.

The Board of Directors of this Company have this day declared a quarterly dividend of TWO Per Cent upon its capital stock, payable on TUESDAY, the first day of November next, at this office. NEW YORK, LAKE ERIE & WESTERN RAILWAY.

TO THE TRAVELING PUBLIC.

During the Centennial Season six months, closing November 10, 1876—the Erie Railway carried almos 3,000,000 passengers, without a single accident to life or limb, or the loss of a piece of baggage.

And for a whole year, the official records of the United States Post-Office Department show the arrivals of Erie Railway trains in New York, on time, to be from 15 to 27 per cent. ahead of competing lines.

Facts well worthy the consideration of travelers.

ROTUNDA FURNACE.

VENTILATING AND HEATING APPARATUS.

Prepare for Winter. - - Home Comfort.

After twenty-four years' experience in the warming of buildings and studying the defects of existing heating apparatus, I have lately introduced a new and improved furnace, called the "ROTUNDA," a name suggestive of its appearance. It is very simple in its construction, has less joints than any other furnace made, and these are sand joints. *By no possibility can gas escape* into the air-chamber. *The castings are durable*, and are corrugated. It has an immense radiating surface. The shaking and dumping grate is perfect in operation. There are no confusing dampers for servants. Hard or soft coal can be used.

IT IS SELF-CLEANING. It can be placed in a low cellar. *The prices are moderate.* A large evaporator and air-moistener is used, rendering the air soft and mild.

Estimates given for warming new Houses, Schools, or Churches.

I also manufacture the ZERO REFRIGERATOR. This refrigerator obtained the Grand Award of Merit at the Centennial Exhibition, 1876. Over 38,000 have been sold.

The ROTUNDA FURNACE has been adopted by the Rt. Rev. Bishop Neely, of Maine ; Rev. A. V. Clarkson, of Croton, N. Y., for a church and school ; E. H. Cushman, Esq.; M. B. Bronner, Esq., of Baer & Co., real estate, New York.

ALEXANDER M. LESLEY, Manufacturer,

Steam Navigation, Commerce, Finance, Banking, Machinery, Mining, Manufactures.

SECOND QUARTO SERIES.—VOL. XXXVII., No. 42.] NEW YORK, OCTOBER 15, 1881. [WHOLE No. 2,373.—VOL. LIV.

The Varieties of Steel.

Originally the word steel was applied only to iron which contains such quantities of carbon as would cause hardening when the red-hot iron was cooled suddenly. This definition still applies, but, in addition, the term cast steel applies to all of the products of the crucible, the Bessemer converter, and the open-hearth furnace, whether such products are too low in carbon to harden or not. The steels that are not cast steel are known in the market as blister steel, German steel, shear steel and double shear steel. Blister steel is made by heating bars of wrought iron, bedded in charcoal, in hermetically sealed chambers. The carbon of the charcoal penetrates the hot iron, converting it into a crystalline mass of crude steel; large blisters rise on the surfaces of the bars, giving the name blister steel to this product. German steel is blister steel rolled down into bars. It is used mainly for tires and common springs, but is being rapidly superseded by the cheaper grades of cast steel. Shear steel is made by taking a high heat on blister steel and hammering it thoroughly. Double shear steel is made by cutting up shear steel, piling it, heating it, then hammering again. The best shear steel is made from the best wrought iron. The sheer steels are very useful onaccount of their toughness and the ease with which they can be welded to iron; and, when of good quality and well worked, they will hold a very fine edge. Crucible steel is made by melting in a crucible either blister steel, or blister steel and wrought iron, or wrought iron and charcoal, or wrought iron or scrap steel, or, in short, a great variety of mixtures, which depend on the quality of steel to be produced. Crucible steel can be applied to any purpose for which steel is used. Generally, it is better than any other steel—that is to say, crucible steel made by melting blister steel and tempered to suit by mixing iron of the same grade in the crucible, is always better than German or sheer steel made from the same blister.

Bessemer steel is made by blowing air through melted cast iron, thus burning silicon and carbon out of the cast iron. After the silicon and carbon are burned out, melted spiegeleisen or ferro-manganese is added to the charge. The carbon in the spiegel recarbonizes the steel to the desired point, and the manganese unites with and removes the oxygen which the air used leaves in the steel. Open-hearth steel is made by melting, in a very hot furnace, a charge of pig-iron. To this melted iron, which is called the "bath," is added either wrought iron, or scrap steel, or iron ore, and the whole is kept hot until all is melted. The wrought iron or scrap, or ore, reduces the carbon or silicon in the bath to such proportions as are desired in the steel. Bessemer and open-hearth steel are much alike in quality. They are used mainly for rails, boiler plates, ship plates, bridge and other structural purposes and machinery. The better qualities are also used largely for springs. The best spring steel, like the best tool steel, is simply that which is made from the best material. Quality of material, chemically speaking, being equal, the best spring steel is that which is made rfom crucible cast steel, as the crucible process is less crude than either of the others.

Electricity as a Motive Power.

A correspondent of the London *Times*, writing of the Electric Exhibition at Paris under date of September 14, says:

"During the last few days a number of new machines have been in action to show the different applications of electricity as a motive power. This is a special branch of the subject, which will attract a large number of visitors. Most of the machines of this class are in the northwest corner of the building. Here the ploughing machine of M. Menier is exhibited by M. Felix, and, although it does not actually plough the ground, it is interesting to see the way in which the electro-motor drags the plough with three shares across the space devoted to it, while a workman sits in it and guides its direction. Then there is a circular saw driven by electricity. The diameter of the saw is three feet, and the planks upon which it works are five inches thick. M. Piat exhibits in the same part of the building a stone cutter and an electrical hammer, which does all the work usually assigned to a steam hammer. Close to these machines is another for pumping water, driven by a Gramme motor; the large volume of water which is thrown out conveys to the eye some idea of the great force which can be transmitted by electricity, although in reality this machine does not require nearly so much force as many other motors in the exhibition. In the same corner we find a number of machines for sewing and for driving band-saws, and so forth, all driven by the convenient little motor of M. Deprez. There is also an embroidering machine, which is more interesting from its mechanical construction than from its being driven by electricity. Near to this spot there is also a rock-drilling machine, for use with black diamonds; the drill rotates under the influence of a Gramme machine; and while a hole is being bored it advances under the influence of the water pressure obtainable in Paris, which is about three atmospheres."

The History of Coke.

The history of the discovery of coke and the development of the traffic has never been written. Authentic information of the first use of coke in this country places it in 1817, when it was employed by Col. Isaac Meason, one of the earliest founders of western Pennsylvania, in refining iron at the Plumsock, or Upper Middletown mill, in this county, a few miles from the Youghiogheny river. In 1818 the use of coke was attempted by blast furnaces, but it had to be abandoned because the blast was too light, being only five pounds to the square inch. Even then the value of coke as a furnace fuel was fully appreciated, but the enjoyment of its advantages was prevented by inability to increase the blast. In 1835 William Firmstone manufactured good gray forge iron at the Mary Ann furnace, in Huntingdon county, with coke produced from Broad Top coal. In the same year F. H. Oliphant, of Fairchance furnace, near Uniontown, exhibited at the Franklin Institute, Philadelphia, samples of iron made from blue lump ore smelted with coke. In 1840 the Great Western Iron Works, at Brady's Bend, built four coke furnaces. In 1841-2 coke was made on the banks of the Youghiogheny River and shipped in flat boats to Cincinnati. A gentleman who is well informed in all the details of the coke business says that Dud Dudley, an English iron manufacturer of the sixteenth century, is entitled to the discovery of coke. He used it for the same purpose to which it is applied now, smelting. The manufacture of coke in the Connellsville region did not rise to the dignity of a business until toward the close of the decade of 1850, when it was carried on principally at Dawson's Station, on the Youghiogheny River, six miles below Connellsville, by the Cochrans, who are still in the business, and to most of whom it has brought great riches.—*Philadelphia Press.*

THE first electric railway in Upper Silesia is about to be opened. It has been constructed by Siemens & Halske, for the Donnersmarckhutte Company, to supersede their ordinary colliery horse railway. The current is conveyed by wire ropes supported on poles in the same manner as telegraph wires. On the wires run small contact carriages, connected with the locomotive by wires. The maximum speed will be eight miles per hour.

U. S. District Court, N. D. Ill.

SANDY ALSTON v. ANCHOR LINE S. S. Co.

RIGHTS OF PASSENGERS—TICKET EVIDENCE OF CONTRACT—CIVIL RIGHTS BILL.

A ticket of passage is the evidence of the contract between the purchaser and the carrier, and parol testimony as to prior conversations is inadmissible to vary the terms of the contract as set forth in the ticket.

In an action brought under the provisions of the Civil Rights Bill, if the jury believe that the plaintiff has been unlawfully deprived of his rights, they are to assess his damages at the sum named in the statute.

It is left to the jury to determine from the evidence whether or not the plaintiff, after being excluded from the table as alleged, waived his right to recover by accepting a return of a part of the money paid for passage, or whether, if he did accept the money, it was not, in view of all the circumstances, received under such duress as would relieve the plaintiff from the contract thereby sought to be created.—ED. CHICAGO LEGAL NEWS.

CHARGE TO THE JURY.

BLODETT, J.—*Gentlemen of the Jury:* The plaintiff in this case charges that during the season of navigation, in the year 1877, he, being a colored man or negro, purchased at the defendant's ticket office, in this city, a ticket entitling him to a first-class passage on one of the defendant's boats, from Chicago to Detroit, that he paid full fare for a first-class ticket, and that, in pursuance of this, he took passage upon the steamer "Japan," one of the defendant's boats, and on the morning after he took such passage took his seat at the breakfast table in the cabin, with the other first-class passengers, and was forcibly compelled by the captain to leave his seat, and was denied the privilege of the table during the trip.

On the part of the defendant, it is contended that prior to the purchase of the ticket, plaintiff was told that men of his color would not be allowed to eat at the first table, but would have to eat with the servants on the boat, and that plaintiff consented to this arrangement; and further, that after plaintiff was excluded from the table on the boat, he was tendered back and accepted one-half the fare which he had paid, and agreed not to demand the right to sit at the first table.

The only disputed questions are whether the plaintiff agreed, before he bought his ticket, that he would not go to the first table on the boat; and whether he actually accepted back part of the purchase money from the captain, with the understanding that he would waive his right to sit at the first table.

The plaintiff's proof tends to show that when he went to buy his ticket he asked defendant's agent if there would be any difficulty on account of his color, and was told that his rights there would be the same if he paid first-class fare as that of any other first-class passenger, and that they would treat him as well as they would treat General Grant, and that he bought the ticket upon that assurance. The proof on plaintiff's part also tends to show that, although the captain, after excluding him from the table, offered him back some part of his passage money, he refused to take it, and did not actually take it.

All parties agree that the ticket sold and delivered to the plaintiff was the same as defendant sold to any other first-class passenger, and upon its face entitled him to all first-class accommodations of the boat, including meals at the first table. But the defendant insists that the plaintiff expressly agreed to waive his right to meals at the first table with the other first-class passengers.

Upon these conceded facts I see no reason why this part of the case does not fall within the rule that parol evidence will not be allowed to void a written contract—for a printed ticket is the same as a written contract—and all previous talk or negotiation must be excluded and the contract of the parties must be considered as embodied only in the ticket or written instrument. This ticket was the evidence which the defendant gave the plaintiff of his rights as a passenger on its steamer. The ticket is the contract between the parties, and not the conversation before buying the ticket. There is really no controversy as to the fact that the plaintiff was denied the right to eat at the first table. It may then be taken as conceded that the plaintiff held a first-class ticket but was denied the rights to which that ticket entitled him. And the testimony as to the conversation between the ticket agent and plaintiff before the ticket was purchased should be disregarded, because it only tends to prove a different contract from that shown by the ticket.

In regard to the point that the plaintiff accepted back a part of his fare after the difficulty arose in reference to his sitting at the table, the testimony appears to be this: The plaintiff and his witness Mr. Anthony, testify that he did not accept this money. The captain and some of the other witnesses on the part of the defendant say that he did take the money that was offered him by the captain. Here is a conflict of testimony which you must settle.

It also appears that this money was not offered back to the plaintiff until after he had been compelled to leave the table by the captain. It is for you to say, under the circumstances in this case, whether this was such an acceptance, even if he did accept the money, as makes a new contract between the parties. The defendant contends that by accepting this money back the plaintiff virtually made a new contract with the officers of the boat, by which he, in effect, stipulated or agreed, impliedly, at least, not to claim the privileges of the first table.

In order to determine whether such a contract was made, you must consider the circumstances surrounding the case. The plaintiff was alone upon this boat, the captain arbitrarily had excluded him from the rights to which his ticket entitled him, and the testimony tends to show that he was threatened with personal violence in case he insisted upon those rights.

Now it is for you to say in the light of these surrounding facts whether the parties stood in such relations of equality as to to make a binding contract out of the mere tender of this money back, even if the plaintiff accepted it. You are to say whether this man, alone upon this vessel, with an imperious and arbitrary officer, excluding him from his contract rights, is to be impliedly bound by any arrangement which he made under such circumstances in the haste and excitement of such an occasion. Of course if you find from the evidence, which is contradictory, that the plaintiff did not accept the money back, then, no such contract as is claimed by the defendant was made or would be implied. But even if he did accept the money back and you find that he accepted it under compulsion, as it were, under a threat that he could not have the rights for which he had paid, and the only alternative given him was that he must keep away from the table and might, if he chose, accept this money then you are to say whether such an occurrence would make a contract which would bind the plaintiff and be a waiver of his rights.

If you find from the testimony that the plaintiff did intelligently, and without any fear or under intimidation, accept back one-half the fare, so that the amount of money which he paid would entitle him to second class fare only, and agreed, expressly or impliedly, to waive his right to sit at the first table, then the contract is thereby modified or changed from that of a first class ticket to that of a second class ticket, the plaintiff's rights are changed accordingly. While, if you find that this money was not accepted by the plaintiff, or if it was accepted, it was accepted under such circumstances of intimidation as to show that he did not understand that he was making a new contract, then no defense arises to the defendant from this circumstance.

I have said this much without reference to any enactment by Congress affecting the rights of these parties, but simply upon the common law rights of the parties under this contract without regard to the color, condition in life, or nationality of the plaintiff. The common law recognizes the rights of equality between those who pay a common carrier for the same accommodations. The carrier fixes the rates at which he will furnish first class and second class accommodations to passengers, and, if any man, without regard to color, pays first class fare, it entitles him to first class accommodations. If he pays only second class fare he can only demand second class accommodations from the carrier.

This action has been framed under the provisions of what is known as the Civil Rights Bill, passed by Congress, and approved on the first of March, 1875, the two first sections of which read as follows:

"Sec. 1. That all persons within the jurisdiction of the United States shall be entitled to the full and equal enjoyment of accommodations, advantages, facilities and privileges of inns and public conveyances on land and water, and theatres and other places of public amusement, subject only to the conditions and limitations established by law, and applicable alike to citizens of every race and color, and regardless of any previous condition of servitude.

"Sec. 2. That any person who shall violate the foregoing section by denying any citizen, except for reasons by law applicable to citizens of every race and color, and regardless of any previous condition of servitude, the full enjoyment of any of the accommodations, advantages, facilities or privileges in said section enumerated, or by aiding or inciting such denial, shall, for every such offense, forfeit and pay the sum of $500 to the person aggrieved thereby, to be recovered in an action of debt with full costs."

If, therefore, you find from the evidence that plaintiff's ticket entitled him to eat at the first table, and that he was not allowed to do so, and did not waive that right by any subsequent agreement, then defendant is liable, and the damages should be assessed at the amount fixed by the statute.

If, on the contrary, as I have already said, you find that the plaintiff did actually accept back a portion of this passage money, with the understanding that he was to waive his right to the privileges of the first table, then he cannot recover in this case.

Mr. FREDERIC ALGAR, Nos. 11 and 12 Clements Lane, Lombard Street, London, E. C., England, is the authorized European Agent for the JOURNAL.

New York, Saturday, October 15, 1881.

Entered at the Post Office at New York City as Second-Class Mail Matter.

OURSELVES.

DURING the fiftieth year of the AMERICAN RAILROAD JOURNAL, changes have occurred in its management and its general make-up which start it off in its second half century with additional strength and with new features that give it a somewhat broader character than it has aimed at in the past. Since the paper was first started, in 1831, there have been remarkably few changes in its management, one of the parties now connected with it having been interested in the paper from its earliest days, and much of the time its sole proprietor. A year ago a company was formed for the purpose of extending the field of the paper, and during that time plans have been developed which, with others just started under most favorable circumstances, will doubtless result in making the coming years of the JOURNAL even more prosperous and useful than the past years of successful labor have proved.

Within the past few weeks the company having the proprietorship of the paper has been greatly strengthened by the accession of new parties identified with one of the largest commercial and manufacturing houses of the city, who bring to the paper, in addition to capital, a practical experience in newspaper work and business connections, which will naturally place before the paper new fields for its future occupancy and development. The JOURNAL, standing as it does in the position of the oldest railroad paper in the world, is now better able than it has ever been before to occupy that position to the advantage of the interests it represents.

Several changes, which are readily apparent, have been made recently in the appearance of the paper, but they have been made hurriedly and have not yet indicated fully the plans in progress. As to the typographical part, it is the aim of the new management to present to their patrons a readable paper. It is not intended to make it necessarily an illustration of the advancement in the printer's art, but rather to make it, in type and form, of such a kind as to be the most easy and convenient for the eye and the hand of the reader. New features have been added to the contents of the paper from time to time during the past year, and in the near future others will be adopted, which it is believed will prove of value. The bond and share list tables, which previous to this year had so regularly and for so long a time appeared conspicuously in the paper, are removed, that their form and contents may be improved and made of more interest. It is not intended to omit from the paper any information for which in the past it has been especially valued, but rather to give such and additional information in more desirable form. With this end in view much of the tabulated matter, when it appears hereafter, will be published in supplementary form from time to time.

THE AMERICAN RAILROAD JOURNAL started with the first one hundred miles of railroad in this country, and has seen the number of miles increased to nearly one thousand times as many. Growing up with our vast railroad system, the paper has ever aimed to be a faithful chronicler of the important events in its development, and into this aim has been put so much of honest work that there is to-day no more complete history of railroading in this country to be found than is furnished by the files of the JOURNAL. The appreciation which this work has met with is shown by the position it has earned for itself, not only among American capitalists, but among foreign banking houses, especially in Great Britain and Germany, and by the fact that authorities like *Herapath's Railway Journal*, of London, and *Chambers' Encyclopædia* recommend it as an outspoken journal and a valuable work for reference. With perfect freedom from all entanglements of cliques or parties maintained, the present management hope to merit the favor of the old-time patrons of the JOURNAL while seeking additional support in new fields auspiciously opening to it.

Flanging Boiler Heads.

The study of the causes and nature of the defect known as grooving, as well as the character and appearance of the fractures which frequently occur in the flanges of heads or tube sheets, and other parts of boilers where flanging is done leads to the conclusion that flanges, as ordinarily turned, are very much too sharp, or turned to too short a radius; The evil effect upon iron of bending it too sharply may be shown by a diagram which represents a full size section of a tube sheet, at the angle or flange, bent to a radius equal to about the thickness of the plate, as frequently found in practice. Indeed. the sheets are frequently found with a still shorter bend, sometimes almost a sharp corner on the inside. The effect of this is to unduly strain the iron, both on the outside and inside of the flange, the outside being under a combined tensile and bending strain generally to such an extent that a section of the flange shows a laminated appearance, caused by the layers of the plate being separated and sliding upon each other, while the outside of the plate, unless of extra fine iron worked with more skill than is usual, if examined closely, will be found to be filled with small cracks having the appearance of season checks, as seen in timber. The inside of the flange, on the contrary, is in a state of undue compression, the fibres being crushed and buckled up. The effect of too sharp flanging may easily be shown ; by taking a narrow strip of boiler plate and bending it sharply the effect will be very marked. This disturbance of the fibres and laminæ of the iron renders it peculiarly susceptible to the corrosive actions of the acids present to a greater or less extent in all waters, the result being manifested by grooving or channelling and fracture along the angle of the flange caused by the combined action of grooving, and the "working" caused by variations of pressure and contraction and expansion.—*The Locomotive.*

Virginia, Tennessee and Georgia Air Line Railroad.

A contract was signed in this city on the 28th ult. between E. W. Cole, President of the East Tennessee, Virginia and Georgia Railroad Company, G. W. Tyler, President of the Norfolk and Western Railroad Company, and F. J. Kimball, President of the Shenandoah Valley Railroad Company, embracing in all 2,138 miles, which unites permanently these properties under the name of the Virginia, Tennessee and Georgia Air Line, President E. W. Cole and President F. J. Kimball constituting an executive committee for the whole line, who have appointed Henry Fink general manager. The united lines penetrate seven States, to wit —Tennessee, Alabama, Mississippi, Georgia, Kentucky, North Carolina and Virginia, with

all rail routes to the East, via the Virginia Midland, and from Norfolk to Meridan, Miss., from Norfolk via Rome, Atlanta and Macon to Brunswick, Ga., on the Atlantic and to Florida, to Louisville and Cincinnati via the Knoxville and Ohio, a division of the East Tennessee, Virginia and Georgia railroad, and into North Carolina by another division of the East Tennessee, Virginia and Georgia railroad.

Organization.

THE Directors of the Portsmouth and Concord Railroad Company, elected on the 6th inst., are: Stephen Kenrick, Franklin; Samuel N. Bell, Manchester; Benjamin F. Martin, Manchester; Joseph B. Walker, Concord; Walter M. Parker, Manchester; John J. Pickering, Portsmouth; John J. Bell, Exeter. The Treasurer reported $1,582.90 on hand. The road is operated under a lease by the Concord Railroad Company.

THE certificate of incorporation of the Cumberland, Washington and New York Railroad Company was filed at the Executive Department, Annapolis, Md., on the 5th inst. The termini are at Cumberland, in Allegany County, Md., and at Washington and Point Lookout. The capital stock is fixed at $5,000,000. The incorporators are S. Taylor Suit, Sidney S. Wales and George W. Dimmock, of Prince George's County, Md., and William J. Muntagle and James Read, of New York.

SAMUEL ABBOTT has been elected President and D. W. C. Clement Secretary of the Salem (N. J.) Railroad Company. The Directors are: D. W. C. Clement, Samuel Abbott, Charles E. Elmer, Joseph N. Dubois, Richard Grier, Strickland Kneass, Coleman F. Leaming, Thos. Sinnickson, Jr., Samuel Prior, William J. Sewell, Josiah Wister, T. Jones Yorke and Quinton Keasby. The road is to be extended across Salem Creek to East Griffith street in the city.

THE following gentlemen have been elected Directors of the Nevada and Oregon Railroad Company to fill vacancies: C. A. Bragg, G. L. Woods, W. D. Balch, S. C. Scoville, F. F. Fowler, A. H. Manning and H. J. McMurray.

ARTICLES of incorporation were filed on the 7th inst. in the office of the Secretary of State of Illinois of the Neoga and Southeastern Railroad Company. The incorporators and first board of Directors are; Tracy Kingman, S. F. Wilson, W. W. Whitney, W. B. Phillips, D. W. Ragsdale, P. Welshimer, Cyrus D. Greene, M. Votaw, G. W. Albin, H. C. Marshall, F. D. Vons, Henry A. Aldrich and W. H. Singer, all of Neoga. The capital of the company is $200,000. It is proposed to construct a railroad from the village of Neoga, in Cumberland County, through the County of Cumberland and into the counties of Effingham and Jasper, to a point where said railway shall join or intersect the Springfield, Effingham and Southeastern Railroad.

The Missouri Northern Railroad Company has been incorporated, with a capital of $600,000. The stockholders are: Messrs. Wyatt, Durfee, McKillop, Dopf, Lewis and Hunter, of Rockport, Mo., and Messrs. Carson, Bailey, Johnson and Broady, of Brownsville, Neb. The length of the road, when completed, will be 37 miles, and is of standard gauge. It begins on the east bank of the Missouri River, opposite Brownsville, Neb., and runs thence in an easterly direction by the way of Rockport, in Atchison County, through Atchison and Nodaway counties, to a point at or near Burlington junction.

THE People's Railway Company of Springfield, Mo., has been incorporated by the Secretary of State, with a capital of $4,000. This is a street horse railroad, and will run from Springfield to North Springfield. The shareholders are Messrs. Shepherd, McAfee, Cravens and Massey, of Springfield.

ARTICLES of consolidation have been filed of the following railroad companies: Chicago and West Michigan Railroad Company; Grand Rapids, Newaygo and Lake Shore Railroad Company; Grand Haven Railroad Company and the Indiana and Michigan Railroad Company—the new company taking the name of Chicago and West Michigan Railroad Company; capital stock $600,000, with directory headed by Nathaniel Thayer, Secretary.

Personal.

THE Brotherhood of Locomotive Engineers will hold its annual convention at Baltimore, Md., on the 19th inst. The headquarters will be at the Carrollton House, but the meetings will be held at Grand Army Hall. Most of the roads will pass the delegates and their wives to and from the convention on presentation of proper credentials.

THE National Board of Steam Navigation, recently in session at Washington, appointed delegates to the Mississippi River Improvement Convention, which meets on the 20th inst., at St. Louis, Mo. Officers were elected for the ensuing year, as follows: President, E. W. Gould, St. Louis, Mo.; First Vice-President, R. H. Wooltolk, Louisville, Ky.; Second Vice-President, J. B. Coyle, Portland, Me.; Third Vice-President, J. N. Bofinger, St. Louis, Mo.; Secretary, B. S. Osborn, New York; Treasurer, F. W. Nickerson, Boston, Mass.

WILLIAM A. BALDWIN has been appointed Manager of the Pennsylvania Railroad. The office is a new one, and the duties are of a character which will greatly relieve General Manager Thomson, of the Pennsylvania Railroad, and General Manager Caldwell, of the Pittsburg, Cincinnati and St. Louis lines, over which his authority will also extend.

MR. JAY GOULD has been elected a Director of the National Stock Yards at East St. Louis.

AT the Autumn meeting of the Iron and Steel Institute, London, on the 11th inst., Capt. D. N. Jones, of Pittsburg, read a paper on the manufacture of steel and steel rails in America.

A. J. DREXEL has been elected one of the Trustees of the Peabody Educational Fund in place of George W. Riggs, deceased. Among the Trustees are Ex-Presidents Grant and Hayes, Hon. Hamilton Fish, Hon. William M. Evarts, Hon. R. C. Winthrop.

THE Grand Division of the Order of Railway Conductors concluded their fourteenth annual meeting at Buffalo, N. Y., on the 7th inst. The following are the officers for the ensuing year: Grand chief conductor, C. S. Wheaton, Elmira; assistant grand chief conductor, P. E. Fitzgerald, St. Louis; grand secretary and treasurer, W. P. Daniels, Cedar Rapids; grand senior conductor, S. H. Detories, Toronto; grand junior conductor, W. L. Dunn, Scranton; grand inside sentinel, W. H. George, Houston, Tex.; grand outside sentinel, W. A. Webster, St. Thomas, Ont.; executive committee, C. R. Ashton, Council Bluffs; H. S. Chapman, Buffalo.

The Coal Trade.

The leading coal carrying companies make the following reports of their tonnage for the week ending October 1, and for the year to same date, compared with their respective amounts carried to the same date last year:

	Week.	1881.	1880.
Reading Railroad	159,871	6,452,757	5,694,466
Schuylkill Canal	14,257	444,395	369,726
Lehigh Valley	86,914	4,625,602	3,657,542
Delaware, Lackawanna and Western	81,952	3,118,865	2,527,424
Shamokin	23,407	806,402	640,790
Central R. R. of New Jersey	85,090	3,208,623	2,694,232
United R. R. of New Jersey	28,126	1,147,512	832,805
Pennsylvania Coal	31,907	1,010,975	809,123
Delaware and Hudson Canal	70,238	2,639,763	2,180,421
Huntingdon and Broad Top Mountain	11,346	394,589	329,731
Penn. and New York	.....	1,187,522	880,111
Clearfield, Pa	.....	1,743,651	1,192,092

The total tonnage of anthracite coal from all the regions for the week ending Oct. 1, as reported by the several carrying companies, amounted to 541,435 tons, against 535,962 tons in the corresponding week last year, an increase of 5,473 tons. The total amount of anthracite mined for the year is 20,528,249 tons, against 16,819,922 tons for the same period last year, an increase of 3,708,327 tons. No reports of bituminous coal shipments have been received, excepting those of the Cumberland region noted below. The total amount of bituminous mined for the year is 3,554,060 tons, against 3,156,693 tons for the corresponding period last year, an increase of 397,367 tons. The total tonnage for the coal year is 24,082,309 tons, against 19,976,615 tons to same date last year, an increase of 4,105,694, tons. The quantity of coal and coke carried over the Pennsylvania Railroad for the week ending October 1 was 158,302 tons, of which 118,631 tons were coal and 39,671 tons coke. The total tonnage for the year thus far has been 6,708,601 tons, of which 4,911,074 tons were coal and 1,797,527 tons coke. These figures embrace all the coal and coke carried over the road east and west. The shipments of bituminous coal from the mines of the Cumberland coal region during the week ended October 1 were 49,617 tons, and for the year to that date 1,543,545 tons, a decrease of 17,537 tons as compared with the corresponding period of last year. The coal was carried to tidewater as follows: Baltimore and Ohio Railroad—week, 29,635 tons; year, 1,000,019 tons; increase compared with 1880, 77,726 tons; Chesapeake and Ohio Canal—week, 13,304 tons; year, 333,273 tons; decrease compared with 1880, 134,624 tons. Pennsylvania Railroad—week, 6,677 tons; year, 209,049 tons; increase compared with 1880, 38,159 tons. The Reading Railroad shipment for last week, ending October 8th, was 183,000 tons, of which 48,500 tons were sent to and 51,000 tons shipped from Port Richmond, and 16,000 tons sent

to and 15,900 tons shipped from Elizabethport. —*Phil. Ledger, Oct.* 10.

Statement of the Public Debt of the United States, October 1, 1881.

The foregoing is a correct statement of the public debt, as appears from the books and Treasurer's returns in the Department at the close of business, September 30, 1881.

H. F. FRENCH,
Acting Secretary of the Treasury.

Northern Central Railway.

The following is a comparative statement of the gross earnings, operating expenses, and net earnings of the Northern Central Railway for the month of August—

	1881.	1880.
Gross earnings	$498,008 52	$453,923 51
Operating expenses	403,673 42	330,966 59
Net earnings	$94,335 10	$122,956 92

—showing an increase in earnings of $44,085 01, with an increase in expenses of $72,706 83, making a decrease in the net earnings of $28,-621 82.

For the eight months ending with August, the gross earnings, operating expenses and net earnings were:

	1881.	1880.
Gross earnings	$3,600,687 94	$3,120,012 24
Operating expenses	2,402,628 18	2,146,816 42
Net earnings	$1,198,059 76	$973,195 82

—showing an increase in earnings of $480,675 70, in expenses of $255,811 76, and in net earnings of $224,863 94.

Imports of Dry Goods at New York.

The Imports of Foreign Dry Goods at New York for the month of September, were:

ENTERED FOR CONSUMPTION.

AMERICAN RAILROAD JOURNAL.

Financial and Commercial Review.

THURSDAY EVENING, Oct. 13, 1881.

The quotation for money this morning on acceptable Stock Exchange collateral was 5@6 per cent, in the afternoon it was 5 per cent; but in the last hour it fell to 3@4 per cent.

The posted rates for prime bankers' sterling were 4.79½@4.83½; the actual rates were 4.78½ 4.79 and 4.82½@4.83. Cable transfers were 4.83½@4.84, and prime commercial bills were 4.76¾@4.77. The actual rates for Continental exchange are as follows: francs, 5.28⅛@5.25; marks, 93⅝@94½, and guilders, 39½@39⅝.

Under date October 10th notice is given by the Secretary of the Treasury that on and after Monday, the 17th inst., United States bonds embraced in the 105th call will be redeemed at the Treasury Department in Washington to the amount of $5,000,000, with interest to the date of payment. The weekly purchases at the Sub-Treasury in New York will continue as heretofore authorized.

The total outstanding funded indebtedness of the District of Columbia and late corporation of Washington now amounts to $21,896,450, of which $10,013,000 is registered and $11,883,450 coupon bonds and stocks.

The proposals to sell the government 3½ per cent bonds (extended fives and sixes) at par and accrued interest were present at the Sub-Treasury at noon on Monday the 10th inst., and aggregated $8,730,150. Only $2,000,000 of the bonds were accepted, of which $254,500 were extended fives.

By referring to the Statement of the Secretary of the Treasury, given in another column, it will be seen that the total debt of the United States on the 30th of September was $2,049,542,473 09, less cash in the Treasury $250,686,547 32, leaving net $1,798,855,925 77. Since 1st of September the debt has been reduced $17,483,641 66, and since the 1st of July last $41,742,886 21. Of the bonded debt $10,829,350 bears 5 per cent interest, $250,000,000 bears 4½ per cent, $739,347,800 bears 4 per cent, $578,925,100 bears 3½ per cent, and $14,000,000 (navy pension fund) bears 3 per cent. Interest has ceased upon $10,039,595, and $431,553,392 bears no interest, being in the form of certificates of deposit gold and silver certificates, legal tender notes, etc. Of the cash in the Treasury there is $160,024,648 34 in excess of current liabilities. In addition to the debt enumerated above there are outstanding $64,623,512 bonds issued to Pacific Railroad companies, and known as the currency 6s.

The payments made from the United States Treasury in September, exclusive of interest or principal of the public debt, were on account of civil and miscellaneous, $23,804,284 58; war, $4,090,447 84; navy. $1,183,701 23; Interior (Indians) $663,997 31, and do. (pensions) $3,550,864 86—total, $13,293,295 82.

The amount of United States old and legal tender notes outstanding is $346,741,056, and of fractional currency $8,375,934—total, $355,116,990. The ameunt of the National bank circulation outstanding is $357,770,490 currency, and $980,450 gold notes.

The closing quotations on Thursday were: Adams Express, 138@140; American Express, 91⅝@93; American District Telegraph, 49@52; Chicago, Burlington and Quincy, 154¾@154; Canada Southern, 58⅝@59; Chicago and Northwestern, 123⅜@123½; do. pref., 134½@134¾; Chicago and Alton, 129½@130; Central of New Jersey, 93½@93⅝; Chicago and Rock Island, 133@134; Central Pacific, 94⅜@94⅝; Chicago, Milwaukee and St. Paul, 108¾@109; do. pref., 121@122; Chicago, St. Louis and New Orleans, —@—; Cleveland, Columbus, Cincinnati and Indianapolis, 92½@93; Columbus, Chicago and Indiana Central, 20½@20¾; Delaware and Hudson Canal, 107¼@107½; Delaware, Lackawanna and Western, 123@123¾; Hannibal and St. Joseph, 97@98½; do. pref., 114⅞@115½; Illinois Central, 130½@130¾; Lake Erie and Western, 44½@43¾; Lake Shore and Michigan Southern, 119⅜@119½; Metropolitan Elevated, 87@87½; Manhattan Elevated, 44¾@45; Michigan Central, 88¾@88½; New York Elevated, 111@112; New York, Lake Erie and Western, 44⅜@44⅞; do. pref., 87½@88; New York Central and Hudson River, 138½@138⅞; Ohio and Mississippi, 43½@43½; do. pref., 104@110; Ohio Central, 26⅜@26½; Texas and Pacific, 49½@49⅝; Union Pacific, 118⅝@118¾; United States Express, 70½@71; Welsl-Fargo Express, 130@131; Western Union Telegraph, 86¼@86½; Wabash, St. Louis and Pacific, 48¼@49; do. pref., 89⅛@89½.

Railroad Earnings.

The earnings of the Central Pacific Railroad company for the month of September, 1881, were $2,293,000, against $1,964,996 for the month of September, 1880, an increase of $328,004. For the first nine months of 1881 the earnings were $17,004,544, against $14,283,-195 for the corresponding period of 1880, an increase of $2,721,349.

The gross earnings of the New York and New England Railroad company for the month of August, 1881, were $280,523.78, the operating expenses $174,751.78, and the net earnings $105,772.

The earnings of the St. Paul Minneapolis and Manitoba Railroad company for the week ending September 30, 1881, were $142,887.92, against $83,043.03 for the same week in 1880, and increase of $59,844.89. For the four weeks ending September 30, 1881, $485,735.77; same period in 1880, $274,187.94; increase, $211,-547.83. From January 1 to September 30, 1881, $3,236,459.37; corresponding period of previous year, $2,216,858.14, an increase of $1,019,-601.23.

The earnings of the Denver and Rio Grande Railway company for the first week in October, 1881, were $159,127; same week last year, $106,-576; increase, $52,551.

The earnings of the Union Pacific Railway company the first week in October, 1881, were $829,113; for the same period in 1880, $584,953; increase, $244,160. From January 1 to October 7, $19,950,802; same time 1880, $17,204,655; increase, $2,746,147.

The earnings of the Milwaukee, Lake Shore and Western Railroad company for the first week in October, 1881, were $18,414; same period in 1880, $8,394; increase $10,020.

The earnings of the Houston and Texas Central Railway company for the third week in September, 1881, were $88,336.06; for the same period in 1880, $96,162.71; decrease, $7,826.65. From January 1 to September 22, 1881, $2,554,-922.55; same time 1880, $2,280,371.93; increase, $274,550.62.

Illinois Central Railroad.

During the month of September, 1881, the traffic on the lines operated by this company was, (estimated):

In Illinois	$619,669 00
In Iowa (leased lines)	193,941 00
Total	$813,610 00

The traffic for the same month in 1880, on the same mileage, was (actual):

In Illinois	$628,725 28
In Iowa (leased lines)	178,111 24
Total	$806,836 52

During September 1881, the land sales were 4,604.09 acres for $18,111.51 and the cash collected on land contracts was $18,293.31.

L. A. Catlin, *Secretary.*

Interest and Dividends.

The Baltimore and Ohio Railroad company has declared cash dividends of 5 per cent. on the stock of the main stem and of the Washington Branch, payable on the 1st of November.

The Wabash, St. Louis and Pacific Railway company has declared the regular quarterly dividend of 1½ per cent. on the preferred stock, payable November 15.

The Directors of the New Bedford and Fairhaven Street Railway company have voted a dividend of 4½ per cent. from the earnings of the past six months.

At Buffalo, N. Y., on the 8th inst., in the case of Henry Clews vs. W. L. Sessions et al., for $30,000 damages for malicious prosecution, the jury rendered a verdict for the plaintiff in the sum of $12,000.

Dividend Notices.

THE LAKE SHORE AND MICHIGAN SOUTHERN RAILWAY COMPANY,
TREASURER'S OFFICE, GRAND CENTRAL DEPOT,
NEW YORK, September 27, 1881.

The Board of Directors of this Company have this day declared a quarterly dividend of TWO Per Cent upon its capital stock, payable on TUESDAY, the first day of November next, at this office. The transfer books will be closed at 3 o'clock, P. M., on Saturday, the first day of October next, and will be reopened on the morning of Friday, the fourth day of November next.

Works, CHESTER, Pa.

NEW YORK, LAKE ERIE, AND WESTERN RAILWAY.

TO THE TRAVELING PUBLIC.

During the Centennial season—six months closing September 10, 1876—the Erie Railway carried almost Three Million passengers, without a singe accident to life or limb, or the loss of a piece of baggage.

And for a whole year the official records of the United States Post Office Department show the arrivals of Erie Railway trains in New York, on time, to be from 15 to 27 per cent ahead of competing lines.

Facts well worthy the consideration of travelers.

Scientists Obstructing Progress.

Professional scientists—often those filling college chairs—are more apt than other men to suggest difficulties and throw obstacles in the path of scientific progress. Mankind in general are now quite credulous in respect of science. They are too ready to believe in the announcements of scientific pretenders. Savants themselves incline to the other extreme of doubt. They are sometimes the bitterest opponents of those original thinkers and discoverers who are continually forcing the boundaries of human conquest over the unknown. Scientific men said it would be impossible to drive railroad trains up grades of over fifteen feet to the mile. A grade of one hundred feet is considered easy for the modern locomotive. The same carping class declared that no steamship could carry coals enough to run her across the Atlantic Ocean. They ridiculed the earliest attempts to lay an Atlantic cable, because no wire could be sufficiently insulated at great sea depths nor be secured against rupture from various causes. They have demonstrated to their own satisfaction over and over again that the electric light could never economically compete with gas, and that its subdivision was an impossibility. These are a few out of many examples of the inability of some scientists to appreciate the discoveries and claims of men of genius who know no such word as fail.

Sir William Thomson, of England, is more liberal and hopeful than most of his scientific brethren in the estimate he puts on the future of electricity. But in his address before the British Association at York, he is so very anxious to avoid the terrible suspicion of being sanguine that he throws cold water on some of the most reasonable expectations of modern science. It has for some time been hoped and believed that the immense tidal force now daily wasted could be utilized as a motive power. Tide mills have been in successful operation for many years. The tide is caught on its rise, imprisoned in a basin, and used like any other reserved water to drive mills. Why could not this be done on the large scale in great estuaries and bays, and the pent-up water serve to drive electric engines, and currents of great power be conveyed by wire to distant cities, there to be used for the production of light and the movement of machinery? Sir William Thomson says it would take a dock area of forty acres to produce one hundred-horse power of tidal force, and that the cost of constructing the artificial basins puts the scheme financially out of the question. This is mere assumption. Of course it would be possible to spend so much money on the tidal reservoirs as to make the plan unprofitable. But Nature has provided places along every sea coast where the operation could be performed by the construction of a moderately expensive sea wall. Granting, however, that the tidal force is not available, can we not fall back on the wind as an ally? in this direction. Windmills with him are as expensive as tidal basins. It is true, as he says, that some of them are very costly machines. But it is surely within the resources of Yankee ingenuity to make cheap and efficient windmills for the performance of almost any work required of them. Little dependence can be placed on windmills for steadiness. Sir William Thomson offers no encouragement But M. Faure's brilliant invention for storing up electricity enables us to dispense with a regular and continuous motive power for the development of currents. It is not necessary for the tide and wind to be operative at the very time when the electricity is required for use. For the latter can now be compressed like carbonic acid gas or oxygen or hydrogen, and kept in store for days without apparent loss of power. Electricity developed by the motive power of the wind by day could be used by night, and the production of one uninterrupted week of wind could be accumulated to meet the deficiency of a succeeding lull.

The question has its admitted difficulties. But it is not extravagant to predict that the day is coming when not only the incalculable tidal energy now fruitlessly expended on every shore, and all the winds of heaven, will be pressed into the service of man. They will furnish light for him. They will drive his printing presses and his grist mills, and perhaps his railroad trains. They will not necessarily banish steam or other motive powers now in use. But they will supplement and reinforce the present working agencies of the world. They will be of use at least in places where fuel is dear and labor scarce. We are less likely to err in assuming that these things are feasible—since M. Faure's remarkable discovery—than that they are impossible for any reason now apparent which may cease to be of force after a further exercise of the inventive faculty of man.

Sir William Thomson concedes that the water power of Niagara Falls could be converted into electric energy at points as distant from the source as Montreal, Boston, New York and Philadelphia. But even Niagara Falls has its limit of converting power. And unfortunately there is only one Niagara. The Falls would do a great deal of electrical work for remote cities, but would still leave the important question unanswered for the majority of mankind. If Mr. Ericsson should ever perfect his solar engine, by which the heat of the sun can be made a motive power, a method for the production of electricity, very cheap and of general application, may then have been discovered. But the solar engine belongs to a future more remote than the improved tidemill and windmill, which, in our opinion, promise the quickest and best results to the genius who will not take "no" for an answer from any scientist, however high his reputation in Europe and America.—The New York Journal of Commerce, Sept. 15, 1881.

Tracing Lost Cars.

Travelers over any of our railroad lines are constantly passing "lost" cars, which are usually among those to be seen standing idly on side tracks. They belong to many different railroads, the initials of which they bear, and "searchers" from which are ever busy hunting them up. In speaking of the manner of tracing a lost car, the Philadelphia Press illustrates how records are kept to show just where such a car is standing, and why it is there. "For instance," says that paper, "if the car is an unwarranted length of time at Germantown Junction, the Pennsylvania Railroad receives a "searcher," either by telegraph or train service, asking why the car is not sent home. In this way a great railroad, stretching half way across the continent, and with its rolling stock scattered over every State in the Union

keeps account of its stock, numbering, in the case of the Pennsylvania Railroad, more than 30,000 freight cars of all kinds. Occasionally one of the number is lost altogether, and the complicated railway detective service is set at work. The last clue to its whereabouts is traced out, and in time the lost car is found somewhere between Texas and Montreal.

"As soon as a car is unloaded it should be started back to the road from which it came, but in New England they turn it over as the common property of the road, and it is run back and forth, carrying local freight. It is not an uncommon thing when a car is loaded and sent to an eastern point that it is not again heard from for three or four months. In the meantime there are more than a hundred clerks employed on the car accounts, and week after week searchers are sent out for the missing car. A fair idea of the magnitude of these accounts may be had from the fact that the entire movement over the Pennsylvania Railroad exceeds over 40,000 per day. Lost freight cars, which were formerly hunted by travelling agents, are now traced by "searchers," official documents which contain the number and description of the lost car, and the date at which it was last seen on the Pennsylvania road. These documents are forwarded in the wake of the car, receiving many official signatures on the way, and finally overtake an agent who has the car in charge."

The Carolina Pines.

A correspondent of the New York World thus describes the lonely pine forests of Carolina:

There is no place that seems further out of the world than the pine forests of Carolina. For half a hundred of miles in every direction from this place the wind of these pleasant September nights finds nothing to touch it into music but the harps of straw that hang a hundred feet high on millions of pines. This continuous monotone is the most lonely sound that ever reached human ears. It is as depressing as the constant sight of the melancholy, drooping moss of the live oaks along the gulf coast. Throughout three or four counties one can frequently ride a distance of ten miles without seeing a house or a living thing. Through deep sand the path winds between the large trees, as monotonous in appearance as the wind above it is in its dirge. Here and there unexpectedly (for no one could reasonably expect to meet human beings or to see a human settlement) a small house is seen by the pathside. But there is no farm. A little patch of cotton and tobacco, and a garden, where the hardest varieties of onions and cabbage grow, make an excuse for a fence of rough-split timber. A dog, if not a deer-hound always a brindle-cur, announces a traveler's appearance, and two or three cleanly women, with snuff-brushes, and without shoes, come to the door to look upon the human being that must have lost his way and come to this end of the earth. The houses are very nearly all the same architecture—wooden structures with steep roofs, containing two large rooms, a piazza for two-thirds the length of the house, leaving space for a third room that is small. The kitchen is a separate building, usually of logs, and it does service also as a dining-room in winter. Just at this season, however, one sees the turpentine gatherers at work in the forest. Near the railroad, of course, lumber wagons are seen, and the smoke of turpentine distilleries and mills rises from the pines. Occasionally, too, a lone cow tinkles her bell in one's hearing, while she seeks wire-grass among the decaying pine straw that covers the whole face of the earth. The pines monopolize the soil. In these extensive forests there is little other growth except along the streams. There juniper and poplar abound; there, too, a vigorous undergrowth of smaller trees flourishes. But on the highlands, on all the ground except the immediate banks of the streams, little undergrowth can be found. So clear are the forests of small trees that one can easily drive a vehicle for miles through the primeval regions without the trouble of making a road. At a distance from the railroads the land is held mainly by poor people. For even pine trees in inaccessible regions are not such property as can be turned into money. But on the lines of railroad a pine forest is a fortune. And here the best timbered lands have recently been bought, and are now worked by men who have capital enough to put up saw mills and distilleries.

No other tree is as variously profitable as the pine. The first money that is made out of it is made by the turpentine men. The tree is boxed, that is, a niche is cut on an old tree near the ground and the back is chipped off for a foot or two above the box. The raw turpentine oozes out in summer and drips down into the box—such quantities of it! On a large tree sometimes four of these boxes can be cut, between which of course a small strip of bark is left—enough to keep the tree alive. Early in the summer the tree workers go into the forests. The "boxers" box the trees, if the field is a virgin forest. Then every week the company of "hackers" go along and "hack" every tree a half inch higher, to keep the flow of the turpentine continuous. This "hacking" is kept up at the rate of a half inch or an inch a week all summer. This can be continued four or five summers. Then the tree is hacked five or six feet high, and, as a producer of turpentine, is valueless. Another company of the tree-workers is the "dippers," who dip the resinous deposit from the boxes and put it in barrels that are placed at convenient intervals. Then the raw rosin is carried to the distillery. Thence, of course, it goes to the market as rosin and as spirits of turpentine. The "virgin" rosin is that which comes from the trees the first summer they are boxed. Nothing can be more beautiful than the virgin rosin when, in its liquid form, it flows from the distillery and shapes itself into all the fantastic forms of the snow crystals and icicles, and of such wonderfully many tints.

After the turpentine men have made fortunes from the pines, the same trees have other fortunes for the lumber-men. There is more lumber to-day uncut in North Carolina than in all the lumber States of the Northwest. A saw-mill here by the railroad is a fortune. The yellow or "long leaf" pine attains here its best growth. The trees are branchless for 50, sometimes for 70 or 80 feet from the ground; and they are all heart. The sap is very thin. When a tree has been drained by the turpentine men for four or five years the lumber is not as good as that of an unworked tree. But no expert can tell the difference if the tree has not been worked too long.

JAMES A. GARFIELD.

OBIT SEPTEMBER 19, 1881.

THE END.

A wasp flew out upon our fairest son,
And stung him to the quick with poisoned shaft,
The while he chatted carelessly and laughed,
And knew not of the fateful mischief done.
And so this life, amid our love begun,
Envenomed by the insect's hellish craft,
Was drunk by Death in one long feverish draught,
And he was lost, our precious, priceless one!
Oh, mystery of blind, remorseless fate!
Oh, cruel end of a most causeless hate!
That life so mean should murder life so great!
What is there left to us who think and feel,
Who have no remedy, and no appeal,
But damn the wasp and crush him under heel?

J. G. HOLLAND, *in N. Y. Tribune.*

AN order was made by Judge Gilbert, in the Kings County Supreme Court, on the 17th inst., discharging Austin Corbin from the office of Receiver of the Long Island Railroad Company. The affairs of the company will be managed by its own officers hereafter.

THE Green Bay and Minnesota Railroad was taken out of the hands of the receiver on the 15th inst. and turned over to the new company, which is known as the Green Bay, Winona and St. Paul Railroad Company. The securities of the new company will shortly be ready for delivery to those who surrendered the old under the reorganization scheme.

THE Chief of the Bureau of Statistics at Washington reports that during the month of September there arrived in the customs districts of Baltimore, Boston, Detroit, Huron, Minnesota, New Orleans, New York, Passamquody, Philadelphia, and San Francisco 69,924 passengers, of whom 58,452 were immigrants, 8,380 citizens of the United States returned from abroad, and 3,092 aliens not intending to remain in the United States. Of this total number of immigrants there arrived from England and Wales 8,997, Ireland 5,633, Scotland 1,971, Austria 1,043, Germany 19,708, Norway 1,953, Sweden 3,703, Canada 8,710, China 976, all other countries 5,858. During September, 1880, the arrivals numbered 54,874.

IS FIRE INSURANCE A FRAUD?

THE question upon many lips to-day is —is fire insurance a fraud? This question is forced upon thinking men by the action of some companies in their manner of settling claims. Take, for illustration, a single case occurring at the recent fire in the storehouse on Fourth avenue. A party, a year or more ago, stored his valuables in this storehouse for safety, until such a time as he should require them for home purposes again. To make what was considered safe doubly safe, he took out a policy of insurance for half the value of the goods stored. There was no trouble in obtaining such a policy, as agents by the score stood ready to take the business, and scores of companies were only too willing to assume the risk.

A fire takes place, and all these valuables were destroyed. The gentleman takes his policy and marks the value of the different articles, so far as he remembers them, leaving without mark of value such articles the value of which he has forgotten or is unable to determine. There were trunks containing the many articles of women's and children's apparal, the contents of which cannot be specified, and the number given simply because not known. These trunks were marked "sundries," and many articles value unknown; but enough are designated and described and valued to make the loss 25 per cent more than the face of the policy; and claim for payment is made on the agent. The agent looks at the list, and refuses to entertain the same. He demands that each article in every trunk shall be specified, and that each trunk and every article shall have a money value affixed. But the gentleman protests that he is unable to do this; that he has already affixed values to more than cover the policy; that even if he could affix values to twice the face of the policy, he could only recover the face; that the company can be satisfied that he has lost more than is covered by the policy, and he is willing to throw all he cannot place values on out, and make his claim for the amount of policy on the things he can place values on. All this does not satisfy the agent: he must have proof of the entire loss. The reason he gives is, that this is necessary to protect the company from fraud.

Here is the lame point in fire insurance contained in a nutshell—the willingness to issue a policy before a fire without protecting the company, and then trying to protect the company after the fire by harassing the policy-holder. Now, out of the hundreds of thousands of policy-holders there are very few indeed who can give a correct list of their household goods, and, because of this, must have trouble and delay in collecting the face of their policies, or, what is worse, are obliged to effect a compromise with the company in order to save a lawsuit. The time for a company to protect itself is before it issues a policy—the same as a merchant does before he sells a bill of goods. When a man applies for credit at any well-regulated store, his standing and responsibility are looked after before credit is granted. So should it be in fire insurance. When a man desires a policy, his standing and responsibility should be known before a policy is granted, and the value of the goods insured fully understood to be enough to cover the face of the policy, the same as collateral is expected to be large enough to cover the amount of a good loan. But in the unseemly competition to issue policies, risks are not carefully selected, and the result is that in case of a fire all claims are liable to be contested, in which event the innocent are generally the sufferers, while rogues and thieves are the gainers. Until there shall be a radical change in the direction of good business management, many, like the writer, will consider fire insurance a fraud.

CORNERS.

THE question of adopting stringent measures for preventing "corners" in the grain and financial markets is being agitated with unusual force just at present, and the resurrection of old and neglected laws on the subject is producing decided surprises in various quarters. In England special attention has been directed to the matter through the recent operations in the Liverpool cotton market; and the advisability of action by Parliament to prevent transactions in "futures" is being widely considered. The sale of options or kindred transactions have always been interdicted by the common law, though the means which have been taken during the past one hundred years for removing the restrictions on trade have had the effect of practically doing away with these laws, or at least have led to their having become disregarded and generally forgotten.

One of the most disastrous features of this method of gambling is that shown in the manipulations from which the grain market not infrequently suffers. The direct evils of the nefarious work of grain cornering are apparent enough, while the disturbance it makes for general business is so widespreading and varied in character as to make the indirect influence immeasurable. When it is considered from a humane standpoint, the evil is one which is fraught with most unhappy and disastrous consequences upon the people, who find the prices of their main articles of subsistence dependent upon the swindling deals of the few men play-

ing with marked cards. The recent great corner in the Chicago grain market was productive of such evil as to arouse the courts of Illinois to action, which will very likely do much toward suppressing such handlings of the market in the future, or at least toward classing them with the corners among which they belong. Judge Jameson has just presented to the Grand Jury of the Criminal Court of Chicago a fearless charge on the subject, in which he called attention to the following statute (Revised Statutes Illinois, Chapter 38, Section 130):

"Whoever contracts to have or give to himself the option to sell or buy at a future any grain or other commodity, stock of any railroad or other corporation, or gold, or forestalls the market by spreading false rumors to influence the prices of commodities therein, or corners the market, or tries to do so in relation to any of such commodities, shall be fined not less than $10 nor more than $1,000, or confined in the County Jail not exceeding one year, or both."

By this section the sale of options forstalling the market and cornering the market are denounced as three separate misdemeanors. "The thing which we know as a 'corner' in the market," says Judge Jameson, "might be briefly described as a process of driving unsuspecting dealers in grain, stock, and the like into a corral and relieving them of their purses. The essence of the offence consists in the party securing a contract for the future delivery of some commodity at his option, and then, by engrossing the stock of such commodity in the market, making it impossible for the other party to complete his contract by purchasing of his adversary at his own price, or paying in cash the difference fixed by such adversary." The comment concerning the evil of this operation in the grain market is applicable to other markets, and the tendency of corners generally is well marked out in the charge, which says that by them the course of business, instead of proceeding quietly and healthily, will become broken by fits of fever and panic; unlawful gains will be preferred to the slow profits of legitimate trade; our farmers, partaking of the prevalent spirit, will hold back their crops in expectation of corner processes, borrowing money on mortgage to carry on their operations, instead of realizing by the sales of farm products. Perhaps there will now be a scratching among dusty old New York statutes touching on this subject, to see what of the kind can be resurrected here. It would not be an untimely search; and the provision of what may be wanting in our laws in this respect cannot receive too prompt or careful attention.

Organization.

Articles of consolidation of the Toledo, Cincinnati, and St. Louis Railroad Company, of Illinois and Indiana, and the Toledo, Cincinnati, and St. Louis Railroad Company, of Illinois, were filed on the 5th inst. at both Springfield and Indianapolis. The former Company is the result of a consolidation of a company of like name with the Vermillion and State Line Railroad Company, while the latter Company is formed by a consolidation of the Tuscola, Charleston, and Vincennes and the Charleston, Niagara and St. Louis railroad companies. The name of the consolidated company is the Toledo, Cincinnati, and St. Louis Railroad Co, the capital stock is $4,000,000, and the principal office is to be at Charleston, Coles county, Ills. The first-named Company was organized for the purpose of constructing and operating a railroad from the dividing line between Ohio and Indiana in Orleans county, where the Toledo, Delphos, and Burlington road intersects the State line, to a point on the south line of Vermillion county, Ill., near the crossing of the said line by the Danville and Southwestern Railroad; and the second was organized for the purpose of constructing and operating a road from a point on the State line of Indiana and Illinois, in Vermillion county, Ill., where the Frankfort and State Line road intersects said State line, extending through the counties of Vermillion, Edgar, Douglass, Coles, Cumberland, Shelby, Fayette, Bond, Montgomery, Madison, and St. Clair, to the city of East St. Louis.

Articles of incorporation of the Chicago and Northwestern Railway Company were filed at Springfield, Ill., on the 5th inst. It is proposed to construct a railroad from the city of Chicago in a westerly direction to some point on the westernmost boundary of the county of Cook. The capital stock is $20,000, and the board of directors consists of Eckley B. Coxe, Alexander B. Coxe, Henry B. Coxe, Ezra B. Ely, and George Ely.

At a meeting of the stockholders of the Western Union Telegraph Co., held in this city on the 12th inst., the following gentlemen were elected directors: Norvin Green, Thos. T. Eckert, Edward D. Morgan, John Van Horne, Aug. Schell, Harrison Durkee, Jay Gould, Russell Sage, Alonzo B. Cornell, Sidney Dillon, Edwards S. Sandford, James S. Banker, Moses Taylor, Robert Lenox Kennedy, Hugh J. Jewett, J. Pierpont Morgan, Frederick L. Ames, Edwin D. Worcester, Wm. D. Bishop, Geo. B. Roberts, Samuel Sloan, Cyrus W. Field, Chauncey M. Depew, Zalmon G. Simmons, Erastus Wiemen, James W. Clendenin, and George J. Gould.

The directors of the North St. Louis Railroad Company, elected on the 14th inst., are: M. A. Wolff, J. A. Robertson, F. W. Mott, John H. Terry, John Lumsden, Louis Gottschalk, and C. F. Hermann. The officers are: M. A. Wolff, president; J. A. Robertson, vice-president; and F. W. Mott, secretary and treasurer.

The directors of the Profile and Franconia Notch Railroad Co., recently elected, are: Emmons Raymond, of Boston; John H. George, of Concord; Samuel N. Bell, of Manchester; Walter Aiken, of Franklin; Joseph A. Dodge, of Plymouth, John A. White, of Concord; Edward Spalding, of Nashua; and Isaac Cruft, of Boston.

Articles of incorporation have been filed in the office of the Secretary of State of Iowa, of the Shenandoah, Sydney, and Pacific Railway Company. The object is to build a road from Shenandoah, in Page county, to the Missouri River; thence to a connection with the Republican Valley branch of the Union Pacific. Capital, $2,000,000.

The Knoxville and Augusta Railway, the Rabun Gap Short Line Railway of North Crrolina and the Clayton Railroad of Georgia were consolidated on the 18th inst. under the name of the Rabun Gap Railway Company. The line extends from Knoxville to Lula on the Atlanta and Charlotte Air Line road. The road is being built by the Richmond and Danviile syndicate.

The directors of the Baltimore and Ohio Railroad Company, elected on the 13th inst., are J. L. Donaldson, of Baltimore; H. Pearson, of London; F. Jansen, of Louisville, and T. Harrison Garrett, of Baltimore. The new board organized by the election of W. T. McClintock as President, and the other officers the same as last year, except that A. Donaldson was chosen auditor and assistant secretary, instead of E. K. Punnett. The committee appointed to carry out the plan for taking the road out of the hands of the receiver decided to proceed immediately with their task. The committee is composed of W. T. McClintock, Chairman; T. H. Garrett, Treasurer, and W. W. Scarborough.

Personal.

The following is a complete list of the Commissioners appointed by the President to investigate the construction of the Pacific Railroads according to Act of Congress: Northern Pacific Railroad—About 75 miles of completed road on the eastern end: Barnabas Burns, of Mansfield, Ohio; Ezekiel Clark, of Iowa City, Iowa; David C. Shepard, of St. Paul, Minn. Northern Pacific for about two hundred completed miles on the western end: Thomas T. Minor, of Port Townsend, Washington Territory; H. H. Gerringe, of New York city: Chris. W. Slagle, of Fairfield, Iowa. Atlantic and Pacific Railroad—Simon Stevens, of New York, N. Y.; R. D. Mussey, of Ohio; Edward C. Dean, Michigan. New Orleans Pacific—Thomas Hasard, Florida.

H. H. COLLBRAN has been appointed General Freight and Ticket Agent of the Alabama Great Southern Division of the Alabama Great Southern, Vicksburg and Meridian, and Vicksburg, Shreveport and Pacific Railroads, vice L. B. Morrison, who has been appointed General Eastern Agent of the entire line.

JOHN M. Douglass, formerly President of the Illinois Central Railroad Company, has been appointed Receiver of the Ohio and Mississippi Railroad Company, vice John King, Jr., resigned.

C. E. PERKINS has been elected President of the Chicago, Burlington and Quincy Railroad Company, vice J. H. Forbes, resigned.

CHARLES P. Clark has been elected Second Vice President of the New York, New Haven and Hartford Railroad Company.

C. E. HENDERSON has been appointed General Manager of the Indiana, Bloomington and Western Railway vice Maj. Henning resigned.

P. P. WRIGHT, of Jersey City, late Master of Transportation of the New York, Lake Erie and Western Railroad, has received and accepted the appointment of General Superintendent of the Lake Shore and Michigan Southern Railway.

JOHN H. Witman has been appointed General Passenger Agent in Chicago, for the West and Northwest, of the Grand Trunk and the Chicago and Grand Trunk Railways.

THE new Board of Directors of the Western Union Telegraph Company organized on the 13th inst. by the election of the following officers: Norvin Green, President, Thomas T. Eckert, Vice-president and General Manager; John Van Horne, Augustus Schell and Harrison Durkee Vice-presidents; A. R. Brewer, Secretary; and R. H. Rochester, Treasurer. The Executive Committee consists of Norvin Green, Thomas T. Eckert, Edwin D, Morgan, John Van Horne, Augustus Schell, Harrison Durkee, Jay Gould, Russell Sage, Alonzo B. Cornell, Sidney Dillon and Cyrus W. Field.

New York, Lake Erie and Western Railroad.

The gross earnings, working expenses and net earnings of the New, York, Lake Erie and Western Railroad Company for the month of August, 1880 and 1881, were as follows:

	1880.	1881.
Gross earnings	$1,606,873 68	$1,772,895 26
Working expenses	957,685 85	1,095,523 47
Net earnings	$649,187 83	$677,371 79

—showing an increase for the month in gross earnings of $166,021.58, in working expenses of $137,837.62, and in net earnings of $28,183.96.

From October 1, 1880, to August 31, 1881, the gross earnings, working expenses and net earnings were:

	1879-'80.	1880-'81.
Gross earnings	$16,906,691 54	$18,981,406 35
Working expenses	10,615,626 50	12,103,713 34
Net earnings	$6,291,065 04	$6,877,693 01

—showing an increase for the eleven months in gross earnings of $2,074,714.81, with an increase in working expenses of $1,488,086.84, making an increase in net earnings of $586,627.97.

Western Union Telegraph Co.

AT the annual meeting of the stockholders of the Western Union Telegraph Co., held on the 12th inst., the President submitted his annual report. The following are its principal parts:

The capital stock of the Company is $80,000,000, it having been increased during the year from $41,073,410, by the issue of $38,926,590.

Of the capital stock there is owned by and in the treasury of the Company $20,017.50.

The bonded debt at the close of the year was as follows:

Bonds due March 1, 1900, 6 per cent	$951,102 00
Bonds due May 1, 1900, 7 per cent	3,920,000 00
Bonds due May 1, 1902, 7 per cent	1,373,000 00
Total	$6,244,102 00
Less balance of sinking funds appropriations, not yet used for redemption of bonds, held by the Union Trust Company, trustees	190,855 18
Total	$6,053,246 82

BUSINESS OF THE YEAR.

Surplus July 1, 1880		$403,255 14
The revenues of the year ending June 30, 1881 were	$14,060,806 01	
Expenses (including leased line rentals and taxes)	8,420,165 79	
Net profits		5,640,640 22
		$6,043,895 36
From which there was applied:—		
For dividends	$3,732,633 25	
For interest on bonds	427,455 61	
For sinking fund appropriations	40,005 35	
		4,200,094 21
Surplus of net revenue for the year, over dividends, interest, and sinking fund appropriations	$1,440,546 01	
For new property there was appropriated:—		
For construction of new lines and erection of additional wires	$1,041,657 51	
For telegraph stocks and other properties	674,384 88	
		$1,716,542 39
Surplus July 1, 1881		127,258 76
		$6,043,895 36

During more than half of the year for which this statement is made the Company's expenses were largely increased and revennes somewhat diminished by a sharp and litigious competition, and by maintaining the separate organization of the Atlantic and Pacific Telegraph Co. under the then existing agreements; and during the latter half much of the duplicate expenditures for rents, etc., besides extraordinary legal expenditures, had to be borne.

A statement of the revenues and disbursements of the Company from July 1, 1866, is then given, from which it appears that of the $51,250,000 of net profits accruing to the Company during the last fifteen years, more than $26,750,000 have been paid to stockholders in cash dividends, more than $17,250,000 in stock dividends, $6,000,000 for interest and sinking fund on bonded debt, leaving a present surplus unappropriated of $1,090,000.

President Green gives an account of the consolidation with the Western Union Co. of the lines and properties of the American Union Telegraph Co. and the Atlantic and Pacific Telegraph Co. He says:

"In the general statement now presented the item of the Atlantic and Pacific Telegraph Co. stock is taken out of the list of assets and charged with the funds appropriated out of net profits. The remainder of assets, now aggregating over sixteen and a half millions, is credited by the fifteen and a half millions which has been capitalized by the stock dividend. These assets have an actual value much greater than the cost value at which they were stated.

"The business of the year ending June 30 has been exceedingly gratifying, considering it has been a year of continued warfare and legal controversies, involving considerable expenditures affecting the net results.

"For the quarter which has expired since the end of the fiscal year for which this report is made, a large increase of net profits is shown, indicating very much better results for the ensuing year.

"It will be seen that there was invested in new and additional properties $1,716,542.39. These large additions to the plant and acquisitions of telegraph stocks and properties are in pursuance of the long-established policy which has built up and expanded the Company to its present dimensions and strength; and the moneys invested therein are believed to be worth more to the stockholders than if paid to them in cash dividends.

"GOLD AND STOCK TELEGRAPH CO.

"The capital stock of the Gold and Stock Telegraph Co. is $5,000,000, of which the Western Union Telegraph Co. owns $1,890,500, and Company itself owns $105,600 Its bonded debt, maturing May 1, 1885, is $500,000, of which $65,300 is owned by the Company.

"Its net profits for the year ending June 30, 1881, were $412,422.19. During the year were paid for quarterly dividends, $200,000; for interest on bonded debt, $35,000; for construction of lines and purchase of patents, $70,000. The surplus for the year, of $10,500, has been invested in telephone stocks.

"The earnings of the Company for the year were up ward of 7½ per cent on its present capital stock above its interest account.

"INTERNATIONAL OCEAN TELEGRAPH CO.

"The capital stock of the International Ocean Telegraph Co. is $3,000,000, of which the Western Union Telegraph Co. owns $1,517,000, and the Company itself owns $194,600. It has no debt.

"Its net profits for the year ending June 30, 1881, were $229,252.66. During the year there was paid for quarterly dividends $196,378, and for construction and other new property $5,873.94, leaving the cash surplus at the close of the year $152,744.04, or $27,000.72 greater than it was at the close of the previous year.

"The Company is now earning and paying at the rate of 8 per cent per annum on its present capital.

"ESTIMATE FOR ENSUING YEAR.

"The gross earnings of the Western Union Telegraph Co. for the ensuing year cannot be less than fifteen millions, and the net profits can scarcely fall below six and half millions. The earnings are now, and have been for the first quarter just closed, at a rate considerably above the figures named."

Cincinnati Iron Market.

OFFICE OF E. L. HARPER & Co.
Cincinnati, Oct. 18, 1881.

The market is almost bare of Iron in the South and West and a further advance has been developed. Offerings are light and prices are very firm at the quotations below, and at the close have a strong upward tendency. The expectations are that Hanging Rock charcoal Hot Blast Iron will command $30 within the next thirty days. We quote as follows:

	No.	Mos.
FOUNDRY.		
Hanging Rock Charcoal	1 27 00@28 50	4
Strong Neutral Coke	1 24 00@25 50	4
American Scotch	1 23 50@24 50	4
GREY FORGE.		
Neutral Coke	22 00@22 50	4
Cold Short	21 00@22 00	4
CAR WHEEL AND MALLEABLE.		
Hanging Rock Cold Blast	36 00@38 00	4
" Warm Blast	30 00@32 00	4
Lake Superior 1 and 2	32 00@33 00	4
Lake Superior 3 to 6	34 00@36 00	4
Southern Car Wheel	34 00@35 00	4

THE General Manager of the Chesapeake and Ohio Railway, being unable to complete his road to Yorktown in season to be of service to visitors to the Centennial, is said to exclaimed: "Oh, if Cornwallis had only held on a week longer, I would have been all right."

THE survey of the Tay Canal, which is to be united to the Rideau Canal, has been completed.

Statement of the Public Debt of the United States, October 1, 1881.

Interest paid by the United States, $51,467,272 02; interest repaid by transportation of mails, &c., $14,486,-125 84; interest repaid by cash payments: 5 per cent. net earnings, $655,198 87; balance of interest paid by United States, $36,325,947 31.

The foregoing is a correct statement of the public debt, as appears from the books and Treasurer's returns in the Department at the close of business, September 30, 1881.

H. F. FRENCH,
Acting Secretary of the Treasury.

The Coal Trade.

The leading coal carrying companies make the following reports of their tonnage for the week ending October 8, and for the year to same date, compared with their respective amounts carried to the same date last year:

	Week.	1881.	1880.
Reading Railroad	188,735	6,641,493	5,790,005
Schuylkill Canal	18,915	464,310	375,143
Lehigh Valley	144,866	4,770,648	3,729,288
Delaware, Lackawanna and Western	94,208	3,213,073	2,580,079
Shamokin	22,804	829,206	661,488
Central R. R. of New Jersey	96,505	3,305,128	2,731,146
United R. R. of New Jersey	30,626	1,178,138	842,480
Pennsylvania Coal	30,906	1,031,881	827,074
Delaware and Hudson Canal	72,467	2,712,231	2,214,266
Huntingdon and Broad Top Mountain	11,265	405,855	340,018
Penn. and New York	39,108	1,252,490	919,858
Clearfield, Pa	42,872	1,819,888	1,277,416

The total tonnage of anthracite coal from all the regions for the week ending Oct. 8, as reported by the several carrying companies, amounted to 671,278 tons, against 340,983 tons in the corresponding week last year, an increase of 330,295 tons. The total amount of anthracite mined for the year is 21,199,527 tons, against 17,160,905 tons for the same period last year, an increase of 4,038,622 tons. The quantity of bituminous coal sent to market for the week amounted to 97,716 tons, against 98,040 tons in the corresponding week of last year, a decrease of 324 tons. The total amount of bituminous mined for the year is 3,810,150 tons, against 3,333,194 tons for the corresponding period last year, an increase of 477,041 tons. The total tonnage of all kinds of coal for the week is 768,994 tons, against 439,023 tons in corresponding week last year, an increase of 329,971 tons, and the total tonnage for the coal year is 25,009,692 tons, against 20,494,029 tons to same date last year, an increase of 4,515,663 tons. The quantity of coal and coke carried over the Pennsylvania Railroad for the week ending October 8 was 184,243 tons, of which 138,725 tons were coal and 45,518 tons coke. The total tonnage for the year thus far has been 6,892,844 tons, of which 5,049,799 tons were coal and 1,843,045 tons coke. These figures embrace all the coal and coke carried over the road east and west. The shipments of bituminous coal from the mines of the Cumberland coal region during the week ended October 8 were 56,039 tons, and for the year to that date 1,599,651 tons, a decrease of 50,366 tons as compared with the corresponding period of last year. The coal was carried to tidewater as follows: Baltimore and Ohio Railroad—week, 26,970 tons; year, 1,028,989 tons; increase compared with 1880, 39,808 tons; Chesapeake and Ohio Canal—week, 21,988 tons; year, 354,261 tons; decrease compared with 1880, 130,354 tons. Pennsylvania Railroad—week, 6,912 tons; year, 215,961 tons; increase compared with 1880, 37,834 tons. The coal was brought from the mines as follows: Cumberland and Pennsylvania Railroad—week, 43,734 tons; year, 1,418,-724 tons. George's Creek and Cumberland Railroad—week, 10,364 tons; year, 123,788 tons; Baltimore and Ohio Railroad—week, 1,760 tons; year, 52,430 tons, The Reading Railroad shipment for last week, ending October 15, was 182,500 tons, of which 48,700 tons were sent to and 61,000 tons shipped from Port Richmond, and 10,800 tons sent to and 12,500 tons shipped from Elizabethport.—*Phil. Ledger, Oct.* 17.

IN the United States Court, Milwaukee, Wis., on the 11th inst., Judge Dyer decided the case known as Barnes vs. the Chicago, Milwaukee and St. Paul Railroad Company, concerning the redemption of $2,000,000 worth of old Milwaukee and La Crosse bonds, practically in favor of the defendants.

THE Court of Appeals of New York, in the suit of Henry A. Heiser against Hatch & Foote, has ordered the entry of absolute judgment for $4,357.40, the value of Government securities purchased by Heiser from Hatch & Co., which proved to be counterfeit.

IN the case of the South Carolina Railroad Company, Judge Bond, in the United States Circuit Court, at Charleston, on the 7th inst., overruled the exceptions and confirmed the sale of the road to Barnes, Stout, Higginson, Sloan and Bradley. Notice of appeal to the United States Supreme Court was given on behalf of Cockraft, who excepted to the confirmation of the sale.

New York Stock Exchange.

AMERICAN RAILROAD JOURNAL.

Financial and Commercial Review.

THURSDAY EVENING, Oct. 20, 1881.

In the morning the money market was easy at 4 to 6 per cent. Time loans were 6 per cent. to that rate and a commission. Prime mercantile paper was 6@7 per cent. In the afternoon and at the close the quotations were 4@5 per cent. The extreme rates to-day were 6 and 3 per cent.

The posted rates of the leading drawers of sterling were 4.80½ and 4.84½. The actual rates were 4.79¼@¾ and 4.83¼@4.84. with cables 4.84¼@⅝, and prime commercial bills 4.77¾@4.78½. The actual rates for Continental exchange are as follows: francs, 5.28⅛ and 5.24⅜; marks, 93⅜ and 94½; and guilders, 39½ and 39⅝.

The Governors of the New York Stock Exchange have admitted to dealings at the board the following securities:

Richmond and Danville Railroad Company—40,000 shares—$4,000,000 capital stock and $6,000,000 consolidated mortgage 6 per cent gold bonds due January 1, 1915. The length of the company's own road is 152⅜ miles. By ownership it operates the Piedmont Railroad, 48⅝ miles, upon which the annual fixed charges are $40,000; the Northwestern North Carolina Railroad, 25½ miles; annual charges, $780: by ownership of a majority of the stock of the Richmond and West Point Terminal Railway and Warehouse Company it indirectly controls and operates the following lines: Charlotte, Columbia and Augusta Railroad, 191 miles; Columbia and Greenville Railroad and branches, 229 miles; Spartanburg, Union and Columbia Railroad, 68 miles; Northeastern Railroad of Georgia, 40 miles; Western North Carolina Railroad, 186 miles; Asheville and Spartanburg Railroad, 67 miles; and Virginia Midland Railroad, 400.50 miles. By lease, the Richmond, York River and Charlotte Railroad, 38½ miles; annual rental, $87,500; North Carolina Railroad, 223⅛ miles; annual rent, $260,000; and Atlanta and Charlotte Air Line Railroad 339 miles, annual rental, $462,500, and contingent additional charge of $170,000. The total of lines owned, leased and operated being 2,006½, besides the steamer lines between Baltimore, Md., and West Point and Richmond, Va. The annual fixed charges on this 2,006½ miles of road is $996 per mile, or the equivalent of six per cent on $16,600 per mile.

Texas and Pacific Railway Company (Rio Grande Division)—Additional issue of $1,500,000 first mortgage bonds covering 60 miles additional of road constructed, from the 360th to to the 420th mile post. Bonds numbered from 9,001 to 10,500, being at the rate of $25,000 per mile. The total amount now listed is $10,500,000.

New Orleans Pacific Railway Company—An additional $2,640,000 first mortgage bonds upon 200 miles of completed road, being at the rate of $20,000 per mile. In April bonds Nos. 1 to 1,360 on 68 miles were listed; since then 132 miles of additional road have been completed; bonds Nos. 1,361 to 4,000 each for $1,000, are added to those now on the list, making the total amount now listed $4,000,000.

Houston and Texas Central Railroad Company.—An additional $1,000,000 general mortgage 6 per cent gold bonds, numbered 3,001 to 4,000 inclusive, making the amount now listed $4,000,000.

International and Great Northern Railroad Company.—An additional $300,000 first mortgage 6 per cent gold bonds, making the total listed issue $7,434,000, and $300,000 6 per cent coupon bonds, making total listed issues $6,534,000.

Louisville, New Albany and Chicago.—Consolidation of the Louisville, New Albany and Chicago Railway Company with the Chicago and Indianapolis Air Line Railway Company, under the name of the Louisville, New Albany and Chicago Railway Company—$5,000,000 stock issued in exchange for $3,450,000, of the old stock of the Louisville, New Albany and Chicago Railroad, and $1,550,000 for the stock of the Chicago and Indianapolis Air Line Railroad, in accordance with the agreement for consolidation of the two companies.

Boston and New York Air Line Railroad Company.—10,000 shares common stock, $100 each, authorized by charter. Amount actually issued, $818,000.

Chicago and Northwestern Railway Company.—An additional $3,030,000 Sinking Fund bonds of 1879, issued on 202 miles of completed road. The interest on this issue is 5 per cent., instead of 6 per cent., the rate on former issues. These bonds are a portion of the $15,000,000 authorized for the construction of new railroads, and are like the former issues, excepting in the rate of interest.

Texas and St. Louis Railway Company.—An additional issue of $608,000 first mortgage 6 per cent. bonds, numbered from 1,521 to 2,128, making the total issue $2,128,000, maturing June 1, 1910; also, an additional issue of $608,000 Land Grant Income bonds, numbering from 1,521 to 2,128, making the total issue $2,128,000. The capital stock of the company has also been increased $608,000, and there are now outstanding 21,280 shares of $100 each, making a total of $2,128,000, the authorized capital having been increased to $12,000,000. The whole is on 266 miles of completed road.

The amount of extended 6s offered at the Treasury Department for redemption, with interest, on the 17th inst., under the Secretary's order of the 10th inst., was $5,608,000, all of which was accepted and checks mailed to the various owners of the bonds presented.

The Allegheny Valley Railroad Company, not being able to pay the interest due October 1 on the income bonds, the cash fund applicable will be distributed pro rata, allowing $12 on each $35 coupon. The deficit will be paid in orders upon the trustees for bonds of the same issue and scrip convertible into those bonds for sums less than $100.

On the 18th inst. the Philadelphia and Reading Railroad Company commenced the payment of the unpaid half of the coupons of the general mortgage bonds of the company due on the 1st of January last.

The offerings of bonds for sale to the Government on the 17th inst. amounted to $11,090,750. The usual weekly purchase of $2,000,000 was awarded.

The master's report shows that the balance on hand in the Treasury of the Philadelphia and Reading Railroad Company on the 1st of August was $150,367.24. The receipts during the month were $3,180,100.83 and the payments $2,965,673.02, leaving the balance on hand August 31 $364,795.05. The balance on hand in the treasury of the coal and iron company on August 1 was $15,988.69. The receipts for the month were $1,565,565.05 and the payments $1,571,261.63, leaving the balance on hand August 31 $10,292.11.

The amount of United States bonds redeemed, or which have ceased to bear interest since March 4, 1881, is as follows: Six per cents, issues of 1861 and 1863, $24,211,400; 5 per cents, issues of 1870 and 1871, $67,817,350; continued at 3½ per cent., $13,608,000; total, $105,636,750. Reduction in annual interest charge: On 6s redeemed and continued, $5,-

904,062.75; on 5s redeemed and continued, $9,413,417; on 3½ per cents redeemed, $476,280; total, $15,793,759.75. Of the $105,636,750 of bonds which have been redeemed or ceased to bear interest, there are still outstanding $6,487,150 of the 5 per cents embraced in the 104th call. The money for the redemption of these bonds, however, is available, and the bonds will be paid upon presentation.

Railroad Paralleling as a Political Development.

The Chicago newspapers, ever on the alert for railroad news—that being pre-eminently a railroad city—have startled the average reader by stories of a colossal conflict said to be impending in railroad building and operation both east and west of that city. We gather from all that is printed that not only are we to have the new road paralleling the Lake Shore and Michigan Southern from Chicago to Buffalo, and thence to New York and Boston, but also duplicate lines from Chicago to the Pacific coast at San Francisco, along the Salt Lake route: that is to say, (1) the Chicago, Burlington and Quincy system is to be extended to Denver, where it will connect with the Denver and Rio Grande system, which again is to be extended to Ogden, where it meets the Central Pacific, and thus completes the line all the way across the continent. (2) The Union Pacific Managers, possessed by an ambition to have a line of their own through to San Francisco, as well as a branch line to Portland, Oregon, are threatening to extend a road across Nevada to California so as to parallel the Central Pacific. (3) In self defense the Central Pacific, it is asserted, with equal determination is resolved upon carrying a line from Ogden east to the Missouri River so as to gather business from at least five of the Chicago lines, thus "sandwiching" the Union Pacific on the north and on the south. All these are independent of the Northern Pacific and, of course, of the Southern Pacific and the Atlantic and Pacific. The Northern and the Atlantic and Pacific lines are still some distance from completion, but will probably not be stopped, even if a financial flurry should overtake us; but the Southern Pacific has a three fold eastern connection via the Atchison, Topeka and Santa Fe, and via the Texas Pacific (now on the eve of junction) and via San Antonio to New Orleans. It would seem, therefore, that with four stem lines from the Atlantic through to the Pacific, as we may hope to have within three years, it would be an act of folly for either of these to so prolong their respective halves as to create a fifth line.

In the country east of the Mississippi the situation differs somewhat. It has been asserted that the Lake Shore and Michigan Southern Railway will be able to starve the new Lake Shore or "Seney" road into bankruptcy. This may be doubtful; but if true, what then? A bankrupt road is, for some purposes, a more troublesome competitor than a solvent one. But so long as the New York, Lake Erie and Western Railroad Company remains independent, and the new line up the Hudson, and the Delaware, Lackawanna and Western Extension are in the field at Buffalo, it is by no means certain that the new "Seney" road will be bankrupted, as its capital and debt are about one-third that of the older neighbor. Then, again, there is the Lehigh Valley Railroad, which can as easily be extended to Buffalo as the Philadelphia and Reading Railroad can be extended to a favorable point on the New York Central and Hudson River Railroad. It seems reasonably certain that the Chicago Extension of the New York, Lake Erie and Western from the vicinity of Galion, Ohio, will be carried through, which will tend to emancipate it from the Canada roads on the one hand, and from the Lake Shore contract on the other.

The construction of parallel roads is in full operation; and is adding to the complexity of our railroad affairs. On every hand each attempt of any of the trunk lines is met by a counter-move of its neighbors or rivals. What can be the result? Without noticing at present the effect upon the public mind, and political bodies, it is safe to predict that these duplicate lines will eventually be worked in harmony, if not owned in common. The users of railroad facilities will in the end have to pay for the cost of building two sets of roads where one might have sufficed. It is more reasonable to suppose that Mr. Vanderbilt, for instance, will find it advisable either to purchase the new rival, as he did the Canada Southern, or the two will be united on same traffic basis. So also of the lines east of Buffalo. It will be found they cannot live and perpetually contend for the through business. As Stephenson long ago put it; "Competition is impossible where combination is possible." There is a prospect that both the stockholders of the old and the new roads may lose a part of their investment, but the community at large will gain.

Should the threatened multiplication of lines to the Pacific coast be carried out, the same results must follow. The parties to them will find out in the words of the Quaker that "there never was a good war nor a bad peace." They will come together, on some terms, after having exhausted their resources and credit. Why then cannot some equitable terms be found for combinations before the struggle instead of after?

France has been partitioned out into districts, and the extent and location of the several railroad lines prescribed by law. The same is true of Russia and some other countries. In the United States we have very generally "free railroad laws." The genius of our institutions frowns upon anything like exclusive privilege or rights. This is our great popular safeguard against monopoly. We are now confronted with one of the excesses of freedom. Like the ballot, it has its penalties, and these railroad wars are of them.

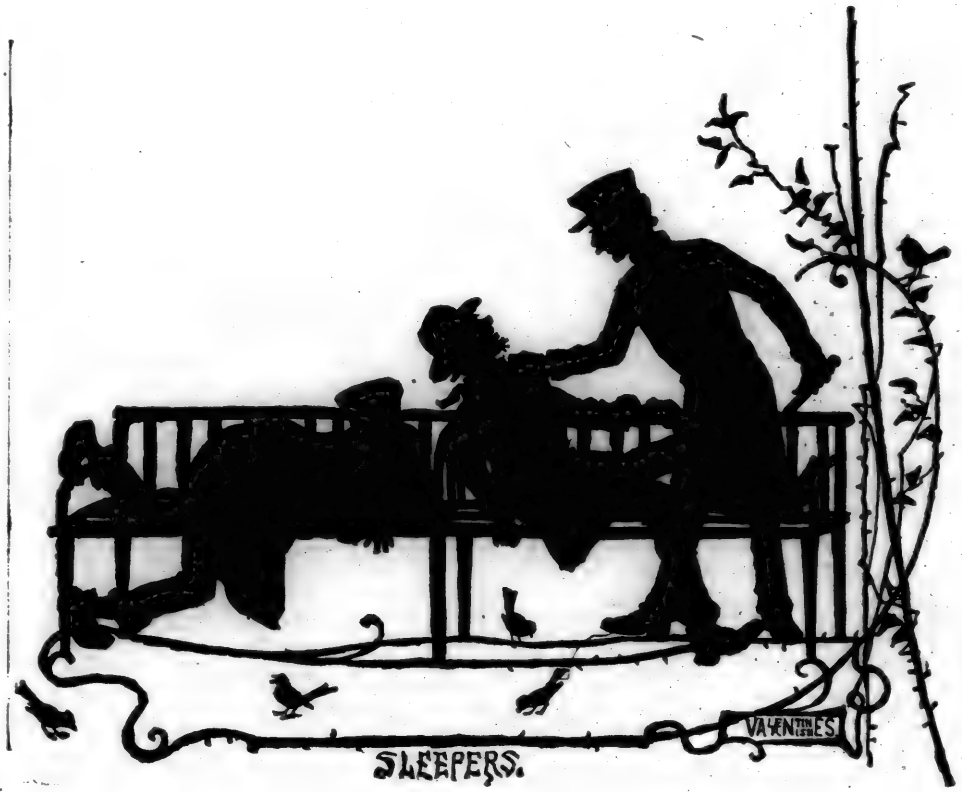
Lehigh and Hudson Railroad.

The Lehigh and Hudson Railroad, which is designed to connect the Pennsylvania Railroad and the coal roads crossing the Delaware with the New York and New England Railroad at Fishkill, on the Hudson River, is pushing along rapidly. The track is already laid six miles from Belvidere, N. J., and will be completed to Andover by December 1. From Andover the Sussex Railroad will be used the present winter as far as Franklin Furnace. There the Lehigh and Hudson again runs on its own line (late the Warwick Valley) to Greycourt, where connection exists with the Newburg branch of the New York, Lake Erie and Western Railroad. At Newburg the cars will be ferried across to Fishkill. Thus an all-rail direct route will soon be in operation from Philadelphia to Boston, passing through the finest farming country in New Jersey and New York, and avoiding the inconvenience of transfer at New York City. Mr. Grinnel Burt, President of the Lehigh and Hudson, is authority for the statement that the Pennsylvania Railroad Company will ship a large proportion of its heavy Eastern freight over the new route. With the additional freights of other roads from the Pennsylvania coal regions, it is expected that the Lehigh and Hudson will have a large carrying traffic from the start. The new route will afford many attractions in the summer season for pleasure travelers.

THE new Detroit, Mackinac, and Marquette Railroad will probably be completed by the 1st of November.

IT is stated that the Canada Pacific syndicate have decided to purchase the portion of the Quebec, Montreal, and Ottoway Railway between Ottawa and Montreal, build a bridge at Lachine, and continue the road on the opposite side of the river.

THE Philadelphia, Medford, and Marlton Railroad, which was formally opened on the 15th inst., extends about 11¼ miles from Haddonfield, N. J., and connects with the Camden and Atlantic Railroad to Medford, where connection is made with the track of the Medford Branch of the Camden and Amboy Division of the Pennsylvania Railroad.



THE Receivers of the Brooklyn Elevated Railroad filed their first report in the Kings County Supreme Court, on the 18th inst. The liabilities are $4,880,482 and the assets $979,503. The receivers say that the road can be completed and put in full running order between Fulton Ferry and East New York for $2,500,000, and they think the money can be raised on the receivers' certificates.

Dividend Notices.

THE LAKE SHORE AND MICHIGAN SOUTHERN RAILWAY COMPANY,
TREASURER'S OFFICE, GRAND CENTRAL DEPOT,
NEW YORK, September 27, 1881.

The Board of Directors of this Company have this day declared a quarterly dividend of TWO Per Cent upon its capital stock, payable on TUESDAY, the first day of November next, at this office. The transfer books will be closed at 3 o'clock, P. M., on Saturday, the first day of October next, and will be reopened on the morning of Friday, the fourth day of November next.

E. D. WORCESTER, *Treasurer.*

AMERICAN RAILROAD JOURNAL.

PUBLISHED WEEKLY BY THE

AMERICAN RAILROAD JOURNAL CO.,

No. 23 Liberty Street, - - New York.

The AMERICAN RAILROAD JOURNAL, the oldest railroad paper in the world, was established during the construction of the first 100 miles of railroad in this country. Its files of the past fifty years furnish a complete record of the development of American railroads and faithful chronicles of the kindred financial interests. It contains features of special value to investors and others desirous of being readily acquainted with values and transactions connected with the development and working of our railroad systems, and much of interest to the general reader. It is taken by leading railroad men, investors and banking houses in this country and Europe, where it has long been a recognized authority in its special field, being recommended as such by "Chambers' Encyclopædia" and other standard foreign and domestic publications. We give below a few extracts from opinions of the press:

From "Herapath's Railway Journal," London.

The AMERICAN RAILROAD JOURNAL, one of the most honest and outspoken of American papers.

From the "Journal of Commerce," New York.

The AMERICAN RAILROAD JOURNAL, a most valuable weekly newspaper. Is now half a century old.

From the "Cincinnati Price Current."

The AMERICAN RAILROAD JOURNAL'S list of patrons is composed largely of the oldest and heaviest financial houses in the United States, Great Britain and the Continent, and of railway companies, manufacturing establishments and banking and commercial houses in this country.

From the "Pittsburg (Pa.) Chronicle."

The AMERICAN RAILROAD JOURNAL is authority on railroad news.

From the "Washington (D. C.) Law Reporter."

The AMERICAN RAILROAD JOURNAL is a most valuable publication, and to all persons interested in American railroads, earnings, dividends, etc., etc., it is almost invaluable.

Safety Railroad Switches,

SECOND QUARTO SERIES.—VOL. XXXVII., No. 44.] NEW YORK, OCTOBER 29, 1881. [WHOLE No. 2,375.—VOL. LIV.

Comparative Service of Iron and Steel in Shipbuilding.

A DECISION announced by the Consett Iron Company must be regarded as significant at the present time. That Company has been one of the most fortunate of all those engaged in northern metallurgy. It bought the immense iron works and collieries in the northwest of Durham at a very low price, and by judicious expenditure and good management it has paid wonderful dividends for many years. Over a series of years it paid 14 per cent per annum to its fortunate shareholders, and in the last two years it has returned 25 per cent per annum, and given a bonus in addition. These large results, contributed to by the coke manufacture, have been chiefly attained by the iron trade, and notably by the iron-plate trade. For the year just closed the Consett Iron Company had a profit £204,906, and out of this £160,236 was the profit on iron plates and pig iron. The Company is, indeed, the largest iron-plate producing concern in the world; and hence it is a fact of very great significance to find that it has decided to erect a Siemens-Martin plant for the production of steel plates.

Hitherto the ships built on northern rivers have been iron since the cessation of the building of wooden vessels, with a very few exceptions. Exceptional steel vessels have been built in the North of England—on the Tyne and the Tees, and at West Hartlepool; but all the steel for some of these, and much of it for others, has been taken into the district from Scotland and Wales—districts that have earlier commenced the production of steel plates for shipbuilding. The northeastern district down to a few years ago was almost exclusively an iron-making district. Steel making commenced on a large scale some three years ago only, but the immense steel-rail mills erected near Middlesbrough produced 69,000 tons of steel rails in 1879, about 90,000 tons last year, and this year will enlarge that quantity. These were made at first exclusively from foreign iron ores, to the loss of the consumption of local ores; but the dephosphorization process enables the latter now to be used, and hence there is a growing production of steel in the form of rails in the North. Practically, the production of what was one of the staple manufactures of the district—iron rails—is now extinguished in behalf of those of the more enduring metal. For long there has been a controversy whether iron thus supplanted would also have steel substituted for it for shipbuilding uses.

The Consett Company takes the lead in the production of iron for ships, and hence the significance of the step it has now announced, if even that step be taken on a scale comparatively small. Locally and nationally the question of the comparative service of iron and steel in shipbuilding is being discussed, and is also undergoing the test of experience. In the most recent of these discussions it was stated on the side of iron that a given vessel would cost 4¾ per cent more per ton of dead-weight carrying capacity if of steel than it would be if of iron; while on the other hand it was claimed that even with steel much above iron in price, as at present, it would, by carrying more, cost slightly less per ton of carrying capacity. An example was given of the cost of steel and iron vessels—the former of a certain size costing £18,350, and an iron one the same size costing £17,000, but carrying eighty tons less freight. Hence it was contended that for the additional cost there was a very large interest. When the matter is narrowed to these dimensions, it can scarcely be said that it is too soon to speak of the ultimate substitution of steel for iron in shipbuilding.—*Pall Mall Gazette.*

Locking Railway Car Doors in England.

The locking of the doors of railway carriages is one of the mysteries of railway management. No passenger has ever been able to divine why such infinite pains are taken to lock him in. The only result of the process is that if there is an accident he is a prisoner, with a chance of being killed. If, on the contrary, his train arrive safely at his destination, he is still a prisoner, who has to wait till he is liberated, making, meanwhile, spasmodic signals to attract some friendly porter for the purpose, unless having grown wise by experience, he carries a key himself, and is able triumphantly to emerge. Some people imagine that a regulation of the Board of Trade obliges this extraordinary precaution. No such regulation, however, exists. On the contrary, the greatest diversity of practice prevails on the subject. One company locks its carriage doors on the main line only, another on the branch and main lines both, a third on single lines only, a fourth does not lock its doors at all. And the extraordinary thing is, that the companies that entirely neglect the custom find no disadvantage whatever in doing so. On the contrary, their porters are able to attend to other matters during the time when they would have been locking and unlocking doors.

The following are the railway companies who do not lock their doors on either side of their trains: In Scotland—the Glasgow and Southwestern, Great Northern of Scotland, Highland and North British. In England—Great Eastern, London, Chatham and Dover and Northeastern. It is hard to see why in these days of falling dividends other companies do not follow their example.—Pall Mall Gazette.

Tunnel Under the Severn River.

The tunnel under the Severn River, joining the two paths of communication from the English and Welsh sides, is said to have been practically completed. After seven years of labor the workmen have met in the middle of the channel; so that, unless some most unlikely interruption or disaster should now occur, there remains nothing but to enlarge the passage, wall it in, and lay the rails. Referring to the above, the London Globe says: "Should everything now go well, a design worthy of the old days of railway engineering will have been realized, in spite of most disheartening obstacles. It will be remembered that only a year or two ago some consternation was caused by the news that water from the river had broken into the borings. Such an accident might well cause alarm and inspire a fear that no part of the river bed would be found sufficiently free from fissures or irregularities of geological formation to allow a railway to pass beneath it safely. The contractors, however, worked on with only the greater determination, and their labors have now, it may be confidently hoped, achieved a real success. The new line under the Severn will almost revolutionize the communication between the west of England and the principality by bringing close to one another towns and districts which have always been neighbors geographically speaking, but, for all practical purposes, were very distant from one another. Take, as an instance, the two important towns of Bristol and Newport, which, as the crow flies, are less than 20 miles apart, but, for the purposes of land communication, were separated by nearly 80 miles

of railroad. The new line will cut off three-fourths of this distance, and enable railway passengers and merchandise to go in a quarter of the time. A similar change will be effected in the facilities for communication between Bath, Exeter, and, in fine, in all the towns in Somerset, Devon, and Cornwall, and the whole of South Wales. Glamorganshire and Monmouthshire will no longer look across the Bristol Channel at a shore which can only be reached by means of an uncomfortable sea passage, or by a detour of 80 miles or more, and the citizens of Bristol and Bridgewater will begin to find it almost as easy to take their holidays on the Welsh sea beaches as at the rather muddy watering places of the Somersetshire coast."

A Contrivance for Railway Passengers.

A new device has been lately patented which is likely to be of great service to railway travelers. The article is a small, thin card-case made of neatly plated metal and fastened by screws to the side of a valise or a trunk. The case is furnished with a cover like a box, and is fitted with a lock and key, to permit of its being securely fastened after a card containing the name and address of the owner of the baggage has been inserted on the inside. When this is done the owner has practically a duplicate check on the regular baggage check he receives from the express or railroad baggage-master, and can thereafter travel with more contented comfort, feeling that he has his property doubly secured against loss. In case he should lose his check tag he can secure his property, with comparatively little of the now unavoidable delay and vexation necessary to complete identification, by simply producing the key, unlocking the card case and exhibiting his card to the baggage-master. Further than this, there could be no longer experienced any inability to discover the owner of the baggage. For in case the latter failed to come forward voluntarily, the card case could be broken open and the necessary information as to its ownership obtained.

The German Railway Regiment.

In common with every other fraction of the German army, the German Railway Regiment holds annually its autumn manœuvres. These exercises have been carried out this year at Klausdorf, and comprised the construction, within forty-eight hours, of a field railway 1½ kilometres in length, and a viaduct 80 metres long and from six to sixty feet high—the center arch of the viaduct having a span of over thirty feet. The task was completed well within the specified time, relays of men being employed to carry on the work night and day; and immediately the whole of the line was laid a locomotive was run over it to test the solidity and exactness of its construction. The railway regiment is a comparatively new formation in the German army, its first battalion having been organized only in May, 1871; and the perfection it has attained in the accomplishment of its special duties is largely owing to the interest taken in it by Count von Moltke himself. The corps has thus been the subject of much patient consideration and prevision, and affords another evidence of the fact that the organization and training of the more purely fighting element of their army is not deemed by the German military authorities to be all the preparation that is necessary to insure success in war.

A Railway in the Tree Tops.

It may not be known outside of the neighborhood where it is situated, but it is nevertheless a fact, that in Sonoma county (Cal.) we have an original and successful piece of railroad engineering and building that is not to be found in the books. In the upper part of this county, near the coast, may be seen an actual roadbed in the tree tops. Between the Clipper mills and Stewart's Point, where the road crosses a deep ravine, the trees are sawed off on a level and the timber and ties laid on the stumps. In the center of the ravine mentioned, two huge redwood trees, standing side by side, form a substantial support, and they are cut off seventy-five feet above the ground, and cars loaded with heavy saw logs pass over them with as much security as if it were framed in the most scientific manner. "All roads lead to Rome," except this one. The builders never contemplated a terminus at San Francisco, Petaluma or Chicago, but merely to convey heavy timber from the woods to their mill. There are many places in our redwood forests where this example might be followed profitably, as it would be cheaper to grade through with a cross-cut saw and lay the ties on the stumps than to remove the trees. We can boast of a broad gauge, a narrow gauge and a road in the tree tops—yet we are not all happy.—Petaluma (Cal.) Argus.

Joint Stock Companies in England.

The joint stock enterprises of England present some very remarkable features. Your pounds or dollars against my brains is the ordinarily accepted method of exchange. Just at present the gigantic hotel enterprises being looked at with indifference, there is a good bit of money being put into Indian gold-fields, with results which will probably be more advantageous to sellers than to buyers. From 1862 to 1880 there have been not less than 15,807 limited joint stock companies registered in the United Kingdom. Nominal capital represented by a line of figures is not worth much, but English companies printed its total as not less than 1,737,619,466 pounds. Scotland as 77,334,544 pounds, and Ireland 30,114,288 pounds sterling. To show, however, how really little money there was in some of these concerns, one company wrote itself down as having a nominal capital of 200,000,000 pounds, when all it had in the world was a beggarly 200 pounds. Nothing can be more amusing than to read how much some of these companies asked for and what they really got. One venture called for 15,000 pounds and received 35 pounds, and a Paris Hansom company soliciting for only 100,000 pounds, actually had paid to it 119 pounds, and never did get a farthing more. When the study of the dead and departed companies is undertaken, one's grief at the amount of money supposed to have been lost may be suppressed, as pounds hardly represent farthings.—London (Ont.) "Free Press."

Legal Notes.

SUPREME COURT OF MICHIGAN.

Chicago and Northwestern R'y Co. v. Smith.

An eight year old boy, trespassing upon the premises of a railroad company, got on the step of the engine and was ordered off by the fireman, and as he jumped off, he fell. The locomotive was started at that moment and the tender passed over his arm. He was a boy of more than average intelligence, and had been warned against going on the premises or riding on the engine. Held, that the railway company could not be held liable for the injury without showing that the engineer, or other servants of the company in charge of the locomotive, knew that the child was in the way, or that they had been negligent in the management of the engine, or could have anticipated the injury.

Chicago and Northeastern R'y Co. v. Miller.

An old man, who was somewhat deaf, while driving a span of colts towards a railway track, down a narrow road, from which the track was concealed on one side by a high embankment, stopped to listen, but hearing nothing, drove on, and when near the track a train appeared within a few rods. Thinking that he could not control his horses where they were, he whipped them up and tried to cross the track, and the rear of the buggy was struck by the locomotive. Held, that in an action for the injury the question whether plaintiff was guilty of contributory negligence was for the jury.

In a declaration for a railway injury, an averment that defendant negligently and carelessly drove a certain locomotive upon the railroad up to, upon and across a certain public highway at the crossing of the same and the said railroad, without giving the necessary statutory signals, viz.: ringing a bell or sounding a whistle, was a sufficiently specific averment of defendant's negligence, when taken in connection with the averment of consequential injury, and entitled the plaintiff to support it by evidence under the defendant's plea to the general issue.

The negligence of a railroad company to ring a bell, as required by statute, when approaching a crossing, will make it liable for any injury resulting from such neglect.

The extension of the branch of the Michigan Central Railroad north of Saginaw was completed to Cheboygan on the 16th inst., so far as laying the rails is concerned, and the work of ballasting the new road will now be prosecuted vigorously. The remaining gap, 12 miles, between Cheboygan and Mackinaw City, will be speedily covered, and it will be but a short time before the new continuous line will be open from Detroit to Marquette.

The new iron steam propeller Gaston, 1,000 tons burden, built by the Harlan & Hollingsworth Company, of Wilmington, Del., for the Bay Line, arrived at Baltimore on the 18th inst.

AMERICAN Railroad Journal. ESTABLISHED 1831.

PUBLISHED WEEKLY BY THE

AMERICAN RAILROAD JOURNAL CO.,

At 23 Liberty Street, New York.

Subscription, per annum, in advance..... $5 00
Foreign Subscription, including postage..... 6 00

Purchases for the AMERICAN RAILROAD JOURNAL CO. are authorized only by the written order of Geo. F. Swain, Treasurer; and the Company will not be responsible for the payment of bills unless accompanied by such order.

Payments for advertising and subscriptions should be made by check payable to order of the Treasurer.

BRANCH OFFICE:
53 Devonshire St., Boston, Mass.

Mr. FREDERIC ALGAR, Nos. 11 and 12 Clements Lane, Lombard Street, London, E. C., England, is the authorized European Agent for the JOURNAL.

New York, Saturday, October 29, 1881.

Entered at the Post Office at New York City as Second-Class Mail Matter.

SCHEDULE TIME.

THERE is a crying evil in this country, in the management of railroads, that sooner or later must culminate in vexatious lawsuits and much loss of money, and that is, the failure of trains to make schedule time. The traveling public have been very lenient in this respect, but there is a limit to all patience, and the time now seems near when forbearance should cease to be a virtue. There are certain conditions in railroad travel—such as unavoidable accidents or where it is dangerous to run at a high rate of speed—when railroads are excusable if they fail in making time. But these conditions rarely prevail, and when they do they will be readily appreciated by those inconvenienced. The fact of not making time to-day is attributable to the false economy of railroad management, which prefers to take care of its rolling-stock by not running over a certain number of miles an hour, whether the train is on or behind time. This is the true inwardness of the case, and not, as is many times falsely stated, the safety of the passenger. It is an established fact that a train running forty to sixty miles an hour, provided the road-bed and rolling-stock are all they should be, can carry the passenger just as safely and far more comfortably than when running at twenty miles an hour. An accident to a train running at twenty miles an hour proves just as disastrous as though the train were running at sixty miles an hour. In fact, judging from published reports, we would believe that all the accidents occurred to slow-running trains, as very few have been set down to fast running. That the fast-running train is far more comfortable was proven (if not proven before) by the way the train was run that conveyed our late President from Washington. Now in regard to the care so many railroad managers seem to have for the rolling-stock, the traveling public is not interested. Travelers know that they pay money enough for the privilege of traveling to enable the companies to erect magnificent depots, pay large dividends to stockholders, and at times to enter into what seems ruinous competition with one another by cutting rates. There is no need of such magnificent depots, nor of declaring such large dividends, nor of entering into such cut-throat competition: the money thus expended can be better employed in keeping the rolling-stock in good order and in making the traveler more comfortable.

Passengers by most any line of railroad who travel much could write of numberless instances of failing to make connections, of arriving at their destination hours behind time, for which failures they would be unable to find a reasonable excuse exhonerating the company.

The time has come when the traveling public must assert their rights. They must demand that schedule time be made or they will look to the company for damages.

There is no reasonable doubt that if one such case should get into court, that damages would be awarded the plaintiff; and a few such cases would make the railroads more careful. A man who pays his money to arrive at a depot at a certain hour, has the same right to be landed there at that hour that he has to a seat in the car. It is to be hoped that some one will make a move in this direction, that we may have a legal decision in this country the same as in other lands. It is time that railroads were made to realize that passengers have rights which are to be respected, and that it is just as imperative to land a passenger on time as it is to expect him to be at the depot to start on time.

PROPOSALS FOR RAILROAD SUPPLIES.

A CONSIDERATION of the responsibility resting upon railroad purchasing agents has given rise to the suggestion that they should invite proposals in a systematic way from all dealers in good standing, for the important articles to be purchased, or for those bought in sufficient quantities to warrant such proposals. There is no doubt that railroad managers generally employ as purchasing agents reliable and able men; probably no more competent class of buyers, as a rule, could be found in any department of business. The duties of a buyer for a railroad company, however, are peculiarly trying, and the qualities required for their successful performance are of a nature considerably different from those demanded of a purchaser for general business houses, where, in large concerns, each department has its buyer, who may be an expert in his particular line and a novice in almost any other.

Upon a railroad purchasing agent devolves the buying of an almost endless variety of supplies, from waste to rub off the wheels of the locomotives to the rails upon which they run. A long experience in some cases doubtless enables him to judge intelligently of the merits of the various articles proffered him by dealers, but the years which have given him this experience have also formed for him connections with certain dealers or brands of goods which may have so prejudiced his mind as to cause him to neglect to give to other new articles of merit the attention they deserve; an attention which, if given might prove of great value to the company which the agent represents. An agent is the constant recipient of hospitalities and attentions from dealers of his acquaintance, and not infrequently such

relations are formed as make peculiarly strong the temptation to bestow patronage from friendly, though perhaps in other respects disinterested, motives, rather than from solid business principles. Meanwhile other less favored dealers are not encouraged to present their wares or terms, and the result is detrimental to the general trade and discouraging to the introduction of new and improved articles.

The admission is an unpleasant one to make, but it is well known to be warranted, however, that the way to railroad patronage for the dealers is too often through a system of gift making on the one side and favoritism or prejudice on the other. Complaints of this kind are heard often enough by inventors and manufacturers endeavoring to place their devices and goods upon the railroads. That some of these complaints are justly made is unquestionable, but at the same time it should be borne in mind that disappointed men, and especially those who have imagined that their inventions could demand a ready adoption, are prone to attribute to the injustice of others what they are loth to recognize as resulting from the imperfection of their own ideas and works.

The system of advertising for proposals for government supplies is a necessity, and its desirable features are easily recognized. Its workings may be defective, but its principle is sound, just, and business like. Our gigantic railroad organizations are consumers of such vast quantities of manufactured supplies that the system would seem to be more needed there even than in some of our public departments. The strong objections to the system in buying government supplies is, that taints of political influence are sometimes attributed to it, and that the manipulations of fraudulent contractors are too readily condoned or neglected. Neither of these conditions would be likely to obtain in a well managed railroad company. Even if the system is not considered an imperative need, owing to the confidence railroad purchasing agents generally merit and receive, yet a trial of it would do much toward securing for the railroads the best prices and goods, and for deserving dealers equitable and encouraging treatment.

Organization.

THE stockholders of the Utah and Northern Railway in Montana elected the following directors on the 18th inst: Sidney Dillon, S. H. H. Clark, Thomas L. Kimball, J. W. Garrett, A. J. Poppleton, Samuel Ward, and George W. Irwin.

AN organization of the Evansville, Jackson, and New Orleans Railroad Co. was effected in Henderson, Ind., on the 19th inst. R. G. Hervey, of the Evansville and Indianapolis Air Line, was elected president, and J. J. Morton secretary and treasurer.

AT a meeting of the stockholders of the Old Orchard and Ferry Beach Railroad on the 21st inst., the following directors were chosen: James T. Furber, of Lawrence; Dr. J. R. Nichols, of Haverhill; Amos Paul, of South Newmarket; M. G. Palmer and S. E. Spring, of Portland; George F. Calef and W. S. Dennett, of Saco.

AT the annual meeting of the stockholders of the Wolfboro' Railroad Co., held on the 11th inst., the following board of directors was chosen: William B. Bacon and Elijah B. Phillips, of Boston; Willard P. Phillips, of Salem, Mass.; Frank Jones, of Portsmouth, N. H.; John W. Sanborn, of Wakefield; John M. Brackett and Joseph L. Avery, of Wolfboro', N. H.

A CERTIFICATE of incorporation was filed in the office of the Secretary of State of Ohio on the 11th inst., of the Lima and Columbus Railway Co. Capital, $2,500,000. The incorporators are: Samuel Thomas, of Columbus; Calvin S. Brice, Charles M. Hayden, George H. Meily, and James B. Townsend, of Lima. The road is to pass through the counties of Allen, Auglaize, Hardin, Logan, Champaign, Union, Madison, and Franklin.

THE directors of the Cincinnati, Indianapolis, St. Louis, and Chicago Railroad Co., elected at Indianapolis, Ind., on the 25th inst., are: Geo. Bliss and C. P. Huntington, of New York; J. H. Devereux, Cleveland; R. R. Cable, Rock Island; Thomas A. Morris and Thomas H. Sharpe, Indianapolis; George Wilshire, Benj. Evans, L. Anderson, Charles W. West, George Hoadley, Samuel J. Broadwell, and M. E. Ingalls, Cincinnati. The directors elected M. E. Ingalls president, and continued all the other officers.

THE first meeting of the stockholders of the Portland and Rochester Railroad Co. was held at Portland, Maine, on the 18th inst., and the following board of directors was elected: Samuel E. Spring, Nathan Webb, William L. Putnam, Geo. P. Westcott, and Richard O. Conant, of Portland; E. B. Phillips, and Geo. C. Lord, of Boston; Stephen J. Young, of Brunswick; John A. Waterman, of Gorham. The board organized with the choice of Geo. P. Westcott as president; Wm. H. Conant, treasurer and clerk. The capital stock is $600,000. The necessary votes were passed accepting acts of the legislatures of Maine and New Hampshire.

THE Directors of the Cincinnati, New Orleans and Texas Pacific Railway Company (organized to operate the Cincinnati Southern Railroad under the lease to the Erlanger syndicate in connection with the Erlanger system of railroads in the South) are as follows: Frederick Wolffe, of Montgomery, Ala.; Charles A. Page, of New York city; John Scott, of Chattanooga, Tenn.; Theodore Cook, Alexander McDonald, William A. Goodman and Edgar M. Johnson, of Cincinnati, Ohio. The officers are: President, Theodore Cook; Vice-President and General Manager, John Scott; Secretary, George F. Doughty; Treasurer, H. H. Tatem; General Counsel, Edgar M. Johnson. The capital stock is $3,000,000, of which Frederick Wolffe subscribed for the syndicate $1,510,000.

THE Anderson, Lebanon and St. Louis Railroad Company and the Paris, Rockville and Northwestern Railroad Company filed articles of consolidation with the Secretary of State of Illinois on the 12th inst. The former company exists under the laws of Indiana, and has in process of construction a railroad from Anderson, Madison County, Ind., to the Illinois State line, in the direction of Paris, Ill. The latter company is organized under the Illinois law, and proposes to construct a road from Paris, Ill., to a point on the Indiana State line, in the direction of Montezuma, Ind. The name of the consolidated company is to be the Anderson, Lebanon and St. Louis Railroad Company, and its capital stock is $2,500,000. The principal office of the company is to be at Anderson, Indiana.

AT a meeting of the stockholders of the Ohio Railway Co. (a corporation formed by the consolidation of the Cleveland, Columbus, Cincinnati, and Indianapolis and the Cincinnati, Hamilton, and Dayton railroad companies), held in Cleveland on the 20th inst., the following board of directors was elected: W. H. Vanderbilt, C. Vanderbilt, Augustus Schell, James H. Rutter, A. G. Dulman, W. L. Scott, J. H. Devereux, Stephenson Burke, T. P. Handy, Amos Townsend, John Newell, M. E. Ingalls, John Carlisle. After the polls closed the directors of the Ohio Railrway Co. met and chose officers as follows: President, J. H. Devereux; secretary and treasurer, Geo. H. Russell; assistant secretary and treasurer, Geo. S. Russell; auditor, P. A. Hewitt; general manager, E. B. Thomas; traffic manager, O. B. Skinner; general freight agent, Lucien Hill. The only change is in the auditor, Hewitt succeeding A. Ely. Vice-president Stephenson Burke, assistant to President F. H. Short, with headquarters in Cincinnati; general passenger agent, A. J. Smith; paymaster, E. C. Sheldon; purchasing agent, J. L. Yale; executive committee, S. Burke, Amos Townsend, T. P. Handy, John Newell, J. H. Devereux. The terms of the directors are as follows: Amos Townsend, T. P. Handy, John Newell, M. E. Ingalls, one year; W. L. Scott, A. G. Dulman, S. Burke, John Carlisle, two years; W. H. Vanderbilt, C. Vanderbilt, J. H. Devereux, John A. Rutter, Augustus Schell, three years.

Personal.

R. G. Fleming has been appointed Superintendent of the Savannah, Florida and Western Railroad.

Jay Gould has been elected President of the St. Louis, Iron Mountain and Southern Railroad Company, vice H. G. Marquand resigned.

Col. L. N. Trammell, of Dalton, has been appointed a member of the Georgia Railroad Commission, in the place of Mr. Barrett, whose term of office has expired.

D. Tisdale of Simcoe, has been re-elected President and S. S. Fuller of Stratford Vice President of the Grand Trunk, Georgian Bay and Lake Erie Railway Company.

W. D. Washburn has been elected President, H. T. Wells Vice President, A. H. Bodey Treasurer, and M. P. Hawkins Secretary of the Minneapolis and St. Louis Railroad Company.

Francis C. Yarnell has been elected Vice President of the Lehigh Coal and Navigation Company. He is the oldest member of the board, has acted several times as president pro tem of the company, and cannot fail to be acceptable to the shareholders.

E. A. Touzalin, General Manager of the Burlington and Missouri River Railroad in Nebraska, has been elected first Vice President of the Chicago, Burlington and Quincy Railroad Company, with headquarters at Boston. James E. Peasley, Treasurer of the Chicago, Burlington and Quincy, was elected second Vice President, with headquarters at Chicago, and will continue to act as treasurer. L. J. Potter, present General Manager of the Chicago, Burlington and Quincy, east of the Missouri River, has been elected third Vice President and General Manager of all the Burlington lines east and west of the Missouri, including the new valley road.

At the session in Baltimore on the 22d inst. of the Convention of International Brotherhood of Locomotive Engineers, the following officers were elected: Mr. T. S. Ingraham, Cleveland, Ohio, (re-elected,) first grand Engineer for three years; Robert Thomas of St. Thomas, Province of Ontario, Canada, second grand Engineer; E. A. Stevens, of Boston, Mass., second grand Assistant Engineer, D. C. Hawton, of Tolara, California, third grand assistant Engineer; T. Tate, of Jackson, Tenn., grand Guide; G. W. Tyre, Indianapolis, Ind., grand Chaplain. The term of office of Mr. P. M. Arthur, grand Chief Engineer, who was elected in 1880, will not expire until 1883.

Interest and Dividends.

The Concord Railroad Corporation has declared a dividend of 5 per cent.

The Boston Equipment Company will pay a semi-annual dividend of 5 per cent.

The Lynn and Boston Railroad Company has declared a dividend of $4 per share.

The Manchester and Lawrence Railroad has declared a dividend of 5 per cent payable in November.

The Boston and Providence Railroad Corporation have declared a dividend of $4 per share, payable November 1.

The Oregon Railway and Navigation Company have declared a quarterly dividend of two per cent, payable November 1.

The Sunbury and Lewistown Railroad have declared a dividend of three per cent, payable October 25, at the Manufacturer's Bank, Philadelphia.

The Richmond and Danville Railroad Company has declared a dividend of 2 per cent on its stock, payable November 15, and announces it as a quarterly dividend.

The St. Louis, Jacksonville and Chicago Railroad Company have declared a semi-annual dividend of $3.50 on the common capital stock, payable November 1 to stockholders of record October 22.

Underground Railway.

At a meeting of the Commissioners appointed by the General Term of the Supreme Court to investigate and inquire as to the feasibility of the Underground Railway, held in the Special Term room of the Supreme Court on the 24th inst., Walter A. Morris, a civil engineer of the road, testified that he thought the plan feasible, and that it could be easily perfected without damage to the property along the line. The building of the road would cost one and two-third millions per mile. He had formed a knowledge of the route by examining, for the last six years, the excavations for the foundation of every new building erected. He remembers the erection of the buildings at Franklin street and Broadway, but did not remember one-half of the street caving in. He relied solely on his own investigations in regard to the nature of the soil. The water pipes will be supported by chains attached to beams running from curb to curb, the beams themselves to be supported by others. The gas pipes could be similarly supported. The paving-stones, when taken up, could be placed on the side streets.

The Commissioners then adjourned until the 29th inst., at half past ten.

Grand Trunk Railway of Canada.

The gross receipts of the Grand Trunk Railway of Canada for the month of August, 1881, were £178,841, the working expenses £136,843, and the net profit £41,998; for the month of August, 1880, the gross receipts were £185,065, the working expenses £127,139, and the net profit £57,926—showing a decrease in gross receipts of £6,224, with an increase in working expenses of £9,704, making a decrease in the net profit of £15,928. For the two months ending August 31, 1881, the gross receipts were £350,649, the working expenses £266,362, and the net profit £84,287; for the corresponding period of 1880 the gross receipts were £363,384, the working expenses £249,542, and the net profit £113,842—showing a decrease in gross receipts of £12,735, with an increase in working expenses of £16,820, making a decrease in the net profit of £29,555.

Great Western Railway of Canada.—The gross receipts of the Great Western Railway of Canada for the month of August, 1881, (excluding leased lines) were £75,329, the working expenses, including transfers to reserve funds, £57,740, and the net earnings, £17,589. For the month of August, 1881, the gross receipts were £81,801, the working expenses, etc., £53,528, and the net earnings £28,273—showing a decrease in earnings of £6,472, with an increase in expenses, etc., of £4,212, making the decrease in net earnings £10,684. The above is subject to interest on bonds.

New York, Chicago and St. Louis Railroad.

The New York, Chicago and St. Louis Railroad is rapidly being completed. Between Cleveland and Chicago they have 110 miles of track laid, and 100 miles graded which is ready for the iron; between Cleveland and Brocton 10 miles of the road has been ironed, and they have 100 miles graded and ready for iron. At the west end of the road track is being laid down at the rate of four miles per day. All along the line the bridge building is being pushed as rapidly as possible. From Brockton to Buffalo they have combined with the Buffalo, Pittsburg and Western, and this line will soon be ready for iron. It is expected that the entire road from Buffalo to Chicago will be in first-class running order by September, 1882, and the portion between Cleveland and Chicago, which is 20 miles shorter than the Lake Shore road, before that time, possibly by the first of next January. As to the branch from Chicago to St. Louis, nothing has been done aside from the securing of a portion of the right of way as far as the free bridge at East St. Louis, which is open to all railroads. No definite arrangements have yet been made in regard to an eastern connection at Buffalo, but as the company have exceedingly favorable propositions from several roads, they will have no trouble in this regard. This road has been a wonderful piece of railroad enterprise. It was first talked of in December, 1880, and in less than a year the entire right of way has been secured, and a large portion of the road graded and ironed. It is backed by ample capital, and is destined to be one of the most important lines in the country.—*Pittsburg Chronicle.*

Pennsylvania Railroad.

The statement of the business of all lines of the Pennsylvania Railroad Company east of Pittsburg and Erie for September, 1881, as compared with the same month in 1880, shows

An increase in gross earnings of	$87,463
An increase in expenses of	99,196
A decrease in net earnings of	$11,733

The nine months of 1881, as compared with the same period in 1880, show

An increase in gross earnings of	$2,624,629
An increase in expenses of	1,655,125
An increase in net earnings of	$969,504

All lines west of Pittsburg and Erie for the nine months of 1881 show a surplus over liabilities of $2,405,424, being a gain, as compared with the same period in 1880, of $398 859.

The Philadelphia and Baltimore Central and the West Chester and Philadelphia companies will be consolidated on the 31st inst. for convenience in keeping accounts.

The Coal Trade.

The leading coal carrying companies make the following reports of their tonnage for the week ending October 15, and for the year to same date, compared with their respective amounts carried to the same date last year:

	Week.	1881.	1880.
Reading Railroad	185,603	6,827,096	5,995,896
Schuylkill Canal	11,155	474,465	398,497
Lehigh Valley	148,547	4,919,016	3,860,742
Delaware, Lackawanna and Western	90,417	3,303,490	2,684,486
Shamokin	.....	829,206	661,488
Central R. R. of New Jersey	95,492	3,400,621	2,848,794
United R. R. of New Jersey	34,990	1,213,128	873,805
Pennsylvania Coal	37,558	1,079,440	861,400
Delaware and Hudson Canal	70,807	2,783,039	2,292,877
Huntingdon and Broad Top Mountain	10,383	416,239	346,628
Penn. and New York	36,181	1,288,671	949,590
Clearfield, Pa	41,528	1,861,410	1,312,236

The total tonnage of anthracite coal from all the regions for the week ending Oct. 15, as reported by the several carrying companies, amounted to 652,084 tons, against 699,018 tons in the corresponding week last year, a decrease of 46,934 tons. The total amount of anthracite mined for the year is 21,851,611 tons, against 17,859,923 tons for the same period last year, an increase of 3,991,688 tons. The quantity of bituminous coal sent to market for the week amounted to 99,376 tons, against 80,200 tons in the corresponding week of last year, an increase of 19,176 tons. The total amount of bituminous mined for the year is 3,909,541 tons, against 3,413,394 tons for the corresponding period last year, an increase of 496,147 tons. The total tonnage of all kinds of coal for the week is 751,460 tons, against 779,218 tons in corresponding week last year, a decrease of 27,758 tons, and the total tonnage for the coal year is 25,761,152 tons, against 21,273,317 tons to same date last year, an increase of 4,487,835 tons. The quantity of coal and coke carried over the Pennsylvania Railroad for the week ending October 15 was 182,233 tons, of which 139,759 tons were coal and 42,474 tons coke. The total tonnage for the year thus far has been 7,075,077 tons, of which 5,189,558 tons were coal and 1,885,519 tons coke. These figures embrace all the coal and coke carried over the road east and west. The shipments of bituminous coal from the mines of the Cumberland coal region during the week ended October 15 were 55,188 tons, and for the year to that date 1,654,839 tons, a decrease of 31,169 tons as compared with the corresponding period of last year. The coal was carried to tidewater as follows: Baltimore and Ohio Railroad—week, 34,207 tons; year, 1,061,195 tons; increase compared with 1880, 42,520 tons; Chesapeake and Ohio Canal—week, 15,415 tons; year, 360,675 tons; decrease compared with 1880, 136,203 tons. Pennsylvania Railroad—week, 5,403 tons; year, 221,364 tons; increase compared with 1880, 40,908 tons. The coal was brought from the mines as follows: Cumberland and Pennsylvania Railroad—week, 44,812 tons; year, 1,463,536 tons. George's Creek and Cumberland Railroad—week, 8,334 tons; year, 132,132 tons; Baltimore and Ohio Railroad—week, 1,760 tons; year, 52,430 tons. The Reading Railroad shipment for last week, ending October 22, was [illegible]00 tons, of which 41,000 tons were sent to and 42,500 tons shipped from Port Richmond, and 15,000 tons sent to and 17,500 tons shipped from Elizabethport.—*Phil. Ledger, Oct.* 24.

Commerce of New York.

The foreign imports at New York for the month of September were:

	1879.	1880.	1881.
Ent. for cons	$16,309,325	$17,495,330	$20,943,426
Do. for warehouseing	4,815,222	7,143,519	5,155,426
Free goods	9,139,245	10,162,197	10,625,657
Specie and bullion	27,482,179	18,850,020	10,274,030
Total ent. at port	$57,745,971	$53,651,066	$46,998,539
Withdrawn from warehouse	7,699,112	10,648,846	10,254,985

The foreign imports at New York for nine months from January 1 were:

	1879.	1880.	1881.
Ent. for cons	$117,239,777	$182,299,102	$169,506,853
Do. warehouse	53,699,602	93,292,898	66,828,705
Free goods	66,862,351	92,917,533	92,162,192
Specie and bullion	40,199,989	33,510,382	45,946,589
Total ent. at port	$278,001,719	$402,020,220	$374,444,339
Withdrawn from warehouse	50,287,507	68,428,532	74,859,701

The following is a classification of imports for nine months ending September 30:

	1879.	1880.	1881.
Dry goods	$72,146,732	$100,800,769	$87,840,285
General mdse	165,654,998	267,709,069	240,657,465
Specie	40,199,989	[33,510,382	45,946,589
Total	$278,001,719	$402,020,220	$374,444,339

The duties received at New York for the nine months ending with September were:

	1879.	1880.	1881.
Six months	$48,176,921 66	$71,038,523 16	$68,641,439 07
July	9,329,895 17	13,360,394 37	12,079,573 95
August	10,562,138 82	14,492,361 87	15,204,469 58
September	11,790,902 26	12,856,636 10	14,104,647 51
Total	$79,859,857 91	$111,747,915 50	$110,030,130 11

The exports from New York to foreign ports in the month of September were:

	1879.	1880.	1881.
Dom. produce	$35,774,116	$36,785,577	$32,637,408
For. free goods	73,729	172,919	522,244
Do. dutiable	349,125	518,595	389,057
Specie and bullion	515,261	244,765	973,492
Total exports	$36,712,231	$37,721,856	$34,522,201
Do. exclusive of specie	36,196,970	37,477,091	33,548,709

The exports from New York to foreign ports for nine months from January 1 were:

	1879.	1880.	1881.
Dom. produce	$249,824,861	$302,587,820	$275,727,505
For. free goods	1,634,381	1,947,027	6,342,504
Do. dutiable	3,421,789	3,555,295	4,417,674
Specie and bullion	12,991,579	5,824,776	9,341,480
Total exports	$267,872,610	$313,914,918	$295,829,163
Do. exclusive of specie	254,881,031	308,090,142	286,487,683

Railway Travel in Great Britain.

The development of travel by third class passengers in England, at one penny per mile, since its introduction by the Midland Railway Company in 1872, (since which time it has been adopted by all the othes companies in the kingdom) is exhibited by the fact that in the year above named, with a total of 372,450,023 passengers, 32,015,513 traveled first class, 64,963,939 second class, and 275,470,771 traveled third class. In 1876, of first class passengers there were pretty nearly 37,000,000, but of third class 380,191,868. In 1880, with a total of 540,669,175 passengers, the distribution was as follows: first class, 32,097,645, second class, 57,894,129; third class, 450,677,401. As to receipts from passengers, in 1872 it was £16,783,113; in 1876, £19,623,028, and last year, £20,341,096; the first class paying £3,250,190, and the third class £12,750,035. Comparing the miles of railroad with receipts per mile, whereas in 1872 it was £1,547 per mile, in 1880 it was £1,622. While, then, there has been moderate growth in the first and second passenger classes, the increase in the third class has been almost unparalleled. There is no reason to suppose that, with the additional increase of business, third class accommodations in England will not be made more comfortable. In fact, as has been remarked, "a traveler abroad must be either a fool or an American if he pays for a place in a first class car."

A New Spark Arrester.

A spark arrester recently placed in several locomotives of the Old Colony Railroad Company, is described by the Springfield (Mass.) Republican as follows: It is placed in the smoke-stack. A reservoir of the same diameter as the boiler is bolted securely on the boiler's head, and a partition separates it from the boiler flues. As the sparks and cinders come out of the flues from the fire-box they are immediately whirled into and up the smoke-stack by the draught. At the top of the stack is a wire netting and just below a cast-iron cone with sweeping base, whose peculiar shape diverts the sparks when they strike it, as they must do, into two large pipes that leads to the reservoir, in which they are deposited. All the sparks must go this way, and it is not possible for any of them to escape from the stack. At the bottom of the reservoir is a small chamber into which enters a blow-pipe and a water-jet, by which the sparks are blown out, through an adjustable pipe about three inches in diameter, into any receptacle provided.

Municipal Bonds.

An opinion was rendered at Indianapolis on the 12th inst. in the case of Thomas Hopper vs. the town of Covington, which involves the authority of municipalities to issue bonds and other commercial paper. The question was presented by a demurrer to the complaint in a suit to recover the value of certain interest coupons detached from certain bonds that were issued by the town of Covington. The coupons are in the ordinary form, and contain no recitals as to the circumstances under which the bonds were issued. The court held, that municipal corporations are created for local, governmental and administrative purposes, and not for business purposes; that they cannot issue bonds or other commercial securities without Legislative authority, either expressed or clearly implied, and then only in the manner and for the purposes provided by law. Municipal bonds not issued in pursuance of express Legislative authority and in the manner and for the purposes prescribed by such authority, possess none of the qualities of commercial paper. Municipal bonds which contain no recitals are not unimpeachable of bona fide holders for value, that is, they are not commercial paper. The holder of municipal bonds (which do not contain recitals as to the law and circumstances under which they were issued) is bound to know that they were issued under express Legislative authority and for certain purposes. He is also bound to inquire whether the conditions existed that authorized them to

be issued. Power to issue commercial paper is the exception and not the rule, and in the absence of such recitals as might preclude the municipality from impeaching the bonds in the hands of a bona fide holder, the plaintiff has no right of action unless he avers in his complaint that the bonds were issued in substantial compliance with the Legislative enactment and for a proper purpose.

Work on the De Lesseps Canal.

According to the New York *Times*, the officers of the De Lesseps Panama Canal have made considerable progress during the past season, contrary to common belief in this country. A satisfactory arrangement was not made with the Panama Railroad Company to carry the immense amount of material necessary to be taken into the interior, until last June, and therefore the time in which actual work could be done has been limited. The preliminary step was to clear out the undergrowth on the line of the canal. This has been successfully accomplished, and a path for the canal from 20 to 30 metres wide has been cut clear across the Isthmus. Steamsounding apparatus has been put up and the formation and nature of the soil ascertained, generally to the satisfaction of the officers. Work on the canal itself has begun. The company now has 200 cars, 12 locomotives, 2 pontoons, 2 steam cranes, 13 flat-boats, 2 dredges with change pieces, ribbon saws, rails, etc., a part of which is already at Colon and the remainder is on the way. The storehouses at Colon cover an area of 1,400 metres and are full. Five barges and two steamboats are plying upon the the Chagres River. Another steamboat at Panama is used for hydrographic surveys of the bay. The fears that the company would be unable to obtain a sufficient number of laborers are not likely to be realized. The adjoining provinces will furnish more men than can be employed.

A Canal-Boat Propelled by Air.

A CANAL-BOAT is now on exhibition in Boston, which the *Journal*, of that city, says is calculated to attract considerable attention.

It is called a pneumatic canal-boat, and was was built at Wiscasset, Maine, as devised by the owner, Mr. R. H. Tucker, of Boston, who claims to hold patents for its design in England and the United States. The specimen shown on Charles River, which is designed to be used on canals without injuring the banks, is a simple structure measuring 62 feet in length and 12 in width. It is 3 feet in depth and draws 17 inches of water. It is driven entirely by air, Root's blower No. 4 being used, the latter being operated by an eight-horse power engine. The air is forced down a central shaft to the bottom, where it is deflected, and, being confined between keels, passes backward and upward, escaping at the stern through an orifice 19 feet wide, so as to form a sort of an air wedge between the boat and the surface of the water. The force with which the air strikes the water is what propels it. The boat has a speed of 4 miles an hour, but requires a thirty-five-horse power engine to develop its full capabilities. The patentee claims a great advantage in doing away with the heavy machinery of screws and side-wheels, and believes that the contrivance gives full results in proportion to the power employed. It is also contrived for backing and steering by air propulsion. Owing to the slight disturbance which it causes to the water, it is thought to be very well adapted for work on canals, without injury to the sides.

Anthracite Coal Tonnage.

J. H Jones, accountant for all the anthracite coal carrying companies, makes the following statement of anthracite coal tonnage for the month of September, 1881, compared with the same period last year:

	Sept. 1881.	Sept. 1880.
Philadelphia and Reading Co.'s	665,066.06	769,551.16
Lehigh Valley Railroad	504,739.04	497,865.07
Central Railroad of New Jersey	360,608.07	457,632.05
Delaware, Lackawanna & Western Railroad	380,013.07	411,672,12
Delaware and Hudson Canal	292,378.14	306,498.13
Pennsylvania Railroad	196,698.04	208,061,01
Pennsylvania Coal Co	144,627.00	157,362.08
New York, Lake Erie and Western Railroad	43,293.01	33,833.18
Total	2,588,219.03	2,842,478.00

—showing a decrease for the month of 254,258 17. The stock of coal on hand at tide water shipping points, September 30, 1881, was 613,-958 tons, against 652,943 tons at the same time last month.

THE stockholders of the Tehuantepec Inter-Ocean Railroad, of which Edward Learned is president, met at Pittsfield, Mass., on the 20th inst., and listened to a favorable report of the progress of the work. Forty miles of road will be completed from the northern terminus at Coatzacoalcos by December, and several miles are graded from the southwestern harbor at Chipequa, on the Pacific coast. The money provided amounts to $1,870,000, $1,539,282 being paid in. The prospects for completing the entire line and harbors within two years are excellent.

THE probabilities are that a through line will be built from the Adirondack Railroad at Luzerne, by the way of Lake George, to the Vermont Central Railroad at Addison Junction. A company has already been chartered to construct a road from the latter point to Lake George.

THE Kansas City and Southern and the Iron Mountain and Helena railroad companies have consolidated, and will at once proceed to build a line from Kansas City to Helena, Ark., sixty miles below Memphis, Tenn.

THE Green Bay and Minnesota Railroad has recently passed into the hands of the Green Bay, Winona, and St. Paul Railroad Co., and will hereafter be known by that name.

THE track of the Missouri Pacific Railroad is laid four miles south of Hillsboro, and is expected to reach Waco, Texas, by the 15th of November.

THE gauge of the Toronto, Grey, and Bruce Railway will be changed on the 12th of November.

ENGINEER POLKE and his party are within 12 miles of Shreveport, La., locating the line of the Vicksburg, Shreveport, and Pacific Railway.

The Inman Steamer City of Rome.

The Inman Line steamer City of Rome reached her wharf in this city on Tuesday last at 11 A. M., after her first trip across the ocean, having been detained below on account of the fog since 9 o'clock on Monday night. The passage was made under very unfavorable circumstances, being subjected to frequent stoppages owing to the breaking of a turning wheel of one of the engines, the heating of one of the pistons, and also of the bearings, and the breaking of the steering gear; while throughout almost the entire voyage she encountered severe gales.

The trip seems to have fully tested her seaworthiness. The passage from Queenstown to this port was made in 8 days and 22 hours, notwithstanding the fact that her machinery was not in perfect working order, and the additional fact that she was only put to three-quarters speed in consequence of the gales. She is the largest vessel at present engaged in the transatlantic trade. She is 546 feet in length. Her displacement, at 26 feet mean draught, is 13,500 tons, so that she has a dead weight carrying power of 5,500 tons. The cubical contents of her hold give her a measurement capacity of 7,720 tons at 50 cubic feet to the ton. Her stern frame, or post, is the largest single forging ever made for such a purpose, the finishing weight being estimated at not less than thirty-three tons. She brought 256 cabin, 1,176 steerage passengers. Her officers and men number nearly two hundred. She is commanded by Commodore James Kennedy, who has been in the employ of the Company since 1853, during which time he has made 494 trips across the ocean, in the accomplishment of which he has traveled not less than 1,482,000 miles. The City of Rome leaves again on her return trip to Liverpool to-day.

THE Groove Track Pavement Company have petitioned the Board of Aldermen for permission to revolutionize travel and traffic on Broadway. They propose to lay down on that street five sets of grooved tracks gauged to any size of vehicle, and guarantee to keep the street free from ice and snow in Winter and dirt and dust in Summer, and in return they ask the privilege of transporting passengers in their own vehicles for a five cent fare, or of making a pro rata arrangement with omnibus or car lines. The scheme looks very specious on its surface, but it has the appearance of placing our great thoroughfare under the control of a single corporation and of imposing a tax upon cartage and the movement of freight through the city. No private company should be permitted to control Broadway from curb to curb. The city itself can do all that is necessary toward securing the orderly passage of vehicles.

BROWNSVILLE, Baltimore, Boston, New York, New Orleans and Philadelphia have been designated as ports from which imported merchandise may be shipped in bond in transit through the United States to Mexico by routes prescribed from time to time by the Treasury Department.

THE Flushing and Northside Railroad sold at Hunter's Point, L. I., under a foreclosure, on the 22d inst. It was bought in by John W. Lawrence for $50,000.

New York Stock Exchange.

AMERICAN RAILROAD JOURNAL.

Financial and Commercial Review.

THURSDAY EVENING, Oct. 27, 1881.

In the morning call loans were 4 to 6 per cent; in the afternoon, 5 per cent and at the close, 4 per cent. The money market was easy throughout the day. The Bank of Belgium has raised its rate of discount to 5½ per cent. The posted discount rates of the Bank of England remains at 5 per cent.

The actual rates for sterling exchange were 4.80½@4.81 and 4.84½@4.85, with cables 4.85½@4.86 and prime commercial 4.79@¼. The actual rates for Continental exchange are as follows: francs, 5.26⅞@5.26¼ and 5.21⅞@5.21¼, marks, 94@⅛ and 94⅛@95, and guilders, 39⅝@¾ and 40.

The Secretary of the Treasury issued on the 20th inst. a circular to the effect that until further notice the remainder of the $20,000,000 of the 3½ per cent bonds embraced in the 105th call would be paid upon presentation of the same to the Department at Washington, with interest accrued thereon to date of presentation. The amount of these bonds outstanding at the date of the above notice was about $13,000,000. The bonds should be assigned to the "Secretary of the Treasury for redemption," and should be addressed to the "Secretary of the Treasury, Loan Division, Washington, D. C."

Under the order issued by the Secretary of the Treasury on the 1st inst., $2,000,000 of bonds were purchased by the Government on Monday last. The amount offered was $3,417,200.

The Commissioners of the Sinking Fund on the 21st inst. passed the required resolution authorizing the Controller to pay off $2,497,000 of the City debt, which falls due on the 1st of November.

A statement has been prepared at the Treasury Department, Washington, showing that the total amount of the five per cent (continued) bonds of the funded loan of 1881 is $401,490,000, of which $22,022,550 are held abroad, $182,355,750 by national banks, and $197,111,700 by other persons in the United States. The interest from August 12 on these bonds will fall due November 1, and will amount to about $3,100,000. Checks for the payment of the interest will be mailed by Treasurer Gilfillan on the last day of October.

According to a statement just completed at the Census Bureau at Washington of the State, county and municipal debts of Missouri, it appears that the State bonded debt was $16,258,000: county debt, $11,760,493; floating county debt, $274,410; gross county debt, $12,035,903; sinking-fund, $112,901; net county debt, $11,923,312; school district debt, $718,784; debt of cities of 7,500 inhabitants and over, $26,146,449; floating, $1,483,418: gross debt of these cities, $27,629,867; sinking-fund, $534,309; net debt of these cities, $27,095,558; debt of cities and towns of less than 7,500 inhabitants, $1,280,059; floating, $189,767; gross, $1,469,826; sinking-fund, $35,158; net debt of these cities and towns, $1,434,668; total bonded debt, $55,446,000; floating, $2,666,880; gross debt, $58,112,880, sinking-funds, $681,558; net debt, $57,431,322.

The report of the Director of the Mint of the production of gold and silver in the United States for the year 1880, shows that the estimated production of $36,000,000 in gold has been sustained, and that the value of the silver produced during 1880, namely, $39,260,000, exceeds the estimate of the Director by $1,500,000. The silver bullion purchased during the fiscal year for coinage amounted to 24,262,571 standard ounces, worth at its coining value $28,232,810; and the deposit of silver coin and bullion not of domestic production was $2,507,766, of which probably $2,000,000 was purchased and used.

The Committee on Securities of the Philadelphia Stock Exchange has decided not to list hereafter the stocks of any mining companies which do not have at least $10,000 in the treasury.

The Supreme Court of New Jersey has restrained the Central Railroad Company of New Jersey from paying interest on its Income bonds on the 1st of November, on the ground that the floating debt is yet unprovided for.

A mortgage was executed on the 19th inst. by the Erlanger syndicate to the Trustees of the Cincinnati Southern Railroad, to secure them in their rental. All the rolling stock, valued at $2,000,000, is mortgaged.

On the 1st of March, 1869, the interest charge on the public debt of the United States was $126,389,550, and on the 1st of March, 1873, $101,569,527, an average monthly reduction of $501,700. On the 1st of March, 1877, the interest charge was $94,403,645, an average monthly reduction of $149,289. On the 1st of March, 1881, the interest charge was $76,845,937, an average monthly reduction of $365,785. October 18, 1881, the interest charge was $61,052,177, the average monthly reduction of $1,974,219.

The closing quotations on Thursday were: Adams Express, 146@148; American Express, 97@98; American District Telegraph, 50@58; Chicago, Burlington and Quincy, 136½@136¾; Canada Southern, 66¾@67; Chicago and Northwestern, 124@124½; do. pref., 135@136; Chicago and Alton, 129½@130; Central of New Jersey, 95¾@95⅞; Chicago and Rock Island, 134@135; Central Pacific, 94½@94⅝; Chicago, Milwaukee and St. Paul, 108⅛@108⅜; do. pref., 120½@122; Chicago, St. Louis and New Orleans, 77@79; Cleveland, Columbus, Cincinnati and Indianapolis, 93½@94; Columbus, Chicago and Indiana Central, 21@21½; Delaware and Hudson Canal, 109@109¼; Delaware, Lackawanna and Western, 126½@126⅝; Hannibal and St. Joseph, 95½@96½; do. pref., 112¾@113¼; Illinois Central, 130@130½; Lake Erie and Western, 47½@47⅝; Lake Shore and Michigan Southern, 121⅜@121½; Metropolitan Elevated, 91@91½; Manhattan Elevated, 53½@53¾; Michigan Central, 92½@92⅝; New York Elevated, 109@109½; New York, Lake Erie and Western, 44⅛@44½; do. pref., 87@88; New York Central and Hudson River, 139⅛@139⅜; Ohio and Mississippi, 41¾@41⅞; Ohio Southern, 21@22; Ohio Central, 27½@27⅝; Pacific Mail, 48¾@48⅞; Union Pacific, 120⅛@129⅜; United States Express, 75@76; Wells-Fargo Express, 134@136; Western Union Telegraph, 87½@87¾; Wabash, St. Louis and Pacific, 48¼@48½; do. pref., 88½@88⅝.

The following quotations of sales of Railway and other securities, for the week, are in addition to those given elsewhere in our columns:

The Pittsburg, Penn., *Chronicle* says that railroad operatives are active in Fayette. Several roads are in process of construction and others are to follow. Vanderbilt has finished his survey of the East Shore road up the Monongahela River to the West Virginia line, and the Cat's Run route from Masontown to Uniontown is now being surveyed.

The report of the directors of the Great Western Railway Company of Canada shows that the receipts for the half-year ending July 31, 1881, were £470,000, and the surplus £45,000. The directors recommend a half-yearly dividend of 5 per cent. on the preference stock, and 1½ per cent. on ordinary shares.

Mr. Joseph Hickson, General Manager of the Grand Trunk Railway of Canada has returned from England. He says that "nothing has transpired with reference to pushing the construction of the double track faster than it has been going on, and that money is not easily obtained in England."

The annual inspection of the lines of the Pennsylvania Railroad Company by its officers commenced on the 17th inst.

Philadelphia and Reading Companies.

The following is the comparative statement of the Philadelphia and Reading Railroad Company and the Philadelphia and Reading Coal and Iron Company for the month of September, 1881 and 1880:

	1881.	
GROSS RECEIPTS.	*Profit for mo.*	*Year to date.*
Railroad traffic	$892,187.42	$6,728,253.23
Canal traffic	53,181.44	292,250.30
Steam colliers	41,023.28	217,350.75
Richmond coal barges	636.64	994.14
Total Railroad Co	$987,088.78	$7,238,848.42
Reading Coal & Iron Co	141,730.24	824,828.74
Total of all	$1,128,819.02	$8,063,677.16
TONNAGE & PASSENGERS.	*Month.*	*Year to date.*
Tons of coal on railroad	785,795.09	6,433,875.19
Tons of merchandise	621,996.02	5,411,826.07
Passengers carried	1,076,270	8,701,771
Coal transp by stm colliers	50,775.00	460,880.00
TONS OF COAL MINED.		
By Coal and Iron Company	416,459.18	3,096,100.06
By tenants	138,715.12	1,189,939.19
Total mined from lands owned and controlled by Co. and from leasehold estates	555,175.10	4,286,040.05
	1880.	
GROSS RECEIPTS.	*Profit for mo.*	*Year to date.*
Railroad traffic	$1,082,371.50	$6,330,738.28
Canal traffic	110,210.23	267,584.20
Steam colliers	22,208.58	161,258.92
Richmond coal barges	71,611.01	184.71
Total Railroad Co	$1,213,179.30	$6,759,496.69
Reading Coal & Iron Co	218,963.27	233,196.93
Total of all	$1,432,142.57	$6,992,693.62
TONNAGE & PASSENGERS.	*Month.*	*Year to date.*
Tons of coal on railroad	904,828.09	5,690,588.13
Tons of merchandise	478,093.01	4,881,454.00
Passengers carried	1,001,251	8,126,807
Coal transp by stm colliers	45,836.00	454,528.00
TONS OF COAL MINED.		
By Coal and Iron Company	439,615.13	2,705,403.14
By tenants	163,565.16	963,229.13
Total mined from lands owned and controlled by Co. and from leasehold estates	603,118.09	3,668,633.07

The receipts of both companies for the month of September, 1881, were $3,356,411.57; the expenses, excluding interest, $2,227,592.55; and the profit $1,128,819.02, against $1,432,142.57 for the month of September, 1880, a decrease of $303,323.55. From the commencement of the fiscal year, December 1, 1880, to September 30, 1881, the profit of both companies were $8,063,677.16, against $6,992,693.62 for the corresponding period of the previous year—an increase of $1,070,983.54. The increase in passengers carried for the ten months under review was 580,964; in tons of coal transported on railroad, 743,287.06; in tons of merchandise carried, 530,372.07; and in coal transported by steam colliers, 6,352. In tons of coal mined from lands owned and controlled by the company and from leasehold estates, shows an increase of 617,406.98 tons.

The Terrors of Railway Traveling.

It was night.

Night in Arkansas.

It was night in several other States as well, but Arkansas is the one with which we have to deal at this writing.

It being our turn to deal.

A lightning express was booming along at sixty miles an hour. Every car was full, many standing in the aisles with that meekness and patience only seen on an American railroad, to accommodate the fellow who wants four seats to himself.

The lamps blazed fitfully over the passengers' dusters, which seemed to fit fully as well as traveling dusters usually do.

The conductor had passed through, punching people into wakefulness in order that he might punch their tickets.

The train boy had filled the passengers' laps with books to keep them from bouncing in their seats while going over rough places.

A brakeman had put his head in the door and shouted: "The next stopping place is ——!" the name of the place being lost in the slamming of the car door.

The boy who is always dry had made his fifty-second pilgrimage to the water tank.

And the woman who wants air had just torn off her last remaining finger nail in trying to get her window up.

This was on a railroad in the State of Arkansas.

Suddenly the car door opens.

A youthful figure appears, holding something ing in his hand upon which the light glitters. He presents it in a significant manner and cries:—

"Now, gentlemen, your money—"

Fifty men turn pale and cry, "Don't shoot!"

Twenty females scream with one voice, and some faint.

There is a hasty thrusting of watches and pocket-books beneath cushions and into boots.

Strong men fight for a place under the seats where they can secrete themselves.

"Gentlemen," again cries the boyish voice, ringing high and clear above the screams of the women and the din of the train (gasps for mercy from some of the men), let me sell you some of this excellent tropical fruit," and he extends in his dexter hand—a banana.

It was the train boy pursuing his useful and harmless vocation.

CHARLES E. Lambert has been appointed General Passenger Agent of the Troy and Boston Railroad Company.

THE Richmond and Allegany Railroad was completed on the 14th inst., and the formal opening took place at Howardsville, Va., on the 15th inst.

THE President and Secretary of the Interior have granted permission to the Chicago, Texas and Mexican Central and the St. Louis and San Francisco Railroads to build their lines through the territory of the Choctaw Nation.

THE Newark and Delaware Railroad, extending from Delaware City to Newark, Del., a distance of fifteen miles, has been transferred by its officials to the Pennsylvania Railroad Company.

F. B. GOWEN, Receiver of the Philadelphia and Reading Railroad Company, sailed from this city for Europe on the 15th inst. During his absence Geo. D. B. Keim will be act as Receiver.

THE Charlotte, Columbia and Augusta Railroad Company has leased the Atlantic, Tennessee and Ohio Railroad, running between Charlotte and Statesville, N. C., at an annual rental of $25,000.

Established in 1831.

AMERICAN RAILROAD JOURNAL.

PUBLISHED WEEKLY BY THE

American Railroad Journal Company,

No. 23 Liberty Street,

NEW YORK.

The AMERICAN RAILROAD JOURNAL, the oldest railroad paper in the world, was established during the construction of the first 100 miles of railroad in this country. Its files of the past fifty years furnish a complete record of the development of American railroads and faithful chronicles of the kindred financial interests. It contains features of special value to investors and others desirous of being readily acquainted with values and transactions connected with the development and working of our railroad systems, and much of interest to the general reader. It is taken by leading railroad men, investors and banking houses in this country and Europe, where it has long been a recognized authority in its special field, being recommended as such by "Chambers' Encyclopædia" and other standard foreign and domestic publications. We give below a few extracts from opinions of the press:

From "Herapath's Railway Journal," London.

The AMERICAN RAILROAD JOURNAL, one of the most honest and outspoken of American papers.

From the "Journal of Commerce," New York.

The AMERICAN RAILROAD JOURNAL, a most valuable weekly newspaper. Is now half a century old.

From the "Cincinnati Price Current."

The AMERICAN RAILROAD JOURNAL'S list of patrons is composed largely of the oldest and heaviest financial houses in the United States, Great Britain and the Continent, and of railway companies, manufacturing establishments and banking and commercial houses in this country.

From the "Pittsburg (Pa.) Chronicle."

The AMERICAN RAILROAD JOURNAL is authority on railroad news.

From the "Washington (D. C.) Law Reporter."

The AMERICAN RAILROAD JOURNAL is a most valuable publication, and to all persons interested in American railroads, earnings, dividends, etc., etc., it is almost invaluable.

Dividend Notices.

THE LAKE SHORE AND MICHIGAN SOUTHERN RAILWAY COMPANY,
TREASURER'S OFFICE, GRAND CENTRAL DEPOT,
NEW YORK, September 27, 1881.

The Board of Directors of this Company have this day declared a quarterly dividend of TWO Per Cent upon its capital stock, payable on TUESDAY, the first day of November next, at this office. The transfer books will be closed at 3 o'clock, P. M., on Saturday, the first day of October next, and will be reopened on the morning of Friday, the fourth day of November next.

E. D. WORCESTER, *Treasurer.*

COTTON-SEED HULLS

For Packing Journal Boxes of Cars.

NATIONAL RAILWAY PATENT WASTE CO.

240 Broadway, - New York.

Railroading the Sahara.

SOME years ago Victor Hugo made an after dinner speech in relation to the possible future of Africa, which was ridiculed even by people possessed of an intelligent imagination.

The ground which the great poet took was that perhaps, many centuries hence, Africa would develop a civilization of her own as wonderful in its way as any civilization that has yet existed. Surely it is not more remarkable that in the course of time a highly cultivated race should develop from negroes than that human beings should be evolved from the quadrumana—and the latter is a theory almost universally accepted at present by the scientific world.

We do not know whether the project in contemplation by the French, of building a railroad across the Sahara, will have any effect in hastening the realization of Victor Hugo's dream. The idea is to construct a road of this kind from the head waters of the Niger to the French possessions in Africa, and then to form a union with another railway running east from Senegal. There are numerous obstacles at present in the way of this project being carried out. It has long been cherished by the French nation, however, and there is every probability that it will one day be fully worked out.

Bridging Lake Ponchartrain.

A CONTRACT was executed on the 31st ult. at Cincinnati for the building, for the Erlanger syndicate, of an immense trestle across Lake Ponchartrain. The Alabama and Great Southern Railroad ends at Meridian, where the New Orleans and Northwestern Railroad begins, leading to Lake Ponchartrain. Opposite the terminus of the New Orleans and Northeastern Railroad, at Lake Ponchartrain, is the Northern terminus of what is known as the "Old Fork Road," which begins at Canal street, New Orleans. The last-named road has been used principally for carrying pleasure seekers from New Orleans to Lake Ponchartrain. It has recently been purchased by the Erlanger syndicate, and, in order to connect this road with the New Orleans and Northeastern, the construction of a trestle across the lake is found necessary, which will form, when completed, a direct connection with Meridian. The trestle will be six miles long.

This link will form an important connection and greatly develop the strength of the entire Erlanger system. The contract for the erection of a creosote factory near the lake will be awarded in a few days. This establishment will be built for the purpose of supplying enough creosote to be used for saturating those portions of the timbers under water, to prevent them from decaying.

Developing Trade in Africa.

The work undertaken by the French Ministry of Marine, of opening up Western Soudan, continues to attract attention in France. A detailed account of the operations carried out up to the present time, together with the plan of those to be executed before the beginning of next summer, has just been published by a Parisian journal. According to that paper, a large part of the country intervening between the Senegal at Medine and the Niger at Bamakou has been surveyed. Across this tract it is proposed to construct a railway, and the surveys made up to the present are said to show that the work will not be difficult. The task to be accomplished before the unfavorable season of 1882 sets in and puts a temporary stop to the proceedings of the French surveyors and engineers is to make a line of rail from Kayes, on the Senegal, to Bafoulabe; to complete or enlarge the latter post and that of Kita; to establish other places between them; to establish an additional post as near the Niger as possible, and to push on the surveys. The public is warned that serious delays in carrying out such a work in such a climate and country are likely enough to occur. Nevertheless, it has been really begun, and the possibility of opening Soudan to European, or at least to French, trade is about to be practically tested.

Compressed Air as a Motor.

THE People's Passenger Railway Co. will soon begin an extensive series of experiments with a compressed air motor, with the view of introducing this new system on each of its lines if satisfactory results are reached. A single car is being fitted with machinery to test the ability of the motor to perform its work. If the car runs properly, ten others will be supplied with engines, and a thorough test made for efficiency and economy.

This system has been used for ten years at Nantes, France, but when an attempt was recently made to introduce it in Paris the omnibus companies successfully opposed the innovation. It is the invention of a Frenchman named L. McKarski. The motor can be attached to cars as built at present with but little difficulty. The engine, and battery of sixteen cylinders to contain compressed air, will be underneath the car, while on the front platform the engineer and machinery for controlling the car will be placed. The cylinders will be charged with 100 cubic feet of air compressed to the density of thirty atmospheres or a pressure of 450 pounds to the square inch. In transmission to the engine the air will be passed through hot water, which will further increase its pressure. The engineer, by means of a gauge, can control the pressure applied to the piston rod, which will be about that of steam in ordinary running.

A speed of twenty miles an hour can be obtained from the engine, which is designed to run seven miles before the cylinders will need recharging. The engine now being built at the Philadelphia Hydraulic Works for compressing air is of an entirely new pattern and unusually strong. A merit claimed for the new moter is that it does not require an experienced engineer to run it. The representatives of the patentee in this country expect to accomplish wonderful results with the motor, though mechanical engineers think it will not be able to work in winter over a track covered with snow and ice.—Philadelphia Record.

INDUSTRIAL SECRETS.—A century ago, what a man discovered in the arts he concealed. Workmen were put upon oath never to reveal the process used by their employers. Doors were kept closed, artizans going out were searched, visitors were rigorously excluded from admission, and false operations blinded the workmen themselves. The mysteries of every craft were hedged in by thick-set fences of empirical pretensions and judicial affirmation. The royal manufactories of porcelain, for example, were carried on in Europe with a spirit of jealous exclusiveness. His Majesty of Saxony was especially circumspect. Not content with the oath of secrecy imposed upon his workpeople, he would not abate his kingly suspicion in favor of a brother monarch. Neither king nor king's delegate might enter the tabooed walks of Meissen. What is erroneously

called the Dresden porcelain—that exquisite pottery of which the world has never seen its like—was produced for two hundred years by a process so secret that neither the bribery of princes nor the garrulity of the operatives revealed it. Other discoveries have been less successfully guarded, fortunately for the world. The manufacture of tinware in England originated in a stolen secret. Few of our readers need be informed that tinware is simply thin iron, plated with tin by being dipped into the molten metal. In theory, it is an easy matter to clean the surface of iron, dip it into a bath of boiling tin, remove it enveloped with a silvery metal to a place of cooling. In practice, however, the process is one of the most difficult in the arts. It was discovered in Holland, and guarded from publicity with the utmost vigilance for more than half a century. England tried in vain to discover the secret, until James Sherman, a Cornish miner, insinuated himself master of the secret, and brought it home. The secret of manufacturing cast steel was also stealthily obtained, and is now within the reach of all artizans.

Accident Insurance—Accidental Death.

ENGLISH HIGH COURT OF JUSTICE, QUEEN'S BENCH DIVISION, JUNE 22, 1881.

LAWRENCE v. ACCIDENT INSURANCE COMPANY. 44 L. T. Rep. (N. S.) 25.

An accident insurance policy provided thus: "This policy insures payment only in case of injuries accidentally occurring from material and external cause operating upon the person of the insured, where such accidental injury is the direct and sole cause of death to the insured, but it does not insure in case of death arising from fits, or any disease whatever, arising before or at the time, or following such accidental injury (whether consequent upon such accidental injury or not, and whether causing such death or disability directly or jointly with such accidental injury. The insured, while standing upon a railway platform, was seized with a fit, and falling on the railway track was killed by a passing locomotive. *Held*, that the death of insured was not within the provision of the policy, and the insurance company were liable for the amount of insurance specified in such policy.

SPECIAL case stated by order of a master, of which the following are the material facts:

The action was brought by the adminstrator of James Lawrence, deceased, to recover 1000l, being the full amount of a policy of insurance against accidental injury effected on the 10th February, 1873, by the deceased with the defendant company.

The policy in question proceeded so far as material as follows: "Now therefore this policy witnesseth that the said Accident Insurance Company, Limited, doth hereby agree that if at any time before the expiration of one year from the date of this policy, or if at any time hereafter during his life, while the insured shall at the expiration of each year from the date when this policy is renewable pay the premium above specified, or any increased or decreased premium agreed to be received by the directors in consequence of change of occupation or otherwise, the said insured shall sustain any personal injury caused by accidental and external violence, within the meaning of this policy and the conditions hereto, and the direct effects of such injuries shall occasion his death within three calendar months from the happening thereof, then the frands and property of the company shall be subject to pay the full sum hereby assured (being the sum of 1000*l*) to the legal representatives of the insured within three calendar months after proof of such death satisfactorily to the directors of the said company shall be furnished."

The policy also (among other things) contained the following proviso: "Provided also that this policy insures payment also in case of the injuries accidentally occurring from material and external cause operating upon the person of the insured, where such accidental injury is the direct and sole cause of death to the insured or disability to follow his avocations, but it does not insure in case of death or disability arising from fits or rheumatism, gout hernia, erysipelas, or any disease whatsoever arising before or at the time or following such accidental injury (whether consequent upon such accidental injury or not, and whether causing such death or disability directly or jointly with such accidental injury."

While the policy was still in force, namely, on the 26th February, 1870, the insured, being at a railway station, was taken suddenly ill and fell forward in a fit off the platform on to the railway, and a locomotive engine with empty carriages, which was at that moment going through the station, passed over the neck and body of the insured, and instantly killed him. The falling forward of the insured off the platform was in consequence of his being seized with a fit or sudden illness, and but for such fit or illness he would not have suffered injury or death as before mentioned.

The question for the opinion of the court was, whether the death of the insured happening under these circumstances was caused in such a manner as to entitle the plaintiff, as administrator of the insured, to payment of the sum assured by the policy.

DENMAN, J. I must say that during the argument I had considerable doubt as to the true meaning of this clause, and I am not even now sure that, but for *Winspear's* case, I should not be of opinion that the defendants were protected by the clause. I think, however, that the legitimate effect of that decision is to make the cause plain; and if that decision be correct, the facts in this case do not constitute a defense so as to prevent the plaintiff from recovering in this action. The facts are these: The deceased, while standing on a railway platform, was suddenly seized with a fit, which caused him to fall off the platform on to the line, and a locomotive engine, which at that moment was going through the station, passed over his neck and body, and instantly killed him. Now the immediate cause is not at all to be disputed, for if the deceased had not been on the platform, and had not been seized with a fit, he would not have fallen on to the line and been killed; and in that sense the fit may be said to have occasioned his death. The question here is whether the fit was one of the several events which occasioned his death, or whether it was, within the meaning of this proviso, a thing which would prevent the policy from attaching. In *Winspear's* case, where a man who was fording a stream was seized with a fit and fell into it and was drowned whilst suffering from the fit, it was decided that the fit was not the cause of death within the meaning of the policy. That case, although not quite identical, is very like the present one. The policy here is somewhat different to the policy in that case, and the words which appeared to me to be strongly in favor of the defendants in this case are, "Causing such death or disability, directly or jointly with such accidental injury." If the words had simply been that "this policy shall not attach in case where death was caused by an accident jointly with the fit," I should have thought that it was a case in which the defendants would have had a defense to this action. But these words are in a parenthesis, and are put in to explain the class of cases in which the three previous lines of the proviso will apply, that is where disease is one of the things which has caused the death itself, directly or jointly with the accidental injury. The words "arising from fits * * * or any disease whatsoever," which are defining words, have received a judicial interpretation in *Winspear's* case, and so far as that part of the present case is concerned, are identical with those in *Winspear's* case, where it was held that the death arose not from the fit, but from the drowning. So here the death arose from the accident of the engine passing over the man and so destroying him, and not from the fit having caused him to fall on the rail. I think the present case is governed by the case in the Court of Appeal, and the plaintiff is entitled to our judgment.

WILLIAMS, J. I also am clearly of opinion that the plaintiff is entitled to recover in this action, and I desire to put my decision upon principle, and not upon the cases which have been quoted. Now the question here is whether, upon the true construction of this true proviso, this is a case of death arising from a fit. It seems to me that the first maxim of Lord Bacon is directly in point, in which it is said that "it were infinite for the law to judge the causes of causes, and their impulsions one of another; therefor it contenteth itself with the immediate cause, and judgeth of acts by that, without looking to any further degree." Applying that maxim to the words of this proviso, we must look to the immediate and proximate cause of death, and that would be the injury caused by the engine passing over the deceased. I think that the true meaning of this proviso is that if the death arose from a fit, then the company would not be liable, but it is essential to that construction that it must be made out that the fit was the immediate and proximate cause of death. I put my decision on the broad ground that death in this case did not arise from the fit, but from that which happened afterward, and the plaintiff is therefore entitled to our judgment.

Judgment for the plaintiff.

THE Rabun Gap Short Line Railway Company of North Carolina and the Clayton Railroad Company of Georgia have been consolidated under the name of the Rabun Gap Railway Company. The whole line extends from Knoxville to Lula, on the Atlanta and Charlotte Air Line Road.

AT a meeting of the stockholders of the Memphis and Vicksburg Railroad Company held in Vicksburg, Miss., on the 20th ult. a resolution was adopted looking to the consolidation of that company with the Tennessee Railroad Company.

THE OUTLOOK FOR THE COAL AND IRON TRADES.

THE condition of the coal and iron trades is unusually strong this fall, and the outlook for the coming year in these departments of trade indicates a period of prosperity that has not been equalled for several years. In fact, it would seem, from the present activity in manufacturing enterprises, that a period of favorable business that might extend through several years had been fairly entered npon. The vast amount of railroad construction that has been under way for the past year has created a demand for iron and steel that is not likely to be permanently abated in the near future, though it may receive temporary checks. The activity in the manufacture of iron and steel necessarily creates a proportionate demand for coal. Reports from the coal trade indicate an inability on the part of the dealers,of late,to fill the orders that have been coming in liberally upon them, notwithstanding that the production is estimated to be between three and four million tons more than last year. The scarcity of water alone doubtless has prevented a much larger production. Should it prove that the end of the serious drouth had come, there is little reason to suppose that the supply of coal would be sufficiently increased as to move prices to any great extent, the probability being that the production for the next few months will not exceed the current needs.

The coal and iron trades have seldom looked forward into a future of more promise than now, and the indications are that it may be a future of several prosperous years. The present year of general business activity has given an impetus to all manufacturing industries, and pushing work is witnessed not only in such enterprises as railroad construction, but in building generally, the number of buildings, especially for manufacturing and commercial purposes, going up throughout the country being almost unprecedented. The field for the use of both coal and iron has grown rapidly of late, and is extending continually. The increase in the demand for iron in the Southwest and South has been very conspicuous during the past year, and the interest taken in the great Atlanta exhibition is a prophecy of still further development in Southern enterprises.

To meet the increasing demand,the coal and iron trades were never in better condition than now, as to facilities and valuable experience obtained in late years. These trades have witnessed many ups and downs during the past few years, and have passed through very trying circumstances, which, while they have been accompanied with unfortunate results in many directions, have after all developed certain business facts that required just such conditions and experiences to show the necessity of their existence being recognized as features to be embodied in rules that should influence future operations. At present the causes which seem to give activity to both the coal and iron trades are such as are consistent with well-balanced conditions of supply and demand; and while there must always be more or less of the speculative movement in these trades, the markets appear at present to be affected by it to no alarming extent. If the natural workings of the regulator found in the laws of supply and demand can be maintained, and are allowed to govern operations as free from influences of speculation and of contraction or overcrowding as they appear to be at present, a promising future indeed would appear to be vouchsafed to these important industries, whose prosperity influences favorably so many and such varied interests.

THE RAILROADS AND THE WATER ROUTES.

THE war of freight rates which has been waged so bitterly of late by the leading trunk lines has brought to the front, among other facts, the one that water routes are becoming more important factors in the transportation question than has been generally recognized, and that a powerful check as well as a stimulant is provided by these growing competitors. At a first glance it may appear that the rate-cutting was the result chiefly of an antagonistic feeling among railroad managers, or a rivalry confined to themselves. But when the great activity which has been witnessed in water transportation this year is taken into consideration, especially that activity witnessed among the grain-carrying boats of the Mississippi, it may safely be concluded that the rate-cutting, instead of being the result of rivalry among railroad managers, was the natural result of a necessity forced upon them. A reduction of rates was inevitable; the cutting of rates was but a natural way of meeting the inevitable, or, perhaps, a forced result of it.

The opening and extending of water routes in Canada, the improvements of the Mississippi called for, the reduction of canal tolls, and the other measures undertaken or advocated for developing water routes, must of necessity have a decided effect upon transportation matters and the changing of grain centers or shipping points. While the public is greatly benefitted by this competition between railroads and water routes, the railroads are not so much injured by it as might be supposed. The competition is a stronger and safer regulator than could be provided by governmental restrictions. The benefit which the railroads derive from it

is by no means a small one, for it has stimulated them to attain the utmost perfection of railroad working; and the experience of the past year has improved their working condition for maintaining supremacy in the carrying trade.

TRAVELING by rail has become so necessary and so universal in the United States that accident insurance companies have sprung up in different States, some of which, notably the Travelers Insurance Company, of Hartford, have found great favor among railroad men. Two decisions have arisen in our own courts upon the construction of accident policies, but England has had several cases which are of interest to persons holding accident policies. The latest though not the leading case is, "Lawrence v. Accidental Insurance Co., 72. B. D. 216," an abstract of which we cite elsewhere. The insured, while at a railway station, was seized with a fit and fell off the platform across the railroad, and was run over and killed by a passing train. The policy provided that there was no insurance in case of death arising from fits or any disease, "arising before or at the time or following such accidental injury (whether consequent upon such accidental injury or not, and whether causing such death or disability directly or jointly with such accidental injury"). *Held*, a death by accident, and not from fits or disease.

AN important change has been made in the running of trains on the Metropolitan Elevated Railway, and one, it is said, which is calculated to give general satisfaction. Hitherto, or at least until the first of this month, no trains have been run on that line after midnight, and its down-town terminus has been at the Rector street station. In future, however, trains will be run all night at intervals of twenty minutes after midnight, and the southern terminus of the road will be South Ferry, the rails to which from Rector street were laid last winter. A bridge will be thrown across New Church street to enable passengers by the down trains to cross to the east side of the street and so avoid the crowded thoroughfare at that point. On the east side an improvement, which was projected long ago, and which General Manager Hain says will be carried out in good time, is the erection of a structure in Chatham square by which will be rendered practicable the plan of running trains on the Third avenue line direct to the ferries without the transfer which is made necessary by the existing condition of affairs. The bulk of the travel northward from the ferries goes by way of Third avenue, and the convenience of travelers by this line will, when the change is made, be vastly increased. The Second avenue line will practically end at Chatham square, and its passengers will be the ones who will then be compelled to make the transfer.

Organization.

THE directors of the Danbury and Norwalk Railroad Company, recently elected, are: Roswell P. Flower, New York; Orin Benedict, Bethel; Edgar S. Tweedy, Lucius P. Hoyt, Nathan M. George, Danbury; James W. Hyatt, F. St. John Lockwood, Norwalk; Edwin Sherwood, Southport; Henry McHarg, New York.

AT the annual meeting of the stockholders of the Vermont and Canada Railroad Company, held at Bellows Falls, Vt., on the 20th ult., the following gentlemen were elected Directors: Charles E. Billings, Francis A. Brooks, James W. Johnson, John D. Bryant, and Timothy F. Clary, of Boston, Warren C. French, of Woodstock, Vt.; William H. Webb, of Philadelphia.

AT a meeting of the stockholders of the Cincinnati, Sandusky and Cleveland Railroad Company, held at Sandusky, Ohio, on the 20th ult., N. W. Pierce and Levi C. Wade of Boston were re-elected Directors for three years. J. S. Farlow of Boston was re-elected president, N. W. Pierce of Boston vice president, and J. L. Moore of Sandusky, secretary.

THE Directors of the Boston, Winthrop and Point Shirley Railroad Company, elected on the 25th ult., are: J. H. Buttrick, Lowell, Mass.; S. W. Hale, Francis French, Keene, N. H.; C. A. Parks, Wakefield, Mass.; N. K. Baker, Boston. The general officers are: John H. Buttrick, president; Francis French, vice president; C. A. Parks, general superintendent; Frank H. Hills, clerk and treasurer.

THE directors of the Louisville, Cincinnati and Lexington Railroad Company, recently elected, are, E. P. Alexander, president; Lyttleton Cooke, Geo. A. Washington, J. B. Bangs, Jacob Krelger, jr., Edward Fulton, Chas. Tilden, A. L. Schmidt, E. D. Sayre, M. C. Johnson: S. S. Eastwood was elected treasurer. On and after November 1 this road will be operated as a part of the system of the Louisville and Nashville Railroad Company.

THE Directors of the New York, Pennsylvania and Ohio Railroad Company, elected on the 28th ult., are: S. L. Mather, H. Upson, P. D. Cooper, J. T. Clark, John Tod, Jarvis M. Adams, George Boyer, Henry B. Perkins, W. W. McFarland, Thomas Warnock, Robert Harris, W. W. Scarborough and W. J. McKinnie. The officers are: J. M. Adams, president; J. T. Clark, vice president, and P. D. Cooper, general manager.

THE Directors of the New York and Connecticut Air Line Railway Company, elected on the 28th ult., are: J. D. Mowry, Norwalk; B. A. Sands, F. W. Ford, Sheldon Collins, H. Walter Webb, W. F. Black, Thomas N. Browne, C. V. Seidell, David Tydig, H. C. Hepburn and G. L. Clark, Providence, R. I. The officers are: President, Sheldon Collins; vice president, H. C. Hepburn; treasurer, C. V. Slidell; secretary, Thomas N. Browne.

THE following is a list of the Directors of the Massachusetts Central Railroad Company, recently elected; George S. Boutwell of Boston, Charles A. Cutting of Wayland, J. Edwin Smith of Worcester, Lewis J. Dudley of Northampton, Franklin Bonnie of Hadley, Henry F. Hills of Amherst, Silas Seymour of New York; Luke Lyman of Northampton, William A. Dickinson of Amherst, James W. Rollins of Boston, Ginery Twichell of Brookline, and William T. Parker of Boston. Geo. S. Boutwell was re-elected president of the company.

ARTICLES of association of the New York and Council Bluffs Railway Company were filed with the secretary of State of Indiana on the 17th ult. The main road crosses the State at or near the 41st parallel, and a branch beginning in the southeast corner of Adams county passes through Adams, Wells, Huntington, Wabash and Miami counties, going a total length in the State of 230 miles. The capital stock is $5,000,000. Directors: Isaac B. Hymer, Terre Haute; Albert L. Rice, New York; Ezra Hoscal and Charles Thiers, Brooklyn: Johnson M. Bugge, John H. Shively and David T. Kesshe, North Manchester.

Incorporation.

ARTICLES of incorporation of the New York, St. Louis and Chicago Railway Company were filed on the 24th ult. in the office of the Secretary of State of Illinois. The capital stock is $5,000,000, and the incorporators and directors are C. R. Cummings, William B. Howard, George A. Ives, all of Chicago; C. S. Brice of Lima, Ohio, and James E. Neal of Hamilton, Ohio. The officers are C. R. Cummings, president; C. S. Brice vice president, and James E. Neal, secretary and treasurer. It is proposed to construct a railroad from a point on the Indiana and Illinois state line one mile south of the northeast corner of the township of Thornton, in Cook county, to a point on the north line of said county, at the northeast corner of Northfield township, and passing through said county of Cook.

A COMPANY has been incorporated in Texas to build a railroad to run from Dallas, in a southerly direction to the Rio Grande River. The company has a right to operate a telegraph line alongside its tracks, and to do an express business on its own road. The amount of capital is placed at $750,000. The following are the names and residences of the incorporators: John W. Forney, Samuel J. Randall, W. H. Brady, Frank Sinck, Thomas T. Everett, W. W. Reitzel and James Forney, of Pennsylvania; Charles H. Cole, J. W. Throckmorton, W. M. Walton and C. C. Slaughter, of Texas. The following are the board of directors: John W. Forney, Samuel J. Randall and W. W. Reitzel, of Pennsylvania; Charles H. Cole, W. M. Walton and C. C. Slaughter, of Texas.

THE Turner's Falls extension of the New Haven and Northampton Railroad was completed and opened for business on the 31st ult.

Consolidation.

THE McLaughlin and Saw Mill Run and the Chartiers Railroad Companies have been consolidated under the name of the "Pittsburg, Chartiers and Youghiogheny Railroad Company". The former road extends from Bridgeville to a point on the Pittsburg Southern Railroad near Sodom; the latter road is being built from a point on the Pittsburg and Lake Erie Railway to Tom's Run, four miles beyond Mansfield on the Pittsburg, Cincinnati and St. Louis Railway. The directors of the consolidated company are: Jacob Henrici, of Economy; Roger Hartley, Edward Gregg, Edwin H. Stowe, O. P. Scaife, of Allegheny; John Reeves, Henry Hice of Beaver; J. E. Schwartz, C. Reisinger, F. B. Hubbell, J. K. P. Duff, and John G. MacConnell, of Pittsburg. The officers are: J. E. Schwartz; vice president, Henry Hice; secretary, Fred. B. Hubbell. The stock in the new company is held by those who were stockholders in the two old ones, the stock of the Chartiers and Mansfield Valley going in at $100,000, and that of the McLaughlins and Saw Mill Run at $60,000.

AT Mt. Carmel, Ind., on the 20th ult., the stockholders of the Louisville, New Albany and St. Louis Railroad agreed to consolidate with the Evansville, Rockport and Eastern Railroad. The officers of the air line were elected for the consolidated road, and William H. Eilman, W. F. Nesbit, of Evansville, and H. B. Hanson, of Saratoga, were added to the board of directors.

THE consolidation of the Westchester and Philadelphia and Baltimore Central Railroads under the title of the last named company took effect on the 1st inst. Both roads are controlled by the Pennsylvania Railroad Company and the consolidation is made for convenience in operation. They will be known in the operating department as the Central Division of the Philadelphia, Wilmington and Baltimore Railroad.

ARTICLES of consolidation of the Toledo, Delphos and Burlington Railway Company with the Iron Railroad Company were filed on the 27th ult. The former company has lines in operation between Toledo and Kokomo, Delphos and Dayton, Dayton and Gallipolis and numerous minor connections. The Iron Railroad Company's line extends from the Ohio river to Wellston, Ohio. All the capital, property and franchises of the two companies are united under the name of the Toledo, Delphos and Burlington Railway Co., with a capital stock of $8,000,000.

THERE were filed in the office of the Secretary of State of Illinois on the 27th ult. articles of consolidation of the Cairo and Vincennes, the St. Francisville and Lawrenceville, the Danville and Southwestern and the Wabash, St. Louis and Pacific Railroad companies. The Wabash assumes all debts and liabilities of the other companies, issues 5 per cent mortgage bonds in the sum of $3,857,000 and in lien of surrendered stock of the Danville and Southwestern, the St. Francisville and Lawrenceville, and the preferred stock of the Cairo and Vincennes, appropriates to the holders thereof bonds of the proposed new issue as follows: to the holders of the stock of the Danville company, $1,340,000; to the holders of St. Francisville stock, $122,000; to the holders of the Cairo stock, $2,000,000; to the purchase of the rolling stock and equipments now in use upon the line of the Cairo company, $350,000 and to the payment of the present indebtedness of the same company, $45,000.

Personal.

JAMES W. HYATT, of Norwalk, Conn., has been elected President of the Danbury and Norwalk Railroad Company, in the place of Roswell P. Flower, resigned.

A. B. HARRIS, of Springfield, Mass., has been elected President of the Vermont Valley Railroad Company, vice Gouverneur Morris, resigned. Oscar Edwards, of Northampton, Mass., and Hugh Henry, of Chester, Vt., were elected to fill vacancies in the board of directors. James H. Williams, of Bellows Falls, Vt., was elected secretary and treasurer, in the place of his father.

THE President has appointed Joseph K. McCammon to be Commissioner of Railroads, vice Theophilus French. Mr. McCammon's occupancy of the office will continue until it is permanently filled by nomination to and confirmation by the Senate at the next session.

THE officers of the Washington, D. C., Exchange, elected on the 2d inst., are: George H. B. White, President; H. D. Cooke, Vice-President; J. B. Kerr, Treasurer; A. E. Bateman, Secretary; standing committee, D. W. Middleton, C. S. Bradley and H. C. Offley.

Interest and Dividends.

THE Evansville and Terre Haute railroad company have declared a semi-annual dividend of two per cent, payable November 5, at the Farmers' Loan and Trust Company.

The directors of the Pennsylvania railroad company, at their meeting at Philadelphia on the 1st inst., declared a semi-annual dividend of four per cent, payable, clear of State taxes, on the 30th of November.

THE usual quarterly dividend of two per cent on the cnpital stock of the Pullman Palace Car company has been declared, payable November 15th, at the offices of of the Farmers' Loan and Trust Company of New York, the New England Trust Company of Boston, and the company's office at Chicago.

THE Atchison, Topeka and Santa Fe railroad company will not pay a cash dividend in November, but proposes fifty per cent in stock, subject to ratification of the stockholders on the 12th inst.

The Iron Steamboat company have declared a dividend of five per cent, payable on the 15th inst., at the office of May & King, 33 Broad street.

THE Wabash, St. Louis and Pacific railway company have declared a quarterly dividend of 1½ per cent on the preferred stock, payable November 15.

THE New York, Providence and Boston railroad company have declared a quarterly dividend of two per cent, payable on the 10th inst.

THE Nashua and Lowell railroad corporation has declared a dividend of four per cent, payable November 1.

THE Boston and Maine railroad company have declared a semi-annual dividend of $4 per share, payable November 15.

A General Manager's Car.

THE new official car recently completed at the Detroit shops of the Pullman Palace Car Company for the use of the General Manager of the St. Louis and San Francisco Railway arrived at its destination from Chicago on the 22d inst. It is said to be one of the most complete official cars ever turned out by the Pullman Co. Its length is 55 feet besides the platform. It has twelve paper wheels, and is equipped with the automatic air-brake and with the Miller platforms and couplings, etc. The inside wood finish of the car is all mahogany. In the front end of the car are the kitchen, china closets, ice-chests, toilet-room, and Baker's heater, which latter heats the car. Then comes four full sections of Pullman's standard sleeping-berths. The center of the car is taken up by the general manager's private room, which can be used as an office and sleeping-apartment. Adjoining this room is a toilet-room. The rear end of the car, 12½ feet long, is known as the "observation-room," having two end windows extending down to the floor.

The name given to the new car by Captain Rogers is "Wyandotte," which is handsomely lettered on both sides of the exterior of the car.

THE Chicago, Burlington and Quincy Railroad Company is building its extension of the Burlington and Missouri River Railroad in Nebraska to Denver at the rate of one mile per day. The first hundred miles is graded, and track is laid forty-five miles west of Indianola, the former terminus, and trains are running to Culbertson, thirty miles beyond Indianola. The entire distance from Indianola to Denver is 250 miles, and 200 miles of this route is located and surveyed, and work on 100 miles of telegraph line has been begun. Trains will run into Denver next September.

THE Supervising Inspector General of Steam vessels will recommend in his annual report that the tax upon steamboat officers be reduced in view of the increasing accumulation of funds each year in excess of the needs of the service. He says: "The aggregate surplus now lying idle in the Treasury unnecessarily collected from this source amounts to $649,320.35."

THE Knoxville and Augusta Railway company has consolidated with the Rabun Gap Short Line Railway company and the Clayton Railroad company of Georgia, under the name of the Rabun Gap Railway company. The road is being built by the Richmond and Danville syndicate.

THE extension of the Chesapeake and Ohio Railway to Newport News was opened on the 18th ult.

THE Texas-Colorado Construction Company has contracted for building the first twenty-five miles of road, and also for 16,000 tons steel rails and other equipment.

Statement of the Public Debt of the United States, November 1, 1881.

DEBT BEARING INTEREST.

	Amount Outstanding.	Accrued Interest.

Totals	$64,623,512 00	$1,292,470 24

Interest paid by the United States, $51,467,272 02; interest repaid by transportation of mails, &c., $14,662,-941 06; interest repaid by cash payments: 5 per cent. net earnings, $655,198 87; balance of interest paid by United States, $36,149,132 09.

The foregoing is a correct statement of the public debt, as appears from the books and Treasurer's returns in the Department at the close of business, October 31, 1881.

H. F. FRENCH,
Acting Secretary of the Treasury.

THE Missouri Pacific railroad has just put on two Pullman sleepers, built at the Pullman shops, Detroit, which are a marvel in construction, and not excelled in anything of the kind. One is named "Hyperion" and the other "Prospero." Both are to run via Kansas City between St. Louis and St. Joseph. Mr. Talmage, the General Manager, is much pleased with the cars. They are elegantly lighted. The company are building a line of hotel cars to run between San Antonio and St. Louis this winter, the through travel over that line promising to be very large henceforward.

IT is reported semi-officially that the difficulties between the Texas and Southern Pacific Railroad Companies will soon be adjusted, and that neither road will fulfill their threats—the former of building to San Francisco, and the latter to Galveston.

THE incorporators of the Northern Aroostook Railroad met at Bangor, Me., on the 18th ult., and it was voted to locate the road at once from some point of the European and North American Railway—at Bancroft or Houlton.

The Coal Trade.

The leading coal carrying companies make the following reports of their tonnage for the week ending October 22, and for the year to same date, compared with their respective amounts carried to the same date last year:

	Week.	1881.	1880.
Reading Railroad	183,044	7,010,140	6,198,092
Schuylkill Canal	16,250	490,715	419,516
Lehigh Valley	120,214	5,039,230	3,976,757
Delaware, Lackawanna and Western	94,407	3,397,099	2,779,194
Shamokin	20,868	874,536	718,429
Central R. R. of New Jersey	102,709	3,503·331	2,968,059
United R. R. of New Jersey	32,646	1,245,775	901,845
Pennsylvania Coal	35,955	1,115,395	884,969
Delaware and Hudson Canal	75,941	2,858,980	2,365,742
Huntingdon and Broad Top Mountain	9,731	425,971	350,552
Penn. and New York	35,730	1,324.402	980,675
Clearfield, Pa	49,137	1,910,553	1,362,348

The total tonnage of anthracite coal from all the regions for the week ending Oct. 22, as reported by the several carrying companies, amounted to 633,710 tons, against 659,768 tons in the corresponding week last year, a decrease of 26,058 tons. The total amount of anthracite mined for the year is 22,485,321 tons, against 18,519,691 tons for the same period last year, an increase of 3,965,630 tons. The quantity of bituminous coal sent to market for the week amounted to 108,999 tons, against 85,652 tons in the corresponding week of last year, an increase of 23,347 tons. The total amount of bituminous mined for the year is 4,018,540 tons, against 3,499,046 tons for the corresponding period last year, an increase of 519,494 tons. The total tonnage of all kinds of coal for the week is 742,700 tons, against 745,420 tons in corresponding week last year, a decrease of 2,711 tons, and the total tonnage for the coal year is 26,503,861 tons, against 22,018,737 tons, same date last year, an increase of 485,425,124. The quantity of coal and coke carried over the Pennsylvania Railroad for the week ending October 22 was 181,658 tons, of which 144,895 tons were coal and 36,763 tons coke. The total tonnage for the year thus far has been 7,256,735 tons, of which 5,334,453 tons were coal and 1,922,282 tons coke. These figures embrace all the coal and coke carried over the road east and west. The shipments of bituminous coal from the mines of the Cumberland coal region during the week ended October 22 were 55,387 tons, and for the year to that date 1,710,226 tons, a decrease of 11,169 tons as compared with the corresponding period of last year. The coal was carried to tidewater as follows: Baltimore and Ohio Railroad—week, 34,226 tons; year, 1,095,421 tons; increase compared with 1880, 64,582 tons; Chesapeake and Ohio Canal—week, 16,185 tons; year, 386,681 tons; decrease compared with 1880, 121,704 tons. Pennsylvania Railroad—week, 4,736 tons; year, 226,100 tons; increase compared with 1880, 44,108 tons. The Reading Railroad shipment for last week, ending October 29, was 186,500 tons, of which 42,200 tons were sent to and 45,000 tons shipped from Port Richmond, and 17,400 tons sent to and 16,300 tons shipped from Elizabethport.—*Phil. Ledger, Oct.* 31.

THE Southern Pacific Railroad has been opened for traffic at Camp Rice, on the Rio Grande division, 54 miles east of El Paso and 1340 east of San Francisco. The track is laid nearly to Eagle Springs, 35 miles further east, and is expected to meet the road from Galveston and New Orleans near the mouth of Pecos River next July.

Richmond and Danville Railroad.

The roads owned and operated directly by the Richmond and Danville Railroad company are as follows :

	Miles.
Richmond and Danville Railroad	152
Richmond, York River and Chesapeake Railroad	39
Piedmont Railroad	49
North Carolina Railroad	223
Northwestern North Carolina Railroad	25
Atlanta and Charlotte Railroad and branches	339
Total miles	827

The following roads are controlled by the Richmond and Danville Railroad Company, through its ownership of 51 per cent of the capital stock of the Richmond and West Point Terminal Railway and Warehouse Company, to which corporation they belong:

	Miles.
Virginia Midland Railway	400
Western North Carolina Railway	185
Charlotte, Columbia and Augusta Railroad	191
Columbia and Greenville and branches	228
Spartanburg, Union and Columbia Railroad	68
Asheville and Spartanburg Railroad	50
Northeastern Railroad of Georgia	40
Knoxville and Augusta Railroad	16
Total miles	1,179
Add	827
Total miles owned, controlled and leased	2,006

Within the past few weeks the Atlantic, Tennessee and Ohio Railroad, extending from Charlotte to Statesville, N. C., has been leased by the Richmond and Danville Railroad Company. This company has all rail connection north over the Virginia Midland Railroad from Danville to Washington (which road was recently purchased by the Richmond and Danville Company), and has trackage and traffic contracts with the Pennsylvania and Baltimore and Ohio Railroads, and runs its trains into Washington and Baltimore from Alexandria, Va. It also has tide-water connections from Richmond by the James River, and from West Point by the York River. It has a line of its own steamers from West Point to Baltimore, and has connections from Richmond and West Point with New York and Eastern cities by steamship. The railway line commences at Alexandria and extends through Lynchburg to Danville ; from West Point the line runs through Richmond to Danville, where these two lines meet and unite. Thence the main line goes on south over the North Carolina Railroad to Charlotte, N. C., at which place the line divides—one branch going to Columbia and Augusta, Ga., and the other to Atlanta.

There are other lines constructed and in course of construction in Western North Carolina, Tennessee, Georgia, Alabama, Mississippi, Arkansas and Texas, which, when completed, will be under the control of the Richmond and Danville Company. Reliable authority also has it that this company is trying to buy a controlling interest in the Seaboard and Roanoke Railroad, running from Portsmouth, Va., to Weldon, N. C., which would give them control from Portsmouth to Raleigh. The same authority says that the Richmond and Danville Company are trying to buy a controlling interest in the Carolina Central Railroad, which runs from Wilmington to Charlotte.

Mr. W. J. Best is building from Salisbury to Goldsboro. Northern capitalists have completed a road from Norfolk, Va., to Elizabeth City, N. C., and are pushing on to Edenton. There is a proposition to build a road from Norfolk through North Carolina to Charleston, S. C. Part of the road from Raleigh to Plymouth is graded, and it is said that work will soon commence on the whole line. A new road has just been built from Henderson to Oxford. Col. W. F. Beasley is building another road from Oxford to Clarksville, Va. Several other roads are being surveyed in the western part of the State. Altogether there is an active railroad development in North Carolina.

Cumberland, Washington and Norfolk Railroad.

Books of subscription to the capital stock of the Cumberland, Washington and Norfolk Railroad Company (which was incorporated in Maryland a few weeks ago) were opened on the 1st inst. at Suitland, Prince George County, Md., when S. Taylor Suit, President of the Washington City and Point Lookout Railroad, for himself and others, subscribed for the entire amount. The incorporators of this company were S. Taylor Suit, A. W. Dimmock, William J. Murtagh, S. I. Wailes and E. O. Reed. The capital stock is $5,000,000. The road, it is understood, is to connect the coal fields at Cumberland with the Washington City and Point Lookout Railroad, which is now being built. The connection will take place at Hyattsville. Point Lookout, the terminus of the Washington City and Point Lookout Railroad, has been designated as a United States coaling station by the Secretary of the Navy when direct communication is opened by rail.

Cincinnati Iron Market.

OFFICE OF E. L. HARPER & Co.
Cincinnati, Nov. 1, 1881.

The market is stronger than reported last week, prices having advanced from $1 to $2 per ton. Enquiries are numerous, and buyers are taking advantage of present prices. Many of the furnaces are sold up and those that have any metal on hand are not disposed to sell in large lots. Market closes with a good demand, and furnaces are disposed to sell at closing prices. The mills have, after eight days conference, settled the difference with their workmen and will resume work as early as possible. We quote as follows:—

	No.		Mos.
FOUNDRY.			
Hanging Rock Charcoal	1	29 00@30 00	4
Strong Neutral Coke	1	26 00@27 00	4
American Scotch	1	25 00@26 50	4

CAR WHEEL AND MALLEABLE.			
Hanging Rock Cold Blast		36 00@38 00	4
" Warm Blast		30 00@32 00	4
Lake Superior 1 and 2		32 00@33 00	4
Lake Superior 3 to 6		34 00@36 00	4
Southern Car Wheel		34 00@35 00	4

Northern Central Railway.

The gross earnings, operating expenses and net earnings of the Northern Central Railway Company for the month of September, 1880 and 1881, were as follows:

	1881.	1880.
Gross earnings	$429,565.13	$464,093.30
Operating expenses	379,159.00	272,355.61
Net earnings	$50,406.13	$191,737.69

—showing a decrease in gross earnings for the month of $34,528.17, with an increase in operating expenses of $106,803,39, making a decrease in the net earnings of $141,331.56.

For the first nine months of the current year (January 1 to September 30, 1880 and 1881,) the gross earnings, operating expenses and net earnings were:

	1881.	1880.
Gross earnings	$4,030,253.07	$3,584,105.54
Operating expenses	2,781,787.18	2,419,172.03
Net earnings	$1,248,465.89	$1,164,933.51

—showing an increase in gross earnings for the nine months of $446,147.53, with an increase in operating expenses of $362,615.15—making an increase in the net earnings of $83,-532.38.

THE new route to the West from Portland, via the Portland and Ogdensburg, Ogdensburg and Lake Champlain, and Rome, Watertown and Ogdensburg Railroads commenced to bill traffic through on the 1st inst.

J. W. VAN VALKENBURGH, Receiver of the Lebanon Springs Railroad Company, reports that the receipts of the road for the quarter ended Sept. 30, 1881, were $138,919.05, and the disbursements $130,217.47, leaving a balance on hand of $8,701.58. The assets of the company are $266,972.64, and the liabilities $254,445.68.

THE gross earnings of the Philadelphia and Erie Railroad Company for the month of September, 1881, were $276,522.15, the expenses, $213,262.05; and the net earnings, $63,260.10; net earnings, 1880, $109,866.11—decrease, $46,-606.01. Net earnings nine months of 1881, $802,102.39; net earnings nine months of 1880, $970,228.18—decrease, $168,125.79.

DANBURY, Conn., is now one of the important stations on the New York and New England Railroad, being made so by the new extension of the road which has recently been completed between Waterbury and the Hudson River. It is announced that trains will begin running over this new extension between Boston and the Hudson River on the 6th inst.

THE Pennsylvania Railroad Company is making an effect to abolish the improper use of the word "depot." The word "station" is to be used on its lines henceforth, and even the great "Union Depot" at Pittsburg is hereafter to be known as the "Union Station." Richard Grant White is thus indorsed. The word depot means a place of storage of goods. Station is the correct word. Railroads may have their depots for freight, but not for passengers.

ACCORDING to the recent annual report of the Danbury and Norwalk Railroad Company there has been a large increase over the receipts of last year, and many improvements, such as steel rails, Miller platform, &c., which are classed as betterments, have been made, which have added 20 per cent to the capital stock of the company, and these, added to the dividends paid during the same time, show net earnings for the past four years of more than 8 per cent per annum. Besides the amount which is classed as betterments, a large amount has been pain for new bridges, &c., which is classed as necessary expenses, and which has added thousands of dollars to the value of the road.

New York Stock Exchange.

(Thursday's quotations follow money article.)

AMERICAN RAILROAD JOURNAL.

Financial and Commercial Review.

THURSDAY EVENING, Nov. 3, 1881.

Six per cent was the ruling rate for call loans on stocks during the day, the quotation being 5@6 per cent. Time loans were about 6 per cent, and prime mercantile paper 6@7 per cent.

The posted rates for prime bankers sterling were 4.81 and 4.85. The actual rates were 4.80@4.80½, with cable transfers 4.85@4.85½ and prime commercial bills 4.78@4.79½. The actual rates for Continental exchange are as follows: francs, 5.25⅝ and 5.20⅝; marks, 94⅛ and 95; and guilders, 39¾@40⅛.

The Committee on Securities of the New York Stock Exchange have reported unanimously against admitting the shares of the Metropolitan Elevated Railroad Company with the guarantee of a ten per cent dividend by the Manhattan Railroad Company cancelled.

The amount of standard silver dollars now in the United States Treasury is $66,576,378, while the silver certificates outstanding, or in circulation, amount to $66,327,670, leaving only $248,708 available beyond the amount held for the redemption of the certificates. Owing to the small sum of silver dollars available for the ordinary business of the Department, it has become necessary to suspend the exchange of silver certificates for gold coin or bullion.

The coinage executed at all the Mints of the United States in October was 8,103,500 pieces, valued at $12,653,500, viz: 648,500 eagles, valued at $6,485,000; 755,000 half-eagles, valued at $3,775,000; 2,350,000 standard silver dollars and 4,350,000 cents, valued at $43,500.

By referring to the statement given on another page it will be seen that the total debt of the United States on the 30th of October was $2,025,494,438.12, less cash in the Treasury $240,960,971.22, leaving net $1,785,534,466.90. Since the 1st of October the debt has been reduced $13,321,458.87, and since the 1st of July last $55,064,345.08. Of the bonded debt $250,000,000 bears 4½ per cent interest, $739,347,800 bears 4 per cent, $563,380,950 bears 3½ per cent, and $14,000,000 (navy pension fund) bears 3 per cent. Interest has ceased upon $13,746,305, and $433,679,798 bears no interest, being in the shape of legal tender and other currency, certificates of deposit, and gold and silver certificates. Of the cash in the Treasury $144,493,449 is available at date, being in excess of current liabilities. In addition to the above there are outstanding $64,623,512 bonds issued to Pacific Railroads, and known as the currency 6s.

The excess of exports of merchandize from the United States in September, 1881, was $6,769,250; September, 1880, $17,997,246; nine months ended September 30, 1881, $121,193,289; nine months ended September 30, 1880, $73,798,920; twelve months ended September 30, 1881, $246,270,615; twelve months ended September 30, 1880, $163,857,613. Excess of imports of gold and silver coin and bullion in September, $10,200,865; September, 1880, $19,104,049; nine months ended September 30, 1881, $37,630,406; nine months ended September 30, 1880, $29,568,665; twelve months ended September 30, 1881, $77,321,563; twelve months ended September 30, 1880, $71,432,893.

The total values of the exports of petroleum and petroleum products during the month of September 1881, were $4,762,711, and during September, 1880, $3,712,763. For the nine months ended September 30, 1881, $34,952,961, and for the same period in 1880, $24,989,343.

The amount of United States currency outstanding on the 31st ult. was as follows: old demand notes, $60,040; legal-tender notes, all issues, $346,681,016; one-year notes of 1863, $43,705; two-year notes of 1863, $12,100; two-year coupon notes of 1863, $23,150; compound interest notes, $228,930; fractional currency, all issues, $15,469,090.25; total, $362,518,121.25.

The closing quotations on Thursday were: Adams Express, 146@147; American Express, 94@96; American District Telegraph, 50@57; Chicago, Burlington and Quincy, 137½@137⅝; Canada Southern, 63½@63½; Chicago and Northwestern, 126⅝@126¾; do. pref., 138¾@139½; Chicago and Alton, 130½@131; Central of New Jersey, 95½@95½; Chicago and Rock Island, 135@135½; Central Pacific, 95⅝@95¾; Chicago, Milwaukee and St. Paul, 108⅛@108⅜; do. pref., —@122½; Chicago, St. Louis and New Orleans, 78¼@79½; Cleveland, Columbus, Cincinnati and Indianapolis, 92½@93½; Columbus, Chicago and Indiana Central, 21@21½; Delaware and Hudson Canal, 109@109⅛; Delaware, Lackawanna and Western, 127⅝@127¾; Hannibal and St. Joseph, 96@96½; do. pref., 112½@112½; Illinois Central, 131½@131¾; Lake Erie and Western, 47@47½; Lake Shore and Michigan Southern, 122⅝@122½; Metropolitan Elevated, 101½@102; Manhattan Elevated, 51½@52; Michigan Central, 94½@94¾; New York Elevated, 110½@111; New York, Lake Erie and Western, 45¾@45⅞; do. pref., 89⅛@90⅛; New York Central and Hudson River, 139⅜@140; Ohio and Mississippi, 41½@41⅝; Ohio Southern, 22½@23; Ohio Central, 26¾@27; Pacific Mail, 44⅛@44¾; Union Pacific, 120@120½; United States Express, 74@75; Wells-Fargo Express, 133@135; Western Union Telegraph, 86½@86⅝; Wabash, St. Louis and Pacific, 48⅝@48½; do. pref., 89@89¼.

A Good-Natured Engineer and His Engine.

THE *Mechanical Engineer* says that the locomotive is the highest type in machine works in point of durability, and cites this one in evidence: It was made at the Chicago, Rock Island and Pacific Railway shops in Chicago. Engine No. 3 of this road has been in service since June, 1878, when it was new. It has never been in the shop since, and none of the brasses except those on the cross-heads have been taken out for refitting, and these only once. Its mileage during the three years has been 115,369 miles, and it is considered good for 50,000 more before going into the shop. Its driving-wheels are 57 inches in diameter, and have Krupp's steel tires. Master Mechanic Twombly gives the credit of this performance to Jerry Shea, the engineer, who is constitutionally good-natured and never gets his engine excited.

Dividend Notices.

THE LAKE SHORE AND MICHIGAN SOUTHERN RAILWAY COMPANY,
TREASURER'S OFFICE, GRAND CENTRAL DEPOT,
NEW YORK, September 27, 1881.

The Board of Directors of this Company have this day declared a quarterly dividend of TWO Per Cent upon its capital stock, payable on TUESDAY, the first day of November next, at this office. The transfer books will be closed at 3 o'clock, P. M., on Saturday, the first day of October next, and will be reopened on the morning of Friday, the fourth day of November next.

E. D. WORCESTER, *Treasurer.*

Baker & Godwin's PRINTING HOUSE.

ESTABLISHED 1850.

MODERN RAILWAY PRINTING.

Special attention given to this class of work.

This establishment is very extensive, adapted to every variety and style of Printing, and the proprietors hope to be favored with a share of Railway patronage. Estimates furnished on application.

BAKER & GODWIN, Printers,

Directly opp. Post Office. **NEW YORK.**

Printing of all kinds at greatly reduced rates.

THE RAILWAY TIMES

AND JOINT-STOCK CHRONICLE.

The *Railway Times* was established in the year 1837, and has consistently maintained the purpose for which it was started—to give an independent account of all matters of importance to railway shareholders, not neglecting, at the same time, the duty of keeping its readers well informed on all matters of commercial interest.

It is published every Saturday. Price 5*d*. The price of subscription for one year is £1 1*s*.

No. 2 Exeter Street, Strand, W. C., London.

KNOX & SHAIN,

Manufacturers of Engineering and Telegraphic Instruments. No. 716 Chestnut Street, Philadelphia. Two Medals awarded by the Franklin Institute, and one by the Centennial.

HOUSATONIC RAILROAD

Tehuantepec and the Eads Ship Railway.

[From Harpers' Monthly Magazine.]

THE latest railroad maps of Mexico could hardly fail to excite the fears of Mexican patriotism if our neighbor republic had any fear of that Yankee invasion which is now going on. From the northern frontier no less than four lines of invasion, more or less advanced, pierce the interior. The Mexican Central company has its main or international line extending down from El Paso, while its interoceanic branches meet the Gulf at Tampico, and the Pacific at San Blas; the Palmer and Sullivan narrow gauge, or the Mexican National, invades the country from Laredo on the frontier, and Manzanillo on the sea. Eagle Pass, on the Rio Grande, is the starting point of an American road to Topolorampo, on the Gulf of California. South of the city of Mexico the Grant concession occupies the territory from sea to sea, and guards the western coast from Anton Lizardo across to Accapulco, and thence to the southern limit of the republic.

Instead of dreading this invasion, however, the Mexicans welcome it as the harbinger of the new age of gold which is, to succeed their brazen age of pronunciamento and of civil war, and they have given the full measure of their enthusiastic approval to the daring scheme of the American engineer James Buchanan Eads, who proposes to make Mexico the highway of the world's east and west ocean commerce by taking up the ships, crews, cargoes, and all, and carrying them on railroad cars across the Isthmus of Tehuantepec.

The suggestion of a ship railroad dates back from the adventurous epoch and from the busy brain of Cortez. The "wild surmise" which held Balboa "silent upon a peak in Darien" very soon gave way to a depressing conviction that there was an obstacle in the way of Columbus's idea of reaching the East by way of the West, and Cortez was not content with merely conquering Mexico as long as anything remained beyond. He made a personal exploration of the Coatzacoalcos, the river of the isthmus, with a view of establishing a portage across the short path to the South Sea, for the rich commerce of Zipangu and far Cathay. Spain thought well of the project, and, after three hundred years of thinking, issued a decree in 1814 authorizing the attempt. But the revolution had already started, and prevented all further proceedings until 1842, when the republic granted a concession to Don Jose de Garay to build a railroad there. The Garay concession lapsed, although the government of the United States was prepared to pay fifteen millions of dollars for a right of way across the isthmus, and authorized the commissioners of the boundary treaty to offer that sum to Mexico. This too fell through, but after the gold discoveries of California our government kept its eye on the isthmus, and has since made two surveys for the purpose of determining the practicability of a canal. These surveys were made by General Barnard in 1851, and by Commodore Shufeldt in 1870; but it looks as if the isthmus was waiting for the ship railroad, for in the interval three successive concessions were made to Mexicans, and one to an American company, yet the Panama Canal, 1,200 miles further away from us, was begun before the Mexican government turned a willing ear to the idea of Eads.

The idea of Eads is that wherever a canal can be dug to float a ship, a railroad can be built to carry a ship; and strange and novel as the idea sounds upon its first mention, the most sober-minded and competent engineers of this country and of England declare that it is scientifically sound and quite practicable.

The ship to be transported across the isthmus is placed on its platform, car, or cradle, or dry-dock, or whatever one chooses to call it, resting on even keel and bilge blocks, and braced as if it had gone on the ways for repairs. The car is designed to move on twelve rails spaced the standard width and the wheels are placed as near together as their diameter will allow, or three feet from axle to axle. The tractile power is furnished by four locomotives, each with fivefold the capacity of an ordinary freight locomotive. The non-scientific mind begins to ask at once, How can the ship get there, how is she secured from bending or twisting strains while there, and how does the railroad meet the demands of the pressure on its road-bed, and of the grades and curves involved in a hundred miles of mountain location?

The ship gets on the railway very much as it gets on any other ways. The railway begins thirty feet below the surface of the harbor, in a land-locked basin. A slope of one in a hundred brings the railway down to thirty feet in depth at a distance of three thousand feet from the land terminus. The cradle is run down this incline to the depth at which the ship's keel rests on its bearing; the vessel is secured to the cradle and braced, and stationary engines at the land end of the basin draw it to its level on *terra firma*.

The car is made of cross girders of plate iron, with each wheel bearing on an independent axle, and with its separate set of springs. A car three hundred feet in length, such as would carry a ship of four thousand tons, would have one hundred wheels on each rail, or twelve hundred wheels under each car. This would give a pressure of five tons on each wheel, which is not as great as is borne by the road-bed of an ordinary railroad. Any one who has traveled at the rate of forty miles an hour on the two rails of such a road as the Hudson River road, where the motion is hardly felt, will have no difficulty in believing that a vessel securely braced can be moved on an elastic cushion of twelve hundred springs, distributed across twelve rails, without any disturbance or strain, as long as the road is straight and level. In the ship railway, curves are out of the question, and a change of direction is made by a turning-table. The surveys of the road have shown that a maximum grade of fifty feet in the mile is easily obtainable. A cradle three hundred feet long would be exposed to a maximum flexure of six inches in its center in passing directly from a level to such a grade.

There is a popular delusion that a ship is so delicate that it would give way if any part of it were left unsupported. Lloyds' Rules, which are the basis of ocean insurance, require a seagoing vessel to be so strong that it would sustain no injury if supported on a single bearing across its center, or if suspended between two supports at its ends. A ship that cannot stand this without injury is not fit to go to sea, yet there is no room on the ship railway for any such strain as this.

While on the one hand the loaded ship is supposed to have so tremendous a weight as to crush in the road-bed, we are told that it is so light that it cannot stand the exposure of its surface to the wind. Ship captains have declared that the seams would dry and crack and open under exposure to the hot sun; to which the projector answers that he will transfer every ship from harbor to harbor within twelve hours, and if the ship's seams cannot stand that exposure, it is a sign that they need calking and tarring, for which the passage will furnish an opportunity. In fact, the conservative old salts look upon the audacious attempt to lift their craft out of the water and haul it across dry land very much as the old Shiver-my-timbers and Benbows of sailing three-deckers look-

ed upon the introduction of steam and of Monitors. But science has no sentiment, especially when pressed into the service of trade, and the testimony of science is to the effect that, spite of old salts and salt-water sentiments, ships will yet sail on dry land across the isthmuses of Tehuantepec and Corinth, across Florida, and over the Landes of Southern France, between Biscay and the Mediterranean.

The Tehuantepec project is already well advanced, and under circumstances that promise speedy success. The concession which the Mexican government gave to our fellow-countryman is the most liberal that any government ever gave to a private individual. Its importance to us consists in the fact that the charter permits the company to discriminate in favor of the commerce of any nation which aids in building the work.

The Isthmus of Tehuantepec becomes, in the light of its possibilities, one of the points of interest on the map. At its narrowest part it is 143 miles wide, from the bar of Coatzacoalcos on the north to the chain of natural harbors at the south end. The Coatzacoalcos River is a broad and deep stream, with twenty-five feet of water from the mouth to the town of Minatitlan —a sleepy, ragged, and tumble-down settlement thirty miles up. This is a port of some importance for the trade in mahogany and other precious woods. The whole Atlantic side of the isthmus is a low, marshy, unhealthy forest for fifty of sixty miles back from the coast. Below Minatitlan the tributary stream of the Uspanapa comes in from the south, and carries the deep channel twenty miles further inland to a bend where a conspicuous cottonwood-tree has given the name of "Ceiba Bonita" to the point where the work of the ship railway will begin. Here the land is so marshy that a canal of ten miles in length will probably need to be dredged out to the begining of track-laying. The railway itself will run through a country of exuberant fertility, of beautiful scenery, and of healthful climate. The mountains present no especial obstacle, for at three different points the Sierra Madre lowers itself to an elevation of only 650 feet, as if bending to the yoke of commerce. These are the passes of Chivela, Tarifa, and Masagua, through one of which the road will run ; and thence southward there is a choice of routes either to Salina Cruz, on a large lagoon, or by the town of Tehuantepec to the harbor of Ventosa, on the sea.

A corps of engineers, under the direction of Mr. J. J. Williams, and Captain Flores of the engineer corps of the Mexican army, are now on the isthmus completing the surveys on which the course of the road and the estimates of its cost were based. The choice of a best location for the road is a matter of more than usual importance, as Captain Eads estimates that his railway will cost half a million dollars a mile ; the estimate of the total cost of the road, including equipment and harbor work, is placed at seventy-five millions ; the period needed for its completion is not to exceed four or five years.

After leaving the fevers of the marsh-land the chief obstacle is the tropic luxuriance of vegetation, which here grows so rankly as to obstruct all passage. It is a land of tropic storms, of six months of rain and six months of dry weather ; its inhabitants are a few tribes of half civilized Indians ; its woods abound in every species of game ; its soil has a capacity for every tropical cultivation. On the Pacific coast there is a wholly different climate, haciendas and villages diversify a landscape which opens out upon glorious views of the far-off Pacific, and peace and primitive prosperity mark it as a fit habitation for man. When the dream of Cortez is realized, and the portage is made, not for such light craft as he built on the lake of Tezcoco, but for the monster ships which now interchange the grain of California and the silks and teas of Cathay and Zipangu with the productions of civilized Europe, two statues should crown the summit of the pass—one of the great conquistador of the sixteenth century, and one of the modern American citizen whose genius has shown itself not less daring in the paths of peace.

St. Gothard Tunnel.

The St. Gothard Tunnel, which was opened on the 2d inst., is located on the line of the railway between Lake Maggiore, in Italy, and Lake Luzerne, in Switzerland, and passes under the Lepontine Alps. The undertaking was organized in 1871, under the authority of a treaty between Italy, Switzerland and Germany, who jointly contributed 85,000,000 francs to the construction company. The first estimate of cost was 187,000,000 francs, but this was increased to 289,000,000 francs by the discovery of an important error in calculation shortly after the work was commenced. The enterprise languished for a long time, but under an increase of capital and further government subventions it was revived and carried to completion. Louis Favre, of Geneva, was the contractor, and agreed to finish the work by October 1, 1880. About a year ago, however, the falling of an immense mass of loose rock greatly embarrassed and impeded the work. The completion of the tunnel will divert some of the commerce and travel of the south, which has hitherto passed by the way of the Mt. Cenis Tunnel into France, or through the Benner Pass into Austria, Switzerland and Germany, and this was the object for which it was built.

The Great Salt Lake.

Four barrels of water of the Great Salt Lake will leave, after evaporation, nearly a barrel of salt. The lake was discovered in the year 1820, and no outlet from it has yet been ascertained. Four or five large streams empty themselves into it, and the fact of its still retaining its saline properties seems to point to the conclusion that there exists some secret bed of saline deposit over which the waters flow, and that thus they continue salt—for, though the lake may be the residue of an immense sea which once covered the whole of this region, yet by its continuing so salt with the amount of fresh water poured into it daily, the idea of the existence of some such deposit from which it receives its supply seems to be only too probable. For the past fifteen years, until last year, the lake has been gradually rising; but in 1870 it receded two or three feet—a most unusual occurrence—owing to the exceptionally warm weather. There are no fish in the lake, but myriads of small flies cover its surface. The buoyancy of the water is so great that it is not at all an easy matter to drown in it. The entire length of the Salt Lake is eighty-five miles, and its breadth forty-five miles.

The Pacific Railway Snow Sheds.

These wonderful wooden tunnels cover 40 miles of the Central Pacific Railroad. They were first suggested by its practical Vice President, Charles Crocker, but his companions hesitated through fear of their impracticability and expense. They are of two kinds, one with very steep roofs and the other with flat roofs. They cost per mile from $8,000 to $12,000, and in some places, where heavy masonry was needed, the cost reached $30,000 a mile. They are firmly constructed to support the great weight of snow and resist the rush of avalanches. The precautions are very thorough. Corrugated plates of iron separate the buildings into sections, and in the great ten mile shed there are automatic electric fire alarms. At the summit is an engine and tank always ready to flood the ignited spot in an instant. These sheds shut in the view of the great Sierras; but without them winter travel would be impossible. Sometimes five feet of snow falls upon them in a day, and often thirty feet lie on the ground at one time, and in many places snow accumulates to the depth of fifty feet above these great wooded arches.—*Nashville American.*

Nero's Engineers.

Modern engineers think they have carried the art of surveying to very great perfection, but a good deal of it must have been known in ancient times. No road is so imperishable as a Roman road, which indicates that the engineers not only built well, but chose good routes, especially in their exemption from the action of floods. The Indian engineers seldom find that they can improve on the routes selected for ancient native canals or the sites chosen for huge tanks, and this week Colonel Turr quoted a still more striking instance. He has been surveying for the canal to be cut through the Isthmus of Corinth, and after a most careful examination of three alternative routes has decided that the one selected by the Emperor Nero's engineers is by far the best. Not to mention that it is shorter than all others, the "trace of Nero" terminates at each end in calm and deep water; and "another advantage of the Nero trace consists in the disposition of the slopes, which favors it, inasmuch as the canal would be then protected against the floods in the ravines along the slopes, while the other two lines would catch these waters." That shows scientific surveying; and it is to be noted that Nero's engineers, like Alexander's, had freed themselves from the singular superstition which so greatly influenced modern opinion, that the waters of two seas were never of the same height. This argument was actually thrown at M. de Lesseps as a serious one, not only against the Suez canal, but the Canal of Corinth.—*Spectator.*

AMERICAN Railroad Journal. ESTABLISHED 1831.

PUBLISHED WEEKLY BY THE
AMERICAN RAILROAD JOURNAL CO.,
At 23 Liberty Street, New York.

Subscription, per annum, in advance..... $5 00
Foreign Subscription, including postage..... 6 00

Purchases for the AMERICAN RAILROAD JOURNAL Co. are authorized only by the written order of Geo. F. Swain, Treasurer; and the Company will not be responsible for the payment of bills unless accompanied by such order.

Payments for advertising and subscriptions should be made by check payable to order of the Treasurer.

BRANCH OFFICE:
53 Devonshire St., Boston, Mass.

Mr. FREDERIC ALGAR, Nos. 11 and 12 Clements Lane, Lombard Street, London, E. C., England, is the authorized European Agent for the JOURNAL.

New York, Saturday, November 12, 1881.

Entered at the Post Office at New York City as Second-Class Mail Matter.

THE apprehension which has been felt in many minds concerning the practicability of the Eads Ship Railway project seems to be disappearing in proportion as the details of the plan are made clear to the general public. The important features of the plan, or those which have received the most discussion and given rise to the strongest objections, appear in the main to have been endorsed as feasible by high scientific authorities. One of the objections most frequently referred to is that the average ship could not stand the strain of the transportation by rail. The opinion of Captain Eads, with his experience in engineering works, such as the construction of the bridge at St. Louis, is of itself of great value, and his opinion is supported by some of the most noted engineers of the day, among them E. I. Reed, who ranks among the leading experts of the world in naval construction, having been for years the chief constructor of the British navy; and Edward Hartt and H. L. Fernald, noted naval constructors of the United States navy. In addition to these authorities a number of prominent military and civil engineers give their endorsements to Captain Eads' opinion on this point and other features of the plan. A very clear and interesting description of the plan is given in an article by John A. Dillon in the November number of Harpers' Magazine, a portion of which we publish elsewhere. Evidently belief in the practicability of the ship railway is growing in the minds not only of scientific persons, but in the public mind also. The prospects of the enterprise are reported as being promising, and the idea seems destined to grow in popularity, one indication of which is that the literary and business press are treating it as a popular subject, and in a most cordial spirit placing its merits before the public.

THE CONFEDERATE BOND MYSTERY AND THE SOUTH.

THE investing public, both here and abroad—and, in fact, the general public, especially that part of it interested in construction work, manufacturing, and agriculture—are looking with no little curiosity and expectancy just now to the Southern States as a field of special promise. In England an unusual amount of inquiry is being made concerning the probable future of Southern railroad interests and the agricultural and manufacturing development of that section of our country. Even the absurd flurry about Confederate bonds, which has been witnessed of late over the water, has doubtless as its basis (if anything appearing at first glance so chimerical and utterly void of honest life can be said to have a basis of any kind) that of an awakening faith in the South.

To us on this side of the water, of course, this Confederate bond business seems an amusing absurdity, for which no satisfactory explanation can be made or expected. Various theories of the meaning of the movement have been advanced, however, more or less significant as illustrating the gullibility with which the schemers accredit the unsophisticated class of investors that are supposed to be ready, chiefly in the rural districts of England, to bite at a glittering hook with a somewhat important-sounding name, as it may seem to those who are not familiar with American history, but which by others is known to have not even the semblance of a bait. We venture to give a possible explanation of this mysterious activity among the musty bonds, or at least to mention what it occurs to us may result from it even if not so intended by the schemers. It looks not a little like a skilful bit of advertising; a forerunner sent out to awaken curiosity and to turn people to thinking of the section from which the bonds came, its present condition, and the promises of its future.

Considered as an advertisement, the movement no longer retains the character of an absurdity, but can be recognized as a plan of far-seeing adroitness and power. It is well known that Confederate bonds are scattered all over England, and are held by many small investors, who do not keep themselves thoroughly informed as to the tendency of current events, and of recent years have known little and cared less concerning the developments that have been taking place in that section, from which a few years ago the unfortunate bonds were issued. Since the bonds were buried away in rural garrets among the accumulating never-to-be-again-referred-to papers, little interest has been taken by their holders in the enterprises that have started up in our Southern States. But here comes word to them that those bonds are worth resurrecting, and even if the amount paid for them is a mere trifle, the trifle coming in this particular way has a peculiarly pleasant value in their eyes. In nothing does the financial heart count itself more blessed than in reaping unexpected fruit, be it ever so little, from seed so long considered fruitless as to have been placed among the would-be-forgotten ventures of a much regretted past.

The resurrection of the bonds brings to the attention of the holders, perhaps for the first time, the fact that a new life is springing up in the South. The curiosity about the bonds develops a stronger and more important curiosity concerning the investment field opening before them. They begin to read up concerning the resources of the section in question, and the more they read the more attractive grows the subject. They find the magazines

and papers of the day presenting a picture of the South new to them; a picture of bright color in the foreground for its present, and of roseate hues in the prospective for its future.

It is doubtful if any better measure than this Confederate bond movement could have been adopted by foreign projectors of Southern enterprises for stimulating an interest among investors in their plans. Whatever may have been the aim of the scheme, this is certainly a result of it. It has drawn attention in a remarkable degree to the South as a field for investment. Information is eagerly sought concerning the advantages offered, not only for investment, but for settlement in our South and Southwest; and the increased inquiry that has so promptly followed the mysterious Confederate bond movement is a significant fact. Doubtless the great Atlanta fair has already produced an effect on the foreign mind by the showing it has made in manufacturing and agricultural departments of a variety and extent that were not supposed possible, but the full benefits of the fair will not be realized until long after its close. The chief benefits must be looked for in the stimulus given to the Southern people by a better appreciation of their industrial power and natural resources, rather than an increasing curiosity among foreign investors. Let the enterprise of the people and the value of the resources of any part of our country be fully demonstrated, and capital will be found ready to go there from both sides of the water.

Right of Recognition of a Railroad Co. in any other State than their Own.

In the United States Supreme Court at Nashville on the 31st of October Chief Justice Waite delivered the opinion of the court in the cases of the Baltimore and Ohio Railroad Company, plaintiff in error, vs. George W. Koontz, administrator, and same plaintiff in error vs. Munroe Funkhouser, administrator, in error to the Supreme Court of Appeals of Virginia. These suits were brought in a State court of Virginia, under a Statute of that State, to recover from the Baltimore and Ohio Railroad Company damages for the death of sundry persons named in the respective bills, who were killed in an accident on the Washington and Virginia Midland and Great Southern Railroad, which road was at that time leased and operated by the Baltimore and Ohio Company. The plaintiff in error filed a petition for the removal in the cases from the State to the federal courts on the ground that the Baltimore and Ohio Railroad Company was a corporation of Maryland, while the complainants were all citizens of Virginia. The State court refused to permit the removal, for the assigned cause that the Baltimore [illegible]hio Company, by leasing the Virginia M[illegible] road, became a corporation of the State of Virginia, and could properly be sued in the courts of that State,

The question here presented is whether by taking a lease of the road, a Virginia corporation, the Baltimore and Ohio Company, being a citizen of Maryland, made itself also a citizen of Virginia for all purposes connected with the use of the leased property. This court holds that the rights of corporations outside the States under the authority of which they were created depend primarily upon their charters. If their charters allow it they may exercise their chartered privileges, and carry on their chartered business in any other State which by express grant or by implication permits them to do so. They have no absolute right of recognition in any other State than their own, and the State which recognizes them can impose such conditions on its recognition as it chooses and not inconsistent with the constitution and laws of the United States. If they are recognized and permitted to do business without limitation, express or implied, they carry with them wherever they go all their chartered rights and may claim all their chartered privileges which can be used away from their legal home. By doing business away from their legal residence, which is at their principal place of business within the State that brought them into existence, they do not change their citizenship, but simply extend the field of their operations. They reside at home but do business abroad. This court therefore does not hesitate to say, with all due respect for the Court of Appeals of Virginia, that the Baltimore and Ohio Railroad Co., by taking a lease from the Virginia corporation, with the unconditional assent of the State of Virginia, of a railroad which could only be operated by the use in Virginia of the corporate franchises of the lessor, did not make itself a citizen of Virginia, or part with any of the rights it had as a citizen of Maryland under the constitution and laws of the United States. The Baltimore and Ohio Railroad therefore was entitled to have these cases removed to the federal courts, and the refusal of the State court to permit such removal was an error. The judgment of the Court of Appeals in each of the cases was reversed, and the cases are remanded to the Supreme Court of Appeals of Virginia, with directions to reverse the judgments of the Circuit Court of the county and transmit the cases to that court with instructions to vacate all orders and judgments made or entered in said cases subsequent to the filing of the several petitions for removal, and proceed no further therein unless its jurisdiction be restored by the action of the Circuit Court of the United States or of this court.

Consolidation.

Articles of association were filed at Indianapolis, Ind., on the 4th inst., of the New York and Council Bluffs Railroad Company and the Indiana Junction Railroad Company. The capital of the former is $3,000,000, and of the latter $2,000,000. The directors of both corporations are the same, viz: Ezra Haskell, Charles Theirs, Albert Price, F. Batton, Isaac Hymer and George Pixley. The road will pass through Adams, Wells, Huntington and Wabash counties, and thence westward.

Articles of incorporation were filed with the Secretary of State of Iowa on the 2d inst., of the Chicago, Burlington and Kansas City Railway Company. This company is a consolidation of the line now running from Burlington through Lee, Van Buren, Davis and Appanoose counties, and of the Kansas City, St. Joe and Burlington line from Mendota to Unionville, Putnam County, Mo., and also from Unionville, Mo., south through Sullivan and Lynn counties to Laclede. The place of business is Burlington. Capital, $8,000,000, to run fifty years from August 16. The object of the consolidation is to secure the immediate construction of a line to Kansas City. The directors are Elijah Smith, W. J. Batch, J. N. Denison, Sidney A. Kent, William Endicott, jr., Prosper W. Smith, James F. Joy, John B. Lyon and W. W. Crapo.

Incorporation.

Articles of incorporation of the United States Underground Cable Company were filed at Albany, N. Y., on the 2d inst. Capital $600,000.

Articles of incorporation of the Saratoga and Mount McGregor Railway Company have been filed at Albany. The capital stock is $300,000. The road is to run from Saratoga to Mount McGregor, a distance of 10 miles.

The charter of the Kansas and Texas Southern Railroad Company, with a capital of $6,000,000, was filed with the Secretary of State of Texas on the 1st inst. The object is to build a road of standard gauge, beginning in Meade County, Kan., and having its southern terminal point at Presidio, on the Rio Grande, Tex.

Articles of association of the Kansas City and Rosedale Street railway have been filed with the Secretary of State of Missouri; capital, $50,000, one-half paid up. The stockholders are Bishop Goodrich of Jackson county, Mo., Wilson Waddingham of New York, and William T. Little of Wyandotte, Kansas.

Articles of association of the Chillicothe and Kansas City Railway Company were filed on the 1st inst. in the office of the Secretary of State of Missouri. The capital stock of the corporation is $780,000. The stockholders and directors are G. G. Henry, D. W. C. Edgerton, A. McVey, E. J. Broaddus and W. B. Leach, all of Chillicothe, who subscribe one share each, and Henry Hatch, trustee, who subscribes 774 shares. The length of the road is about seventy-eight miles and is to run from Chillicothe to Kansas City.

Articles of incorporation of the Nevada Midland Railroad Company, with capital stock at

$5,000,000, divided into 50,000 shares, have been filed in the office of the Secretary of State of Nevada. The road is to be constructed from a point on the eastern boundary line of the State of Nevada, in White Pine County, to a point on the western boundary line in the County of Douglas.

THE San Francisco and Clear Lake Railroad Company has been incorporated to build and operate a railroad from the bay of San Francisco to Clear Lake; to buy, sell, own and navigate steam or other vessels, connecting the termini of said road with San Francisco, and other places on the bay and on Clear Lake. The estimated length of the road is seventy-five miles. Capital stock, $1,500,000. The directors are: C. C. Gilman, J. D. Thompson, R. B. Safford, Daniel Willcox, T. L. Grigsby, and S. M. Holmes.

ARTICLES of incorporation of the Willamette Street Railway Company have been filed in the County Clerk's office. Capital stock, $250,000. The incorporators are J. N. Dolph, H. Thielson, C. H. Prescott and H. B. Thielson, all prominent officials of the Oregon Railroad and Navigation Company. The company obligates itself to build at least one mile the first year, and to extend the line as fast as the city demands. The proposed routes will cover four-fifths of the city, from the extreme north to the extreme south end, and from the river to the eastern boundary.

ARTICLES of incorporation were filed in the office of the Secretary of State of Illinois on the 4th inst., of the Chicago, Keokuk and Kansas City Railway Company, with a capital of $3,500,000. It is proposed to construct a railroad from Chicago to Hamilton, Hancock County, and a number of branches, one to the west of the main line of the Illinois Central and extending to East Hannibal; another from the east line of La Salle County to a point at or near the southeast corner of Will County, and still another from or near the point where the line crosses the Illinois Central road to a point in Rock Island County, bordering on the Mississippi River. The incorporators and first board of directors are : Charles C. Holden, J. M. Davis, William H. Reynolds, Joseph G. Press and Richard Holden, all of Chicago. The principal office is to be at Chicago.

Organization.

THE directors of the Glendale and East River Railroad Company, recently elected are: Austin C. Corbin, D. C. Corbin, G. S. Moulton, F. W. Dunton, Isaac D. Barton, Alfred Sully and Alfred C. Chapin.

AT the annual meeting of the Hannibal and St. Joseph Railroad Company, on the 7th inst., the following gentlemen were elected directors: William Dowd, H. H. Cook, Myron P. Bush, Elihu Root, William J. Hutchinson, Horace Porter, John Bloodgood, A. G. Gorham and John R. Duff. The retiring directors are Jay Gould, Russell Sage, Enoch Pratt and Julius Hallgarten, who retire at their own request.

THE directors of the Philadelphia, Germantown and Norristown Railroad Company, elected on the 7th inst., are: to serve three years. Coffin Colket, Edwin N. Benson, Winfield S. Wilson and Christopher Heebner; to serve two years, to fill a vacancy, Thomas U. Walker; to serve one year, to fill a vacancy, Joseph W. Johnson, Jr.; these with I. V. Williamson, Richard Dale, Lewis Elkins, John F. Gilpin, John Slingluff and John A. Brown, holding over, complete the full board.

THE directors of the Norwich and New York Transportation Company, elected on the 2d inst., are: James H. Wilson, of Boston; William T. Hart, of Boston; Frederick J. Kingsbury, of Waterbury; R. Suydam Grant, of New York; Simeon E. Baldwin, of New Haven; Francis H. Dewey, of Worcester, W. Bayard Cutting, of New York; Charles W. Copeland, of New York, and George W. Gill, of Worcester. The officers are: James H. Wilson president, and Oliver L. Johnson, jr., secretary and treasurer.

Personal.

GEN. I. D. IMBODEN has been elected president of the Bristol and North Canadian Narrow Gauge Railway Company.

W. H. MARSHALL has been made general roadmaster of the Long Branch division of the Central Railroad of New Jersey.

CHARLES CROCKER, president of the Southern Pacific Railroad Company, has given to the Academy of Sciences of San Francisco $20,000 in Southern Pacific 6 per cent bonds, the interest to be devoted to original scientific investigation on the Pacific slope.

JUDGE WESTBROOK has reappointed Gen. J. W. Husted receiver of the Rockaway Beach Improvement Company by consent of Mr. Cadwalder, counsel for Frederick Taylor, Fisk & Hatch, C. P. Huntington, Morton, Bliss & Co., Drexel, Morgan & Co. and A. M. Kidder & Co., who represent more than $700,000 in interest.

PETER A. B. WIDENER has been elected president and D. W. Dickson treasurer of the West Philadelphia Railroad Company. The latter also acts as secretary in the place of Samuel R. Reed. Assistant general superintendent Wm. Gorman has been promoted to be general superintendent.

GEORGE S. GRISCOM, general superintendent of the Eastern Division of the Pittsburg, Ft. Wayne and Chicago Railway, has tendered his resignation for the purpose of accepting the presidency of the Pittsburg, Chartiers and Youghiogheny Railway and Chartiers Coal Company.

THE next postal cars to be put on the New York Central and Hudson and the Lake Shore and Michigan Southern Railroad are to bear the names of James G. Blaine, Thomas H. James, Wayne MacVeagh, William H. Hunt, William Windom, Robert T. Lincoln, Richard A. Elmer, Frank Hatton and A. D. Hazen.

THE following appointments have been made by the Pennsylvania Railroad Company under the revised organization which went into effect on the 1st inst.: Max Rubenack, assistant comptroller; Thomas P. Sargent, assistant purchasing agent; and George W. J. Ball, chief conveyancer. The title of the general ticket and freight agents has been changed under the new organization to division freight and division ticket agents.

Duluth and Winnipeg Railroad.

The *Boston Journal* says that a company has been organized under the title of the Duluth and Winnipeg Railroad Company, to build a railroad from Duluth, at the head of Lake Superior, in Minnesota, to a point on the international boundary line between Minnesota and Manitoba, and near the Red River of the North, a distance of 250 miles. The route as described, and the surveys for a portion of which have been completed, lies northwesterly from Duluth, through the heavy pine lands of the St. Louis River and its tributaries. At the international boundry line the road connects with a Canadian line to Winnipeg, thus affording the shortest outlet for the products of the Manitoba and great Northwestern wheat fields to the head of lake navigation, and, when navigation is closed, the shortest route over the main trunk lines to the Eastern seaports.

The distance from Winnipeg to water navigation is 150 miles shorter by this line than by the Canada Pacific, and 168 miles shorter than by way of the St. Paul, Minneapolis and Manitoba and Northern Pacific. When navigation is closed (six months in the year) the distance from Winnipeg to Montreal and the East, by the Duluth and Winnipeg Railroad, is 450 miles less than by the Canada Pacific; and between 400 and 500 miles less over this route than by that from Winnipeg to the East by way of Chicago. In aid of this enterprise the Legislature of Minnesota has granted to the company "an amount of swamp lands (quoting from the grant act) belonging or hereafter to accrue to the State under the act of Congress of March 12, 1860, equal to 10 sections of 640 acres each per mile for each mile of the road that may be completed, to be selected within 10 miles on each side on the line of the road." This grant will give them 1,600,000 acres whenever the road is completed.

Construction of Telegraphic Lines.

In 1844 Prof. Morse laid the first telegraph line between Baltimore and Washington. To-day there are half a million miles in use in the United States alone. Great Britain uses 114,000 miles of lines. Germany has 150,000 miles, and more than 3,000 miles of underground cable. British India has 50,000 miles; France, 115,000 miles; Belgium, 15000; Spain, 25,000; Denmark, 65,000, and Norway 10,000 miles, which are used chiefly in the management of her fisheries. The Emperor of China has allowed 1,270 miles to be built during the past year. Persia has 6,000 miles, and Egypt 9,000, Russia has 130,000 miles in use, Australia has 15,000, and New Zealand 10,000. South America with the exception of a transcontinental line from Valparaiso to Buenos Ayres, and a short line between Aspinwall and Panama, has no land lines. There are nearly 10,000 miles of military telegraph lines in our Western Territories; 20,900 miles in Canada, and 7,000 miles in Mexico. Besides land lines, it is estimated that there are 104,000 nautical miles of submarine cable now in use, and new lines are projected.

SUBSCRIBE for the "American Railroad Journal."

THE first complete railway train, carrying 100 passengers, passed through the St. Gothard Tunnel on the 3d inst. in fifty minutes.

Statement of the Public Debt of the United States, November 1, 1881.

Interest paid by the United States, $51,467,272 02; interest repaid by transportation of mails, &c., $14,662,941 06; interest repaid by cash payments: 5 per cent. net earnings, $655,198 87; balance of interest paid by United States, $36,149,132 09.

The foregoing is a correct statement of the public debt, as appears from the books and Treasurer's returns in the Department at the close of business, October 31, 1881.

H. F. FRENCH,
Acting Secretary of the Treasury.

Testing Underground Wires.

A successful test was recently made of the workings of the National Underground Electric Company's new line in Market Street, Philadelphia, in the presence of a large number of Philadelphia, Chicago and New York capitalists. Three telegraphic and two telephonic instruments were in connection with similar instruments in distant buildings, and an electric lamp was in connection with a dynamo-electric machine across the street. The telegraphic instruments and one telephonic instrument were connected with solenoid wires, and the other telephone with the ordinary ground-current wire as used in the present system of air lines. In the experiments, a cable, doubled so as to represent a straight length of two and one-half miles, was used. The experiments with the telephones were more interesting. A solenoid wire used as an ordinary wire, with the ends grounded, connected one of the telephones. When the receiver was held to the ear various sounds could be heard in addition to the voice of the person at the other end of the line. These were the sounds gathered in by the induction of the grounded wire. The click of telegraphic instruments could be plainly heard, while the buzzing and whirring sounds made the operation of the wire anything but satisfactory. The telegraphic clicking sounds came by induction from the Western Union and other poles forty feet away, to the wire buried four feet under the stones in the street. The messages could hardly be read, owing to the back strokes of the instruments. The other telephone connected with a solenoid wire, used in its proper way with the metallic circuit, was then tested. When the receiver was placed to the ear not a sound could be heard except the voice, clear and distinct, of the person talking into the transmitter. The slightest whisper was distinctly audible, and conversation could be carried on with the greatest ease.

The Coal Trade.

The leading coal carrying companies make the following reports of their tonnage for the week ending October 29, and for the year to same date, compared with their respective amounts carried to the same date last year:

	Week.	1881.	1880.
Reading Railroad	194,166	7,204,396	6,410,003
Schuylkill Canal	16,352	507,068	440,332
Lehigh Valley	129,335	5,168,565	6,086,551
Delaware, Lackawanna and Western	97,589	3,495,487	2,865,559
Shamokin	24,641	899,176	750,547
Central R. R. of New Jersey	133,790	3,637,120	3,099,308
United R. R. of New Jersey	35,745	1,281,521	930,836
Pennsylvania Coal	30,158	1,145,554	908,887
Delaware and Hudson Canal	78,732	2,937,713	2,446,043
Huntingdon and Broad Top Mountain	6,963	432,953	360,486
Penn. and New York	38,075	1,362,477	1,013,895
Clearfield, Pa	55,889	1,966,442	1,399,930

The total tonnage of anthracite coal from all the regions for the week ending Oct. 29, as reported by the several carrying companies, amounted to 689,636 tons, against 661,859 tons in the corresponding week last year, an increase of 27,777 tons. The total amount of anthracite mined for the year is 23,174,957 tons, against 19,181,551 tons for the same period last year, an increase of 3,993,406 tons. The quantity of bituminous coal sent to market for the week amounted to 51,054 tons, against 60,428 tons in the corresponding week of last year, a decrease of 9,347 tons. The total amount of bituminous mined for the year is 4,069,594 tons, against 3,559,474 tons for the corresponding period last year, an increase of 510,120 tons. The total tonnage of all kinds of coal for the week is 740,699 tons, against 722,287 tons in corresponding week last year, an increase of 18,403 tons, and the total tonnage for the coal year is 27,244,551 tons, against 22,741,025 tons, same date last year, an increase of 4,503,526 tons. The quantity of coal and coke carried over the Pennsylvania Railroad for the week ending October 29 was 187,632 tons, of which 144,306 tons were coal and 43,326 tons coke. The total tonnage for the year thus far has been 7,414,367 tons, of which 5,478,759 tons were coal and 1,965,608 tons coke. These figures embrace all the coal and coke carried over the road east and west. The shipments of bituminous coal from the mines of the Cumberland coal region during the week ended October 29 were 46,877 tons, and for the year to that date 1,757,104 tons, a decrease of 13,902 tons as compared with the corresponding period of

last year. The coal was carried to tidewater as follows: Baltimore and Ohio Railroad—week, 31,347 tons; year, 1,126,769 tons; increase compared with 1880, 73,428 tons; Chesapeake and Ohio Canal—week, 11,075 tons; year, 397,935 tons; decrease compared with 1880, 131,714 tons. Pennsylvania Railroad—week, 4,263 tons; year, 230,662 tons; increase compared with 1880, 42,347 tons. The coal was brought from the mines as follows: Cumberland and Pennsylvania Railroad—week, 37,501 tons; year, 1,546,851 tons. George's Creek and Cumberland Railroad—week, 6,745 tons; year, 146,434 tons; Baltimore and Ohio Railroad—week, 1,716 tons; year, 57,523 tons. West Virginia Central and Pittsburg Railway—week, 547 tons, its first business. The Reading Railroad shipment for last week, ending November 5, was 173,000 tons, of which 40,000 tons were sent to and 39,500 tons shipped from Port Richmond, and 16,000 tons sent to and 15,800 tons shipped from Elizabethport.—*Phil. Ledger, Nov.* 7.

Liability of Railroad Company for Extra Baggage.

In April, 1873, John A. Millard, Jr., bought a ticket at St. Louis, Mo., for Dennison, Texas, over the Missouri, Kansas and Texas Railroad. He had with him a valise, containing his personal baggage, and two trunks filled with electrical apparatus. The baggage-master at St. Louis refused to check all the luggage without extra compensation, because it exceeded the prescribed weight. Mr. Millard then informed him of the nature of the contents of the trunks and paid the charge for the overweight, and checks were given him for the valise and trunks, which were then put aboard the train. On the following day they were destroyed by fire while in the company's possession on the route. Mr. Millard brought suit in the Supreme Court to recover for all of his property destroyed as baggage. The Court gave him judgment for the value of the valise and its contents and for the two trunks, but excluded proof of their contents on the ground that they did not come within the description of baggage.

The defendant paid the judgment, and Mr. Millard then began another action in the same court against the defendant to recover the value of the electrical apparatus contained in the trunks. The railroad company defended on the ground that there was only one contract to carry the baggage and electrical apparatus and that the recovery in the former suit was a bar to this action. It insisted also that Mr. Millard could not recover for the loss of his trunks in one action and for their contents in another, and that the trunks were not baggage if their contents were not. The Court held that there were two distinct contracts—one to carry the baggage implied from the purchase of the ticket, and the other to carry the electrical apparatus as special baggage or freight for which the company demanded and received compensation; that the judgment in the first action was no bar to this, as Mr. Millard there sought to recover for baggage only, and if the recovery included items not covered by that term, the defendant's remedy was by appeal in that action. The Court gave Mr. Millard judgment for the full amount claimed. The Court of Appeals has sustained this judgment with costs in a decision just handed down.

Freling H. Smith appeared as counsel for the plaintiff and Thomas W. Osborn for the defendant.

Cincinnati Iron Market.

OFFICE OF E. L. HARPER & CO.
Cincinnati, Nov. 8, 1881.

We are having a very active demand for nearly all grades and the market closes firm at the qnotations given below. The mills have all started.

The Swifts Iron and Steel Works are running both their mills at Newport and also the mill at Riverside employing 700 men and running double turn. They report plenty of orders at good prices. We quote as follows:

	No.			Mos

Railroad Earnings.

THE earnings of the Norfolk and Western Railroad for the month of October, 1881, were $241,672.90, against $235,909.95 for the month of October, 1880, an increase of $5,762.75. For the six months ending October 31, 1881, the earnings were $1,139,100.08; for the corresponding period of the previous year, $1,036,058.95, an increase of $103,041.13.

THE earniugs of the St. Paul, Minneapolis and Manitoba Railway for the week ending October 31, 1881, were $184,676.09, against $118,186.54 for the same week in 1880, an increase of $66,489,55. For the month of October, 1881, the earnings were $605,703.74, and for the month of October, 1880, $345,056.98, an increase of $260,650.76. For the ten months ending October 31, 1881, the earnings were $3,842,167.11, against $2,561,915.12 for the corresponding period of 1880, an increase of $1,280,251.99.

THE earnings of the Chicago and Northwestern Railway for the month ending October 31, 1881, were $721,833.21, against $717.417.39 for the same week in 1880, an increase of $4,415.82. For the month of October, 1881, the earnings were $2,305,703.12, against $2,105,216.73 for the month of October, 1880, an increase of $200,486.39. From June 1 to October 31, 1881, the earnings were $11,203,016.03, against $9,264,262.62 for the corresponding five months of 1880, an increase of $1,938,753.41.

THE earnings of the Denver and Rio Grande Railway for the week ending October 31, 1881, were $207,521.27; same week last year, $152.973 17—increase. $54,548.08. For the month of October, 1881, the earnings were $665,686.78, against $473,317.81 for the month of October, 1880, an increase of $192,368.97.

THE earnings of the Flint and Pere Marquette Railway for the last ten days in October, 1881, were $54,723.05; same time in 1880, $49,708.05; increase, $5,015. From January 1, to October 31, 1881, $1,522,984.95; corresponding period in 1880, $1,219,878.65—increase, $231,106.30.

The Brotherhood of Locomotive Engineers.

FROM the address of Mr. P. M. Arthur, Grand Chief Engineer of the International Brotherhood of Locomotive Engineers of the United States and Canada, delivered before that body while recently in session at Baltimore, we learn some interesting facts with regard to the aims and work of the association over which he presides. There have been thirteen new "divisions" of the brotherhood established during the past year, so that the total number of divisions at present is 191. At the close of the last fiscal year (September 30, 1880) there were 2,203 members. During the year now ended there were 35 deaths and 112 forfeitures of membership, but the brotherhood at present numbers 2,654, a a gain of 304 over last year. Thirty-four claims, amounting to $77,814.78, have been paid in the last 12 months, and the total amount paid to widows and orphans since the establishment of the Association is $1,178,888,33.

The object of the association is to look after the interests of its members as employees,and guard them against errors. It is of a beneficial character. There have been added to some of the divisions relief associations, paying a stipulated sum weekly to members in case of sickness or disability. To encourage habits of thrift is one of the Brotherhood's chief objects. A monthly journal is published having a circulation of nine thousand. The Grand Chief Engineer protests against the severe tests for color-blindness applied by the Connecticut and Massachusetts boards of examiners to locomotive engineers of those States, and thinks they indicate "a deep-laid scheme to enrich themselves at the expense of railroad men." The Connecticut tests have, however, been repealed.

Another alleged grievance is the growing system of compelling engineers to pay for the breakage of buffers, drawheads, etc., a thing incident necessarily, it is thought, to all railroading.

The Bicycle and its Rights.

In his forthcoming new edition of his work on Highways, Mr. Cook says of bicycles: "The use of the bicycle as a means of travel is so recent that in this State there is as yet no adjudication as to the rights of travelers employing it upon the highway. In England it has been held that one riding a bicycle on the highway at such a pace as to be dangerous to passers by may be convicted of furiously driving a carriage, under a statute forbidding such an act. Taylor vs. Goodwin, L. R., 4 Q. B. D., 228. The right to use a bicycle in a proper manner on the highway was not questioned in the case, and the Court by its decision indirectly admits such right. In the absence of any legislative enactment forbidding them, riders of bicycles would seem to have the same right upon highways as those using any other vehicles, and the validity of any municipal ordinance prohibiting the use of bicycles in those parts of the public streets where carriages may go would be very doubtful."—*Albany Law Journal.*

AMERICAN RAILROAD JOURNAL.

Financial and Commercial Review.

THURSDAY EVENING, Nov. 10, 1881.

The quotation for call loans this morning on stock collaterals was 5@6 per cent, and on Governments 3@4 per cent, Time loans were 5@6 per cent, few being redeemable below 6 per cent. Prime mercantile paper was 6@7 per cent. In the afternoon the quotation was 5 per cent, and in the last hour 6 per cent with, in instances, an additional commission of 1-64th of 1 per cent. The closing quotation was, however, 5@6 per cent.

The actual rates for prime bankers sterling were 4.80¼@¾ and 4.84¼@¾, the posted rates being 4.81@¼ and 4.85@½. Cable transfers were 4.85¼@¾, and prime commercial bills 4.79 @½. The actual rates for continental bills are as follows: francs, 5.25@⅝ and 5.20@⅝; marks, 94@⅛ and 95, and guilders, 39⅜@11-16 and 40.

The Minnesota Refunding Act recently passed provides for the issue of new bonds in place of the old ones at a rate of interest not to exceed five per cent.

The British Board of Trade returns for October show an increase in the value of exports of £2,539,021, and an increase in the value of imports of £3,871,253, as compared with October, 1880.

By referring to the usual monthly statement of the imports of foreign dry goods at this port, it will be seen that the total for October is $1,328,812 more than for October last year; $1,582,071 more than for the same month in 1879, and $3,132,376 more than in 1878. For the ten months ending with October the total is $96,299,082 against $107,930,754 for the same time last year, $70,029,458 in 1879, and $65,188,037 in 1878.

The Treasury Department at Washington gives notice that on each Wednesday of the present month, commencing with the 9th inst., and until otherwise ordered, the Assistant Treasurer at New York will redeem at par and accrued interest any uncalled 6s or 5s extended at 3½ per cent to an amount not exceeding $2,000,000, on each day mentioned. The only bonds offered under this programme on Wednesday last were a lot of $2,550 extended sixes, which were taken at par and accrued interest, 101¼—the market price being 101¼@101⅜.

The closing quotations on Thursday were: American District Telegraph, 50@55; Chicago, Burlington and Quincy, 143¾@144; Canada Southern, 64⅜@64¾; Chicago and Northwestern, 129¾@129⅞; do. pref., 143⅛@143⅜; Chicago and Alton, 133⅞@134⅛; Central of New Jersey, 97⅛@97⅜; Chicago and Rock Island, 135@135¾; Central Pacific, 96½@96⅝; Chicago, Milwaukee and St. Paul, 109@109¾; do. pref., 122½@122¾; Cleveland, Columbus, Cincinnati and Indianapolis, 93⅛@93½; Columbus, Chicago and Indiana Central, 21⅞@22; Delaware and Hudson Canal, 110⅝@110⅞; Delaware, Lackawanna and Western, 128⅜@128½; Hannibal and St. Joseph, 96½@96¾; do. pref., 114@114¼; Illinois Central, 125⅜@125⅝; Lake Erie and Western, 46½@47; Lake Shore and Michigan Southern, 122⅜@122½; Metropolitan Elevated, 100⅞@101⅛; Manhattan Elevated, 57⅜@57⅝; Michigan Central, 95⅛@95⅜; New York Elevated, 109@109⅜; New York, Lake Erie and Western, 47½@47⅝; do. pref., 92½@93; New York Central and Hudson River, 140⅛@140¼; Ohio and Mississippi, 42⅛@42⅜; Ohio Southern, 26¾@27⅛; Ohio Central, 27¾@27⅞; Pacific Mail, 45⅛@45½; Union Pacific, 121⅛@121⅜; Western Union Telegraph, 87⅜@87¾; Wabash, St. Louis and Pacific, 49⅜@49½; do. pref., 90@90⅛.

The following quotations of sales of Railway and other securities, for the week, are in addition to those given elsewhere in our columns:

New York.—Atlantic and Pacific 1st, 101; do. income, 42¾; American Dock and Improvement Co. ass., 136; Boston and New York Air Line pref., 63; Buffalo, New York and Erie 1st, 1916, 129; Central Iowa 1st, 115⅜; Chesapeake and Ohio 1st pref., 41; do. 2d pref., 30½; do. 1st, series A, 102; do. Bridging the Lachine Rapids.

Mr. Peterson's staff are still hard at work among the eddies and currents adjacent to Isle Herron, which acts as a sort of wedge to the Lachine Rapids ; and the more they see of it, the more feasible the scheme of the new bridge appears. There are not wanting among the railroad men and other citizens those who sneer at the proposition to bridge the St. Lawrence at that point ; but if there is one reason more than another that commends itself, it is the ease with which a foundation can be rock-bolted to the almost iron-stone bed the rapids' rocks afford.

While on this subject it may not be uninteresting to look back twenty-seven years to the time when the Victoria Bridge of to-day was in process of survey. Instead of Mr. Peterson, it was no less a personage than the then Robert Stephenson, M. P., who made the survey. From an old copy of the "Commercial Advertiser, Montreal, Friday, June 2, 1854, we take the following : "The report of Robert Stephenson, Esq., M. P., in reference to the proposed bridge across the St. Lawrence, has just been printed and circulated by the Directors of the Grand Trunk Railway. The report he presents is a very elaborate one, setting forth the difficulties that have to be met and the dangers to be encountered before a structure of sufficient strength and durability can be erected, but containing the assurance that, so far as human skill can see, there is nothing impossible in the undertaking, nor any difficulties but such as may be surmounted."—*Montreal Daily Witness.*

Mrs. James and the Snake Head.

When Mrs. James, wife of the Postmaster-General, was a little girl, says the Utica *Herald*, she, with other companions, was walking on the track of the New York Central Railroad. Flat rails were used in those days, and in extremely hot weather, or when the spikes in the ends became loosened, the ends curled up. and frequently found their way through the floor of the cars and created consternation among the passengers. This gave the name of "snake heads," and railroad men dreaded them. Mrs. James, with the other little girls, saw a snake head on the track, and hurrying back to the station, informed Superintendant Priest, who thanked her, gave her a half a dollar, and sent a hand-car crew up the road to destroy the snake head by spiking it down.

In those days a half-dollar piece was as big as a car wheel to a child, and it is not strange that Mrs. James should remember it. When the Postmaster-General met Superintendent Priest on the train near Utica recently, Mrs. James laughingly informed him that he had paid her the first money she ever earned. The Superintendent brushed up his memory, and finally remembered how the little girl's face brightened as he rewarded her for an invaluable service to him and the railroad company.

A new arrangement, it is stated, has been made between the Central Pacific and the Union Pacific Companies. The Union Pacific is to continue giving the Central its business at Ogden as now, and also further agreeing not to carry its Ogden extension to Portland, but to stop at Baker City. The Central Pacific agrees not to build an independent line from Ogden to the Missouri River.

This establishment is very extensive, adapted to every variety and style of Printing, and the proprietors hope to be favored with a share of Railway patronage. Estimates furnished on application.

BAKER & GODWIN, Printers,

Directly opp. Post Office. **NEW YORK.**

Printing of all kinds at greatly reduced rates.

THE RAILWAY TIMES
AND JOINT-STOCK CHRONICLE.

The *Railway Times* was established in the year 1837, and has consistently maintained the purpose for which it was started—to give an independent account of all matters of importance to railway shareholders, not neglecting, at the same time, the duty of keeping its readers well informed on all matters of commercial interest.

It is published every Saturday. Price 5*d*. The price of subscription for one year is £1 1*s*.

No. 2 Exeter Street, Strand, W. C., London.

KNOX & SHAIN,

St. Gothard's Long Tunnel.

From a Letter to the London Times.

A glance at the map of Central Europe will show the importance of the line of railway upon which this enormously long tunnel is situated. A territory lying in the heart of the Continent, and containing the most delightful scenery in the civilized world, is for a distance north and south of 100 miles, (between Lucerne and Milan,) and 300 miles east and west, (Geneva to Innsbruck,) without a line of railway. Nothing but the until recently believed impossibility of working such long subterranean passages has delayed till the present time the construction of railways so urgently needed for the conveyance of the thousands of visitors who annually flock to the summer resorts of grand and beautiful Switzerland. The main line will start from Lucerne and Zurich, the former branch receiving the traffic from the Eastern French and Alsatian lines, while the latter takes that coming from Germany via the Lake of Constance and Schaffhausen. The two forks unite at Zug, and proceeding from there, via the Righi, Goldau, Brunnen, Fluelen, Goschenen-Airolo, (the great tunnel,) Faido to Bellinzona, divide again at the latter station, for the Lake of Como and Milan; also to Lucarno and the Lake Maggiore to Arona and Milan. The distance from Lucerne to Lucarno will be about 80 miles. From Fluelen, at the southern end of Lake Lucerne, the line climbs the valleys through which the waters of the Reuss thunder down to the lake. On the southern side of the St. Gothard group of mountains the railway, after emerging from the great tunnel at Airolo, descends the valley of the Ticino, through some exceedingly wild gorges, to the Italian lakes above mentioned. There are scores of tunnels, precipices, dizzy bridges, and enormous embankments on the whole line, but the chief interest centers in the great tunnel of St. Gothard.

The St. Gothard tunnel, when finished, will measure 8 metres (26½ feet) in width and 6 metres (19 feet 10 inches) from the floor to the crown of the arched roof. It is, therefore, wide enough for a double line of rails, although the railway is being constructed elsewhere as a "single" line. The side walls are laid in *moellon*, (ashlar,) while the roof, which is a semicircle in cross section, is made of "cut" stone. There are places where it was intended to leave the natural rock as a vaulting, but finally it was decided to put masonry throughout the whole tunnel; as the engineer remarked, "If a piece of stone should fall from the roof upon a railway carriage the passengers would write to the journals, the impression would get abroad that the tunnel was unsafe, and the loss of traffic from such possible causes would eventually pay the extra cost of the masonry." At intervals of 100 metres (330 feet) there are small square openings in the side walls about a yard and a half in depth, where tools may be left, while at every kilometer there are spaces in the side walls large enough to permit a dozen men to stand with their implements to avoid passing trains. A short distance from the entrance we come to the "Bad Place," as it has been christened, where millions of francs have been sunk in a space of 70 metres in length; three years have passed in a continual struggle between an ill-natured freak of Mother Earth in the shape of a stratum of soft, plastic material, and the capital and skill of the contractor, M. Favre, plus the science of his assistants and the railway engineers. Near this *mauvais endroit* M. Favre fell dead from a *coup de sang*, the result, no doubt, of his anxiety over the results of this struggle. Many and costly were the expedients tried, but one after another succumbed to the offended genie of St. Gothard, whose internal economy had been so rudely invaded by these presumptuous sons of Adam. The walls of stone were bulged in like paper, and a second line of strong masonry was built, but only to share the fate of the predecessor. A short time since a third wall was begun, and it was so constructed as to form an elliptical cylinder, upon which the pressure, from whatever direction it came, or on whatever point (on the exterior surface) it was exerted, served only to compress more firmly together the stones forming this cylinder, which, of course, is the tunnel itself at this place. Up to the present time this third lining has withstood the utmost efforts of the evidently infuriated genie, and the engineers are confident that the unruly mountain demon has been effectually exorcised. Two miles from the entrance we stopped to exchange our steam power for that of compressed air. These air locomotives make the same noises as the ordinary railway engines when working; they are fitted with whistles, and I was continually shifting about when standing on them, to keep from touching what I could not help thinking were the hot surfaces of an ordinary steam locomotive. The air reservoirs will carry a train from two and a half to three kilometres without reloading when there is a good average pressure in the air compressors at the entrance.

Near the center of the tunnel is the second *mauvais endroit*, which has caused much trouble, although nothing like that resulting from the malevolent efforts of the St. Gothard genie to close up the hole made by intrusive man. Instead of the plastic stratum made by the genie, we have here a singular species of dry, rotton stone, containing a very large proportion of mica. After a short exposure to the air this rotton stratum crumbles to powder. The blasting in the tunnel has all been done by dynamite; until recently this explosive material contained 75 per cent of nitro-glycerine, but they have lately employed as high as 95 per cent of nitro-glycerine in blasting out some of the hardest portions of the floor. So violent have been the explosions that I saw scores of holes in the roof from which the arch stones had been shaken, and the suggestion that more of these loosened masses of granite might fall at any moment was most uncomfortable to a man who had only a greasy silk cap on his head. My happiness was not increased while in the gigantic hole by the official statement that over 200 men had been killed and innumerable others wounded, chiefly by explosions and being crushed by passing railway trucks during the progress of the work.

The scene at this *mauvais endroit* No. 2 was intensely interesting—the flitting figures of numerous workmen stripped to the waist, with perspiration streaming down their brawny figures, myriads of lamps swinging in the hands of moving men or hanging by nails driven into the tree trunks supporting the vaulting, trucks loaded with stone pushed rapidly along by stalwart gnome-looking beings yelling "*grazia*" at every step to warn others of the crushing vehicles' approach; the crashing of masses of granite dumped from the trucks upon the roadside, explosions of dynamite roaring through the subterranean depths and filling the air with the odors of the gases set free, shrill shrieks of the compressed-air locomotives from the unseen distance, creaking windlasses, and the cries of men giving directions, all combined, with the stifling heat and smoke-laden atmosphere, to almost induce the visitor from the outer world to believe that he had fallen into the hands of some modern Virgil, and was being conducted through the realms of grim old Pluto. The tunnel is perfectly straight from end to end, and the engineers met each

other so accurately that their center lines were within a hand's breadth of an exact coincidence.

The Manhattan Company.

CONSOLIDATION OF THE NEW YORK AND METROPOLITAN ELEVATED RAILROAD COMPANIES WITH THE MANHATTAN COMPANY.

The following agreement, embodying the plan of merging the New York and Metropolitan Elevated Railroad companies with the Manhattan Company, was adopted at a meeting of the board of directors of the respective companies on the 14th inst. The agreement was subsequently signed by Jay Gould as President of the Manhattan Company, and by Cyrus W. Field as President of the New York, and Russel Sage as President of the Metropolitan Elevated railroad companies, and the seal of the three companies formally affixed. It is asserted that this agreement does not require the ratification of the stockholders:

The agreement between the Manhattan Railway Company, the New York Elevated Railroad Company and the Metropolitan Elevated Railway Company witnesseth: That the said companies having heretofore, and on the 22d day of October, 1881, made an agreement and supplemental agreement modifying to a certain extent, the tripartite agreement and leases made between the same companies on the 20th day of May, 1879, do now further agree, each with both and each of the others, as follows:

I. That the Manhattan Company shall take a surrender or transfer of the capital stock of the stockholders of each of the other two companies, or of the stock of so many of such stockholders as may choose to make such surrender or transfer, and issue in exchange therefor the like additional amount of the stock of the Manhattan Company, on the terms and conditions following:

II. The stock thus to be issued to the stockholders of the New York Company shall be called first preferred stock, and shall be entitled to the payment of dividends at the rate of six per cent a year, payable quarterly out of the net earnings of the company during the year, before any dividend is paid to a stockholder of any other class; and if the net earnings in any year prove insufficient to pay the six per cent dividend herein provided for, the whole of the net earnings is, nevertheless, to be divided, and any deficiency below six per cent is to remain due and be accumulated and paid so soon as there shall be net earnings sufficient to pay the same, or as far as the net earnings will go; that is to say, the net earnings of each quarter are to be divided among the first preferred stockholders until they shall have received full dividends at the rate of six per cent per year on each share of first preferred stock; the whole of such preferred stock not exceeding six and a half millions of dollars. By net earnings are to be understood the gross earnings, after deducting therefrom operating expenses, the cost of maintaining in efficiency the structure and equipment, all lawful taxes and assessments, and the interest on the then outstanding bonds of the New York and Metropolitan companies. The first preferred stock is not entitled to any dividend beyond that herein provided for.

III. Each stockholder of the New York company shall receive a cash payment of ten dollars a share, on surrendering his stock to the Manhattan company, in addition to his corresponding certificate of first preferred stock of the Manhattan company.

IV. The stock to be issued to the stockholders of the Metropolitan company shall be called second preferred stock, and shall be entitled to the payment of dividends at the rate of six per cent a year, payable quarterly, out of the net earnings of the company during the year after the first preferred stockholders have received full dividends at the rate of six per cent a year on each share of the first preferred stock for all time previous; but, if the net earnings in any year, after payment of the dividends to the first preferred stockholders do not amount to six per cent, the deficiency is not to be made up out of the earnings of any future year, or in any manner whatever. The second preferred stock is not to be entitled to any dividend beyond that herein provided for.

V. The stock not thus issued—that is, the present stock of the Manhattan company, amounting to thirteen millions of dollars—shall be common stock, and shall be entitled to all dividends out of the net earnings of the company after payment of the dividends to the first and second preferred stockholders, according to the terms of this agreement.

VI. All the stock so surrendered or transferred to the Manhattan company shall be retained by it uncancelled, as a muniment of title, or for other use, and subject to such disposition as may be necessary to maintain the rights, not only of the parties hereto, but also of those who have received the stock of this company in exchange for it, and such as may be agreeable to law.

VII. Any further instrument that may be necessary to carry out this agreement and maintain the rights of the said companies and their respective stockholders shall be from time to time executed by the parties hereto.

VIII. Nothing herein contained shall impair the validity or force of the said tripartite agreement and leases, dated the 20th day of May, 1879, and said agreement and supplemental agreement dated the 22d of October, 1881, except as herein expressed, but in all other respects the said tripartite agreement and leases and the said subsequent agreement and supplemental agreement are confirmed.

THE work has been completed on contract 15 of the Canadian Pacific Railway. The road is expected to be handed over to the syndicate on December 1st.

The Law of Guaranty.

A decision was rendered in the United States Supreme Court at Washington, on the 14th inst., in the case of Davis & Patrick vs. Wells, Fargo & Co., which settles some points in the law of guaranty that have hitherto been subjects of controversy. This court holds that where A, "in consideration of one dollar to him in hand paid," executes and causes to be delivered to B an unconditional agreement to guarantee the payment up to a specified amount of C's present and future indebtedness to the said B, it is not necessary for B to formally notify the guarantor A of his acceptance of the terms of the agreement, or to keep the latter informed from time to time of the amount of C's fluctuating indebtedness.

In the opinion of this court the written instrument in question is not merely an offer to do a certain thing, which to be valid must be formally accepted by the party for whose benefit it is made. It is, on the contrary, a completed contract by virtue of the acknowledgment which it contains of the receipt by the guarantor of a valuable consideration for the service to be rendered. The payment to the guarantor of the stipulated consideration is sufficient notice to him that his agreement is accepted, and he is by the instrument estopped now from denying that such consideration was received. The fact that the consideration is merely nominal makes no difference. A stipulation in consideration of one dollar is just as effectual as if the sum were larger.

With regard to the obligation of the guarantee to notify the guarantor of the default of the debtor, the court holds that where the guarantor suffers loss or damage by reason of the failure of the guarantee to give him such notification, he is to that extent released, but but both the laches of the plaintiff and the loss of the defendant must concur to constitute a defence. The judgment of the court below, in favor of Wells, Fargo & Co., is affirmed. Opinion by Justice Matthews.

THE first man who conceived the idea of using steam for moving carriages on land was Solomon De Caus, a Frenchman, who, in the year 1641, was sent to a lunatic asylum for persisting in his idea. An old letter of that date describes a visit paid to the Bicetre at Paris, which was the most celebrated madhouse of the day, by the Marquis of Worcester. Among the inmates it mentions was one who alarmed the visitors by screaming behind the bars of his cell in a hoarse voice, "I am not mad! I am not mad! I have made a discovery which would enrich any country that adopted it." "What discovery," asked our guide. "Oh," said the keeper, "something trifling: you will never guess it; it is the use of the steam of boiling water. To listen to this lunatic, you would think that with steam you could navigate ships, move carriages—indeed, there is no end to the wonders he would have us believe. He has even written a book about it."

AMERICAN Railroad Journal. ESTABLISHED 1832.

PUBLISHED WEEKLY BY THE

AMERICAN RAILROAD JOURNAL CO.,

At 23 Liberty Street, New York.

Subscription, per annum, in advance..... $5 00
Foreign Subscription, including postage..... 6 00

Purchases for the AMERICAN RAILROAD JOURNAL CO. are authorized only by the written order of Geo. F. Swain, Treasurer; and the Company will not be responsible for the payment of bills unless accompanied by such order.

Payments for advertising and subscriptions should be made by check payable to order of the Treasurer.

BRANCH OFFICE:
53 Devonshire St., Boston, Mass.

Mr. FREDERIC ALGAR, Nos. 11 and 12 Clements Lane, Lombard Street, London, E. C., England, is the authorized European Agent for the JOURNAL.

New York, Saturday, November 17, 1881.

Entered at the Post Office at New York City as Second-Class Mail Matter.

A LAW was introduced into the Connecticut Legislature last session, for compelling the adoption by the railroads of measures looking to the prevention of accidents among employees, one of the requirements proposed being the use of safety car couplers. The matter was laid over for a year, for the purpose of giving the Railroad Commissioners an opportunity to examine various devices and to give the subject proper consideration. The Commissioners, desirous of obtaining the fullest information possible, both from railroad men and inventors, have announced a public hearing upon the subject, to be held in their office at Hartford on November 29. Their report is to be made to the Legislature at the coming session, and will doubtless contain much of practical value. The pains taken by the Commission to arrive at a basis for their report is certainly highly creditable, and the entire movement is one that merits the hearty co-operation of railroad managers, employees, and inventors. The men who are constantly placed in positions of risk as well as of great trust are certainly entitled to all the protection that can possibly be provided; and it is the duty of railroad managers and the public alike to give to the subject more attention than it appears to have received in the past. The action of the Connecticut Commissioners is judicious and timely, and can doubtless be relied upon to give the right direction to the humane movement.

THE reduction of the cost of transportation by rail since 1873 is exhibited in a striking manner by facts given in the annual report on the internal commerce of the United States, just issued by Joseph Nimmo, Jr., Chief of the Bureau of Statistics. Among the facts presented by Mr. Nimmo are the following concerning the freight carried on thirteen leading railroads, and the rate of charges for the same: Tons of freight carried in 1873, 45,557,002; in 1880, 78,150,913; receipts, 1873, $112,004,648; 1880, $143,388,178; receipts per ton per mile, 1873, $1.77; 1880, $1.07. In other words, on these thirteen representative roads, while the increase in freight carried has been 71.5 per cent during the past seven years, the increase in the amount of money received has been only 28 per cent, and there has been a decrease of 39.5 per cent in the receipts per ton per mile. It is also shown that the aggregate traffic of the New York Central and Hudson River, the Pennsylvania, and the New York, Lake Erie, and Western railroads has trebbled since 1868. The practical benefits secured to the public by the improvements in railroad working and management which have made these results possible are illustrated by Mr. Atkinson's statement that the subsistence in grain and meat for one year for an adult workingman can be carried from Chicago to Boston, a distance of a thousand miles, for $1.25, a sum less than his average earnings for a single day.

OPTIMISM—PESSIMISM.

THE above two words have recently come into quite frequent use. In reading the different essays dealing with them respectively, and listening to general conversation of parties leaning to one or the other, we have the feeling that the words used are but little understood by the people at large.

In Webster's Unabridged we learn that Optimism means, "The opinion or doctrine that everything in nature is ordered for the best; or the ordering of things in the universe so as to produce the highest good." Webster, therefore, logically defines an Optimist as "one who holds the opinion that all events are ordered for the best." The same high authority takes the word Pessimism as meaning, "The opinion or doctrine that everything in nature is ordered for or tends to the worst, or that the world is the worst possible." In harmony with this is the statement that a Pessimist is "one who complains of everything as being for the worst," and consequently optimism is opposed to pessimism, and an optimist is the exact opposite of a pessimist. Strange as it may seem, most every human being alternates from one doctrine to the other all through life. He who is an optimist one day is very liable to be a pessimist the next day.

The question in which we are the most interested is, How far is either doctrine true?

If we look upon the world as a moving panorama or show, our minds will incline toward optimism. There is something about the blue sky, the green fields decked with myriad flowers, the gaily plumed birds, when taken as a whole and flooded with sunlight, and the air filled with sweet sounds of music, and fragrant with perfume, which makes the heart of the looker on feel lighter; and in the excess of feeling he becomes an optimist, or "one who holds the opinion that all events are ordered for the best."

Take the same man alone, face to face with his inner self: something has gone wrong, and his outward eyes are blinded that the inner sight may behold himself as he is with greater clearness. So far as his parents are concerned, in the majority of cases he can claim that his birth was the result of an accident. His parents did not want him, but in the gratification of animal desire, were obliged to take him, he being the natural consequence. Being born of parents full of error themselves, his early education was not such as would serve him best when man grown. His associates were not those who would improve his condition, for as "birds of a feather flock together," he inevitably selected those of a like mind with himself. His life, after reaching man's estate, in addition to being a continual struggle for bread and position, is a bitter experience of eating the fruit of a tree whose seeds were sown in his youth. He reaches old age after spending the years of his maturity in striving to undo the evils of early life, and feels that he has learned how to live, when the knowledge that his years are well nigh spent makes him hopeless of accomplishing anything. He can then curse the day in which he was born, and truthfully claim that he came here without any will of his own, that fear of something after death has kept him here, many times against his will, and now that he feels ready and prepared to stay, death is going to remove him without consulting his wishes in the matter at all.

We can now see that there is a great difference between looking at a moving panorama or show, and the being a part of, or a thing connected with, the show.

Many a person has sat in front of the footlights laughing at the grimaces and sallies of a clown, whose performance dispelled all care and trouble from his breast, while the same clown was a piteous suppliant at the feet of a doctor, asking relief from the melancholy in his own breast. These same laughing spectators on the morrow will forget the laughter of the night before, in the remembrance of the pain they sought to dispel. Individual experience, in too many cases, seems to have just cause for leaning toward pessimism.

But waiving individual experience, take the world as it is, and place the doctrine of pessimism against that of optimism, and judge on which side lies the weight of argument. In optimism we are taught that everything in nature is ordered for the best, while pessimism teaches that the world is the worst possible. In the Old Testament history we have the record of a world destroyed by a flood: it was too bad to be tolerated. That event is continually held up as a warning to this, and we are constantly reminded of the forbearance which prevents this world from being destroyed and waits for it to grow better. Surely, the natural inference is, that this world is the worst that could be and possibly exist.

There really, then, is only one argument that can be formed in favor of optimism as against pessimism, and that is the argument of a future life where the wrongs of this life shall be righted, and that which was injustice here shall work out an eternal weight of glory.

But this argument is a question of faith and not of knowledge, and can be accepted only as a belief and not as a fact The life beyond the grave, as a known fact, is no more easily determined than what the life was before it appeared on this earth. We may have lived in some other world and have come here, and from here we may go to some other world, and, at some future time, from the other world to the next, and so on indefinitely. We do not know, but the heart believes in a future life, and believing in it, must believe in optimism, that all things are ordered for the best. Take away this belief in a future life, and pessimism must be true when it states that this is the worst world possible.

Organization.

At the annual meeting of the Manhattan Company, held in this city on the 9th inst., the following board of directors was elected: Jay Gould, Russell Sage, John H. Hall, William R. Garrison, Edward M. Field, Henry F. Dimock, Cyrus W. Field, Samuel Sloan, Sidney Dillon, George L. Gould, Washington E. Connor, George S. Scott and Robert M. Gallaway. A report of the settlement between the New York and Metropolitan Elevated Railroad Companies and the Manhattan Company was read and, on motion, the agreement and releases were ratified and confirmed. It was further resolved that while the the stockholders of the Manhattan Company "regard with satisfaction the settlement thus made with the New York and Metropolitan companies, they recommend that measures be taken to merge into the stock of the two other companies—that is to say, that a surrender or transfer of the capital stock of the New York and Metropolitan companies be made by their stockholders to this company and accepted by it; and for that purpose they approve and authorize the issue of the like additional amount of the stock of this company, not exceeding in the aggregate the stocks of the New York and Metropolitan companies—that is to say $13,000,000—on such terms and conditions as may be agreed upon between the three said companies." At a meeting subsequently of the new board the following officers were elected: President, Jay Gould; vice president, Robert M. Gallaway; secretary, F. E. Worcester; treasurer, John E. Body; general manager, F. K. Hain.

Arrangements were completed at Cincinnati on the 12th inst. for the organization of the Cincinnati, Selma and Mobile Railroad Company. This company will operate 72 miles of road leading from Akron, on the Alabama Great Southern Railroad, to Selma. All but 17 miles, between Akron and Greensburg, of this line, are now in operation, the completed portion having been acquired by purchase. The capital stock has been placed at $1,500,000. Mr. Fred. Wolffe of New York will be the President of the company. This road is a highly important acquisition to the strength of the Cincinnati Southern. It will open the way to Selma, Montgomery, Mobile, Pensacola, and Brunswick, and run through the very heart of "the cotton garden of the South." The natural result will be to bring to the Cincinnati Southern a large volume of traffic which has hitherto sought other outlets for the road will enjoy all the advantages incident to direct communication with the cities named and the country tributary thereto. A long contract for the use of the road from Selma to Montgomery having been made with the Louisville and Nashville Railroad Company, the gap of 17 miles will be put under contract at once and be completed by the middle of January.

The Hudson River Tunnel Construction Company was organized at Jersey City, N. J., on the 14th inst., for the purpose of building the tunnel under the Hudson River between Jersey City and New York, now under construction. The capital of the company is $2,000,000, in shares of $100 each. The stockholders have decided, however, to offer for subscription only $750,000, and of this amount two thirds were immediately taken by the directors. The remainder will be offered for public subscriptions. The directors are D. O. Mills, John P. Jones, Charles G. Francklyn, Trenor W. Park and Joseph G. Mills. Trenor W. Park is president, and Frederick B. Jennings, secretary and treasurer. The contract for completing the tunnel has been made by the company.

Incorporation.

Articles of incorporation were filed on the 11th inst. in Court of Common Pleas No. 3, Philadelphia, for the organization of a company "for encouraging and protecting trade in mining stocks, bonds and other stocks and securities," to be known as "The Philadelphia Mining Board of Trade." The company is to have the power to acquire by purchase or lease suitable rooms or buildings for the purposes of their business, and are to encourage and protect trade in mining stocks and bonds in that city. The term of existence is fixed at twenty years. The management of the corporation is said to be in the hands of the following fifteen directors: James B, Anderson, A. L. Garver, W. H. Ware, James W. Bonta, Enon M. Harris, W. B. Keen, Arthur H. Woodward, H. S. Twining, Dr. Samuel Strohm, Dr. Thomas H. Gruel, James W. Mulford, C. H. Woodruff, K. H. Wilson, W. J. Radcliffe and C. J. Fireng, each of whom is to act for a year. There is to be no capital stock, but the funds accruing from membership, monthly dues and other sources are to be applied to the payment of the necessary expenses.

The Minneapolis, Perham and Manitoba Air Line Railroad Company has been incorporated in Otter Tail County, Minn. The design is to build a railroad and telegraph line from some point on the line of the St. Paul, Minneapolis and Manitoba Railroad between the towns of St. Cloud, in Stearns County, and Alexandria, in Douglas County, by way of Perham, in Otter Tail County, thence to the Red Lake River, crossing the same at some point between Crookston and the Red Lake Indian reservation, and thence to the northern boundary of the State of Minnesota, striking the same at a point between the Red River of the North and a point fifty miles east of Red River. The office of the company will be in Perham, Otter Tail County, Minn. Capital stock, $3,000,000. The incorporators are A. McCrea, F. J. Rothpletz, C. H. Tuesley, P. Schroeder, W. S. Hurst, S. Butler, S. Caughey, H. Kemper and D. Newcomb, all of Perham, Otter Tail County, State of Minnesota.

Articles of incorporation of the Bay Shore Railroad Company have been filed with the Secretary of State of California. The purposes of the company are to construct and maintain a line of railroad from San Bruno Station, in the county of San Mateo, to the Presidio Reservation, in the city of San Francisco, with branches to such points upon the water front of said city as it may acquire the right to run. The estimated length of said road is twenty miles; principal place of business, San Francisco. Directors—James McCord, Charles Hanson, Robert F. Morrow, John Rosenfeld and T.

C. Van Ness. The amount of capital stock is $4,000,000, divided into 40,000 shares.

THE charter of the Kansas Railway Company has been filed in the office of the Secretary of State of Kansas. The object of this company is to construct a railroad from the Missouri State line, in the county of Crawford, westerly to a point on the line of the Indian Territory, in the county of Clark. Branches through the counties of Greenwood, Chautauqua, Kingman and Pratt will also be constructed. The estimated length of the main line and branches is five hundred miles. The general office of the corporation will be at Girard County, and the capital stock is $2,000,000. The directors for the first year are S. G. Clark, A. J. Harding, of Chicago; William Clark, of Girard, Kansas.; T. G. C. Dodd, of Altoona, Kan., and H. B. Harking, of Fredonia, Kan.

A NEW railroad company has been incorporated in Ohio under the name of the Cincinnati, Columbus and Hocking Valley Railroad Company—the object being to connect Cincinnati with the Hocking Valley coal region. It is well known that during a portion of the year the Ohio River is so low as to prevent navigation, and the coal fleets are unable to leave Pittsburg. At such times the supply runs low and prices advance to a high figure. At present Cincinnati has no exclusively coal road, and this need it is proposed that the new road shall fill. The other roads coming into the city receive coal at such a disadvantage that they carry little of it, and complain that there is little profit in its transportation. The new road would win all the business it could take care of from the start, and it is thought could be made to pay handsomely.

ARTICLES of incorporation of the Chicago Railway Transfer Company were filed in the office of the Secretary of State of Illinois on the 9th inst. The object is to construct a line of railway from a point near South Chicago, in the township of Hyde Park, through the township of Hyde Park, Lake, Calumet, Lyons, Cicero, Jefferson and Lake View, to a point in said township of Jefferson, or Lake View, in the county of Cook. The proposed capital stock is $500,000, and the incorporators and board of directors are Victor D. Gowan. Charles Robert, Francis A. Riddle, Richard Gregg, all of Chicago, and Stephen D. Inslee of Elgin.

Consolidation.

THE New York and the Metropolitan Elevated Railroad Companies were consolidated with the Manhattan Company on the 14th inst. with Jay Gould as president, Robert M. Galloway vice president, F. E. Worcester secretary, John E. Body treasurer, and F. K. Hain general manager.

THE Vulcan Steel Works of South St. Louis, the Pilot Knob Iron Works, the Iron Mountain Railroad Company, and the Grand Tower Mining and Manufacturing Company of Illinois have been consolidated into a single interest, with a directory consisting of Jay Gould, Thomas Dickson, C. K. Garrison, Solon Humphreys, H. G. Marquand, and Le Grand B. Cannon, of New York, and Charles P. Chouteau, Thomas E. Tutt, Carlos S. Greeley, J. H. Macon, Edward Walls, Jr., D. K. Ferguson, and E. A. Hitchcock, of St. Louis. The last named gentleman will be president of the company. Extensive changes and repairs will be made to the property of the consolidation. Additions will also be made, among which will be a steel wire mill, to be erected on the recent purchase of five acres of ground adjoining the Vulcan Car Steel Works on the north, which will employ 200 men; a new furnace and other improvements and extensions to the extent of $500,000.

Personal.

CHAS. D. LAW has been appointed Superintendent of the Western Division of the Pittsburg, Fort Wayne and Chicago Railroad.

H. B. STONE has been appointed General Superintendent of the Chicago, Burlington and Quincy Railroad.

WM. M. BUCHANAN has been appointed Second Auditor of the Baltimore and Ohio Company, to succeed Mr. James L. Kirk, who takes a position in the auditor's department of the Wabash, with headquarters at Pittsburg.

CHAS. E. LAMBERT has been appointed General Passenger Agent of the Troy and Boston Railroad Company.

H. H. GORRINGE, of New York; C. W. Slagle, of Iowa, and Thomas J. Minor, of Washington Territory, the Government Commissioners recently appointed to examine 200 miles of the Northern Pacific Railroad in Washington Territory, were recently directed by Secretary Kirkwood to examine and report upon an additional section of twenty-five miles of road (extending eastward into Idaho) which has been completed since the date of their apppintment.

H. F. Kenny, Superintendent Philadelphia, Wilmington and Baltimore Railroad, has returned to Philadelphia from a trip to California, after an absence of a month.

The Pennsylvania Flyer.

The fast train fever is spreading. Already limited trains are running on the Lake Shore and Michigan Southern, the Wabash, St. Louis and Pacific, the Chicago and Alton, the Pennsylvania, and other roads. The Pennsylvania Railroad Company has now had two weeks of fast train experience, and its experiments have proved eminently successful. It has made the time without apparently straining any of its muscles. It is well known that the Pennsylvania has most excellent equipment and rolling stock, and no better piece of road-bed can be found in the country than the Pittsburg, Fort Wayne and Chicago, over which their flyer is daily run. If it comes to a matter of speed and time, it is probably true that the Pennsylvania people can run a train from New York to Chicago fully two hours quicker than any road in the country. It has the double advantage of a shorter route and fewer stations. No matter what its rivals may do, it is generally believed that the Pennsylvania flyer has come to stay.—*Pittsburg Chronicle.*

THE opening of the Fishkill extension of the New York and New England Railroad has been postponed until November 21.

The Coal Trade.

The leading coal carrying companies make the following reports of their tonnage for the week ending November 5, and for the year to same date, compared with their respective amounts carried to the same date last year:

	Week.	1881.	1880.
Reading Railroad	174,603	7,378,910	6,550,597
Schuylkill Canal	13,471	520,439	463,356

The total tonnage of anthracite coal from all the regions for the week ending Nov 5, as reported by the several carrying companies, amounted to 579,700 tons, against 514,974 tons in the corresponding week last year, an increase of 64,726 tons. The total amount of anthracite mined for the year is 23,754,657 tons, against 19,686,525 tons for the same period last year, an increase of 4,068,132 tons. The quantity of bituminous coal sent to market for the week amounted to 110,486 tons, against 88,480 tons in the corresponding week of last year, an increase of 22,006 tons. The total amount of bituminous mined for the year is 4,180,080 tons, against 3,647,954 tons for the corresponding period last year, an increase of 532,126 tons. The total tonnage of all kinds of coal for the week is 690,186 tons, against 603,454 tons in corresponding week last year, an increase of 86,732 tons, and the total tonnage for the coal year is 27,934,737 tons, against 23,334,479 tons, same date last year, an increase of 4,600,258 tons. The quantity of coal and coke carried over the Pennsylvania Railroad for the week ending October 29 was 187,632 tons, of which 144,306 tons were coal and 43,326 tons coke. The total tonnage for the year thus far has been 7,444,367 tons, of which 5,478,759 tons were coal and 1,965,608 tons coke. These figures embrace all the coal and coke carried over the road east and west. The shipments of bituminous coal from the mines of the Cumberland coal region during the week ended November 5 have not yet been reported. The Reading Railroad shipment for last week, ending November 12 was, 193,500 tons, of which 48,000 tons were sent to and 43,500 tons shipped from Port Richmond, and 14,000 tons sent to and 14,500 tons shipped from Elizabethport.—*Phil. Ledger, Nov.* 14.

JOSE F. NAVARRO, President of the Loan and Improvement Company, has formally surrendered to the Manhattan Company all the real estate and other property placed in the keeping of the Loan and Improvement Company by the Metropolitan Elevated Railway Company.

THE Grand Trunk Railway Company's double track west of Montreal, so far as it is finished, which serves as sidings and for trains to pass each other at way stations, is found to be very serviceable, so much so that the same plan is likely to be extended east. The laying of two tracks in the Victoria Bridge is also being considered.

The Rhinebeck and Connecticut Railroad was sold on the 9th inst. under a mortgage foreclosure at auction to Thomas Cornell, of Kingston, N. Y.

Interest paid by the United States, $51,467,272 02; interest repaid by transportation of mails, &c., $14,662,-941 06; interest repaid by cash payments: 5 per cent. net earnings, $655,198 87; balance of interest paid by United States, $36,149,132 09.

The foregoing is a correct statement of the public debt, as appears from the books and Treasurer's returns in the Department at the close of business, October 31, 1881.

H. F. FRENCH,
Acting Secretary of the Treasury.

The Letter Express in the West.

About two years ago an attempt was made to have the Government prohibit the carrying of letters by Wells, Fargo & Co.'s Express. A general protest was raised by the people and press of this coast against any interference with the additional mail facilities afforded by the company. It was shown to the satisfaction of Postmaster-General Key that the Government suffers no loss by the existence of the letter express. In every instance Wells, Fargo & Co. use a postal-stamped envelope, thus paying the Government 3 cents for each letter and retaining 2 cents as its compensation. Thus, while full postage is paid, every letter is forwarded and delivered without cost to the Postal Department, and the Government becomes the gainer by the transaction. Upon this showing all further opposition to the express company ceased. It is now reported that Postmaster General James has reopened the question. Should he decide against Wells, Fargo & Co. the public which has been so long faithfully served by them will be the sufferers, and, except in adding a trifle to the compensation of a few Postmasters here and there, no interest can be served. The letter express is a peculiar feature in the business correspondence of the country west of the Rocky Mountains. Many prefer it to the mail, because it is more accommodating and expeditious than the regular postal service. The company establishes agencies in a large number of places where there are no Post Offices and carries letters over routes not covered by the mails. But for the increased facilities afforded by the company our people would be entirely cut off from communication with remote points. Whenever a new mining camp is established the express company is right on the heels of the prospectors and settlers with a branch office, and long before a Post Office can be established the new camp is provided by private enterprise with much needed mail facilities.—*Virginia (Nevada) Enterprise.*

Plans for the Tay Bridge.

The plans for the proposed new Tay bridge, prepared by Mr. W. H. Barlow, C. E., are now being exhibited at the North British Railway offices, Edinburgh, for inspection by intending contractors. The new bridge, which is to be built on the girder principle, will commence on the south side, about 16 feet west of the former bridge. At this end four brick arches are shown next the shore, each having a span of 50 feet. The girder work then commences with a span of 118 feet from centre to centre of the piers, and is continued with 10 spans of 129 feet, and 13 of 145 feet from centre to centre of the piers, until navigable portions of the channel are reached. Here there are 13 wider spans, 11 being each 245 feet and two 227 feet each. Of these spans the first four are carrried to the greatest height of the structure, and give 77 feet of clear headway above high-water mark. From this point the line of the bridge commences to fall toward the north or Dundee side, at a gradient of one in 114, there being one span of 162 feet, ten of 129 feet 6 inches, and one of 127 feet 6 inches. These spans carry the bridge on to the commencement of the curve toward Dundee, and 25 more, each of 71 feet, take the structure to the side of the proposed extension of the esplanade. Several other spans take the bridge on to the point where it is run into the level of the existing arches. The bridge is to be constructed for a double line of rails throughout.

The foundations in the river bed will be formed of two wrought-iron cylinders placed at a distance of 26 feet apart from centre to centre, and filled with concrete. These cylinders rise to the height of within two feet of low-water mark, where brick will be used, filled in also with concrete. The brick-work is to be the height of eight feet above high-water mark, at which level the cylinders are connected and made to form a solid foundation, topped with a course of ashlar. Rising from this foundation two piers are

formed of wrought-iron pillers braced together and incased with iron plates of from three-eighths to seven-sixteenths of an inch in thickness. The piers thus constructed are connected with each other near the top, and the whole has the appearance of a high and strongly built arch on which to place the girders. The principal piers are octagonal in shape, with a diameter varying from 11 to 14 feet 6 inches. The spans are each composed of four girders, with the exception of the higher spans. These are of two girders connected together, top and bottom, with bracing and flooring. The bridge throughout its whole length will have a parapet of between 5 feet and 6 feet in heighth, forming a wind guard. The depth of each girder on the piers is 16 feet 6 inches. The middle girders are 28 feet 9 inches in the centre and at the ends 20 feet 3 inches. They are of hog-back lattice form. The other girders are of plain lattice work, and are all connected by cross bracing, on the top of which the train travels, as it did on the old bridge. At the high girders the train travels between them. The platform of the bridge is of wrought-iron throughout. In the construction of the new bridge, the old one will be sufficiently near for anchorage and carnes.

—London Times.

Cincinnati Iron Market.

OFFICE OF E. L. HARPER & Co.
Cincinnati, Nov. 15, 1881.

We have to report a fair demand at reasonable prices. The mills are running up to their full capacity. Swift's Iron and Steel Works mills at New York and Riverside are running double turn. We quote as follows:

	No.		Mos

Canada Atlantic Railway.

The control of the Canada Central Railway running from Brockville to Ottawa by the Canadian Pacific Syndicate, and the recent purchase of the St. Lawrence and Ottawa by them, has led many to think that they have thus, as it were, cornered the Grand Trunk, and cut them off from a connection with Ottawa. The Canada Atlantic Railway, running from Coteau to Ottawa, is destined, however, to play an important part in these Ottawa connections. The work along this road has been pushed along quietly but most vigorously by Mr. Linsley, the contractor, who is a man of deeds rather than of words. The road will by the latter part of this month be within thirty miles of Ottawa and will reach that city by the 1st of August next. The vigor with which the work is being pushed can be understood when it is known that the company has introduced the electric light at its main gravel pit and by its aid are enabled to work night and day in the work of construction. The road has a remarkably flat and even country to traverse, and will be when completed eighty miles in length, thus making the distance from Montreal to Ottawa by this route 117 miles. Very few people will believe that between the rivers St. Lawrence and Ottawa there exists on the line of this road an unbroken forest which is in many places from twenty to thirty feet deep. The opening of this road must be very beneficial to Montreal. —*Montreal Witness.*

Imports of Dry Goods at New York.

Railroad Earnings.

THE earnings of the Chesapeake and Ohio Railway for the month of October, 1881, were $237,303.16, against $211,819.95 for the month of October, 1880, an increase of $25,483.21. For the first ten months of 1881, the earnings were $2,268,521.80, against $2,215,505.24 for the corresponding period of 1880, an increase of $606,-199.80.

THE earnings of the Central Pacific Railroad for the month of October, 1881, were $2,514,000, against $2,120,229 for the month of October, 1880, an increase of $393,771. From January 1, to October 31, 1881, the earnings were $19,-684,790, against $16,403,434 for the corresponding period of 1880, an increase of $3,281,366.

THE gross receipts of the Great Western Railway Company of Canada for the month of September, 1881, (excluding leased lines), were £83,055, the working expenses, including transfers to reserve funds, £58,541, and the net £24,514; for the month of September, 1880, the gross receipts were £87,657, the working expenses £52,958, and the net £34,699—showing a decrease in gross receipts of £4,602, with an increase in working expenses of £5,583, making the decrease in net £10,185. For the two months ending with September, 1881, the gross receipts were £158,384, the working expenses £116,281, and the net £42,103; for the corresponding two months of 1880, the gross receipts were £169,458, the working expenses £106,486, and the net £62,972—showing a decrease in gross receipts of £11,074, with an increase in working expenses of £9,795, making the decrease in net £20,869.

THE gross receipts of the Grand Trunk Railway Company of Canada for the month of September, 1881, were £189,305, the working expenses £134,247, and the net profit £55,058 ; for the month of September, 1880, the gross receipts were £192,511, the working expenses £123,864, and the net profit £68,647—showing a decrease in gross receipts of £3,206, with an increase in working expenses of £10,383, making the decrease in net profit £13,589. For the three months ending with September, 1881, the gross receipts were £539,954, the working expenses £400,609, and the net profit £139,345; for the corresponding three months of 1880 the gross receipts were £555,895, the working expenses £373,406, and the net profit £182,489—showing a decrease in gross receipts of £15,941, with an increase in working expenses of £27,-203, making the decrease in net profit £43,144.

Illinois Central Railroad.

During the month of October, 1881, the traffic on the lines operated by this company was (estimated):

In Illinois	$655,867.00
In Iowa (leased lines)	174,458.00
Total	$830,325.00

The trfflac for the same month in 1880, on the same mileage, was (actual):

In Illinois	$688,110.09
In Iowa (leased lines)	192,101.14
Total	$880,211.23

During October 1881, the land sales were 1,471.03 acres for $8,430.63, and the cash collected on land contracts was $11,513.15.

L. A. CATLIN, *Secretary.*

New York Stock Exchange.

AMERICAN RAILROAD JOURNAL.

Financial and Commercial Review.

THURSDAY EVENING, Nov. 17, 1881.

In the forenoon the local money market was easy at 5@6 per cent on stocks, and 3½@4½ on United States bonds. Time loans were 5@6 per cent; prims mercantile paper 6@7 per cent. In the afternoon call loans at the Stock Exchange were 5 per cent; and although in the last hour some of the stock brokers paid as high as 6 per cent plus 1-64 of one per cent per day for money, yet at the very close the rate for money to the stock brokers was offered down to 4 per cent.

The actual rates for prime bankers sterling were 4.80¼@¾ and 4.84¼@½, with the posted rates rates 4.81@½ and 4.85@½ respectively. Cable transfers on London were 4.85@½ and prime commercial bills 4.78¾. The actual rates for continental bills are as follows: francs, 5.20 @⅝ and 5.25@⅝; marks, 94@⅛ and 95, and guilders, 39¾ and 40.

On Wednesday only $38,500 of continued 6 per cent bonds were accepted by the Treasury Department, making, with the $4,550 previously accepted, a total of only $43,100 offered and accepted up to date under the terms of the Treasury circular of November 4th.

In consequence of the loss of a $500 bond Treasurer Gilfillan has issued an order to the effect that hereafter no bonds deposited as security for circulation or public credit shall be surrendered or allowed to pass from the custody of the Treasurer's office, except upon the surrender of circulating notes, deposit of lawful money, deposit of other bonds in the name of the Treasurer of the United States in trust, or, in the case of a depositary bank, upon the order of the Secretary of the Treasury.

The Manhattan Company has notified the New York Stock Exchange that its capital stock would be increased from $13,000,000 to $26,000,000 for the purpose of merging the New York and Metropolitan Elevated Railroad Companies' stocks into the Manhattan.

The refunding operations of the Secretary of the Treasury has been completed. The total of the bonds continued at 3½ per cent is $579,560,050, and the total cost to the Government was about $10,000, of which nearly $6,000 was for paper and printing the bonds. This makes the expense of continuing each million dollars of the bonds about $17.81.

The following securities have been placed on call at the New York Stock Exchange :

American Dock and Improvement Company —The 7 per cent mortgage bonds dated October 1, 1866, now upon the list, have been recalled and the company has replaced them with an issue of $5,000,000 of first mortgage bonds in 5,000 bonds of $1,000 each with interest at 5 per cent. The new bonds are placed on the regular list.

Galveston, Harrisburg and San Antonio Railway Company—First mortgage bonds, Nos. 1 to 4,500, each for $1,000, dated February 1, 1871; Nos. 4,501 to 4,800 each $1,000, Lagrange extension, dated August 1, 1880; both mature February 1, 1910; same rate of interest, payable at some time ; included in the same mortgage; are on an entire equality and are a first mortgage on the total length of road, 256 miles, and sidings twenty miles. They have been on the list and called separately. The company requested that they be united and called as one and the committee ordered that the call of Lagrange extension be discontinued and the whole 4,800 bonds be embraced in one call as first mortgage bonds.

Many stock brokers have sent to Washington their supplementary tax reports of what the Government considered taxable deposits and what the brokers did not and failed to enter in the usual returns. If stock has been sold and the margin not touched for a few days, the Government considers it a deposit. The tax levied is one twenty-fourth of 1 per cent a month, which is equal to one-half of 1 per cent a year.

The total values of exports of domestic provisions, tallow, and dairy products, during the month of October, 1881, were $8,923,420; October, 1880, $11,469,967 ; ten months ended October 31, 1881, $111,728,221; ten months ended October 31, 1880, $115,931,919. The total value of exports of provisions and tallow for twelve months ended October 31, 1881, were $119,172,545; for 1880, $113,991,148. The total values of exports of dairy products for six months ended October 31, 1881, were $13,510,430; for 1880, $16,491,519. The total values of the exports of domestic breadstuffs from the United States during the month of October, 1881, were $14,839,914, and during October, 1880, $25,973,970; for the four months ended October 31, 1881, $80,311,635, and for the four months ended October 31, 1880, $192,292,552, and during the same period in 1880, $235,177,847.

THE South Eastern Railway Company are laying down a track of their own in the vicinity of St. Lambert, the Grand Trunk Railway Company having, owing to increasing business, taken entire possession of the one in use by both for about a mile beyond that point.

THE Cairo Branch of the Mobile and Ohio Railroad was opened for freight on the 15th inst. Passenger trains will commence running on the 1st of December.

RAILROAD EARNINGS—MONTHLY.

	January.	February.	March.	April.	May.	June.	July.	August.	September.	October.	November.	December.	Total.

THE Alliance Coal Company, at the head of which is Peter Cooper and Abraham S. Hewitt, are extending their coal mining operations in Schuylkill County, Pa. In addition to operating a large tract at Tamaqua, they have made investments about New Philadelphia, in the same county, and will invest $1,000,000 there in opening lands.

THE Iron Works at Boonton, N. J., formerly leased to Fuller, Lord & Co., of New York, and which have been idle for several years, have been leased by Joseph Wharton, an iron manufacturer of Philadelphia and Bethlehem, Pa., who will at once begin the manufacture of muck and merchant bar-iron.

IN the year ending October 31, 1881, the New York elevated roads carried 75,575,245 passengers, on some days handling a number equal to one-fifth the population of the city. There are 3,400 men on the pay-roll, 203 engines, 612 cars, 161 stations and 32 miles of track. The earnings for the year were $5,279,536.

THE sale of the Florida Central Railroad, extending from Pensacola to Lake City, advertised to take place on the 5th inst. under a decree of the United States Supreme Court, was postponed by order of Judge Pardee, to December 11.

THE Ogden Mine Railroad, crossing and connecting the most important iron mines and veins in the upper portion of Morris County, N. J., has been leased to the Central Railroad Company of New Jersey for 999 years. The company will conduct it with their High Bridge Division. The rental to be paid is equal to 5 per cent on the capital stock of the leased road.

History of Banks and Banking.

HON. John Jay Knox, Comptroller of the Currency, concluded on the 17th inst. his course of three lectures on the History of the Banking System of the United States, before the students of Johns Hopkins University, at Baltimore, Md. These lectures were largely attended, not only by the students, but also by many of the leading bankers and business men of that city. Being of general interest we concluded to transfer to our columns the following resume of them from the Baltimore Sun:

In the first lecture, which was given on the 10th inst., Mr. Knox commenced by defining the charcter of the business and functions of a bank, and presenting the magnitude and importance of the banking business in this country, after which he announced that his three lectures would consist of a brief review of banking as it has existed in this country since its organization, and would include; first, colonial banking previous to the adoption of the constitution; second, the subsequent systems of banking authorized by the laws of the United States and of separate States; and third, the national banking system, including some of the charcteristics of modern banking. The lecturer then gave a brief sketch of the issue of paper money, first made by the colonies in 1690 and subsequently, and of a project by John Coleman and others of a land bank, which was modeled from a plan proposed and favorably reported by a committee to the House of Commons, in England, a few years before. A graphic description was given from Macaulay of this project, which was finally defeated by the united force of demonstration and derision, which produced an effect even on the most ignorant rustic of the House. The land bank project at Boston was not so easily defeated. It was organized in 1740, and among those who favored it was the father of John Adams. Each stockholder gave to the directors a title to landed estates, and received its equivalent in bank bills. Circulating notes equal to $750,000 were issued, and five per cent of the capital was to be paid annually in the notes issued or articles manufactured. The "manufactures" consisted, among other things, of hemp, cordage, beeswax, tallow and cordwood. The mortgage securities of these banks were insufficient to realize enough to pay the debts, and twenty-eight years after its organization, and many years after its failure, creditors were still clamoring for their just dues from those few stockholders who were solvent.

Many other like incidents of colonial banking were given. A brief sketch of the Bank of North America, organized in Philadelphia in 1782, was then given, and among the incidents mentioned was a letter from Alexander Hamilton to Otho H. Williams, collector of customs in Baltimore, in the year 1779, instructing him to receive the notes of that bank and of the Bank of New York which were payable on or before thirty days from date, in payment of duties as equivalent to gold and silver. It was the moneys received from these two banks, which are still doing a substantial and prosperous business as national banks, that paid the first instalment of salary due President Washington and the Senators and Representatives and officers of Congress during the first session under the constitution, which began at the city of New York, March 4, 1779.

A brief sketch was then given of the Bank of the United States, organized in 1771, and of the efforts made to renew its charter at its expiration, in 1811. A bill for its renewal was lost in the Senate by a tie vote, and in the House by a minority of one vote. The war of 1812 was carried on by the issuing of treasury notes, which were at a discount, and by the notes of State banks, that were issued in large amounts, bringing on a monetary crisis which finally revolutionized the opinion of Congress to such an extent that a bill for the renewal of the charter was passed by Congress, which was vetoed by President Madison in January, 1815.

In the second lecture of the course, given on the 15th inst., the lecturer, after giving a sketch of the plans and powers of the second bank of the United States, which went into operation in 1816, gave an interesting description of the bank at the beginning of the administration of General Jackson, with its capital of $35,000,000—its loans, circulation and deposits being in amount about one-fifth of the whole amount held and issued by all the banks in the country at that time. It had its marble palace in Philadelphia and its twenty-five branches in the principal cities. Its employees were five hundred in number—all men of standing and influence, and all liberally salaried. Its shareholders resided in every State and in nearly every county of the Union. Its bank notes were received at par everywhere at home, and in London, Paris, and other principal monetary centers abroad. Its stock was frequently at a premium of 40 per cent, and it received and disbursed all the revenue of the country. It was not considered a political or partisan institution, and in the presidential campaigns of 1824 and 1828 it was not so much as mentioned. It was a great surprise, therefore, when General Jackson, nine years before the charter expired, presented to Congress constitutional objections to its recharter. His objections were believed to have originated from partisan motives, and a desire that his friends should control the patronage and management of the bank; and a quotation from the speech of Calhoun and from other authors was given in corroboration of this view.

A sketch was given of the bitter party contests, which continued for many years, upon the subject of the removal of the deposits, and subsequently a graphic sketch was presented of the action of Senator Benton, of Missouri, during the proceedings of the Senate in expunging from its records the resolution of censure of General Jackson, which was adopted immediately after the order was given to deposit no more of the public moneys in the Bank of the United States. Following the removal of the deposits the banks expanded their issues and increased their loans beyond all precedent, consequent upon the deposit of public moneys with so many corporations. To the transfer of the public funds to private institutions in a large measure was due the inflation of 1835 and 1836 and the crisis of 1837, and the business depression which continued for five years thereafter. The Bank of the United States suspended with other State banks, and having failed in obtaining a new charter from Congress, obtained one from the State of Pennsylvania just previous to the expiration of the former, Col. Benton ascribing every circumstance of its enactment to corruption, bribery in the members who passed

the act, and an attempt to bribe the people by distributing the bonus among them. The circumstances attending the attempt to obtain a recharter of the bank under the Harrison administration, and the veto of President Tyler in 1841, were then described. The passage of the sub-treasury act, and its repeal and subsequent passage in 1846, were referred to as the final result of this most bitter and pertinacious political controversy, which continued for eight years, from 1833 to 1841.

A rapid sketch was then given of the Suffolk system in New England and the charter safety fund and free-banking systems in New York, and other similar systems, which were organized in Ohio, Indiana and Illinois, and other Southern and Western States. The lecturer closed with a general review of the different State systems in operation at the time of the passage of the national bank act in 1863. The grouping of all the leading events connected with banking in the United States from 1816 to 1863—a period of 47 years—required great condensation, but the subject was presented in a clear and concise manner, and held the attention of the audience closely for more than an hour.

The third and last lecture of the course was delivered by the Comptroller on the 17th inst. Mr. Knox commenced by giving a brief sketch of the passage, in 1694, of the bill establishing the Bank of England. A magazine writer in Philadelphia in 1815 first proposed that the public funds should serve in the absence of specie as a basis of the paper currency, and a plan similar to the present system was proposed by Albert Gallatin in 1831. In 1844 notes to the value of fourteen million pounds sterling were authorized to be issued by the Bank of England on government securities, additional issues to vary with the amount of coin or bullion on deposit. The free banking system of New York was authorized six years previous to the last date mentioned, and was the first system which required securities to be deposited for bank issues. The national banking system was proposed in 1861, and encountered earnest opposition. The organization of banks without capital or with stock notes was one of the great abuses of previous bank systems. The bank act carefully guards against such an abuse.

The lecturer also referred to the frequent failures of State banks and private banks, in comparison with the losses which have arisen in the national banking system, and also compared the expenses of receiverships under previous systems and the present. Under the head of duties of directors and examiners and receivers, he referred also directly at some length to the recent failure of the Mechanics' National Bank of Newark, and stated that while additional legislation may be required, no legislation and no occasional visits of an examiner could prevent the downfall of a bank if subordinates who were robbers and forgers were allowed to have possession and control of its assets, and that there was not so much necessity for additional legislation as there was for increased diligence and sagacity on the part of those who were in charge of great trusts. He closed with a general summary of the advantages of the system, and stated that the rapid reduction of the interest upon the public debt had reduced the profit upon circulation to a minimum; that the national banking system need not be dissolved on account of the reduction of the public debt; that the system could remain legally in existence with but a small issue of circulation and with less than $100,000,000 of United States bonds on deposit. That of itself was an answer to the chief objection of opponents of the system, viz.: That the banks received too much profit upon circulation; for it followed that with the rapid decrease of the public debt there would also be a rapid decrease of the aggregate profit on circulation, unless Congress should authorize some other form of security to be used in place of United States bonds.

Electrical Railways.

THE managers of the street railways in this country have had their attention of late directed to the Siemen's electric engine with the hope that its completion would solve the problem of cheap transit. Mr. Widener, the President of the West Philadelphia Railroad, examined the Siemen's electric road while in Paris recently, where it was on exhibition at the great Electrical Congress. He told Mr. Siemens that the Berlin railroad on stilts, which is somewhat similar to the elevated roads in New York, would not be tolerated in the large cities of the United States, and advised the gentleman not to come here until he had something better. "There was another system of electrical railway," said Mr. Widener, "and that will no doubt be what is wanted when it is perfected. On the front of each car, beneath the platform, is a dynamo box. Then there is a third set of wheels raised above the track. A belt six inches wide extends from these to the other wheels, and the power is given by means of this. Cars with this attached can be used upon surface roads."

In connection with this subject a gentleman well known in scientific circles, and attached to one of our prominent institutions of learning, said that while in Paris at the Congress of Electricians he had examined the Siemen's railway. "So far as its practical use upon our railways is concerned," said the gentleman, "electricity is but in its infancy. It will be years before anything of real use will be developed. Privately, Siemens Brothers regard this railway car more as an advertisement for themselves than anything else; but at the same time they will use all means to perfect it if they find it can be used on American tramway roads. As it stands today it is useless."—Philapelphia Record.

Telegraphing from a Moving Train.

On September 27th, through Messrs. Dewey & Co., a patent was issued to a resident of Santa Barbara, for a method of telegraphing from a moving railroad car. The invention enbles each freight or passenger train to have its own telegraph office. Two wires are required instead of one, and these are suspended directly over the track, and above the moving train. They are parallel, and about eighteen inches apart. One wire is connected with a battery at the station from which the train starts, and the other with a battery at the terminal station. They are so suspended that, by a somewhat ingenious arrangement, light running wheels can move along them from one end of the road to the other. The wheels are insulated from each other, but are connected with wires which pass down through the roof of the car to the operating instrument, and through it complete the circuit. As the car moves, the wheels are drawn along on the wires just above it, and a constant current of electricity is maintained between the initial and terminal stations, through the moving car.

Without attempting to enumerate the advantages of the invention, some of the more obvious may be mentioned. All the train reports and all orders from train dispatchers will be communicated directly to the conductors and engineers while the train is in motion. Passengers can receive and transmit messages at any moment during their journey, without any of the inconvenience now experienced. Directors and distinguished parties traveling in their own private cars will find it especially convenient to have a telegraph office constantly at hand.

But the one great value of the invention after all, will be its preservation of life and property by preventing collisions. Almost every day, heart-rendering accidents are recorded of colliding trains. A lightning express rushes over long stretches of road between stations, without knowing at what moment it may crash into an approaching train. Upon leaving a station all communication is cut off until the next station is reached. With offices upon each moving train, and constant uninterrupted communication, not only with the head office, but with all trains moving on the same track, collisions would be impossible, and the safety of passengers and freight would be enhanced five hundred per cent over the present system. When not in use for railroad business, the lines can be employed for the transmission of ordinary messages.—*Santa Barbara Press.*

Gospel Cars.

A business man recently asked the Boston Transcript why Gospel cars should not be attached to passenger trains as well as smoking cars. Conductor Harris, of the Old Colony railroad, answers through the same paper that the suggestion is a practical one. He writes: "There are hundreds of Christian men, who delight in the worship of God, who spend from six to twelve hours per week on the railroad between home and business. Now, why not utilize this time to the glory of God! What a fitting close it would be for the business of the day. Instead of card tables have an organ or piano, have seats arranged facing the center of the car. Instead of spittoons have a carpet; instead of cards have Bibles and Gospel song books. I venture twenty years' experience that the thing is practicable."

AMERICAN Railroad Journal. ESTABLISHED 1832.

PUBLISHED WEEKLY BY THE

AMERICAN RAILROAD JOURNAL CO.,

At 23 Liberty Street, New York.

Subscription, per annum, in advance..... $5 00
Foreign Subscription, including postage..... 6 00

Purchases for the AMERICAN RAILROAD JOURNAL Co. are authorized only by the written order of Geo. F. Swain, Treasurer; and the Company will not be responsible for the payment of bills unless accompanied by such order.

Payments for advertising and subscriptions should be made by check payable to order of the Treasurer.

BRANCH OFFICE:
53 Devonshire St., Boston, Mass.

Mr. FREDERIC ALGAR, Nos. 11 and 12 Clements Lane, Lombard Street, London, E. C., England, is the authorized European Agent for the JOURNAL.

New York, Saturday, November 26, 1881.

Entered at the Post Office at New York City as Second-Class Mail Matter.

ONE-MAN POWER IN BANKING.

THE effect of the recent disclosures concerning the mismanagement of certain banks has undoubtedly been temporarily depressing to the financial market, but the ultimate result will be beneficial in so much as it leads to a more general adoption and a more rigid enforcement of cautionary measures. It would seem that a reliance upon a one-man power and its optional straightforwardness had been sufficiently indulged in by easy-going though well-intentioned directors to warrant their waking up now to the truth that eternal vigilance is the price of financial security, as it should become of personal as well as of national liberty. The man who "kept accounts in his head" makes an absurd spectacle at the head of a financial institution when disaster makes him conspicuous. It is lamentable that it needed disaster to show the absurdity.

We remember a carpenter who came trotting down the street one day with both arms extended in front of him, with nothing but air between his hands, which were held at as even a distance apart as possible, shouting to the passers by, "Don't touch me; I've got the measure of a door." The people he met saw plainly the kind of a carpenter he was, and when they wanted doors of a decent fit knew just where not to go. Bank presidents and cashiers of the "one-man power" and "kept-accounts-in-his-head" order unfortunately for depositors do not run through the streets proclaiming their character or announcing the measurements they have taken of their lethargic directing officials. Their character is generally discovered by the officers of other banks first.

It is a strong testimony, in many cases, to the honesty of bank officials generally, though it may not always be complimentary to their sagacity, that they are, as a rule, unsuspecting of evil intent or reckless doing on the part of officials of other banks, as shown by the after reports of transactions between them, in cases made public by disaster. This feature is in a degree reassuring when measured by the rogue catching the rogue standard.

When the officers of one bank do bring to light erroneous workings in other banks, it is usually the result of accident clogging the ordinary routine of business rather than of suspicion. The banks whose affairs are absolutely sound and whose workings are known to be reliable and carefully guarded, are not going to be materially disturbed by the unpleasant lack of confidence that recent developments have created. The staunch banks whose affairs are most cheerfully shown to the public and whose directing power and business routine are supervised by a judicious distribution of trust and management, will stand the stronger and the more cheeringly conspicuous for the overthrow of the institutions that have been left to the mismanagement of an erratic and unjustifiable one-man power. The alarm which has been expressed recently concerning the reliability of our banking system is in the main unfounded. The recent disturbances have come at an opportune time. The atmosphere may be clouded a little for a while, but the clearing away will show that there has been a healthful survival of the fittest and a stronger confidence than ever established in them.

GUITEAU.

ON Saturday, July 2, the wires flashed to all parts of the civilized world that the beloved President of the United States had been shot by Charles J. Guiteau. On Monday, September 19, the same wires flashed the sad intelligence that the wounded President had died. Here are two facts about which there is no dispute—not even the slightest shadow of controversy. The first fact is that Guiteau shot the President, which he acknowledges, and his acknowledgement is vouched for by persons of undoubted truthfulness who witnessed the shooting. The second fact is, that the President is dead, the result, either directly or indirectly, of his being shot. The question of whether the President could have survived had he been treated differently by his physicians, does not alter this second fact so far as Guiteau is concerned. But for the first fact of the shooting, there would have been no need of the President being placed in the hands of physicians, as he was a man of robust constitution and in the enjoyment of perfect health. It was the first fact that made the second fact possible, whether the second fact was the result of the pistol shot or of malpractice. The case then, so far as it stands against Guiteau, hinges entirely on the first fact, the shooting of the President. Did he shoot him? According to his own admission and the testimony of many witnesses, it is proved beyond the possibility of a doubt that he did. Now the questions legally connected with this first fact are not many, and can be settled without the aid of a long and expensive trial. The first question to be settled is, What was the motive? This has been answered by the prisoner himself, "To make Arthur President." We cannot follow out the workings of Guiteau's mind to gather all the reasons for this motive. A few of them are so plain that all who will may know them. He was an office seeker, and failing to procure what he desired from Garfield naturally turned his mind against him. In this turning of his mind he could not help but notice that others, men high in authority, were affected like himself. The unseemly spectacle of two Senators turning traitor to their own party and resigning their positions in the United States Senate, and then return to their own State begging a re-election, that they might have the political backing of their State, with which to brow-beat the President, convinced him that he was in illustrious company. Add to this that he who was once the people's idol, and he who held the second highest post of honor, forsook the President and joined his fortunes with the two Senators, and it is easy to conceive that in the turning of Guiteau's mind away from Garfield, because of disappointed hopes, it was natural to look toward these men as the persons who could realize these hopes for him if Garfield was removed. If he removed Garfield, Arthur would be President, and Grant and Conkling would be leading men once more. In this train of

reasoning we can see that Guiteau was a self-conceited fool courting notoriety, desiring to make himself known; but his self-conceit and desire for notoriety were not sufficient to cause him to commit murder, but for that other reason, that the men he thought he was raising into power by removing Garfield, might in turn reward him by the gift of an office. So much for the motive.

There is only one other question, and that regards his sanity. To settle this question no long and expensive trial is required. All the judges that ever sat on the bench, all the lawyers that ever prepared a brief, all the juries that were ever impanelled, all the witnesses that were ever sworn, amount to nothing when the question of insanity arises. Strictly speaking, there is not a sane person in the world, and the majority of persons are subject, more or less, to greater or lesser paroxysms of insanity.

Insanity is a lack of judgment a species of false reasoning, which causes a person to say or do things out of harmony with the accepted common sense of the majority. Such a person is harmless or harmful according to the degree of violence with which he tries to force the acceptance of his judgment by others.

There is no question that Guiteau was insane, and there is no more question but that the haughty Senator from New York was insane when he resigned his senatorial office. One committed murder; the other used no weapons recognized by the law as deadly. Is the Senator responsible for his acts? No one questions it; but if he had shot the President multitudes would have questioned it, and a great plea made in his behalf that he was insane, and therefore not responsible. This, then, is the one point alone that can morally be raised in regard to Guiteau—Was he responsible? With these two facts, the shooting by Guiteau and the death of the President, standing before fifty millions of people, it is not to be wondered at that some one, tired of his long imprisonment, his tedious trial, the law's delay, sought a more summary method of ridding the world of such a monster. The present trial, in the face of these two facts, seems a great farce, for if Guiteau was not responsible, a medical commission should sit in judgment on his case, and so report.

The judge has but one course before him in such an event, and that is to order him to be confined where he can never do ny more harm. If such a commission reports that he was and is responsible, but one duty remains for the judge—the pronouncing of the sentence specified by the law of the land.

CONSTRUCTION.

THE survey of the Toronto and Ottawa Railway from Perth to High Falls has been completed.

AN additional section of 25 miles of the Northern Pacific Railroad has been completed, extending into Idaho.

A CONTRACT has been signed at Palisade, Nevada, for grading the first 25 miles of the Eureka and Colorado River Railroad.

THE Mexican Pacific Extension of the Galveston, Harrisburg and San Antonio Railroad has been completed to Uvalde, Texas.

TRACK laying on the Georgia Pacific Railroad was commenced at Atlanta, Ga., on the 1st inst. J. B. Gordon, president of the company, drove the first spike.

THE first rail on the Chicago and Great Southern Railroad between Terre Haute, Ind., and Oxford was laid at the latter place on the 8th inst. The road is now being pushed through to Terre Haute.

A NEW railroad has been surveyed parallel with the Muskingum Valley Railroad from Zanesville, Ohio, to McLuney Station, whence it proceeds up Black Fork to the coal region.

WORK has been completed on contract 15 of the Canadian Pacific Railway, and it is expected that the road will be handed over to the syndicate on the 1st of December.

THE contract for grading, bridging and piling the Winnipeg and Duluth Railroad from Duluth to the Mississippi River has been let to E. C. Davis & Co. of Crookston and Boston.

THE Rome, Watertown and Ogdensburg Railroad Company is considering the subject of bridging the Niagara River near Lewiston. It proposes to connect with the Great Western by a branch eight miles long.

A SYNDICATE of which J. Conduit Smith, of this city, is the head, has been formed to build the Southern Georgia and Florida Railroad, from Macon to Jacksonville via Dupont. It will be 161 miles long and will cost $2,500,000.

THE contract for the construction of the extension of the Missouri Pacific Railroad from Atchison, Kansas, to Hiawatha, Brown County, has been let to Bagnell & Co. The contract provides for the completion of the road by the 1st of June next.

TRACK laying was commenced at Pensacola, Florida, on the Pensacola and Atlantic Railroad on the 16th inst. The road is to connect East and West Florida, and the managers say it will be completed to a connection with the Jacksonville Railroad during the year.

A DISPATCH from Guaymas, Mexico, dated November 12th, says that Chief Engineer L. Zamora has accepted the railroad to Hermosillo, and rails and ties are going forward for the construction of the road via Magdalene, which point the company will reach by Dec. 15.

IT is expected that, should an open winter ensue, the extension of the Shenandoah Valley Railroad from Waynesboro to Roanoke, Va., will be completed by February, 1882, and that by the end of March trains will be running through to a connection with the Norfolk and Western Railroad at Roanoke.

THE New York, New Haven and Hartford Railroad Company has decided to add two tracks to its road between this city and Stanford, Connecticut, making four tracks in all. Work will be begun at once.

SURVEYS for the Lake George and Lake Champlain Railroad are completed, and it is estimated that it will cost $50,000 to grade and construct it. It is to start from the Central Vermont Road at Addison Junction.

THE people of Woodstown, N. J., have succeeded in raising the $40,000 demanded by the West Jersey Railroad Company for the building of a branch road connecting them with the Salem branch. The right of way has been secured from Swedesboro, and it is supposed the branch will be speedily finished.

THE Evansville Courier says that the Indianapolis and Evansville Straight Line Railroad between Evansville and the Ohio and Mississippi Railway will be completed in two weeks, and the bridges in three weeks. Laying iron from Evansville will commence at an early day. Over thirty car loads of steel rails are now at Evansville for this purpose.

IT is stated that the Union Pacific Railway Company has completed the survey for a branch of the Utah Northern from Dillon to the Yellowstone National Park, by way of Virginia City, Montana. The road, like the Utah Northern, will be narrow gauge; maximum grade, 160 feet, and 130 miles in length. The construction will not begin till next year.

IT is expected that, should the weather prove favorable, the Baltimore and Delta Narrow Gauge Railroad will be completed to Towsontown by Christmas, and the cars running between that point and Baltimore. The distance between the Baltimore terminus and Towsontown on the line of the road is 7¼ miles, and but three miles of track remain to be laid, the grading being nearly finished, and all the necessary material to lay the track as far as Towsontown on hand.

THE construction of the Louisville, New Albany and St. Louis Railroad is progressing vigorously. The great tunnel in Edwardsville, about six miles west of New Albany, and about a mile long, will shortly be completed. By Dec. 1 the line will be completed from Edwardsville to Mt. Vernon, Ill., on the line of the Louisville and Nashville, making direct connection, via Huntingburg and Princeton, Ind., with St. Louis. The Louisville section will be in operation some time during the early spring.

THE Austin and Northwestern Railway Company of Texas have perfected a contract with the Dubuque (Iowa) Internal Improvement Company to complete its entire line of road. Of this company H. W. McNeill is president, J. K. Graves secretary and treasurer, and J. A. Rhomberg general superintendent. All of these gentlemen are citizens of Dubuque and are said

to have all the capital required to carry out their contract.

THE survey of the proposed new railway from Danby, Vt., to Whitehall, N. Y., was commenced on the 14th inst. The road, it is stated, will be extended to Sackett's Harbor, on Lake Ontario, and if built will form another line via the Bennington and Rutland Railroad between Chicago and Boston, connecting with the Hoosac Tunnel route at the Hoosac Junction by an extension road, 18 miles long, to North Adams, Mass.

INCORPORATION.

ARTICLES of incorporation of the Cincinnati, Shawnee and Wheeling Railway Company were filed with the Secretary of State of Ohio on the 14th inst. The capital stock of the company is fixed at $3,000,000 in shares of $100 each, and the incorporators are: Jonas M. McCune, of Columbus; Wm. C. Maholm, of Newark; Levi J. Burgess, of Logan, and L. M. Lawson and David R. Sickels, of New York. The purpose of this incorporation is to construct and operate a line of railroad from Cincinnati to Wheeling. It is estimated that the length of the entire road will not exceed 220 miles.

THE Canal Dover and Cleveland Railroad Company has been incorporated at Columbus, Ohio, with a capital of $750,000, in shares of $100 each. The road will run from Canal Dover, Tuscarawas county, to Cleveland, passing through the counties of Tuscarawas, Stark, Summit and Cuyahoga. It is the virtual building over of the old line of railway from Canal Dover to Canton, on account of not being able to come to terms with existing lines.

THE charter of the Galveston and Rio Grande Railway Company, which was filed at Austin, Texas, on the 8th inst., provides for a line through the counties of Galveston, Brazoria, Matagorda, Jackson, Victoria, Duval and Encinal to Laredo, Webb County; also a branch from a point on the main line in Live Oak County through Duval County to Rio Grande City in Starr County. The total mileage is about 500. The principal business office is to be located at Galveston. The capital stock is $12,500,000.

CHARTERS have been taken out in Maryland, West Virginia and Ohio for a railroad from Baltimore to Cincinnati, midway between the Baltimore and Ohio and Chesapeake and Ohio Railroads, a distance of 601 miles. A construction company has been formed under the laws of New Jersey, with a capital of $10,000,000.

ARTICLES of incorporation of the Chicago and Northern Railway Company were filed at Springfield, Ills., on the 14th inst. The object of the company is to construct a road from some convenient point in the city of Chicago through the counties of Cook and Lake to the northern boundary line of the State of Illinois to some convenient point in the county of Lake. The capital stock of the company is $1,000,000, and the incorporators and first board of directors are John W. Ulm, M. C. Springer, George M. Sargeant, H. H. C. Miller, all of Cook county, and Frank P. Hawkins of Lake county.

ARTICLES of incorporation have been filed in the office of the Secretary of State of Illinois for the Chicago and Southeastern Railway Company, with a capital stock of $700,000, to construct a railroad from a point in Cook County to a point on the Indiana State line in the county of Kankakee or Iroquois, passing through Will County. The incorporators are John L. Beveridge, Eugene Ellery, David B. Dewey, Alexander Schrader and Robert B. Kendall.

AT a recent meeting at Marshalltown, Iowa, of the directors of the Central Iowa Railway Company the articles of incorporation were amended as follows: First—The object of the corporation shall also be to construct, acquire and operate branches in connection with the main line. Second—The capital stock is increased by $6,000,000. Third—The indebtedness is not to exceed two-thirds of the capital stock.

A CERTIFICATE of incorporation of the Baltimore Union Passenger Railway Co, has been filed at the executive department, with the following incorporators: Osmun Latrobe, Jos. Sloan, Jr., John K. Cowan, E. J. D. Cross and Hugh L. Bond, Jr. The termini of the proposed road in Baltimore are at Conway street, where it intersects the westernmost line of Light street, and at Brunswick street, where the same intersects the centre line of Wilkens avenue. The capital stock is $250,000, of 5,000 shares at $50 per share.

A CHARTER has been granted at Harrisburg, Penn., to the Mutual Mining and Manufacturing Company of Greensburg, Westmoreland county. The company is organized for the purpose of mining coal, manufacturing coke, boring for oil, etc. The directors are Richard Coulter, A. W. Logan, William A. Huff, B. S. Jamison and George F. Huff.

ARTICLES of incorporation of the Louisville, New Albany and Jeffersonville Belt Railroad Company were filed at Indianapolis, Ind., on the 12th inst. The proposition is to build a belt road round the Ohio falls connecting the cities of New Albany, Jeffersonville, Portland and Louisville. The capital stock is $1,000,000.

ORGANIZATION.

THE directors of the New Haven and Derby Railroad Company, elected on the 15th inst., are: J. N. Bartholomew, Charles L. English, N. S. Dawson, E. N. Shelton, G. P. Cowles, Thomas Wallace, N. D. Sherry, Isaac Anderson, Joel A. Sperry, G. W. Shelton, M. F. Tyler, F. Farrell, Charles Atwater.

THE stockholders of the Memphis and Charleston Railroad Company have unanimously elected the following board of directors: V. K. Stevenson, John L. Cadwalader, Chas. Y. Swan, Daniel L. Evans, New York; W. R. Rison, Huntsville; W. M. Farrington, J. A. Hayes, Jr., R. D. Trayser, Memphis; G. M. Fogg, Wm. Duncan, James D. Porter, Jere Baxter, Nashville, Tennessee; C. H. Phinizey, Augusta, Georgia. The directors elected V. K. Stevenson, president; Jere Baxter, vice president.

AT the annual meeting of the stockholders of the European and North American Railroad Company, held at Bangor, Me., on the 16th inst., the following board of directors was elected: Noah Woods, N. C. Ayer, T. J. Stewart, S. H. Blake, F. A. Wilson, Charles P. Stetson, H. N. Fairbanks, Sprague Adams and John S. Ricker. Noah Woods was elected president and treasurer and J. F. Leavitt clerk. F. W. Cram was appointed superintendent and J. F. Leavitt, general ticket agent.

AT the annual meeting of the stockholders of the Boston and Providence Railroad Company, held in Boston on the 16th inst., the following directors were unanimously re-elected: Henry A. Whitney, Thomas P. I. Goddard, J. Huntington Wolcott, William R. Robeson, Francis M. Wild, Joseph W. Balch, Royal C. Taft. At a meeting of the directors, Henry A. Whitney was re-elected president, B. B. Torrey, treasurer, Winslow Warren, clerk, and A. A. Folsom, superintendent.

THE directors of the Lynn and Boston Railroad Company, elected on the 9th inst., are: Amos F. Breed, Asa A. Breed and Philip A. Chase of Lynn, Isaac Stebbins and William R. Pearmain of Chelsea, William Sprague, John Reed, Thomas P. Proctor and E. Francis Oliver of Boston, and George W. W. Dove of Andover.

THE directors of the Monadnock Railroad Company, elected at a meeting of the stockholders held at Peterboro, N. H., on the 15th inst., are: John H. Fairbanks, Peter Upton, Oscar H. Bradley, Henry K. French, Willis Phelps, James S. Rumrill, William G. Livingston. Subsequently H. K. French was elected President and W. G. Livingston Clerk and Treasurer.

AT the regular annual meeting of the stockholders of the Baltimore and Ohio Railroad Company, held on the 21st inst., the following board of directors were elected: William F. Burns, Robert Garrett, John Spear Nicholas, John Gregg, William W. Taylor, Samuel Kirby, James Carey Coale, G. A. Von Lingen, Decatur H. Miller, Joshua G. Harvey, George W. Dobbin, and Henry Smith.

THE directors of the Old Colony Railroad Company elected at a meeting of stockholders held at Middleboro, Mass., on the 22d inst., are: Charles F. Choate, Cambridge; Frederick A. Ames, Easton; Thomas J. Borden, Fall River; John E. S. Brayton, Fall River; Samuel C. Cobb, Boston; Uriel Crocker, Boston; Samuel L. Crocker, Taunton; Francis C. Hayes, Boston; George Marston, New Bedford; John J. Russell, Plymouth; Royal W. Turner, Randolph; Elisha W. Willard, Newport.

We have been requested by Allen Middleton, President of the Continuous Draw Bar Co., whose principal office is at 945 Ridge Avenue, Philadelphia, to state that they have purchased the "Salvater Draw Bar," and now own the Middleton's two patents, D. Hoits, Caum, and Patterson and Griffith's patents, giving them the control of the legitimate Draw Bars of the United States.

THE contract for grading, bridging and piling that portion of the Duluth and Winnipeg Railroad, extending from Duluth to the Mississippi, about 150 miles in length, has been let to E. C. Davis & Co., of Boston. Work is to be commenced at once.

THE Rhinebeck and Connecticut Railroad was sold on the 9th inst. under a mortgage foreclosure at auction to Thomas Cornell, of Kingston, N. Y.

Statement of the Public Debt of the United States, November 1, 1881.

Interest paid by the United States, $51,467,272 02; interest repaid by transportation of mails, &c., $14,662,-941 06; interest repaid by cash payments: 5 per cent. net earnings, $655,198 87; balance of interest paid by United States, $36,149,132 09.

The foregoing is a correct statement of the public debt, as appears from the books and Treasurer's returns in the Department at the close of business, October 31, 1881.

H. F. FRENCH,
Acting Secretary of the Treasury.

Interlocking Switches.

Mr. Jay Gould, upon being elected President of the Manhattan Railway Co., began to consider how the rapid-transit system could be improved. He reported to the Board of Directors that he had found that by means of interlocking switches trains could be run to and from the City Hall and South Ferry stations by the Second and Third avenue roads without transfer of passengers at Chatham Square. In view of the grratly increased comfort and convenience and saving of time which such a change would result in to passengers, he had ordered the improvement to be made without delay. To better accommodate the increasing travel, he had ordered the building of five new stations on the Second avenue line—at Seventieth, Eightieth, Ninety-second, One Hundred and Fifth, and One Hundred and Fifteenth streets, and of three new stations on the Sixth avenue line, namely, at Eighteenth, Twenty-eighth, and Forty-seventh streets.

"It is impossible for an accident to occur here," said Stephen Dodds, the switchman in charge of the tower at the City Hall station, in explaining the system of interlocking switches, "unless the engineer of a train runs by a danger signal. Now all the switches are locked, and I can't change one of them unless I begin by dropping that danger signal." To prove this Dodds tugged vigorously at the upright levers, but did not succeed in budging one of them. Then the incoming train that was expected arrived, and Dodds, dropping the red disk to keep other trains from entering the depot, was able to throw one lever after another till the track was ready for the outgoing train. Last of all, the red disk which held this train was raised, and the train drew slowly out. For each train from five to twelve changes are made in the switches and signals, and in the eight hours he is on duty the switchman at this point throws the levers four or five thousand times. "When the trains are running on two minutes' headway," said Dodds, "one passes here every half minute, and we are kept so busy that to look up here you would think a prize-fight was going on."

The levers are thrown in the same order for every fourth train, and consequently the switchman does the work intuitively after a short experience, as a pianist plays a familiar air. The interlocking system makes it impossible to throw the wrong lever.

The levers are nine in a row in the top room of the little iron tower at the entrance to the City Hall station of the elevated railroad. Three are for raising or dropping the three red signal disks, three are for changing the switches, and the remaining three for locking them after they have been put in position. One signal is beside the track for incoming trains north of the tower; when the disk is down, incoming trains are stopped till the switchman, by raising it, shows that the switches are in position and the track clear. The other two signals are in front of the starting points, and until they are raised the trains cannot start. Two of the three switch-levers move two switches each, while the third moves one. Each of the three is connected with one or more of the green-armed and green-lighted semaphores which show whether the track is straight or whether switches are to be crossed. The switches, once in position, are locked from the tower by means of the remaining three levers, and as an additional precaution against the occurrence of accidents through the over hasty change of switches, long strips of iron, known as protecting-bars, are laid along the switches, and while they are pressed down by the flanges of the wheels of a passing train, it is impossible for the switchman to unlock or change a switch.

The great safeguard of the system lies in the interlocking of the signals and switches, which renders it impossible for any lever to be moved at the wrong time. Each lever is connected at the lower end with an iron plate in which are six slots. Above and beneath the plates and parallel to the row of levers are six steel bars, each one of which is connected with one of the locking or switch levers, and which have clamped on them at intervals steel dogs. When a lever is thrown, the bar is moved backwards or forwards. The dogs are brought by the motion either over the slots or the edge of the plate of

some other lever. If the dog is over the slot, it passes through and the lever can be moved, but if it touches the plate the lever is held immovable. The levers are all made interdependent in this way. The dogs are placed at such intervals and the bars in such a mannar that until the proper lever is thrown no other can be moved. Consequently, if the signals are regarded by the engineers, only one train can be moved at a time. To enable a second to move it would be necessary, for example, to raise a signal disk. This is interlocked with a switch, which is held immovable by the locking lever, and this locking lever cannot be unlocked while the first train is passing over the switch, in consequence of the action of the protecting-bar. Perhaps the best proof of the excellence of the systsm is the fact that accidents do not occur at the City Hall station, although trains pass the tower at the rate of one every half minute during the commission hours. Sometimes they are even more frequent.

The switch-room is in charge of one man, who at night and in foggy weather has a flagman with him, ready with lighted lanterns to go along the track to warn trains, if that should be thought necessary. A switchman is on duty in the tower at all hours of the day and night, so that the City Hall terminus of the road could be used if anything should occur to prevent the running of trains to the South Ferry. Train despatcher Gilroy said that to run trains according to the new plan a signal tower would be needed at Chatham Square like that at the City Hall. Switches and signals would be arranged on the interlocking plan, and while one train was passing, all others approaching Chatham Square would be stopped by signals, which would be set by the action of the switchman in signalling the first train to go on.

PERSONAL.

J. P. Brinton has been re-elected President of the Richmond, Fredericksburg and Potomac Railroad Company.

The officers of the Baltimore and Catonsville Railway Company, elected on the 19th inst., are: President, John C. Holland; treasurer, Herman H. Graue; secretary, Wm. W. Orndorff; ticket agent, F. Megenhardt.

The Executive Committee of the Western Union Telegraph Co. have appointed Cyrus W. Field and E. D. Morgan a committee to arrange with J. S. Morgan & Co., of London, for the transfer of stock and payment of dividends there, and for the placing the stock on the London Stock Exchange.

A. A. Hobart, formerly Superintendent of the Boson and Lowell Railroad, has been appointed Superintendent of the Chicago division of the Wabash, St. Louis, and Pacific Railway.

D. C. Law has been appointed Superintendent of the Western division, Pittsburg, Fort Wayne and Chicago Railway, in place of C. D. Gorham, resigned, and Mr. Joseph Wood, Superintendent of Motive Power, with his office at Fort Wayne, Indiana.

Captain R. P. Rifenberick has been appointed Superintendent of Construction of the Ohio River extension of the Ohio Central Railroad from Corning to Point Pleasant, West Virginia, where it will connect with the Richmond and Alleganey Railroad.

The officers of the Naugatuck Railroad Company, recently elected, are: E. F. Bishop, President; Horace Nichols, Secretary and Treasurer; George W. Beach, Superintendent.

Samuel Spencer has been elected President and Edward W. Mealey Secretary and Treasurer of the Washington County Branch of the Baltimore and Ohio Railroad.

Alfred C. Harvey, of St. Johnsbury, Vt., has received the appointment of traveling agent for New England of the Union Pacific Railroad.

The officers of the Hannibal and St. Joseph Railroad Company, elected on the 17th inst., are: President, William Dowd, of New York; Vice-President, John R. Duff, of Boston; Secretary, John A. Hilton, of New York; Treasurer, Walter J. Hilton, of Hannibal, Mo.

Hon. R. R. Bridgers has been unanimously re-elected President of the Wilmington and Weldon and Wilmington, Columbia and Augusta Railroad Company.

Commerce of New York.

The foreign imports at New York for the month of October were:

	1879.	1880.	1881.
Ent. for cons.....	$16,262,046	$15,544,936	$19,940,594

United R. R. of New Jersey	36,609	1,350,875	936,105
Pennsylvania Coal.....	36,652	1,220,230	969,471
Delaware and Hudson Canal	86,049	3,099,828	2,594,370
Huntingdon and Broad Top Mountain.....	10,996	457,397	378,899
Penn. and New York.....	38,137	1,437,851	1,073,228
Clearfield, Pa	57,413	2,075,744	1,462,361

The total tonnage of anthracite coal from all the regions for the week ending Nov. 12, as reported by the several carrying companies, amounted to 677,373 tons, against 635,867 tons in the corresponding week last year, an increase of 41,506 tons. The total amount of anthracite mined for the year is 24,431,830 tons, against 20,332,392 tons for the same period last year, an increase of 4,099,438 tons. The quantity of bituminous coal sent to market for the week amounted to 107,666 tons, against 91,774 tons in the corresponding week of last year, an increase of 15,892 tons. The total amount of bituminous mined for the year is 4,287,746 tons, against 3,739,728 tons for the corresponding period last year, an increase of 548,018 tons. The total tonnage of all kinds of coal for the week is 785,039 tons, against 727,641 tons in corresponding week last year, an increase of 57,398 tons, and the total tonnage for the coal year is 28,749,576 tons, against 24,072,120 tons, same date last year, an increase of 4,647,456 tons. The quantity of coal and coke carried over the Pennsylvania Railroad for the week ending November 12 was 196,524 tons, of which 150,229 tons were coal and 46,295 tons coke. The total tonnage for the year thus far has been 7,845,240 tons, of which 5,783,957 tons were coal and 2,061,283 tons coke. These figures embrace all the coal and coke carried over the road east and west. The shipments of bituminous coal from the mines of the Cumberland coal region during the week ended November 12 have not yet been reported. The Reading Railroad shipment for last week, ending November 19 was, 191,000 tons, of which 43,000 tons were sent to and 44,700 tons shipped from Port Richmond, and 19,000 tons sent to and 17,500 tons shipped from Elizabethport.—*Phil. Ledger, Nov.* 21.

CONSOLIDATION.

At a meeting of the Allegany Central Railroad Company, held at the office of the company, 34 Pine street, this city, on the 18th inst., articles of agreement and consolidation with the Olean Railroad Company and the Friendship Railroad Company were unanimously adopted. The lines of the Consolidated Allegany Central Railroad Company extends from Olean, New York, to Swains, New York, on the Buffalo division of the New York, Lake Erie and Western Railroad, a distance of sixty-one miles. Some thirty miles of the road are completed.

An extensive scheme of railway amalgamation is on the tapis in Canada. The companies which it is proposed to unite are the Midland, the Victoria, the Toronto and Nipissing, the Whitby, Port Perry and Lindsay, the Grand Junction and the projected Toronto and Ottawa.

New York Stock Exchange.

AMERICAN RAILROAD JOURNAL.

Financial and Commercial Review.

WEDNESDAY EVENING, Nov. 23, 1881.

THE quotation for call loans during the day has been 6 per cent to that rate plus a commission of 1-64 of 1 per cent per day until the last half-hour, when the rate fell at the Stock Exchange to 2 per cent.

The posted rates for prime bankers' sterling was 4.80@4.84 and 4.80½@4.84½. The actual rates were 4.79½@4.80 and 4.83½@4.84, with cables 4.84¼@¾ and prime commercial bills 4.77½@4.78. The actual rates for continental bills are as follows: francs, 5.26¾@5.25⅝ and 5.21¼@5.20⅝; marks, 93⅞@94⅛ and 94⅝@⅞: and guilders, 39⅝ and 40.

We give in another column a statement of the Commerce of New York for the month of October, and for the two months ending October 31, compared with the month and ten months of the two preceding years. It will be seen that the cash duties, (which are collected only upon the dutiable goods thrown on the market) amounted in October to $13,011,427.27, of which $7,881,019.36, or about 39¾ per cent, were collected on $19,940,594 of dutiable goods entered directly for consumption, and $5,130,406.91, or about 52¼ per cent, on $9,831,590 withdrawn from bonded warehouse.

The report of the Philadelphia and Reading Companies for the month of October shows that the total gross receipts by the railroad company were $1,989,947.97; expenses, excluding rentals and interest, $1,104,116.19—profit $885,831.78. Gross receipts of coal and iron company, $1,441,673.57; expenses, excluding interest, $1,295,239.57—profit, $146,434. Profit of both companies for the year to October 31, $9,095,942.94, being an increase of $1,059,382.12 as compared with the corresponding period of last year. The profit of the coal and iron company for the year to October 31 was $971,262.74, an increase of $591,307.10 as compared with the corresponding period of last year.

The Treasurer of the State of North Carolina reports that over $8,000,000 of the old bonds of that State have been funded into new four per cents under the Compromise act of March, 1879. The time within which the act operates is now growing to a close, and all operations of exchange will cease January 1st. There are about $4,000,000 of the old debt still unpresented, the holders not having availed themselves of the act.

The total receipts into the Pennsylvania State Treasury during the fiscal year ending November 15th (including $1,235,891.50 balance from the previous years were $7,241,474.28, and the expenditures $6,740,053.17, leaving balance of cash on hand, $501,421.11, viz: to credit of revenue fund, $254,513.33; sinking fund, $208,265.59; school fund, $38,642.19.

A comprehensive summary is given on another page of the three lectures recently delivered in Baltimore by Hon. John Jay Knox, Comptroller of the Currency, on the subject of Banks and Banking in the United States, in which he is reported to have said that the rapid reduction in the interest of the public debt at the present time indicates hereafter a gradual reduction in the circulation of banks; but even if the public debt should be rapidly paid, the national banking system need not be dissolved, for under the present laws the minimum amount of United States bonds required to be kept on deposit in the treasury by banks as security for their circulation is considerably less than one hundred million dollars.

The stockholders of the Old Colony Railroad Company, at their meeting on the 22d inst., voted to authorize the directors to issue notes to run not more than one year and not to exceed $500,000; also, to extend a road from Weir Junction to some place on the main line in Raynham.

The Supreme Court of the United States at Washington has decided, in the case of the Nevada Bank of San Francisco vs. John Sedgewick, that the capital of a State bank "invested abroad and in foreign countries" can be taxed by the United States.

There are now outstanding $2,200,000 in United States 6 per cent bonds, series of 1880 and 1881, which have matured. The 104th call matured October 1, but quite a large amount of the bonds embraced therein is still outstanding. Of the bonds embraced in the 105th call, which matures on December 24 next, there are more than $9,500,000 outstanding. These bonds are payable at par and accrued interest on presentation.

The closing quotations on Wednesday were: American District Telegraph, 50@52; Adams Express, 143@145; American Express, 95@97; Chicago, Burlington and Quincy, 138½@139; Canada Southern, 60½@60⅝; Chicago and Northwestern, 126@126¼; do. pref., 139@139½; Chicago and Alton, 131½@131½; Central of New Jersey, 92⅞@93; Chicago, Rock Island, and Pacific, 133½@134; Central Pacific, 93½@93⅝; Chicago, Milwaukee and St. Paul, 106½@106¾; do. pref., —@121½; Cleveland, Columbus, Cincinnati and Indianapolis, 90⅝@91; Columbus, Chicago and Indiana Central, 19½@19⅞; Delaware and Hudson Canal, 108⅛@108½; Delaware, Lackawanna and Western, 124¾@125; Hannibal and St. Joseph, 94⅜@94⅝; do. pref., 108⅜@109¼; Illinois Central, 131@132½; Lake Erie and Western, 42@43½; Lake Shore and Michigan Southern, 119½@119⅝; Metropolitan Elevated, 94½@95; Manhattan Elevated, 58½@58⅝; Michigan Central, 90½@90⅞; New York Elevated, 107@107¾; New York, Lake Erie and Western, 45@45⅝; do. pref., 92½@92½; New York Central and Hudson River, 136¾@137; Ohio and Mississippi, 40¼@40⅜; Ohio Southern, 23@23½; Ohio Central, 25½@25½; Panama, 195@200; Pacific Mail, 43¾@44; Union Pacific, 117⅛@117¾; United States Express, 76½@78; Western Union Telegraph, 84½@85; Wabash, St. Louis and Pacific, 44¼@44⅝; do. pref., 84@84⅛; Wells-Fargo Express, 134@135.

Cincinnati Iron Market.

OFFICE OF E. L. HARPER & CO.
Cincinnati, Nov. 22, 1881.

There is no material change in the tone of the market since our last report. Nearly all grades of Foundry and Forge Iron are very light, and prices are firm at quotations given below. The mills are all running full, and report plenty of orders for unmanufactured Iron. We quote as follows:

	No.		Mos
FOUNDRY.			
Hanging Rock Charcoal	1	29 00@30 00	4
Strong Neutral Coke	1	26 00@27 00	4
American Scotch	1	25 00@26 50	4
GREY FORGE.			
Neutral Coke	2	23 50@24 50	4
Cold Short	2	22 50@23 50	4
CAR WHEEL AND MALLEABLE.			
Hanging Rock Cold Blast	3	36 00@38 00	4
" Warm Blast	3	30 00@32 00	4
Lake Superior 1 and 2	3	32 00@33 00	4
Lake Superior 3 to 6	3	34 00@36 00	4
Southern Car Wheel	3	34 00@35 00	4

Anthracite Coal Tonnage.

THE production of anthracite coal during the month of October is officially reported as 2,686,053 tons, being an increase of 307,243 tons as compared with the same month last year.

Of that amount the Philadelphia & Reading carried 678,051 ; the Lehigh Valley, 549,562 ; the Central of New Jersey, 379,676 ; the Delaware, Lackawanna & Western, 411,266 ; the Delaware & Hudson Canal, 290,077 ; the Pennsylvania Railroad, 198,407 ; the Pennsylvania Coal Company, 144,878, and the New York L. E. and Western, 34,133 tons.

The total production of the year to November 1st, was 23,047,417 tons, an increase of 1,981,697 tons, as compared with the corresponding period of last year.

RAILROAD EARNINGS—MONTHLY.

	January.	February.	March.	April.	May.	June.	July.	August.	September.	October.	November.	December.	Total.

The Waterways of New York.

A LECTURE was delivered on the 25th ult. at Chickering Hall, this city, before the American Geographical and Statistical Society, by Dr. Isaac I. Hayes, on "The Waterways of New York considered in Relation to the Transportation Interests of the State and the Commerce of the City."

The first point made by the lecturer was that the drift of commerce has in all ages been along the great waterways. The products of any region naturally were drawn out by way of the river that flowed through it, and large cities sprang up along its course. The Indus, the Euphrates, the Ganges and the great rivers of China, that support a population of 400,000,000 souls, were cited in this connection. There was one notable instance in history of the course of traffic crossing the natural channels of trade as it does in this country to-day. The instance referred to was the manner in which the Phœnicians pulled out the products of Asia by means of caravans traveling west, crossing the Euphrates and Tigris at right angles, and thus reaching the great cities, of which Tyre was the principal, and being shipped to Carthage, founded by these enterprising Phœnician traders. But the great natural law asserted itself in time. When the Arabian merchants crept round into the Persian Gulf and took the produce on board their proas up through the Red Sea to the Isthmus of Suez, the caravans were abandoned, the great cities built up through their traffic fell into decay, and a new series of commercial cities, with Alexandria at their head, grew up along the shores of the Mediterranean. Thus it appeared that the boy who asked his father why rivers always flowed past great cities opened up a very important truth. The most surprising example of the course of traffic running across the natural waterways was presented by the United States. The grain and other products of the vast region known as the Valley of the Mississippi, 924,000 square miles in extent, were being drawn eastward to New York instead of going down the Missouri or the Mississippi, as it might be expected to. New York was an artificial city — commercially speaking — and owed its commercial supremacy to the Erie Canal.

After a rapid survey of the construction of the Erie Canal, the lecturer described the villages that sprang up along its banks, and which, within the memory of a single generation, have grown to be the great cities of the Empire State. As these towns grew in importance, short railroads were built connecting one with another to take the traffic that overflowed from the canal, and to carry freight in winter when that was frozen. Running parallel with the canal, and owing their existence to it, these lines grew into the New York Central and Hudson River railroads of to-day; and if the Erie Canal were to be closed, the freight now carried by that road would be driven from our State into Pennsylvania, which had shorter routes to Chicago and could carry cheaper. The Erie Canal had passed through three distinct stages, the first being from the date of its completion until 1835, during which period it was only 4½ feet deep, intended to float vessels of 75 tons only; the second embracing the time from the year named until 1862, during which it was 7½ feet deep and 40 feet wide; the third stage, already partly entered upon, was the making of the canals free; and the fourth stage, yet in the future, would see them free ship canals, accommodating vessels of the largest tonnage. When the lecturer introduced in the State Legislature in 1878 resolutions looking to making the canals free, he was laughed at by everybody. However, he introduced them again unsuccessfully in 1879–80, and again last winter, when they passed both houses. As making them free necessitated an amendment of the constitution of the State, the question had to go before the people, and the fact that both the Republican and Democratic parties made "free canals" a plank in their platforms, the lecturer regarded as very complimentary to himself. "I think I might say at the risk of being thought conceited," he remarked, "that in the matter I have not only accomplished a purpose, but I have created a State policy.

Dr. Hayes argued that the recent improvement of the Mississippi by Captain Eads, which permits ships drawing thirty feet of water to enter the port of New Orleans, and the movement of grain down the river to that city in barges, for shipment thence direct to Europe, are indications that the products of the great wheat growing regions may follow the natural drainage, and that unless New York makes every effort to encourage commerce her supremacy will become a thing of the past. It was of vital importance to deepen and widen our canals to accommodate ships. In this connection he showed what would follow the completion of the Welland Canal. He deplored the lack of dock and warehouse facilities here. In London or Liverpool a vessel, after discharging her cargo, could be loaded with anything whatever in forty-eight hours direct from the warehouses lining the great docks. In New York a shipmaster had to run all over the city to get an assorted cargo. Boston had her Commercial wharf and her India wharf. Other Eastern cities had facilities. New York had none. Besides, the harbor fees and various other charges were too heavy, and tended to discourage owners of vessels from coming here. The lecturer in closing reflected somewhat upon the alleged lack of public spirit shown by the merchants of New York in grave matters of this kind. West street, he thought, should be lined with warehouses, and the street cars there should be replaced by a steam road connecting the various wharves. It too frequently happens that attention was devoted to trivial things which should be given to these important questions.

Railroads from the West to the Seaboard.

THERE are now being constructed east of Chicago six distinct sections of railroad under different organizations, which, when completed, are to form parts of new trunk lines between the West and the Atlantic. These, says the Commercial and Financial Chronicle, are already so far advanced that three of them will probably be completed and in operation during 1882, and all of them within two years from the first of January next. Three more termini will thus be made on the Jersey side of the Hudson river opposite New York City, doubtless with grain elevators and other facilities for the delievery of grain, provisions, cattle, &c., directly on vessels for Europe. These termini, all new for the above purposes, will be those of the New York, West Shore and Buffalo, near the end of their tunnel at Weehawken; the Delaware, Lackawanna and Western terminus at Hoboken, used hitherto only for their coal and passenger business, and the Central of New Jersey termini at Jersey City and Bergen Point, used heretofore for their passenger and coal traffic. Comparing the respective mileage of all the roads then to be worked, there should be the following:

From Chicago to Buffalo—Lake Shore and Michigan Southern, 540 miles; Michigan Central, via Detroit and the Canada Southern, 540 miles; Chicago and Grand Trunk with Grand Trunk of Canada, 531 miles; New York,

Chicago and St. Louis (approximate), 520 miles.

From Buffalo to New York—New York Central and Hudson, 440 miles; New York, West Shore and Buffalo (approximate), 425 miles; New York, Lake Erie and Western, 422 miles; New York, Lackawanna and Western with Delaware Lackawanna and Western (approximate), 415 miles.

From Buffalo to Boston—New York Central and Hudson with Boston and Albany, 500 miles; Boston, Hoosac Tunnel and Western with Fitchburg Railroad (approximate), 490 miles.

From Chicago to New York—Lake Shore and Michigan Southern with New York Central and Hudson, 980 miles; Michigan Central with Canada Southern and the New York Central and Hudson, 980 miles; New York, Chicago and St. Louis with New York, Lackawanna and Western (approximate), 935 miles; New York Chicago and St. Louis with New York, West Shore and Baltimore (approximate), 945 miles; Chicago and Atlantic with New York, Pennsylvania and Ohio, and New York, Lake Erie and Western, 974 miles; Chicago and Atlantic with New York, Pittsburg and Chicago and Central of New Jersey, 887 miles; Pittsburg, Fort Wayne and Chicago with Pennsylvania and leased lines, 912 miles,

The Baltimore and Ohio has its trains in and out of New York over the Pennsylvania Road on a traffic contract, and probably by 1884 will have secured other arrangements.

Enumerating the several lines according to their location, there is (1) the New York, Chicago and St. Louis, stretching from Chicago to Cleveland and thence to Buffalo; (2) the Chicago and Atlantic, from Chicago to Marion, Ohio, connecting there with the New York, Pennsylvania and Ohio; (3) the Boston, Hoosac Tunnel and Western, from Buffalo to Schenectady and thence to the Hoosac Tunnel; (4) the New York, West Shore and Buffalo, from Buffalo to Schenectady and thence to Weehawken; (5) the New York, Lackawanna and Western, from Buffalo to Binghampton, connecting with the Delaware, Lackawanna and Western; (6) the New York, Pittsburg and Chicago, from Marion, Ohio, to Wampum, Pa., and thence to Red Rank, connecting there with the Central of New Jersey system to New York. So far as yet known there has been no combination between any of the companies constructing the above-named roads. Only one of the new lines is a direct road from Chicago to Buffalo, but three of them run from Buffalo eastward.

The capital already raised, or definitely subscribed, for these six lines can hardly be less than $65,000,000, and yet it is a singular fact that there has been put on the market openly advertised for public subscription only $6,000,000 of bonds—those of the Chicago and Atlantic Road, which is built under the auspices of Erie as a Western connection. All the capital for the other roads has been raised by private subscriptions of capitalists, or, what amounts to about the same thing, through the intervention of construction companies, which take the securities of the respective roads that they are building.

What will be the trunk-line facilities on the first day of January, 1884, if all these roads are completed and in operation? There will be two important roads, under strong managements, added to the eastward lines from Chicago—the New York, St. Louis and Chicago, and the Chicago and Atlantic; three new lines will be added to the roads east of Buffalo—the Boston, Hoosac Tunnel and Western; the New York, West Shore and Buffalo, and the New York, Lackawanna and Western; one new line will be formed running from Marion, Ohio, to Red Bank, Pa.—the New York, Pittsburg and Chicago—connecting with the Central of New Jersey and its leased lines; three new termini for Western freights will be made on the Jersey shore, opposite New York City.

The Texas and Pacific and Southern Pacific Railroads.

The agreement in regard to the settlement of the disputes between the Texas and Pacific and Southern Pacific Railroad companies, and for the interchange of traffic and facilities, made between C. P. Huntington on one side, representing the Southern Pacific and the Galveston, Harrisburg and San Antonio Railroads, and their connections eastward as far as New Orleans, and Jay Gould on the other side, representing the Texas and Pacific, including its New Orleans connection, the St. Louis, Iron Mountain and Southern, the International and Great Northern, the Missouri, Kansas and Texas, and the Missouri Pacific railroad companies, was signed on the 26th ult. It provides that the tracks of the two systems shall be joined when they meet 100 miles or thereabouts east of El Paso, and both parties are to use the portion between the Junction and El Paso on equal terms, the Texas and Pacific reserving the right to run its own trains into El Paso on paying half cost of maintenance, taxes and interest on half cost of construction, $10,000 per mile. Through business is to be done on a pro rata basis by both companies, and this extends all the way to San Diego, Los Angeles and San Francisco, although the franchises of the Texas and Pacific were by its charter limited to San Diego; and the rates are to be as low between competitive points as by any of the other transcontinental routes. No discrimination is to be made by the Gould roads for or against any of the termini on the Mississippi or Gulf, either as to rates, time, or otherwise, or among the railroad lines eastward thereof, but east-bound unconsigned business for points reached by them in Northern Texas, Arkansas and Missouri is to be delivered to them at El Paso, or the Junction, as the case may be.

The agreement does not prevent or interfere with the competition of the Huntington road through Texas via San Antonio and Houston, but provides that after its completion the New Orleans and sea-borne business thereof shall be divided equally between the two lines and their connections, the Huntington road from Houston to New Orleans being accorded the privilege of using 80 to 100 miles of the Texas and Pacific nearest to New Orleans, when necessary, on the above terms.

The two systems of roads intersect and cross each other also at Houston, and between this point and Galveston they will use the Galveston road, running through trains if necessary. The through business to and from El Paso and the Pacific will be divided on the basis of one-third to the Texas and Pacific and its connections and two-thirds to the line via San Antonio, that being the shortest line.

In consideration for the privilege of using jointly the road into El Paso, and of a perpetual privilege into Los Angeles and San Francisco, as well as San Diego, equal to the most favored, the Texas and Pacific has relinquished its claim to the land-grant, right of way and franchises west of El Paso to the Southern Pacific companies. The Texas and Pacific engages not to extend its road west of El Paso so long as the covenants with the Southern Pacific are observed, and the Southern Pacific agrees not to parallel the Texas and Pacific east of El Paso or either of the roads mentioned, in Texas, Arkansas or Missouri.

The usual provision is made for arbitration between any of the parties for the settlement of disputes, and the respective superintendents are to carry out the details of the arrangements as to interchange of traffic and the rates of compensation.

The junction with the Texas and Pacific will take place about December 1, at Sierra Blanca Springs, in Western Texas. The lower line across Texas will not be opened before June or July next. Through trains will commence running between New Orleans and El Paso, and St. Louis and El Paso, about January 1. The distance from New Orleans by either line to El Paso is nearly 1,200 miles; to Memphis about the same. From St Louis to El Paso is 150 miles further; from El Paso to San Francisco is 1,285 miles.

Ericsson's Torpedo Boat.

A trial was made on the 14th ult. in the presence of General Grant, Secretary Hunt, Chief of Engineers Loring Henderson, U. S. N., and a dozen other distinguished officers and public men, of Ericsson's new torpedo boat, the Destroyer. The novel feature of this boat is the submerged gun, which discharges a torpedo with unerring certainty through the water four hundred feet in three seconds, with twelve pounds of powder. The experiment was pronounced a success by all who witnessed it. It was the 52d time the gun had fired the projectile, and at no time since the boat has been put in working order has it failed with the same charge to throw a dummy torpedo 400 feet in three seconds or less. It was thought to be an impossibility to operate a gun constructed on such principles and with a submerged muzzle, and astonishment was depicted on every countenance when they saw the projectile rise to the surface beyond the target after having traversed the distance from the muzzle of the gun and through the netting without making even the faintest ripple on the surface. A fleet of cruisers with a couple of these destroyers on board, ready to launch at a moment's notice, could bid defiance to the most powerful iron-clad fleet in the world.

AMERICAN Railroad Journal. ESTABLISHED 1832.

PUBLISHED WEEKLY BY THE

AMERICAN RAILROAD JOURNAL CO.,

At 23 Liberty Street, New York.

Subscription, per annum, in advance..... $5 00
Foreign Subscription, including postage..... 6 00

Purchases for the AMERICAN RAILROAD JOURNAL Co. are authorized only by the written order of Geo. F. Swain, Treasurer; and the Company will not be responsible for the payment of bills unless accompanied by such order.

Subscribers are requested to report to our office any irregularity in receiving the JOURNAL.

Contributed articles relating to Railrord matters generally, Mining interests, Banking and Financial items, Agricultural development, and Manufacturing news, by those who are familiar with these subjects, are especially desired.

Payments for advertising and subscriptions should be made by check payable to order of the Treasurer.

BRANCH OFFICE:
53 Devonshire St., Boston, Mass.

Mr. FREDERIC ALGAR, Nos. 11 and 12 Clements Lane, Lombard Street, London, E. C., England, is the authorized European Agent for the JOURNAL.

New York, Saturday, December 3, 1881.

Entered at the Post Office at New York City as Second-Class Mail Matter.

RAILROAD LEGISLATION AND THE PEOPLE.

WITHIN the next few weeks the legislatures of the various States will be in session, and the usual amount of ambitious display will be made concerning the introduction of novel and original ideas, much-worn hobbies, and world-revolutionizing theories, in the form of bills, upon which the newly constituted law makers will be expected to take wise action. Prominent among these subjects to be struggled over will be an abundance of measures ostensibly recommended for the benefit of the people and for the judicious management of railroads, which institutions afford a favorite field for exhibitions of devotion to the welfare of the masses and a luminous display of legislative lights that, without this golden opportunity, might long be hidden under the merciful bushel. A plea for less legislation through less frequent sessions of the law makers is not untimely; but the cause aimed at is more deserving than the means appear to be practical. The unwise acts that have already been passed, and that have proven themselves to deserve undoing, are so numerous that as many sessions as possible are advisable just now in some of the States to undo the evils of former work. The trouble with this standpoint, however, is that each new session is more absorbed in adding to the accumulation of useless laws than in weeding them out from the statutes.

The age of progress demands from the ambitious legislator the advancement of new ideas, and the opportunity being given him, he is not loth to make the most of it. He may know nothing of railroad management or railroad needs, or how they can best serve their owners and the people, but he may think he does, and he is quite certain to have a friend among his constituents who has an idea of his own to be presented or an axe to be ground, and this friend is powerful in his influence and in his pockets.

Aside from all direct mercenary motives it must be admitted that the old prejudice and jealousy concerning strong corporations or the individual accumulation of wealth is increasing, and the tendency of this is to lead ambitious and unprincipled men to fan the flames to a more threatening glow even though their advancement be through the elements upon which the worst forms of communism are based. Overlooking the fact that the rich and the poor, the strong and the weak have rights alike that are entitled to respect and protection, they take advantage of this old-time prejudice and attack with unreasoning bitterness the rights of corporations upon whose skillful management in so many cases depend the development, the comfort, and even the honorable existence of the people, whose interests they assume to represent. This prejudice against corporations is apparent enough, and its existence is a freely admitted fact that is recognized and frequently illustrated in courts of justice. The schemers in politics know only too well how to use it for selfish purposes, and the result is seen in the attempts that are made to cripple by legislation the very institutions upon which the prosperity of the people and the strength of the nation depend.

Just and wise legislation is not opposed by worthy managers of reliable corporations. Such men are far sighted enough to see and public spirited enough to recognize that whatever benefits the country in which their property lies, and the people who use it or are employed upon it, it is for their interest to promote and encourage. It is the petty restrictions and prejudiced theories concerning the management of their property that they object to have forced upon them by those who know nothing of the numberless details and complications that skillful managers have constantly to meet and adjust, promptly and with a discretion that can be attained only by years of practical experience. How to legislate less is a subject that is entitled to a careful consideration among those who have laid out for their winter's contemplation and adjustment the problem of harmonizing the relations between the people and the railroads which serve them. The people, especially those in the great commercial centers who take an interest in local development, will become convinced after a while that their supposed representatives are not in all cases free from prejudice, and that their theories are not always backed by needed knowledge and disinterested motive. Too much clamoring in legislative halls this winter will hasten this growing conviction, and a result of it may be that the people will demand that all important enactments affecting their relations with corporations shall be submitted to a direct popular vote. There may be no safer or more satisfactory way to prevent the undue accumulation of injudicious and poorly understood laws affecting the mutual interests of the railroads and the people.

An Action for Usury will not Lie against a National Bank.

A decision has just been rendered by the United States Supreme Court in the case of the appeal of Dr. J. B. Stark from the decision of the District Court at Williamsport, Conn. The suit involved a matter of some $18,000, the plaintiff being the Second National Bank of Wilkes Barre. Mr. Stark had indorsed certain notes, and the drawee having failed, proceedings were instituted against the indorser, who, in defence, alleged usury on the part of the plaintiff. The judgment of the District Court was against Mr. Stark, on the ground that a charge of usury could not be maintained against National Banks in Pennsylvania under

the 30th section of the National Banking Act, as many of the State Banks had the right to issue currency under their charters and to charge discount rates ranging from 6 to 10 per cent, and in some cases even more than this. The judgment of the District Court has now been affirmed by the highest court of appeal. The question is similar to that involved in the case of Tiffany vs. the National Bank of Missouri, 18th Wallace, 409, and decided by Mr. Justice Strong. It contains a principle of great importance to business men generally, and establishes the fact that he who contracts with a National Bank for a high rate of interest cannot escape the obligations by raising the question of usury.

American vs. English Railway Carriages.

THE London Spectator, in referring to the murder of Mr. Gold in an English railway carriage, points out what is obviously true—inasmuch as such murders do not take place in any other country—that prevention is perfectly possible, as soon as the English traveling public becomes convinced that the chance of being killed by ruffians like Lefroy is too serious a risk to be taken for the mere sake of enjoying the luxury of escaping the eye of one's fellow-passengers. The Spectator says :

"It cannot be the railway companies who are responsible for this, inasmuch as it is plainly to their interest to fill their carriages as much as possible. Traffic managers would like, if they only dared, to go on the plan of the great French lines, and put on no more carriages than are wanted to carry the passengers actually traveling by that particular train. It would be quite possible, however, without crowding the carriages more than is done at present, to so construct them as to make it necessary for a man who meditates committing murder or robbery to be not merely alone with his victim in a compartment, but alone with him in a carriage. In the great majority of cases this would be a complete security against the commission of crime ; but up to this time, it is safe to say that the provision of such a security would make a railway company most unpopular. This prejudice on the part of passengers has nothing to do with physical comfort. That may be secured, if the carriage is properly built, though every inmate of the carriage is under the eyes of fifteen fellow-passengers. It is the very fact of being under their eyes, or even in a position where their eyes may possibly be brought to bear upon him, that an Englishman seems to dislike. Whether this feeling will prove superior to the alarm evoked by Mr. Gold's murder we will not undertake to say ; but we shall not be surprised if the lesson is quickly forgotten in presence of the charm which our countrymen find in the prospect of there being only two passengers in a space constructed to carry six or eight."

The Evening Post, in commenting upon the above, says that the introduction of the Pullman cars in England will put this matter to the test. Blood is thicker than water, and both branches of the wonderful Anglo-Saxon race have become recently fond of exulting together over their common traditions, ancestry, language, customs and law ; but with regard to railways they are still very far apart. The charm which the Englishman finds in the prospect of there being only two passengers in a space constructed to carry six or eight, though its nature may be intellectually apprehended by the American, has never fascinated him to the degree of inducing him to like or even tolerate the English railroad carriage in this country. This may be due in part to the generally great length of American railway journeys ; close confinement, which is endurable enough for a few hours, becoming insufferable if it is protracted for a whole day ; but even for short distances, where the English system has been tried, the Pullman car has generally in the end triumphed over its rival. The American system, which is based on a gangway extending through the entire length of the car, is open to the objection that it renders possible the "raiding" of entire trains by gangs of robbers like the "James" boys, which is an unknown danger in England. Such raids, however, can be prevented by efficiently policing the cars, while murders like that committed by Lefroy will inevitably take place, as the Spectator says, as long as the charm of comparatively solitary traveling outweighs the fear of the risks to which it exposes the traveler.

CONSTRUCTION.

THE shareholders of the Chester, Iron Mountain and Western Railroad Company have determined to proceed at once with the building of the road. Bonds to the amount of $2,500,000 have been subscribed, and the surveys, plans and specifications are all completed and the surveys placed on file. The officers of the company are : J. Wyman Jones, of New York, president ; C. B. Cole, of Chester, Ill. vice-president ; Newton Crane, of St. Louis, secretary, and Nathan Cole, of St. Louis treasurer.

THE Henrico Coal Company, of which Hon. W. H. Barnum, of Connecticut, is president, have built a line of road 6½ miles long from their mines at Deep Run, in Henrico county, to Lorraine Station, on the Richmond and Allegany Railroad. This completes a connection between the Richmond and Allegany and the Richmond, Fredericksburg and Potomac Railroads, the coal company having already a line four miles long to Hungary Station, on the latter road

THE work of grading the extension of the double track of the West Jersey Railroad, from Wenonah to Glassboro, is now in progress, and is to be completed, ready for laying the track, in about two months, and the track is to be completed about the first of March. This will complete a continuous double track from Camden to Glassboro, a distance of 17½ miles.

IT is officially stated that Swedesboro' branch of the West Jersey Railroad is to be extended to Woodstown, by joint subscription of the West Jersey road and the residents of Woodstown. The right of way has been contracted for, and it is thought probable that the work will proceed at an early day.

THE track has been laid on the New York, Texas and Mexican Railroad from Rosenberg Junction to East Bernard, a distance of fifteen miles. The track is being laid at the rate of a mile per day, and the road is expected to be completed by March, 1882. A force of eight hundred men is now employed along the route.

THE construction of fifty miles of road for the Chicago, Burlington and Quincy Railroad Company, east from Denver, has been let to Chicago parties, who were to have commenced work on the 1st of December. The work will, it is expected, be finished by the first of next May.

THE Danbury and Norwalk Railroad Company is now having surveys made for the contemplated extension of the road to Wilson's Point. It is under the direction of D. George Ferris, of Watertown, N. Y.

HUGH BURNS, of San Antonio, Texas, has the contract for grading 40 miles of the Trinity and Sabine Branch of the International and Great Northern Railway commencing near Palestine, the work to be completed in five months.

IT is proposed to build a narrow gauge railroad from Woodbridge, San Joaquin county, Cal., to Brack's Landing, on the Mokelumne river, a distance of six miles.

THE Monongahela Navigation Company will receive sealed proposals until the 22d inst. for the building of lock and dam No. 7, located on the Monongahela river, 84 miles above Pittsburg.

A CONTRACT has been made with Mr. Braken, of Barker, Penn., for the completion of the Pittsburg and Western narrow gauge Railway to Foxburg, the work to be completed by the 1st of February.

THE Danville and New River Railroad was formally opened on the 29th ult. to Cascade, 22 miles from Danville, Va.

A BRANCH of the Lehigh Valley Railroad was opened to Clinton, Hunterdon county, N. J., on the 22d inst.

GRADING on the East Line Narrow-gauge railroad extension from Greenville, Texas, to McKinney has commenced.

GROUND was broken on the 22d ult., on the Duluth and Winnipeg Railroad about 1½ miles from Duluth.

IT is expected that the Leavenworth, Topeka and Southwestern Railroad will be completed to Topeka, Kansas, by the 18th of April next.

INCORPORATION.

ARTICLES of incorporation of the Chicago, Missouri and Kansas Railroad Company were filed at Topeka, Kansas, on the 23d ult. The road is to run from a point on the Missouri River in the County of Saline, Mo., to the west line of the State of Kansas, with a branch to Dodge City, the estimated length to be 600 miles. The company's headquarters will be at Oswego, Kan. The capital stock of the company is $15,000,000. The Directors are : A. A. Harris, Fort Scott; B. F. Hobart, C. M. Condon, F. A. Bitters and C. B. Sperry, of Oswego, Kan.

A CHARTER has been issued at the State Department, Harrisburg, Pa., to the Conewago and Clarion Railroad Company, with a capital of $1,000,000. The road will run from a point on the south bank of the Clarion river, in Jefferson county, where the Mahoning and Susquehanna railroads intersect, to Warren, Pa. The directors are Lieutenant-Governor Charles W. Stone, Henry E. Brown, William H. Copeland, Henry J. Miller, of Warren, and C. Powell,

Karr, B. F. Reifsmider and Theodore E. Smith, of New York.

A CHARTER was granted at Harrisburg, Penn., on the 23d ult., to the Ohio River and Lake Erie Railroad Company, which proposes to build a line from the vicinity of Sharpsville, Mercer County, to Girard, Erie County. It is to be 60 miles in length. The capital stock is $300,000. It is designed by the company to make a connection with the New York, Chicago, and St, Louis Railroad at Girard.

THE charter of the Guideau Springs Railroad Company was filed in the office of the Secretary of State of Kansas on the 22d ult. The company propose to build a railroad from Arkansas City, Cowley County, Kan., by way of Mineral Springs, to Dodge City, Kan. The length of the line will be about 200 miles. The capital stock is $300,000. Guideau Springs will be the headquarters of the road.

ARTICLES of association of the New York, Indiana and Western Construction Company were filed at Indianapolis, Ind., on the 25th ult. The object of the company is to take contracts for the construction and equipment of railroad lines. The capital is $500,000. The Directors are A. J. Hadder, J. T. Brady, R. H. Lee, John Byrne, and F. Vanderperrin.

THE Incline Plane Passenger Railroad Company of Pittsburg, Pa., has been granted a charter. The road will be two miles in length. The capital is $20,000. The Directors are: John F. Cinley, J. Guy McCandless, Thomas McMichael, A. E. McCandless and Geo. Linderman.

ARTICLES of incorporation of the Santa Martha Railroad Company were filed with the Secretary of State at Albany, N. Y., on the 26th ult. The road is to be built in the United States of Colombia. The capital is $2,500,000.

THE Syracuse and Ontario Railroad Company filed articles of incorporation at Albany, N. Y., on the 28th ult. Capital $400,000. Length of road 23 miles.

CONSOLIDATION.

ARTICLES of agreement and consolidation of the Olean Railroad Company, the Friendship Railroad Company, and the Allegany Central Railroad Company were filed with the Secretary of State of New York on the 23d ult. The corporate name of the consolidated company will be the Allegany Central Railroad Company. The capital stock is $1,000,000, consisting of 10,000 shares. The officers are: President, Frank E. Smith; Vice President, Archer W. Martin; Secretary and Treasurer, Charles E. Kimball.

ARTICLES of consolidation were filed at Albany on the 29th ult. of the Rochester and Pittsburg, the Rochester and Charlotte, the Buffalo, Rochester and Pittsburg the Great Valley and Bradford, the Bradford, and State Line, and the Pittsburg and New York Railroad Companies The name of the consolidated company is the "Pittsburg and Rochester Railroad Company." The capital stock to $10,000,000. Wallston H. Brown, of New York, is President.

ORGANIZATION.

THE directors of the Wilmington and Weldon Railroad Company, elected on the 22d ult., are: Thomas C. Jenkins, B. F. Newcomer, H. B. Plant, A. J. De Rosset, George Howard, W. T. Walters, S. M. Shoemaker, Donald MacRae, E. B. Borden, W. H. Willard. The directors of the Wilmington, Columbia and Augusta Railroad Company, elected on the same day, are: W. T. Walters, S. M. Shoemaker, B. F. Newcomer, George C. Jenkins, Enoch Pratt, J. C. Cameron, George S. Brown, H. B. Plant, R. R. Bridgers, H. B. Short.

AT the annual meeting of the stockholders of the New York, Lake Erie and Western Railroad Company, held on the 29th ult, the following directors were chosen for the ensuing year: Theron R. Butler, Charles Dana, Thomas Dickson, Harrison Durkee, R Suydam Grant, Jacob H. Schiff, Solomon S. Guthrie, Hugh J. Jewett, John Taylor Johnson, William Mertens, Edwin D. Morgan, Cortlandt Parker, F. N. Drake, Homer Ramsdell, Henry G. Stebbins, William L. Strong, J. Lowber Welsh.

PERSONAL.

GEORGE O. MANCHESTER has been elected General Manager of the Leavenworth, Topeka and Southwestern Railroad.

C. C. GALE has been appointed Superintendent of the Indianapolis division of the Cleveland, Columbus, Cincinnati and Indianapolis Railway, with John Ewan as Assistant Superintendent.

A. A. HOBART has been appointed Superintendent of the Chicago division of the Wabash, St. Louis and Pacific railway.

L. G. CANNON, of Indianapolis, Ind., has received the appointment as General Freight and Ticket Agent of the Chicago, Texas and Mexican Centra railway, headquarters Dallas, Texas.

THE President has approved the report of H. H Gorringe, Thomas T. Minor and C. W. Slogle, Government Commissioners appointed to examine a section of 200 miles of the Northern Pacific Railroad, recently completed in the Territories of Washington and Idaho.

INTEREST AND DIVIDENDS.

THE directors of the New York, Lake Erie and Western Railroad Company at their meeting on the 29th ult., declared a dividend of six per cent on the preferred stock, and ordered the payment of six per cent interest on the income bonds, both dividend and interest payable January 16, 1882. This is the first dividend declared by the company since its reorganization is 1878.

THE directors of the Lehigh Coal and Navigation Company have declared a dividend of two per cent, payable December 3.

THE Delaware and Hudson Canal Company have declared a quarterly dividend of 1¾ per cent, payable December 10.

THE Boston and New York Air Line Railroad Company have declared a quarterly dividend of one per cent on the preferred stock, payable December 1.

THE American Express Company have declared a dividend of three dollars per share, payable January 3, 1882.

THE Northern (N. H.) Railroad Company have declared a dividend of $3 per share, payable December 1.

THE Boston and Albany Railroad Company have declared a quarterly dividend of $2 per share, payable December 31.

THE Union Pacific Railway Company have declared a quarterly dividend of 1¾ per cent, payable January 2, 1882.

SEMI-ANNUAL dividends of three per cent have been declared on the capital stocks of the Wilmington and Weldon and Wilmington, Columbia and Augusta Railroad Companies.

Feeding and Watering Cattle in Transit.

THE plan of the Humane Live Stock Express Co. for feeding and watering cattle in transit without removal from the car is being taken up and adopted on several of the leading cattle-carrying railroads, and it will not be long before there will be a route from the West which can assure dealers and the public that the live stock carried over it will be fed and watered at regular intervals The demand for the humane treatment of cattle in this respect has increased as the subject has been more and more fully considered during the past year, and its importance in its commercial and sanitary relations more fully realized. Railroad managers have been called upon to respond to this demand, and have given much attention to it. Special cars for cattle have not been looked upon with favor by them generally, though there has been much experimenting in this direction. The plan now so prominently before them, however, does away with all need of special stock cars, the ordinary car being used, with the simple alteration of placing on hinges one or two boards in the sides of the car for the insertion of the feed. The simplicity of the device has given it great favor among practical railroad men and shippers, while some of our leading public men and capitalists, looking at the subject chiefly in its bearings upon our export trade and general commercial relations, have heartily and substantially endorsed it. Work is already under way for the manufacture and erection of several of these stations, and arrangements are being expedited as fast as possible for having a through line of them in operation between the West and Eastern seaports. With this effected the demand which has been made by the public, from a humane standpoint and the economical requirements of the subject, would seem to have been fully met. One of the stations will be in operation in a stock yard int he vicinity of this city within a few days, when those especially interested will have an opportunity of examining the device, a very clear idea of which, however, is given by a model in the office of the company, in the United Bank Building, corner of Wall street and Broadway.

CHAIRS IN RAILWAY STATIONS.—It has been suggested, and not without good reason, that in station houses along the several railroad lines, there should in cold weather be loose chairs in the room assigned for ladies. Not a few ladies arrive at a station long before a train starts, and frequently they have cold or wet feet. If they stand before one of the tall red-hot stoves in order to warm or dry their feet, their faces are likely to be scorched. If they had chairs, and men were not allowed to appropriate them, they could sit far enough away from the stove to save their faces, and at the same time could put their feet toward the heat.

New York Lake Erie and Western Railroad.

THE following is a synopsis of the report of the New York, Lake Erie and Western Railroad Company for the fiscal year ending September 30, 1881, which was presented at the annual meeting of the stockholders held on the 29th ult.

The gross earnings arising from the operation of the road, its branches and leased lines for the fiscal year were		$20,715,605 18
Working expenses		13,256,230 06
Net earnings from traffic		$7,459,375 12
To which add income from other sources.		844,305 96
Total		$8,303,681 08
Less interest on funded debt.	$4,148,745 50	
Rentals of leased lines and other charges	2,267,517 84	6,416,263 34
Surplus for one year		$1,887,417 74

This amount, together with $1,193,582.22 received from other sources, making in all $3,080,999.96, has been applied mainly to improvements of the road and property and to the acquisition of equipment and real estate, as will appear in detail in the reports of the Vice-President and Auditor.

The working expenses have been 64 per cent of the earnings—an increase of 2 per cent over the previous year, but a decrease of 6 per cent from 1879. This increase of 2 per cent is accounted for by the large increase in our traffic at reduced rates and the increased cost of labor and material.

The increase in the tonnage, other than coal, over the previous year, was 919,655 tons; in the tons transported one mile, 121,079,362 tons; but the earnings from this source decreased $73,349.13, owing to the decreased rates received, being but 789-1000 cents per ton per mile, against 869-1000 cents in the previous year.

This is due to the long and fierce competition for business which has existed between the different lines, and which has resulted in lower rates for transportation than have been reached in many years.

Had we received the rates of 1880 for this traffic we would have earned an additional sum thereon of $1,125,548.22, and our percentage of operating expenses would thereby have been reduced to 60 7-10 per cent.

The increase in coal tonnnge over the previous year was 1,451,276 tons; in the tons transported one mile 142,203,398 tons; in the earnings, $1,661,810.41; and in the rate per ton per mile 107-1000 cents, being 845-1000 cents against 738-1000 cents in the previous year, a result which is very gratifying.

The increase in total tonnage over the previous year was 2,370,931 tons; in the tons transported one mile, 263,282,760 tons; in the earnings, $1,588,461.28; but the rate per ton per mile decreased 031-1000 cents, being 805-1000 cents against 836-1000 cents in the previous year, and 1 209-1000 cents in 1875, a decrease from the latter year of 33.4 per cent.

The increase in the number of passengers carried, over previous year, was 652,727; in the number carried one mile, 29,023,586; in the earnings, $358,315.85; but the rate per passenger per mile decreased 25-1000 cents, being 2 016-1000 cents against 2 041-1000 cents in the previous year.

The total increase in the gross earnings of the road, its branches and leased lines, including express, mails, &c., over previous year, was $2,022,496.32; in the working expenses, $1,612,304.71, and in the net earnings, $410,191.61.

The increase in the freight-train mileage over the previous year was 940,185 miles; in the passenger-train mileage, 196,173 miles, and in the switching-train mileage, 437,498 miles.

The earnings per freight-train mile were $1.75, against $1.76 in previous year. Expenses per freight-train mile, owing to increased load, $1.15, against $1.12 in previous year. Profit, 60 cents per freight-train mile, against 64 cents in previous year.

The earnings per passenger-train mile were $1.32, against $1.28 in previous year. Expenses per passenger-train mile, 79 cents, against 75 cents in previous year. Profit, 53 cents per train mile, same as in previous year.

The average freight-train load was 218 tons, against 210 tons the previous year, and 134 tons in 1875, an increase over the latter year of 62.7 per cent. The average number of passengers per train was 58, against 55 the previous year, and 48 in 1875, an increase over the latter year of 20.8 per cent.

The expenses per ton per mile were 529-1000 cents, against 534-1000 cents in previous year, and 958-1000 cents in 1875, a decrease from the latter year of 44.8 per cent. The expenses per passenger per mile were 1 372-1000 cents, against 1 361-1000 cents in previous year, and 1 950-1000 cents in 1875, a decrease from the latter year of 29.6 per cent.

Propelling Cars by Springs.

A COMPANY was organized in Camden, N. J., on the 21st ult., under the corporate name of the "United States Spring Car Motor Construction Company," with a capital of one million of dollars. The following are the officers elected: President, Hon. George W. Savage, of Rahway, N. J; Vice-President, Edward W. Patton, member of Select Council, Philadelphia; Treasurer, Frank R. Walton; Secretary, E. P. Michener; Assistant Secretary, J. H. Rowley. The object of this company is to apply a new propelling power to the running of cars on streets and elevated railroads. The motor to be used is obtained from a series of coil springs of from four to eight horse power each. The springs are wound around a cylinder similar to a clock, and propel the cars when unwinding. It is said that fair tests have been made, and the success is satisfactory. The company have purchased of Samuel Austin and R. Steel the patents obtained by them for cars to be propelled by springs. A large factory in Philadelphia has been obtained, in which the springs are being made. It is said by the officers of this company that in less than three months their first cars will be exhibited on the street railways.

The Coal Trade.

The leading coal carrying companies make the following reports of their tonnage for the week ending November 19, and for the year to same date, compared with their respective amounts carried to the same date last year:

	Week.	1881.	1880.
Reading Railroad	194,174	7,770,138	6,940,734
Schuylkill Canal	21,685	562,122	515,421
Lehigh Valley	145,785	5,575,374	4,553,120
Delaware, Lackawanna and Western	101,466	3,790,548	3,123,352
Shamokin	18,575	951,575	818,879
Central R. R. of New Jersey	109,616	3,911,499	3,371,852
United R. R. of New Jersey	34,853	1,385,728	1,015,088
Pennsylvania Coal	35,129	1,255,359	1,002,570
Delaware and Hudson Canal	85,870	3,185,699	2,076,594
Huntingdon and Broad Top Mountain	9,868	467,266	383,283
Penn. and New York	32,641	1,470,493	1,105,405
Clearfield, Pa	48,651	2,124,395	1,505,422

The total tonnage of anthracite coal from all the regions for the week ending Nov. 19, as reported by the several carrying companies, amounted to 691,199 tons, against 649,785 tons in the corresponding week last year, an increase of 41,414 tons. The total amount of anthracite mined for the year is 25,123,229 tons, against 20,982,176 tons for the same period last year, an increase of 4,141,053 tons. The quantity of bituminous coal sent to market for the week amounted to 107,373 tons, against 100,696 tons in the corresponding week of last year, an increase of 6,677 tons. The total amount of bituminous mined for the year is 4,395,119 tons, against 3,840,424 tons for the corresponding period last year, an increase of 554,695 tons. The total tonnage of all kinds of coal for the week is 798,572 tons, against 750,481 tons in corresponding week last year, an increase of 48,091 tons, and the total tonnage for the coal year is 29,418,348 tons, against 24,822,600 tons, same date last year, an increase of 4,695,748 tons. The quantity of coal and coke carried over the Pennsylvania Railroad for the week ending November 19 was 191,368 tons, of which 143,792 tons were coal and 47,576 tons coke. The total tonnage for the year thus far has been 8,036,608 tons, of which 5,927,749 tons were coal and 2,108,859 tons coke. These figures embrace all the coal and coke carried over the road east and west. The shipments of bituminous coal from the mines of the Cumberland coal region during the week ended November 19 were 57,373 tons, and for the year to that date 1,929,593 tons, a decrease of 19,164 tons as compared with the corresponding period of last year. The coal was carried to tidewater as follows: Baltimore and Ohio Railroad—week, 34,875 tons; year, 1,227,604 tons; increase compared with 1880, 110,665 tons; Chesapeake and Ohio Canal—week, 17,915 tons; year, 449,698 tons; decrease compared with 1880, 142,068 tons. Pennsylvania Railroad—week, 4,327 tons; year, 249,580 tons; increase compared with 1880, 47,856 tons. The Reading Railroad shipment for last week, ending November 26, was 180,000 tons, of which 34,600 tons were sent to and

36,500 tons shipped from Port Richmond, and 17,000 tons sent to and 17,500 tons shipped from Elizabethport.—*Phil. Ledger, Nov. 28.*

Philadelphia and Reading Companies.

The following is the comparative statement of the Philadelphia and Reading Railroad Company and the Philadelphia and Reading Coal and Iron Company for the month of October, 1881 and 1880:

	1881.	
GROSS RECEIPTS.	*Profit for mo.*	*Year to date.*
Railroad traffic	$803,015.49	$7,531,268.72
Canal traffic	48,772.90	341,023.20
Steam colliers	32,629.70	249,980.45
Richmond coal barges	1,413.698	2,407.83
Total Railroad Co	$885,931.78	$8.124,680.20
Reading Coal & Iron Co	146,434.00	971,262.74
Total of all	$1,032,265.78	$9,095,942.04
TONNAGE & PASSENGERS.	*Month.*	*Year to date.*
Tons of coal on railroad	812,499.14	7,246,375.13
Tons of merchandise	648,709.06	6,060,535.13
Passengers carried	990,691	9,692,462
Coal transp by stm colliers	49,461.00	510,341.00
TONS OF COAL MINED.		
By Coal and Iron Company	420,115.17	3,516,216.03
By tenants	147,027.12	1,336,967.11
Total mined from lands owned and controlled by Co. and from leasehold estates	567,143.09	4,853,183.14

	1880.	
GROSS RECEIPTS.	*Profit for mo.*	*Year to date.*
Railroad traffic	$807,933.86	$7,138,672.14
Canal traffic	68,692.12	336,276.32
Steam colliers	25,696.51	186,955.43
Richmond coal barges	785.96	701.25
Total Railroad Co	$903,108.45	$7,662,605.14
Reading Coal & Iron Co	140,758.71	373,955.64
Total of all	$1,043,867.17	$8.036,560.78
TONNAGE & PASSENGERS.	*Month.*	*Year to date.*
Tons of coal on railroad	719,415.11	6,410,004.04
Tons of merchandise	527,944.12	5,409,398.12
Passengers carried	921,470	9,048,277
Coal transp by stm colliers	44,388.00	498,916.00
TONS OF COAL MINED.		
By Coal and Iron Company	361,198.15	1,096,722.15
By tenants	133,493.02	1,096,722.15
Total mined from lands owned and controlled by Co. and from leasehold estates	494,691.17	4,163,325.04

Total of both companies for month of October, 1881: Gross receipts, $3,431.621.54; gross expenses, $2,399,355.76; profit, $1,032,265.78.

South Carolina Railroad.

At Charleston, S. C., on the 26th ult., Judge Bond, sitting in chambers as of the U. S. Circuit Court, signed final orders for the settlement of the case of Calvin Clafflin and others against the South Carolina Railroad Co. and others. In 1878, after an extended argument before Judge Bond, he decided that the road should go into the hands of a receiver. It was sold last July under directions of commissioners appointed by the court for $1,275,000, and purchased by a committee of the bondholders, to which purchase objection was made. A new company was formed bearing the name of "The South Carolina Railroad Co.," with John S. Barnes, of New York, president; James J. Higginson, of New York, vice-president; Francis A. Stout, Samuel Sloan, Wm. H. Bramley, Geo. W. Dillaway, and Edward E. Chase, directors.

The counsel present, representing the different parties, Hon. Henry Buist, Gen. B. H. Rutledge, C. H. Simonton, Samuel Cord, Jr., D. J. Corbin, (attorney of the receiver of the road, John H. Fisher,) all of South Carolina; Archibald Stirling, Jr., of Baltimore, and Hon. S. T. Shearman, of New York. Judge Bond signed orders confirming the compromise made with the syndicate, directing the transfer of the road to the new company, and fixing the expenses of the sale. The road extends from Charleston, S. C. to Columbia, S. C., and to Augusta, Ga.

Cincinnati Iron Market.

OFFICE OF E. L. HARPER & Co.
Cincinnati, Nov. 29, 1881.

The general features of the market continue the same as noted in our previous report. Stocks in the hands of sellers are light, prices strong, and the demand fully up to the supply. The Rolling Mills here are all busy, and report more than the usual quantity of orders coming in daily for this season of the year. The same can also be said for the Iron Foundries and Machine Shops. We quote as follows:

	No.			Mos
FOUNDRY.				
Hanging Rock Charcoal	1	29 00	@30 00	4
Strong Neutral Coke	1	26 00	@27 00	4
American Scotch	1	25 00	@26 50	4
GREY FORGE.				
Neutral Coke		23 50	@24 50	4
Cold Short		22 50	@23 50	4
CAR WHEEL AND MALLEABLE.				
Hanging Rock Cold Blast		36 00	@38 00	4
" Warm Blast		30 00	@32 00	4
Lake Superior 1 and 2		32 00	@33 00	4
Lake Superior 3 to 6		34 00	@36 00	4
Southern Car Wheel		34 00	@35 00	4

Pennsylvania Railroad.

The statement of the business of all lines of the Pennsylvania Railroad Company east of Pittsburg and Erie for October, 1881, as compared with the same month in 1880, shows

A decrease in gross earnings of	$209,743
An increase in expenses of	123,619
A decrease in net earnings of	$333,362

The ten months of 1881, as compared with the same period in 1880, show

An increase in gross earnings of	$2,414,885
An increase in expenses of	1,778,744
An increase in net earnings of	$636,141

All lines west of Pittsburg and Erie for the ten months of 1881 show a surplus over liabilities of $2,743,213, being a gain, as compared with the same period in 1880, of $228,478.

Value of a Limited Ticket.

The following decision, rendered at Greenwich, Conn., on the 24th ult., will be read with interest by many people, as the question arising has often been discussed, but not hitherto decided by the courts. It appears that in the summer of 1878 Mr. Shelbourne bought a ticket from New York to Boston, by way of the Sound steamers. The ticket read: "From New York to Boston via Norwich Line. Only on a steamer leaving pier No. 40 North River, New York, and connecting therewith. No stop-over allowed." He left the boat at Norwich and remained two or three days. When resuming his journey he offered his limited ticket. The conductor refused it, and on Mr. Shelbourne's refusing to pay for any other ticket or his fare he was ejected from the cars at Putnam and arrested for evading payment of fare. Mr. Shelbourne at once brought suit against the New York and New England Railroad, claiming that his ticket was good, and asking heavy damages. The case was decided against Mr. Shelbourne. The court held that a limited ticket is worthless except for the trip specified on its face.

Northern Central Railway.

The Northern Central Railway Company furnishes the following comparative statement of its gross earnings and operating expenses for the month of October:

	1881.	1880.
Gross earnings	$449,663.57	$512,917.59
Operating expenses	370,322.14	263,241.27
Net earnings	$79,341.43	$249,676.32
	1881.	1880.
Gross earnings	$4,479,916.64	$4,097,023.13
Operating expenses	3,152,109.32	2,682,413.30
Net earnings	$1,327,807.32	$1,414,609.13

Unique Pay Car.

There is in course of construction at the Lehigh Valleys Co.'s shops at Packerton, Penn., a pay car which, when finished, will be one of the most complete cars for that purpose in the State. It is of the usual dimensions of an ordinary baggage car, and will be divided into four compartments—a cash, sleeping, cook and observation room. In the cash or pay room will be placed sofas, tables, chairs, and a Herring safe. The sleeping room will contain four berths. The cook room will be supplied with a cook stove and a patent Baker heater, a closet for dishes and one for linen. The observation room will be furnished with easy chairs and lounges. The interior of the car will be finished in black walnut and maple, and neatly carpeted, and when completed will be a small railroad palace. The paymaster and his crew will sleep and live on the car during the few days required to pay the men employed on all the branches of the road. The car will be completed for the use of the paymaster in time to make the January trip.

Safety Attachment for Elevators.

Among the novelties exhibited at the monthly meeting of the Franklin Institute, Philadelphia on the 15th inst., was Chamberlain's safety attachment for elevators, designed, in case of the breaking of an elevator rope, to instantly stop the car from falling before it has acquired any momentum. The rope is attached to a yielding draw bar or cross bar, connected by links with a rock shaft under the car. Locking cams act against vertical chains or rods, which are firmly attached at their upper and lower ends to rigid parts of the elevator well, and pass through grooved recesses in the elevator car. When in use the cams are turned so as to allow the car to move freely up or down, but the moment the rope breaks, thus removing strain on the cross bar, springs on the rock shaft are freed, and operating upon the shaft, turns the cams into a position where they are at once engaged in the locking recesses. The inventor claims that this action is instantaneous, and that consequently there is no opportunity for the car to acquire momentum.

The Upper House of the Council of the Choctaw Indian Nation has passed the bill, previously passed by the Lower House, granting the right of way through the Nation to the St. Louis and San Francisco road," and it has been approved by the head of the Nation.

AMERICAN RAILROAD JOURNAL.

Financial and Commercial Review.

THURSDAY EVENING, Dec. 1, 1881.

IN the loan market this morning 6 per cent was the ruling rate for call loans on stocks, and 3½@4½ on Governments. In the afternoon, and at the close, the rate at the Stock Exchange was 6 per cent and a commission of 1-64@1-32 of 1 per cent per day.

The posted rates for prime bankers' sterling were 4.81@4.85; the actual rates were 4.80@¼ and 4.84¼, with cable transfers 4.84⅜@4.85¼, and prime commercial bills 4.78¼@¾. The actual rates for continental bills are as follows: francs, 5.25⅝ and 5.20⅝@5.21¼; marks, 94@⅜ and 94⅞@95, and guilders, 39⅝@40½.

The Secretary of the Treasury issued on the 30th ult. the 106th call for the redemption of bonds, the principal and accrued interest on which will be paid January 29, 1882, after which date the interest will cease, viz: Registered bonds of the acts of July 17, and August 5, 1861, continued during the pleasure of the Government under the terms of circular No. 42, dated April 11, 1881, to bear interest at the rate of 3½ per centum per annum from July 1, 1881, as follows: $50—No. 1,811 to No. 1,850, both inclusive; $100—No. 12,701 to No. 13,000, both inclusive; $500—No. 9,221 to No. 9,600, both inclusive; $1,000—No. 45,721 to No. 47,000, both inclusive; $5,000—No. 15,531 to No. 16,000, both inclusive; $10,000—No. 27,861 to No. 30,100, both inclusive; total $20,000,000, many of the bonds originally included in the above numbers have been transferred and canceled, leaving outstanding the amount above stated.

The Assistant Treasurer accepted on the 30th ult. $2,714,500 of three and a half per cent bonds which were offered under the recent letters of the department authorizing the receipt of five millions.

The decrease in the public debt during the month of November was $7,249,126.25; and since June 30, 1881, $62,373,471.33.

The Secretary of the Treasury gave notice on Monday that he had authorized the Assistant Treasurer at New York to redeem on Wednesday, the 30th ult., without rebate of interest, bonds embraced in the one hundred and fifth call to an amount not to exceed $5,000,000. The Assistant Treasurer is also authorized to redeem, on and after Wednesday, 7th inst., without rebate, the remainder of the bonds of that call which may then be outstanding. The bonds will also be paid in like manner at the Treasury Department in Washington on and after Wednesday next.

The stockholders of the Cincinnati and Eastern Railroad Co., at a meeting held at Batavia on the 19th ult., by unanimous vote, agreed to increase the capital stock from $500,000 to $2,000,000 and to increase the bonded debt to such a sum as the Directors may determine. The object is to complete the main line to Portsmouth, Ohio, and run a branch from Brush Creek, in Scioto county, to Gallipolis.

At the recent annual meeting of the Wilmington and Weldon Railroad Company it was decided to increase the capital stock, not to exceed $200,000, to provide for building the Scotland Neck branch and for the company's proportion of sleeping-car equipment for the Atlantic Coast Line. The board resolved to purchase with stock, at par, such of the $571,000 7 per cent gold bonds recently issued as the holders will dispose of at not exceeding 110.

The stock interest in the New York and New England Railroad Company is created by virtue of a clause in the Berdell mortgage, which amounted originally to $20,000,000. When the mortgage was foreclosed the condition defined in that clause became operative, by which any holder of the bonds could at any time exchange his bonds for an equal amount in face value of the stock. Thus the extreme limit of stock which may be put on the market, or become available for voting purposes in the annual elections is $20,000,000. There was no provision in the mortgage making it obligatory on a bondholder to so exchange, nor was any limit of time named within which it must be done. Accordingly, the exchange has but slowly been made. Year before last $7,000,000 or $8,000,000 of the possible $20,000,000 had been issued; last year the total issue was about $9,000,000; during the present year it has been increased to $12,000,000 or $13,000,000, which leaves $7,000,000 or $8,000,000 yet remaining in the form of bonds. Of the $12,000,000 or $13,000,000 of stock the State owns $3,470,000.

The following securities have been admitted to dealings at the New York Stock Exchange:

Missouri, Kansas and Texas Railway general consolidated mortgage bonds, Nos. 33,102 to 34,101, inclusive for $1,000 each, issued on 50 miles of road from Fort Worth south toward Waco and Austin, Texas.

Chicago, Milwaukee and St. Paul Railway, Hastings and Dakota Division, 7 per cent bonds, from No. 4,061 to No. 5,291, inclusive of $1,000 each. Issued on 82 miles of new road.

Richmond and West Point Terminal Railway and Warehouse Company, 30,000 shares of capital stock, aggregating $3,000,000.

Ohio Central Railroad first mortgage 6 per cent bonds of Mineral Division, from No. 1 to No, 300, inclusive, of $1,000 each; also, Mineral Division income bonds, similarly numbered, of same amount, to bear interest not exceeding 7 per cent, payable only out of the net earnings of the division for any one year, not cumulative.

Chicago, Burlington and Quincy Railroad mortgage sinking fund (Iowa Division) 5 per cent bonds, from No. 1 to No. 3,000, inclusive, of $1,000 each; also, 4 per cents, same title, No. 6,001 to No. 15,000, inclusive, $1,000 each.

Oregon and California Railroad 6 per cent bonds of $1,000 each, from No. 1 to No. 6,000, inclusive.

United States National Bank, capital stock $500,000.

Directly opp. Post Office. **NEW YORK.**

Printing of all kinds at greatly reduced rates.

THE RAILWAY TIMES
AND JOINT-STOCK CHRONICLE.

The *Railway Times* was established in the year 1837, and as consistently maintained the purpose for which it was tarted—to give an independent account of all matters of mportance to railway shareholders, not neglecting, at the same time, the duty of keeping its readers well informed on all matters of commercial interest.

It is published every Saturday. Price 5*d*. The price of subscription for one year is £1 1*s*.

No. 2 Exeter Street, Strand, W. C., London.

KNOX & SHAIN,

Manufacturers of Engineering and Telegraphic Instruments. No. 716 Chestnut Street, Philadelphia. Two Medals awarded by the Franklin Institute, and one by the Centennial.

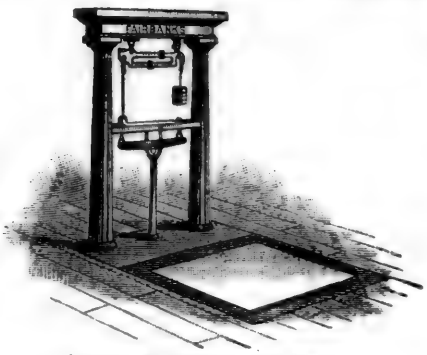
NEW YORK, LAKE ERIE, AND WESTERN RAILWAY

TO THE TRAVELING PUBLIC.

During the Centennial season—six months closing September 10, 1876—the Erie Railway carried almost THREE MILLION passengers, without a singe accident to life or limb, or the loss of a piece of baggage.



And for a whole year the official records of the United States Post Office Department show the arrivals of Erie Railway trains in New York, on time, to be from 15 to 27 per cent ahead of competing lines.

Facts well worthy the consideration of travelers.

Marietta and Cincinnati Railroad Settlement.

THE Baltimore Sun says that the agreement, or settlement, which it is understood has been reached between the Baltimore and Ohio Railroad Company on one side and the bondholders' committee on the other, while not yet made public in all its details, is sufficiently well known to enable those interested to understand the situation. The general outline of the agreement as regards the different mortgages is given in the Sun, on good authority, to be as follows:

1. The first mortgage 7 per cent bonds are to be funded, principal and interest, into a new long bond, bearing 4½ per cent, interest, guaranteed by the Baltimore and Ohio, which, in "street" parlance, makes it "gilt-edged." On August 1st, 1881, eight first mortgage coupons were over due, or $28 on every $100 bond, making $30.33⅓ over due on December 1st. The amount of first mortgage bonds outstanding is given at $3,500,000, and the overdue interest to 1st August, 1881, to be funded into the new 4½ per cent. bond would be $980,000; total, $4,480,000.

2. The $2,500,000 second mortgage 7 per cent bonds outstanding are to be funded into a new long 5 per cent bond. The overdue interest is giving as about $800,000, of which $500,000 is to be funded into the new second mortgage bond, making that loan $3,000,000 in all. The other $300,000 is to be funded at its face value into the new third mortgage long bond described in the next paragraph.

3. The third mortgage outstanding 8 per cent bonds are to be funded into a new third mortgage bond at 66⅔ per cent of the principal. That is, for every $100 bond, $66.66⅔ is allowed in the new bond, which bears 3 per cent interest for ten years and 4 per cent thereafter. The balance of the principal (33⅓ per cent) and all the accrued interest goes into a first income bond, bearing 5 per cent interest. By income bond is meant that the interest will be paid if earned. The third mortgage bonds outstanding are given at $3,000,000. On January 1, 1882, ten coupons will be due, making $1,200,000.

4. The $4,000,000 fourth mortgage 8 per cent bonds, nearly all owned by the Baltimore and Ohio and the Messrs. Garrett, are to be funded into a second income bond. October 1, 1881, the overdue fourth mortgage interest aggregated $1,440,000.

5. The floating debt and other addenda in the way of stock, etc., are to go into preferred and common stock. Baltimore has held very little of the stock of the company. The old first preferred stock is given at $8,105,600; second preferred, $4,440,100; common, $1,386,350.

6. All the lines operated by the Marietta and Cincinnati are to be consolidated into one continuous line from Cincinnati to Parkersburg, it being understood that the leased lines will be combined with the company when reorganized. The Marietta and Cincinnati line has been as follows: From Cincinnati and Baltimore Junction, Ohio, to Main Line Junction, Ohio, 157 miles. Branches and Extensions—Main Line Junction to Scott's Landing, 31 miles; Marietta to Belpre, 11 miles; Portsmouth to Hamden, 55 miles; Blanchester to Hillsborough, 22 miles. Leased—Cincinnati and Baltimore Railroad, 66 miles; Baltimore Short Line, 30 miles. Total operated, 312 miles. The Marietta and Cincinnati guaranteed the stock and bonds of the Baltimore Short Line Railway, and, when in default on its own bonds, this rental of the Baltimore Short Line and the rental of the Cincinnati and Baltimore Railroad were paid.

7. It is supposed the sale of the road will be secured under the first mortgage. The proceedings, as understood, will go along in due course, when the details are arranged and the case is made up.

The Marietta and Cincinnati's troubles commenced so far as the public are concerned, on July 1, 1877, when default was made on the third mortgage, and since then the road has been in the hands of receivers. Baltimore was a large holder of the first three mortgages, and the dealings in them have been mainly on the Baltimore Stock Exchange. The proposition to reorganize the company was started in this city, and of the bondholders' committee of seven to secure that end three of the gentlemen are Baltimoreans. Since they took hold the bonds have advanced in the aggregate about $1,000,000, as estimated, and it is said they congratulate themselves on having aided in adding that much to the value of the securities, at the same time that they have obtained the best terms practicable under the circumstances.

The fixed interest charges of the road, as reorganized under the above plan, will be $201,600 on the first mortgage, $150,000 on the second mortgage and $69,000 on the third mortgage, making a total of $420,600 yearly. The total yearly interest on the first three mortgages under the old system was $660,000.

Vermont Central and Vermont and Canada Railroads.

At St. Albans, Vt., on the 29th ult., Chancellor Royce filed his *pro forma* decree in the case of Langdon et al. against the Vermont and Canada Railroad Company et al. It is decreed that the indebtedness of the Receivers and Managers proved before the Masters, payment of which it is ordered by the decree, constitutes a charge and lien in the nature of an equitable mortgage upon the Vermont Central and the Vermont and Canada Railroads, their privileges and appurtenances, franchise, equipment and all property claims and assets, superior to the claims of the Vermont and Canada Railroad and its first and second mortgage bondholders. The defendants are ordered to pay to the Clerk of the Court, for the benefit of the holders of the first equipment bonds, $3,196 36; for holder's income and extension bonds, issued in exchange for first equipment bonds, $288,821 66; for holders of second equipment bonds, $410,729 20; for holders of third equipment bonds $235,744.60; for holders of third equipment bonds (second issue), $217,328 20; for holders of income and extension bonds not stamped, $469,261 68; for holders of guaranteed bonds, $384,480 96; for holders of Stanstead, Shefford and Chambly bonds, $144,369 99, all with interest from Nov. 1, 1881; for holders of notes representing floating debts proved before masters, $503,750, with interest; for Grand Trunk Railway Company, $547,973 69, with interest from December 31, 1880, less $10,000, and same interest all on or before November 26, 1882, and all sums becoming due hereafter of principal and interest on the above bonds when due. In default of such payment defendants to be foreclosed on all equity redemption in the property above held subject to said claims, and they are ordered to deed and release all title in the same to W. H. H. Bingham of Stowe in trust for the orators and such other trust creditors as may be entitled. The claim of the Vermont Central Railroad is dismissed without prejudice on the objection of the Vermont and Canada Company, because their accounts as receivers and managers are unsettled. An appeal will taken to the Supreme Court.

THE Supreme Court of Missouri issued on the 17th ult. an alternative writ in the case of the Hannibal and St. Joseph Railroad Co. vs. the State Treasurer and the hearing is set for the 28th inst. This is under the proceedings for a writ of mandamus to compel the State Treasurer to certify that the Hannibal and St. Joseph Railroad Co. has liquidated all its indebtedness to the State.

Is a Sealed Railroad Note Negotiable?

A CRITICISM of Mr. A. J. Hirschl, which was recently published in the Albany "Law Journal," upon a recent decision of Judge Blatchford, of the United States Court, seems to us to be timely and justifiable. The case turned upon the question of the jurisdiction of the Federal courts in a suit brought upon a railroad company's note, to which the corporate seal was attached. Judge Blatchford held that such a note was not a "promissory note negotiable by the law merchant," and hence did not come within a statute giving Federal courts jurisdiction in suits brought upon such notes after they have come into the hands of a party outside of the district in which the maker resides, in case the original holder was a resident of the same district. See § 1, Act of Congress of March 3, 1875, 18 Stat. at Large, 470.) He says, in the case of Coe vs. The Cayuga Lake R. Co., 8 Fed. Rep., 534, "The instrument without the corporate seal will be a promissory note, negotiable by the law merchant, and the instrument with the corporate seal will be a specialty, and not a promissory note negotiable by the law merchant. If the capacity to make the instrument without as well as with the seal exists, it cannot, when made with a seal, be a promissory note by the law merchant." That is to say, if a negotiable promissory note has a seal attached to it, its negotiability, so far as suing upon it in the United States court is concerned, is destroyed. This decision, though supported by authorities, is contrary to the custom of trade, and seems to us to be a technical decision, to say the least. It is true that there are several decisions in the English reports, that say simply and broadly that an instrument under seal is a specialty and non-negotiable, but the recent decisions upon this point do not so clearly support this doctrine. In Imperial Land Co. of Marseilles, in re 40 L. J. Chanc. 93 and 11 L. R. Eq. 478—V. C. M., it was held that "instruments issued by a company (whose directors were empowered to draw, accept, or endorse negotiable instruments) in the form of debenture bonds, but which bound the company to 'pay to the bearer,' were promissory notes, which passed to the bearer free from any equities which might have attached to them as between the company and the original holders." In a recent decision of Judge Wells, late of the Supreme Court of Massachusetts, Haven vs. Grand Junction Railroad Co., 109 Mass., 96, it was held that coupons detatched from mortgage bonds under seal are negotiable by mere delivery, and may be enforced against the corporation by a bona fide holder, though such coupons are still a part of the mortgage debt and entitled to share pro rata with the holders of the remainder of the debt. This doctrine is also held in Beaver Co. vs. Armstrong, 44 Penn., Stat. 63, and Thompson vs. Lee Co., 3 Wallace, 327. There can be no doubt but that railroad notes under seal are universally treated by merchants and brokers as negotiable instruments, and if judicial proof were needed we might cite Crouch vs. Credit Foucier Company, 42 L. J., Q B. 183, where the opinion states that "of late years a custom of trade has prevailed to treat such bonds as negotiable instruments."

Bonner defines the law merchant as "the general body of commercial usages in matters relating to commerce. . . . It does not rest exclusively on the positive institutions and local customs of any particular country, but consists of certain principles of equity and usages of trade which general convenience and a common sense of justice have established to regulate the dealings of merchants and mariners in all the commercial countries of the civilized world."

Mr. Hirschl pertinently suggests that as the Act of Congress under discussion was passed in 1875, when it names promissory notes as "negotiable by the law merchant," it cannot mean as the law was considered in England, for there the notes were not at all negotiable by the law merchant, but only by statute, but that the meaning is evidently to embrace notes negotiable by the law merchant, whatever that law may from time to time be. The distinction that the note under discussion would, in the hands of a bona fide holder, be protected against defenses existing between the original, but would not be negotiable, is a very nice one, and one that will not be likely to be favorably regarded by the business men and holders of railroad securities. Mr. Hirshl's conclusion so well expresses our own belief in the matter that we quote it in full. He says:—

"The railroad note in question was fully negotiable under the 'law merchant;' it would have been taken without question by any banker or business man in the civilized world; it is in substance the same as the millions and millions worth of county, city, railroad, and other corporate bonds, notes, or securities which all Europe, including even England itself has been buying from America for these many years; and if now the greater part of such paper must be enforced through the State courts (for in most instances the maker and payee are residents of the same district), before courts and juries frequently of defendant's own election and choice, then the sooner Congress is persuaded to change the law, the better will it be for those, on the one hand, who hold these investments, and for those, on the other, who expect by their issue and by their sale at fair prices to realize needed funds from them."

A Tunnel Through the Pyrenees.

AT Madrid, Spain, on the 22d of November, the Chamber of Deputies passed a bill authorizing the construction of the Huesca and Canfranc Railway, with a subvention of 60,000 pesetas per kilometer. The cost of boring a tunnel through the Pyrenees is estimated at 13,000,000 pesetas, which will be borne equally by France and Spain. The news that a tunnel is likely soon to be made through the Pyrenees will surprise nobody in this age of gigantic engineering works. That which has been done twice over in the Alps can obviously be done in the second great chain of mountains in Europe, and, indeed, probably with a great deal less difficulty, considering the narrowness of the Franco-Spanish chain, as compared with the solid phalanx of mountains composing the Alpine group.

From the accounts now given of the project it would seem that the great range which separates Spain from France is to be pierced at a point nearly midway between the sea on the east and west. This would naturally connect it with the railway already formed on the North as far as St. Girons, and with the Spanish railway at Levida on the South. Such a course would enable the connecting lines of rails to come up the valley of the small river Salat on the French side to within a very few miles of the source of the Noguerra, in Spain. The railway from St. Maitory to St. Girons already follows for some miles the course of the river Salat, and a prolongation of some fifteen miles would take the road up nearly to its source on the northern slope of the Pyrenees. Thus, supposing the mouth of the tunnel on the other side to open close to the springs of the Noguerra River, a line of rails would be laid along the whole course of that stream, having Vogel and the Republic of Andopra on the east and Mount Maladetta on the west.

The most striking incident is not that the scheme should have come forward at this time, but that it should have been suggested by the Spanish and not by the French Government. It is the Cortes which is first to be asked to sanction the scheme, and it is the government of King Alphonso which first undertakes to find half the necessary funds.

Tennessee State Debt.

JUDGE FREEMAN, of the Supreme Court of Tennessee, is credited with saying that there is no prospect of the case involving the constitutionality of the act for the settlement of the Tennessee State debt being advanced upon the docket. It will have to await its regular order, and hence a hearing may be delayed for several months. This bill, which recognizes the full debt of the State, and promises to pay three per cent interest annually upon it, was passed at the last session of the Legislature, and received the signature of the Governor, but before the bonds were printed an injunction was gotten out, and a case to test the constitutionality of the law was carried to the Suprome Court of the State. The Nashville "World," the organ of the low-tax party, states that even if the law is declared constitutional "a large majority of the people of the State will use all legal means to defeat it." It further declares that "it is the merest bosh to talk about forever fixing a State law upon a majority of people who are opposed to that law."

Circular Elevated Railway in Vienna.

A project for constructing a circular elevated railway in Vienna, which for the last fifteen months has found employment for a large staff of English and Austrian engineers, is about to be carried out. The proposal is that wherever it may be possible it shall be carried above ground on iron columns. While the greater part of the railway would be elevated on iron pillars, yet, owing to the rise of the ground, it would have to pass along the Gartel Grasse in a cutting, the cross streets being carried over it on bridges. Before reaching the Wahringer Line, a length of tunnel, about 1,200 feet, would have to be made under the space in front of the grounds of the asylum for idiots. The length of the circular railway as projected is about 8½ miles, but it is proposed to make six branches, which would give a total length of about twenty-eight miles. The locomotives, weighing twenty-five tons, would be fireless and charged with steam from a stationary boiler. The cost of carrying out the scheme is estimated at $20,000,000. The population of Vienna and its suburbs, according to late returns, is 1,400,000.

Cincinnati Iron Market.

OFFICE OF E. L. HARPER & Co.
Cincinnati, Dec. 6, 1881.

The market is stiff for all grades. Sellers' quotations are readily accepted by buyers. Strong Neutral and Red Short Forge Irons are scarce. There is a good demand for Soft Foundry Irons.

AMERICAN Railroad Journal. ESTABLISHED 1831.

PUBLISHED WEEKLY BY THE

AMERICAN RAILROAD JOURNAL CO.,

At 23 Liberty Street, New York.

Subscription, per annum, in advance..... $5 00
Foreign Subscription, including postage..... 6 00

Purchases for the AMERICAN RAILROAD JOURNAL Co. are authorized only by the written order of Geo. F. Swain, Treasurer; and the Company will not be responsible for the payment of bills unless accompanied by such order.

Subscribers are requested to report to our office any irregularity in receiving the JOURNAL.

Contributed articles relating to Railroad matters generally, Mining interests, Banking and Financial items, Agricultural development, and Manufacturing news, by those who are familiar with these subjects, are especially desired.

Payments for advertising and subscriptions should be made by check payable to order of the Treasurer.

BRANCH OFFICE:
53 Devonshire St., Boston, Mass.

Mr. FREDERIC ALGAR, Nos. 11 and 12 Clements Lane, Lombard Street, London, E. C., England, is the authorized European Agent for the JOURNAL.

New York, Saturday, December 10, 1881.

Entered at the Post Office at New York City as Second-Class Mail Matter.

THE PRESIDENT'S MESSAGE.

PRESIDENT Arthur's message has been looked for with a peculiar interest owing not only to the painful circumstances by which it devolved upon him to prepare this important work, but also from the fact that there are at the present time an unusual number of international questions which our people are carefully studying, especially those prominent in commercial and financial matters. There had been many surmises concerning the tenor of the message, and as so little had been announced in advance as to its contents, an additional interest in it was created, as there must always be in unfolding a well-guarded secret to the public. There has been an unusually close criticism of the document from all quarters, but it is accepted almost universally as a clear, business like, and valuable statement, showing that a vast amount of hard study and work has been bestowed upon it during the past few weeks, and indicating a substantial and conservative policy. It contains a very distinct account of our relations with the various governments, embodying much interesting information. In the main the statement of our foreign relations and the reports touching upon our domestic commercial and financial affairs will be regarded as satisfactory and encouraging, and will serve to strengthen faith in the continuance of the prosperity which our country is witnessing.

A part of the President's message which will attract special attention here and abroad is that relating to the Panama Canal. The proposal of Colombia to the European powers to guarantee the neutrality of the canal has given rise to complications which have warranted our Government in defining its position plainly and promptly, as has been done by Secretary Blaine. President Arthur's message approves the representations of the case as they have been made, and announces that a modification of those clauses of the Clayton-Bulwer treaty bearing upon the subject has been formally presented to the British Government. The position of affairs at present and in the recent past of this important matter are stated as follows:

"This Government has not been unmindful of the solemn obligations imposed upon it by its compact of 1846 with Colombia, as the independent and sovereign mistress of the territory crossed by the canal, and has sought to render them effective by fresh engagements with the Colombian Republic looking to their practical execution. The negotiations to this end, after they had reached what appeared to be a mutually satisfactory solution here, were met in Colombia by a disavowal of the powers which its envoy had assumed, and by a proposal for renewed negotiation on a modified basis. Meanwhile this Government learned that Colombia had proposed to the European powers to to join in a guarantee of the neutrality of the proposed Panama Canal, a guarantee which would be in direct contravention of our obligation as the sole guarantor of the integrity of Colombian territory and of the neutrality of the canal itself. My lamented predecessor felt it his duty to place before the European powers the reasons which make the prior guarantee of the United States indispensable, and for which the interjection of any foreign guarantee might be regarded as a superfluous and unfriendly act. For seeing the probable reliance of the British Government on the provisions of the Clayton-Bulwer treaty of 1850, as affording room for a share in the guarantees which the United States covenanted with Colombia four years before, I have not hesitated to supplement the action of my predecessor by proposing to her Majesty's government the modification of that instrument, and the abrogation of such clauses thereof as do not comport with the obligations of the United States toward Colombia, or with the vital needs of the two friendly parties to the compact."

The President speaks of the continuing decline of the merchant marine of the United States as being deplorable, and says:

"In view of the fact that we furnish so large a proportion of the freights of the commercial world, and that our shipments are steadily and rapidly increasing, it is a cause of surprise that not only is our navigation interest diminishing, but it is less than when our exports and imports were not half so large as now, either in bulk or value. There must be some peculiar hindrance to the development of this interest, or the energy and enterprise of American mechanics and capitalists would have kept this country at least abreast of our rivals in the friendly contest for ocean supremacy. The substitution of iron for wood and of steam for sails has wrought great revolutions in the carrying trade of the world; but these changes could not have been adverse to America if we had given to our navigation interests a portion of the aid and protection which have been so wisely bestowed upon our manufactures. I commend the whole subject to the wisdom of Congress, with the suggestion that no question of greater magnitude or further-reaching importance can engage their attention."

The importance of the railroad construction now being pushed in Mexico by American capitalists is recognized as follows:

"As is natural with contiguous states, having like institutions and like aims of advancement and development, the friendship of the United States and Mexico has been constantly maintained. This Government has lost no occasion of encouraging the Mexican Government to a beneficial realization of the mutual advantages which will result from more intimate commercial intercourse, and from the opening of the rich interior of Mexico to railway enterprise. I deem it important that

means be provided to restrain the lawlessness so common on the frontier, and to suppress the forays of the Reservation Indians on either side of the Rio Grande."

CONSTRUCTION.

THE first train over the Aroostook River Railroad arrived at Pasque Isle, Me., on the 2d inst.

THE track of the Northern Pacific Railway was laid to Fort Keogh, Montana, on the 1st inst.

THE Atlantic and Pacific Railroad has been completed to a point 290 miles west of Albuquerque.

THE track of the Chicago, Texas and Mexican Railroad was completed to Cedar Hill, Texas, on the 30th ult.

THE Mexican Central Railroad has been completed to San Juan del Rio, a distance of 190 kilometres from the city of Mexico.

THE double track of the Troy and Greenfield Railroad between Greenfield and West Deerfield was put in operation on the 5th inst.

THE link of railway connecting the Toronto and Nipsissing with the Midland Railway at Woodville Junction, Ca., has been completed.

THE survey of the Gatineau Valley (Ca.) Railway is progressing satisfactorily. The engineers have extended their surveys to the Peche.

THE York Springs Railroad, to run from York Penn,, and connect at Dillsburg with the Harrisburg and Potomac Railroad is to be built at once.

THE track of the Toronto, Grey and Bruce Railway, running from Toronto to Owen Sound and Teeswater, was changed on the 3d inst. from narrow to standard gauge.

THE survey of the railroad from Corinne, Utah, to Yankton, Dakota, by the Central Pacific engineers, has been completed. The line crosses the Missouri 50 miles above Yankton.

The survey of the Texas and St. Louis Narrow gauge line from Mount Pleasant to Dallas, Texas, has been completed, and the grading is being pushed vigorously between those two places.

THE surveys of the different routes for the ship canal across the peninsula of Maryland and Virginia are about completed, and the engineers are now engaged in making maps of the surveys.

THE contracts for all the heavy work on the extention of the Valley Railroad from Staunton, Va., to Lexington have been let. Seventeen miles, or about one-half of the line, are now under contract.

THE laying of the third rail on the Denver and Rio Grande Railway, from Denver to Pueblo, 120 miles, will be completed by January 1st, 1882. On the 3d inst. there were about 30 miles to be laid.

THE track of the Gulf, Colorado and Santa Fe Railway was connected with the Texas and Pacific at Fort Worth on the 3d inst. It is expected that the line will be opened for business by the 15th inst.

THE extension of the Arkansas division of the St. Louis and San Francisco Railway, south from Fayetteville to Brentwood, Washington county, Arkansas, eighteen miles distant from Fayetteville, was opened on the 1st inst.

THE Chicago, Milwaukee and St. Paul Railway is being built through to Omaha from Chicago. The grading is finished and there are about 40 miles to be completed in the spring. It will be the shortest line between Chicago and Omaha, only 475 miles. The entire road through Iowa will be ballasted with rock.

THE Denver and Rio Grande Railway has now five separate divisions in which lines are in complete operation, viz: Denver and Leadville, Pueblo and Mexico, Gunnison, Kokomo, and the divisions embracing the local points on the Missouri river. The branches are the Silver Cliff, Elmoro and Manitou.

CONNECTION was made on the 1st inst. about 5 p. m., between the tracks of the Texas and Pacific Railway and the Southern Pacific Railroad. The junction was formed at Sierra Blanco, Texas, from 85 to 90 miles east of El Paso.

THE surveying parties engaged in running the line of the St. Louis and San Francisco Railway from Fort Smith to Texas are now 80 miles south of Fort Smith in the Choctaw nation, the right of way having recently been granted by the Choctaw council. The line is being surveyed through from Fort Smith to Paris, Texas, a distance of 160 miles.

THE Cleveland Plaindealer says that a contract has been signed between the Baltimore and Ohio and Buffalo, Pittsburg and Western Railroad Companies for an interchange of business, and that the latter company is to build an extension of 136 miles from New Castle, Pa,, to Chicago Junction, where it connects with the Baltimore and Ohio, thus giving the latter an outlet to Lake Erie.

THE Grand Rapids and Indiana Railroad Company let the contract, on the 1st inst., for building the northern extension of its road from the present northern terminus to the straits of Mackinaw, to L. A. Rose of Bronson & McDonald Bros., Grand Rapids. The terms of the contract are that the road is to be completed by June 15, next, and it is expected that passenger trains will be running to the straits by July 15th.

GEN. G. M. Dodge says that the New Orleans Pacific Railway from Shreveport to New Orleans, 300 miles in length, will be completed by the 1st of January, that a branch of the Missouri Pacific Railroad will be built from Alexandria to the Arkansas State Line, where a connection will be made with the St. Louis and Iron Mountain Railroad, that the latter road is being built from Noble, Ark., to the State Line, and that these two lines will be connected before the expiration of the coming year, when direct rail communication between St. Louis and New Orleans will be established and known as the St. Louis and New Orleans Short Line, and the building of the International and Great Northern from San Antonio to Laredo, Texas, will be finished by December 15. As soon as this work is completed an iron bridge will be built over the Rio Grande River, and then Mexican extension will be pushed forward rapidly. The extension will be known as the Mexican, Oriental, Interoceanic and International Railroad Company. It will be 700 miles in length and run almost an air line from Laredo to the City of Mexico.

ORGANIZATION.

THE directore of the Richmond and Petersburg Railroad Company, elected on the 29th ult., are : Fred. R. Scott, president, Bolling W. Haxall, D. W. Lassiter, H. K. Ellyson, R. R. Bridgers and W. T. Walters.

THE directors of the Parkersburg Branch of the Baltimore and Ohio Railroad Company, elected on the 28th ult., are : Samuel Spencer, president, John W. Garrett, Thomas Swann, W. W. Taylor, Decatur H. Miller, George R. Dennis, Robert Garrett, W. F. Burns, Johnson N. Camden, W. N. Chancellor and Caleb Bogges.

THE directors of the Boston and Winthrop Railroad Company, elected on the 3d inst., are: John H. Buttrick of Lowell, Samuel W. Hale of Keene, N. H., Samuel Ingalls of Winthrop, John Lowell, Jr., of Newton, Clarence A. Parks of Wakefield. The officers are: President, Samuel Ingalls; vice president, John H. Buttrick ; treasurer, Nelson K. Baker; clerk, C. N. Goodrich.

AT the annual meeting of the stockholders of the Pittsburg and Connellsville Railroad Co., held at Pittsburg, on the 5th inst., the following directors were elected : Robert Garrett, Mendes Cohen, Hugh Sisson, and Charles Webb, of Baltimore; William S. Bissell, John D. Scully, George A. Berry and Charles. L. Fitzhugh, of Pittsburg; William Baldwin, of Connellsville ; William H. Markle, of Greensburg; C. C. Markle, of West Newton ; and William H. Koontz, of Somerset. At a directors meeting held later, Robert Garrett was elected president, and J. B. Washington secretary and treasurer.

AT the annual meeting of the Iron Steamboat Company, of New York, held at Long Branch, N. J., on the 1st inst., the following gentlemen were elected directors for the ensuing year: George S. Scott, A. R. Whitney, Lewis May, William M. Earl, N. G, Miller, Samuel Carpenter, Washington E. Connor, C. E. Quincy, James D. Smith, William J. Hutchinson, Charles J. Osborn, Edward M. Field, Charles E. Loew, Christopher Meyer, George F. Baker, John H. Hall, Sidney Dillon, G. M. Dodge and G. P. Morosini. Resolutions of thanks were passed to George S. Scott, the President, Lewis May, Treasurer, and William M. Earl, Secretary, for serving the past year without compensation.

AT the annual meeting of the New York and New England Railroad Company, held in Boston on the 6th inst., the following board of directors was elected ; Jesse Metcalf, Jay Gould, Sidney Dillon, Cyrus W. Field, W. T. Hart, James H. Wilson, Jonas H. French, Eustace C. Fitz, George B. Roberts, H. J. Jewett, LeGrand B. Cannon, Russell Sage, Frederick J. Kingsbury, R. Suydam Grant and Henry L. Higginson. The board subsequently organized, and made choice of the following officers for the ensuing year: President, James H. Wilson; treasurer, George B. Phippen; secretary, James

W. Perkins ; executive committee, Jay Gould, Le Grand B. Cannon, Jonas H. French, William T. Hart and James H. Wilson, ex-officio. It was voted that the new board of directors choose four additional directors so that the board shall consist of nineteen members.

CONSOLIDATION.

THE Queen Anne and Kent Railroad has been formally united with the Delaware Division of the Philadelphia, Wilmington and Baltimore Railroad, and I. N. Mills has been appointed General Agent of the entire line, which now consists the New Castle and Wilmington, New Castle and Frenchtown, Delaware, and Queen Anne and Kent Railroads, and the Townsend and Smyrna branches.

THE articles of consolidation of the Texes and St. Louis Railroad Company of Arkansas and the Little River Valley and Arkansas Railroad Company of Missouri, under the name of the "Texas and St. Louis Railroad in Missouri and Arkansas," have been filed with the secrearry of state of Missouri. The consolidated roads will form an unbroken and continuous line of railroad from Texarkana, Ark., to Bird's Point, in Mississippi county, Mo.

ARTICLES were filed at Harrisburg, Penn., on the 2d inst., of the consolidation of the six railroad companies, mentioned in our last issue, under the name of the "Pittsburg and Rochester Railroad Company." With the construction of the road a new outlet will be furnished for the transportation of coal and oil in the western and northwestern portion of the State. Among other things, the road will be used to carry the products of the Rochester and Pittsbnrg Coal and Iron Company recently chartered. The stock of the consolidated railroad companies is principally held in New York.

INCORPORATION.

THE Cleveland, Akron and Columbus Railway Company, with $4,000,000 capital, was incorporated in Cleveland, Ohio, on the 1st inst., by Charles J. Conda, L. A. Russell, George D. Walker, Conrad Halze and Goshorn A. Jones, who recently purchased the Cleveland, Mount Vernon and Columbus Railroad at a judicial sale.

ARTICLES of incorporation of the Peoria and Chicago Railroad Company were filed in the office of the secretary of state of Illinois on the 3d inst. It is proposed to construct a railroad between the two cities named. The capital stock of the company is $3,000,000, and the incorporators and board of directors are Thomas D. Catlin and Edward C. Lewis of La Salle county, and Henry T. Glover, Henry S. Hawley and Addison L. Griffin of Chicago.

THE charter of the American Surety Company was filed in the office of the secretary of state at Albany, N. Y., on the 1st inst. The capital of the company is $500,000, and is to be fully paid in. The company's object is to issue bonds guaranteeing the fidelity of persons holding positions of pecuniary trust and responsibility ; also guardians' bonds in Surrogates' Courts, indemnity bonds to sheriffs, and guarantee all bonds and undertakings required of the courts of this State in civil actions and proceedings. The incorporators are: C. C. Baldwin, President Louisville and Nashville Railroad Company; O. D. Baldwin, Vice-President Fourth National Bank; F. N. Bangs, Attorney; George R. Blanchard, Vice-President New York, Lake Erie and Western Railroad Company; August Brandegee, Attorney; Lyman W. Briggs, late Vice-President Fidelity and Casualty Company; B. H. Bristow, ex-Secretary Treasury; Joseph S. Decker, of Messrs. Decker, Howell & Co.; R. P. Flower, Member Congress; R. Suydam Grant, Grant Locomotive Works; D. A. Heald, Vice-President Home Fire Insurance Company; Theodore Houston, Vice-President New York, Ontario and Western Railroad Company; Hugh J. Jewett, President New York, Lake Erie and Western Railroad Company; William S. Opdyke, Attorney; E. O. Perrin, Clerk Court of Appeals; Asa P. Potter, President Maverick Bank, Roston; A. V. Stout, President Shoe and Leather Bank ; Joshua Tracy, President Burlington, Cedar Rapids and Northern Railroad Company ; Julius Wadsworth, Vice-President Chicago, Milwaukee and St. Paul Railway Company; General James H. Wilson, President New York and New England Railroad Company.

PERSONAL.

A. R. Drew has been appointed chief engineer of the Canada Southern Railway.

Robert Garrett has been elected President of the Pittsburg and Connellsville Railroad Company.

Frank B. Clark has been appointed General Superintendent of the Chicago, Milwaukee and St. Paul Railway.

David H. Ennis has been appointed Assistant Superintendent of the Ohio Southern Railroad, with headquarters at Springfield, Ohio.

D. B. Tracy has been appointed Northern Passenger Agent for the Columbus, Hocking Valley & Toledo Railway, with headquarters in Detroit, Mich.

Alfred Horner for twenty-seven years Treasurer of the Philadelphia, Wilmington and Baltimors Railroad Company, died on the 6th inst., in his 75th year.

P. L. Booth has been appointed Superintendent of the Hocking Valley Division of the Columbus, Hocking Valley and Toledo Railway, vice W. H. Lott, resigned.

A. R. Starr has been appointed Superintendent of the Eastern Division, Pittsburg, Fort Wayne and Chicago Railway, in place of George S. Griscom, resigned.

The officers of the Iron Steamboat Company elected on the 2d inst are: President, George S. Scott; Vice-President, A. R. Whitney; Treasurer and Secretary, Wm. M. Earl.

Allen Manvel, hitherto General Superintendent and Assistant General Manager, has been promoted to be General Manager of the St. Paul, Minneapolis & Manitoba Railway,

E. R. Murphy hus been appointed Auditor of the Denver and Rio Grande Railway Company, Denver and Rio Grande Express Company, Rio Grande Western Construction Company, and Denver and Rio Grande Western Railway Company.

E. D. Standiford, formerly President of the Louisville and Nashville Railroad Company, has been unanimously elected Vice-President and Manager of the Louisville, New Albany and Chicago Railroad Company.

Gospel Cars.

A GENTLEMAN, having the appearance of a clergyman, passed through the incoming local trains on the New York, New Haven and Hartford Railroad, on Tuesday morning, and handed to each passenger a circular reading as follows: TO THE TRAVELLING PUBLIC—BELIEVING THAT the cause of Christ would be advanced by having a devotional car on each morning train into the city, (the religious exercises to consist of short Scripture reading, without comment, singing, and prayer, the whole not to occupy over 15 minutes) it was laid before the Superintendent of this railroad, and he requires 100 or more names to a petition for this object before granting the request. Hoping that you desire to help forward the cause of our common Master will prompt you to co-operate for this end, the writer, the Rev. W. W. Dowd, will shortly call to request your signature to the above-named petition.

The plan, Mr. Dowd said, was to make the experiment on one road, and, if it proved successful to adopt it on others, One car on certain trains, the rear one for instance, would be designated to hold the services in, and bills would be posted in the stations and cars announcing this fact. Before the services began, slips furnished by the Tract Society containing the Scriptural lesson and books of hymns would be distributed, to enable all to join. Mr. Dowd said that he would give his time for one month to establish the work, and then would resign it to other hands. He did not want to make the idea denominational, and for that reason would ask the Pastors of all churches in Stamford, Rye, Mt. Vernon, and other places on the road to select laymen traveling between New York and the different points to conduct the services. Mr. Dowd thought a car ought to be set apart for Christian people as well as smokers and card-players. He obtained his idea from the remark of a conductor on the Old Colony Railroad who said that he did not see why the devil should have all the cars on the train and the Christians not one.

THE special masters appointed to find and report the indebtedness of the Vermont Central Railroad managers have filed their statement in the Franklin County Court. It shows the amount of bonds presented and proved was $3,800,000, out of a total issue of $4,300,000. The overdue interest amounts to more than $2,000,000. The floating debt is about $1,000,000. The Central Vermont claim for cash advances approximates $700,000. This makes a total trust indebtedness of $7,500,000. The report says further that in 1872 the floating debt of the managers was $2,800,000, and owing to the stringency of the money market the notes went to protest. Rival roads then tried to throw the Central Vermont into bankruptcy, and it was then that the new company was organized under a charter from the Legis-

lature, and in the spring of 1873 advanced $1,000,000 in cash to take up the notes of the former management.

Statement of the Public Debt of the United States, December 1, 1881.

Interest paid by the United States, $51,467,272 02; interest repaid by transportation of mails, &c., $14,708,886 34; interest repaid by cash payments: 5 per cent. net earnings, $655,198 87; balance of interest paid by United States, $36,104,186 81.

The foregoing is a correct statement of the public debt, as appears from the books and Treasurer's returns in the Department at the close of business, November 30, 1881.

CHARLES J. FOLGER,
Secretary of the Treasury.

Dilapidated Freight Cars.

New England railroad officials criticise somewhat sharply the character and condition of the freight cars received by them from beyond the Hudson. In very many instances the cars are old, worn-out, and shaky structures, with their running parts in wretched order, constructed of cheap and inferior materials, and injured by hard use and heavy loads. A freight train on the consolidated road near Stanford was partly wrecked Sunday morning by a broken axle on a Pennsylvania Road car, and two or three similar accidents on that road during the past month were traced to like causes. The other day in New Haven, when a freight train came to a stand still near the round-house, one of the wheels of a Western freight car dropped off. The accident and delay of trains last Saturday night on the New York and New England Road was due to a defective axle on a Pennsylvania Road car, and our exchanges show many other instances illustrating the defective character of freight cars coming from outside New England. Of course, cars owned by New England roads are occasionally in poor order and cause accidents, but the bulk of the testimony is against those from outside roads. —*Hartford (Conn.) Courant.*

The Coal Trade.

The leading coal carrying companies make the following reports of their tonnage for the week ending November 26, and for the year to same date, compared with their respective amounts carried to the same date last year:

	Week.	1881.	1880.
Reading Railroad	182,749	7,952,888	7,102,633
Schuylkill Canal	24,971	587,094	524,810
Lehigh Valley	115,865	5,691,240	4,606,415
Delaware, Lackawanna and Western	87,638	3,878,166	3,190,105
Shamokin	20,100	971,675	840,949
Central R. R. of New Jersey	133,410	4,164,159	3,636,931
United R. R. of New Jersey	32,146	1,417,875	1,040,028
Pennsylvania Coal	32,101	1,287,461	1,028,980
Delaware and Hudson Canal	80,432	3,266,132	2,757,554
Huntingdon and Broad Top Mountain	5,549	472,815	391,110
Penn. and New York	34,783	1,505,276	1,134,520
Clearfield, Pa	46,883	2,171,278	1,542,813

The total tonnage of anthracite coal from all the regions for the week ending Nov. 26, as reported by the several carrying companies, amounted to 611,014 tons, against 589,644 tons in the corresponding week last year, an increase of 21,370 tons. The total amount of anthracite mined for the year is 26,315,478 tons, against 22,050,526 tons for the same period last year, an increase of 4,264,952 tons. The quantity of bituminous coal sent to market for the week amounted to 99,705 tons, against 75,249 tons. in the corresponding week of last year, an increase of 24,456 tons. The total amount of bituminous mined for the year is 4,494,824 tons, against 3,915,673 tons for the corresponding period last year, an increase of 579,151 tons. The total tonnage of all kinds of coal for the week is 710,719 tons, against 664,893 tons in corresponding week last year, an increase of 45,826 tons, and the total tonnage for the coal year is 30,810,302 tons, against 25,966,199 tons, same date last year, an increase of 4,844,103 tons. The quantity of coal and coke carried over the Pennsylvania Railroad for the week ending November 26 was 176,454 tons, of which 131,917 tons were coal and 44,537 tons coke. The total tonnage for the year thus far has been 8,213,062 tons, of which 6,059,666 tons were coal and 2,153,396 tons coke. These figures embrace all the coal and coke carried over the road east and west. The shipments of bituminous coal from the mines of the Cumberland coal region during the week ended November 26 were 51,597 tons, and for the year to that date 1,982,190 tons, an increase of 48,081 tons as compared with the corresponding period of last year. The coal was carried to tidewater as follows: Baltimore and Ohio Railroad—week, 32,058 tons; year, 1,259,662 tons; increase compared with 1880, 126,226 tons; Chesapeake and Ohio Canal—week, 18,473 tons; year, 468,171 tons; decrease compared with 1880, 129,102 tons. Pennsylvania Railroad—week, 1,863 tons; year, 251,443 tons; increase compared with 1880, 48,042 tons. The coal was brought from the mines as follows: Cumberland and Pennsylvania Railroad—week, 42,870 tons; year, 1,727,364 tons. George's Creek and Cumberland Railroad—week, 7,271 tons; year, 180,682 tons; Baltimore and Ohio Railroad—week, 1,182 tons; year, 62,966 tons. West Virginia Central and

Pittsburg Railway—week, 941 tons; year, 4,079 tons. The Reading Railroad shipment for last week, ending December 3, was 198,200 tons, of which 34,000 tons were sent to and 40,900 tons shipped from Port Richmond, and 21,700 tons sent to and 20,500 tons shipped from Elizabethport. The aggregate coal tonnage of the Reading Railroad for the fiscal year ended November 30, 1881, is estimated at 8,072,000, an increase of 892,202 tons over the previous year. The fiscal year of the Lehigh Valley Railroad also ended November 30th. Its coal tonnage was 5,791,376, an increase of 1,184,961 tons over the previous year.—*Phil. Ledger, Dec.* 5.

Shirts as Life Preservers in Mines.

Many men burned in the mines by the explosion of gas owe their deaths to the fact that they have persisted in working without any shirts or other protection for their bodies save pantaloons. Often it happen that an explosion of gas occurs which would prove comparatively slight in its effects but for the great surface over which the burns extend. The treatment closes all the pores of the skins over the burned parts, and where these are extensive the patient experiences a sort of asphyxia—seems to be smothered to death. Even burns of a slight depth, if embracing a large surface of the body, almost invariably prove fatal. It is against the rule in many mines for the operators to work without shirts, and it would be well to enforce the rule in all the mines and reduce the number of fatal cases at least 10 per cent. There is great temptation to throw off clothing in some mines, especially those which are very deep, as the temperature rises one figure for every fifty feet in depth, and in many mines the air that is forced into the chambers becomes heated by the steam pipes in the downcast, and loses much of its vitalizing quality before reaching the limits of the mine. But where there is gas stripping is dangerous. Thomas Riley, who died on Saturday, owes his death to cutting off the sleeves of his shirt and leaving it unbuttoned in the back.—*Scranton Republican.*

Extension of the Japanese Telegraph.

The telegraph system in Japan, which dates from 1871, comprised at the beginning of last year 3,929 miles of wire. The total number of telegrams during the year was 1,272,756, of which about 96 per cent were in Japanese, while international messages numbered 22,695. The Japanese language having no regular alaphabet, it became necessary for telegraphic purposes to form a combination of Morse characters to represent the sound of the syllabary known as the Katakana. This was effected by using the letters of the international code, supplemented by others formed of five dots and dashes (figures excepted) to produce a total of 47 signs, and the alaphabet thus constituted is stated to have given tolerable satisfaction during the nine years that have passed since its introduction. A telegraph school has been started for training Japanese youths as operators, and during the last year 227 were appointed to new offices or sent out as reliefs, leaving 97 under tuition. They are taught to write and speak English and French, and receive the rudiments of an English education. In 1880 there were 112 offices open for general traffic, local and international, and 70 others connected with government departments, railways or police, while 53 are kept open day and night. There are 348 Morse instruments in use, 26 single needle blocks and 29 telephones of the Bell pattern.

Imports of Dry Goods at New York.

The Imports of Foreign Dry Goods at New York for the month of November, were :

In the United States Circuit Court, Richmond, Va., on the 17th ult., in the case of the Atlantic, Mississippi and Ohio Railroad, Judges Bonds and Hughes presiding, the petition of the English bondholders asking the payment of expenses amounting to $481,000, was denied. The court decided that the payment of five per cent of the debt to said holders withheld in May last should be paid off, making payment in full.

Railway Rules in Russia.

The Russian Minister of Ways of Communication has issued a series of regulations for the settlement of disputes between passengers on railroad trains in regard to the right to close or open the windows. The rules are five in number, of which the first lays down the law that all windows are to be closed in winter time, while the carriage is being warmed. The second modifies this during the rest of the year, passengers having the right then to demand the opening of the windows if the temperature is not lower than 55 degrees. When this temperature is attained the stoves must be lighted and the windows kept hermetically closed. Rule No. 3 states that on the mercury rising above 55 degrees Fahrenheit, all the windows in the carriage may be opened, subject, however, to the "unanimous approval of all the passengers present." Should there be a "side wind" all the windows on the windward side are, by Rule 4, to be kept closed, and a demand may be made for the general opening of the windows on the other side of the carriage. Finally, by Rule 5, the Minister orders that, in all quarrels between passengers regarding carriage windows, the head guard is to be applied to, and his decision is to be binding on all concerned.

In returning a receipted bill to Pratt & Co., advertising agents, Ninth and Arch streets, Philadelphia, recently, we took occasion to say : "Many thanks for prompt remittance. Were advertising agents equally prompt as a rule publishing would be a pleasant business." Nuff sed!—*Manayunk Chronicle.*

To the above we would add that our experience with the above firm has been of a most pleasant character. Paying full rates on their advertising contracts and cashing bills promptly when presented are features that Messrs Pratt & Co. have adopted in their business. We rank them as A No. 1 agents.—*Frankford Gazette.*

We have been doing business with Messrs. Pratt & Co. for many years, and have always found them fair-dealing gentlemen in all their intercourse.—*Philadelphia Press.*

Our business relation with Messrs. Pratt & Co. commenced in 1870, and from that time it has been of the most pleasant character. It affords us pleasure to do business with such men, and we wish them much of that success which is sure to find its way to all who do business in such an honest, upright and straightforward way.—*Chester Valley Union.*

Messrs. Pratt & Co. are well and favorably known in Philadelphia as advertising agents, and the above comments are certainly well deserved.—*Philadelphia Press.*

The *News* takes pleasure in adding to the above statements that all of its business with Messrs. Pratt & Co. has been entirely satisfactory and their payments prompt.—*Philadelphia News.*

Messrs. Pratt & Co. have for many years been patrons of the *Star*, and we have always found them punctual and exact in their dealings. The many pleasant things spoken of them by our neighbors are what might be expected from the established character of the firm.—*Philadelphia Evening Star.*

We cheerfully bear witness to the prompt business methods which have characterized the firm of Messrs. Pratt & Co. in all their transactions with this journal.—*Philadelphia Record.*

To the above we add our meed of praise—we have always found Messrs. Pratt & Co. prompt and reliable, and we have every reason to believe that they are entirely responsible.—American [N. Y.] Railroad Journal.

AMERICAN RAILROAD JOURNAL.

Financial and Commercial Review.

THURSDAY EVENING, Dec. 8, 1881.

The ruling rate for call loans in the morning hours was 6 per cent with, in exceptional cases, a commission not exceeding 1-32 of 1 per cent a day. In the afternoon and at the close it was 6 per cent, though during the last hour the stock brokers paid 1-64@1-32 of 1 per cent a day in addition.

The posted rates for prime bankers' sterling were 4.81@4.85; the actual rates were 4.80@4.80½ and 4.84½, with cable transfers 4.84⅛@4.85⅛, and prime commercial bills 4.78½@4.79. The actual rates for continental bills are as follows: francs, 5.20⅝ and 5.25⅛; marks, 94@94⅛ and 94⅞@95, and guilders, 39⅝@40.

At the recent meeting of the stockholders of the Virginia Midland Railroad Company the directors were authorized to issue bonds to the amount of $4,000,000 to retire the first and second preferred stock of the company and for other purposes. Mr. Baldwin, on behalf of the trustees, reported that, as authorized by the scheme of organization, there had been issued to all proper claimants stock as follows: of the first preferred, $1,500,000; of the second preferred, $2,000,000, and of the common stock, $800,000. The trustees reported that they had issued $4,000,000 of preferred, $800,000 of common stock, and new bonds aggregating $7,635,000, and that after the payment of all claims there would remain on hand nearly $900,000. President Barbour stated that he had, by outside authority, subscribed $250,000 to the North Carolina Midland Railroad, and requested that the meeting ratify that subscription made by him as President of the Virginia Midland Railway Company. A resolution approving his action was adopted.

The Chief of the Bureau of Statistics at Washington, in his monthly statement, reports that the excess of merchandise for the month ending October 31, 1881, was $9,271,536; month ended October 31, 1880, $31,668,571; twelve months ended October 31, 1881, $217,887,358; twelve months ended October 31, 1880, $155,576,327. The excess of imports of gold and silver coin and bullion was as follows: month ended October 31, 1881, $7,163,013; month ended October 31, 1880, $14,552,138; twelve months ended October 31, 1881, $69,931,138; twelve months ended October 31, 1880, $67,256,689.

By referring to the monthly statement of the Secretary of the Treasury, on another page, it will be seen that the total debt of the United States on the 30th of November, 1881, (including $13,623,837.46 interest) amounted to $2,023,328,207.64, less cash in the Treasury $245,042,866.99, leaving net $1,778,285,340.65. Of the bonded debt ($1,564,305,200) $250,000,000 bears 4½ per cent interest, $739,287,800 bears 4 per cent, and $560,957,400 bears 3½ per cent. Interest has ceased upon $10,648,315, and $434,750,855 bears no interest, being in the shape of currency, gold and silver certificates and certificates of deposit. In addition to the above there are outstanding $64,623,512 bonds issued to Pacific Railroads, and commonly known as the currency 6s. Of the cash in the Treasury $151,274,111 is credited as available at date.

According to a recently compiled statement of the Auditor of Public Accounts of Virginia, the total value of railroad property in that State, both real and personal, amounts to $26,940,173 75. The net income of all the roads for the year ending February 1, 1881, was $351,301 35. The roads whose valuation run into the millions are Norfolk and Western, $7,595,751; Washington City, Virginia Midland and Great Southern, $4,710,500; Chesapeake and Ohio, $3,953,641; Richmond and Allegany, $1,913,336 41; Seaboard and Roanoke, $1,618,450; and the Shenandoah Valley, $1,207,200.

The Comptroller of the Currency reports that during the year ending November 1st, 86 National banks were organized, with an aggregate authorized capital of $9,651,050, to which $5,233,580 in circulating notes were issued. Twenty-six banks, with an aggregate capital of $2,020,000, and a circulation of $1,245,530, voluntarily discontinued business during the same period. The comptroller repeats his recommendation for the repeal of the taxes upon bank capital and deposits and bank checks.

The Missouri State Fund Commissioners have decided to call in $82,000 Renewal Funding 5-20 bonds for redemption on the 31st of December.

The Denver and Rio Grande Railway Company has notified the New York Stock Exchange of an issue of $5,000,000 of its capital stock for the purpose of extending the line in Colorado to connect with the Denver, Rio Grande and Western Railway at the boundary of Utah; for laying third rail between Denver and Pueblo, and making necessary changes in the superstructure therefor and for other improvements.

The coinage executed at United States Mints during the month of November was as follows: double eagles, 111,000 pieces, value $2,220,000; eagles, $441,831 pieces; value $4,418,360; half eagles, 672,000 pieces, value, $2,360,000; silver dollars 2,300,000, value, $2,300,000; cents, 5,340,000, value, $53,400; total gold, 1,224,836, value. $9,998,360; total silver, 2,300,000, value, $2,300,000; total minor, 5,340,000, value, $53,400; total coinage, 8,864,836, value, $12,351,760.

The total receipts of the Brooklyn Bridge Company for the past six months have been $13,335,962.13 and the expenditures $13,323,155.68. The cash on hand is $12,806.45 and the liabilities amount to $95,846.41. An application is to be made to the Legislature of the State for $300,000 more.

The Chicago, Portage and Superior Railway Company has given to the Farmers' Loan and Trust Company, of New York, a mortgage covering all of its property of every description. The consideration named is $10,200,000, payable on the first day of January, 1921, with interest at 6 per cent per annum, half yearly, in gold.

A telegram from London states that the Committee on Securities of the London Stock Exchange have admitted the stock of the Denver and Rio Grande Railway Co.

The Milwaukee, Lake Shore and Western Railroad Company has called in $1,200,000 of its sectional first mortgage 7 per cent bonds. General mortgage 6s will be issued instead. Holders have the option of receiving 105 for the old bonds or new bonds in exchange. The interest on the called bonds ceased on the 1st of December.

The Lehigh Coal and Navigation Company has bought a three-fifths interest in the quarries of the Bangor Slate Company for $100,000 cash. Improvements are to be made to the quarries and the capital of the company increased to $250,000.

The Commissioners of the District of Columbia, in their annual report to the President, state that the receipts into the Treasury of the District from all sources during the year ended June 30, 1881, were $4,147,817.75; the expenditures amounted to $3,737,049.67—leaving a balance on hand July 1, 1881, including trust and water funds, of $410,768.08. There was an increase in receipts from taxes and revenues applicable to general expenses, as compared with the preceding fiscal year of $219,645.17, and an

increase of receipts from all sources of $321,026.40.

A mortgage was filed of record with the County Recorder at Cincinnati, Ohio, on the 25th ult., for bonds to the amount of $18,000,000 by the Baltimore, Cincinnati and Western Railroad—a company under the laws of Maryland, Virginia and Ohio. The mortgage is to the Mercantile Trust Company, of New York, and is signed by E. A. Hoyt, the president of the railroad company.

Pumping Petroleum in Russia.

It has for some years been the practice in this country to transport crude petroleum by pumping it through a long main, extending in some cases over considerable distances. This system has not been established to any extent in Europe, but is now, however, being carried on on an extensive scale in the Caucasus, in South Russia, and Messrs S. Owens & Co., of London, England, have just completed an extensive pumping plant for this purpose. The plant consists of a number of small Blake pumps with 10 inch steam cylinders, 3½ inch pumps and 12 inch stroke, which will be used to deliver the oil through branch services into the tanks from which the main pipes draw. For the main oil line Messrs. Owens have constructed three pairs of duplex Blake pumps with a new arrangement of valve gear, the valve of one pump of each pair being moved by connection with the piston rod of the other pump, and vice versa. The pumps have 24 inch steam cylinders with 30 inch stroke, the piston rod being double, and giving motion through a strong crosshead to a pair of single-acting plunger pumps with 4½ inch rams of phosphor-bronze, these pumps being intended to deliver the oil against a pressure of 1,500 pounds per square inch.

Address MUNN & CO., Patent Solicitors, Pub's. of SCIENTIFIC AMERICAN, 37 Park Row, New York. Hand book about Patents free.

Established in 1831.

AMERICAN RAILROAD JOURNAL.

PUBLISHED WEEKLY BY THE

American Railroad Journal Company,

No. 23 Liberty Street,

NEW YORK.

The AMERICAN RAILROAD JOURNAL, the oldest railroad paper in the world, was established during the construction of the first 100 miles of railroad in this country. Its files of the past fifty years furnish a complete record of the development of American railroads and faithful chronicles of the kindred financial interests. It contains features of special value to investors and others desirous of being readily acquainted with values and transactions connected with the development and working of our railroad systems, and much of interest to the general reader. It is taken by leading railroad men, investors and banking houses in this country and Europe, where it has long been a recognized authority in its special field, being recommended as such by "Chambers' Encyclopædia" and other standard foreign and domestic publications. We give below a few extracts from opinions of the press:

From "Herapath's Railway Journal," London.

The AMERICAN RAILROAD JOURNAL, one of the most honest and outspoken of American papers.

From the "Journal of Commerce," New York.

The AMERICAN RAILROAD JOURNAL, a most valuable weekly newspaper. Is now half a century old

From the "Cincinnati Price Current."

The AMERICAN RAILROAD JOURNAL's list of patrons is composed largely of the oldest and heaviest financial houses in the United States, Great Britain and the Continent, and of railway companies, manufacturing establishments and banking and commercial houses in this country.

"From the "Pittsburg (Pa.) Chronicle"

The AMERICAN RAILROAD JOURNAL is authority on railroad news.

From the "Washington (D. C.) Law Reporter."

The AMERICAN RAILROAD JOURNAL is a most valuable publication, and to all persons interested in American railroads, earnings, dividends, etc., etc., it is almost invaluable.

OFFICE OF

AMERICAN REFRIGERATOR LINE,

New York, Oct., 1881.

Shippers of Foreign, Domestic, and Fresh Fruit, Imported Liquors, Patent Medicines, Essential Oils, Mineral Waters, Lager Beer, Ales and Porters, Oysters, or, in fact, any class of goods that needs protection from heat or cold while in transit to the West and Southwest, either in Summer or Winter, will do well to ship the same by the new and elegant cars of the

A. WHITNEY & SONS,
CAR WHEEL WORKS,
Callowhill and 16th Streets,
PHILADELPHIA, PA.

We furnish CHILLED WHEELS for Cars, Trucks, and Tenders. CHILLED DRIVING-WHEELS and TIRES for Locomotives. ROLLED and HAMMERED AXLES.
WHEELS AND AXLES FITTED COMPLETE.

ESTABLISHED IN 1836.

LOBDELL CAR WHEEL COMPANY,
Wilmington, Delaware.

GEORGE G. LOBDELL, *President.*
WILLIAM W. LOBDELL, *Secretary.*
P. N. BRENNAN, *Treasurer.*

J. C. BEACH, *Treas.* C. H. ANTES, *Sec'y.*

THE
ALLEN PAPER CAR WHEEL COMP'Y.
Gen'l Office, 240 Broadway, N. Y.
WORKS AT PULLMAN, ILL., AND HUDSON, NEW YORK.

AN INDESTRUCTIBLE WHEEL FOR PASSENGER CARS AND ENGINES.

E. W. VANDERBILT. E. M. HOPKINS.

VANDERBILT & HOPKINS,
Railroad Ties,
CAR AND RAILROAD LUMBER, WHITE AND YELLOW PINE AND OAK.
120 Liberty Street, N. Y.

Also North Carolina Pine Boards, Plank, and Dimensions Lumber to order. General Railroad Supplies.

COTTON-SEED HULLS
For Packing Journal Boxes of Cars.
NATIONAL RAILWAY PATENT WASTE CO.
240 Broadway, - New York.

ENGINEERS, Mechanics, Mill Owners, Builders, Manufacturers, Miners, Merchants, &c., will find in MOORE'S UNIVERSAL ASSISTANT AND COMPLETE MECHANIC, a work containing 1016 pages, 500 Engravings, 461 Tables, and over 1,000,000 Industrial Facts, Calculations, Processes, Secrets, Rules, &c., of rare utility in 200 Trades. A $5 book free by mail for $2.50, worth its weight in gold to any Mechanic, Farmer or Business Man. *Agents Wanted.* Sure sale everywhere for all time. For Ill. Contents Pamphlet, terms, and Catalogue of 500 Practical Books, address NATIONAL BOOK CO., 78 Beekman St., New York.

ALL ABOUT KANSAS

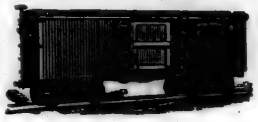
THE WEEKLY CAPITAL is an EIGHT-PAGE, 48-COLUMN paper, published at TOPEKA, KANSAS, giving full and reliable State news, crop and weather reports from every County. $1 00 per year. Sample copy free.

FIDELITY AND CASUALTY COMPANY,
187 Broadway, New York.
CASH CAPITAL, - - - - - $250,000.

FIDELITY BONDS.

Bonds issued guaranteeing the fidelity of persons holding positions of pecuniary trust and responsibility, thus securing a Corporate Guarantee in lieu of a Personal Bond where security is required for the faithful performance of the duties of employes in all positions of trust.

ACCIDENT POLICIES.



Policies issued against accidedts causing death, or totally disabling injury, insuring from FIVE HUNDRED DOLLARS to TEN THOUSAND in case of death, and from THREE DOLLARS to FIFTY weekly indemnity in case of disabling injuries.

WM. M. RICHARDS, *Pres't.* JOHN M. CRANE, *Sec'y.*

PARDEE CAR WORKS.

WATSONTOWN, PA.
PARDEE, SNYDER & CO., LIMITED,
PROPRIETORS.

Manufacturers of
Mail, Baggage, Box, Gondola, Flat, Gravel, Ore, Coal, Mine, and Hand Cars; Kelley's Patent Turn-Tables, and Centers for Wooden Turn-Tables; Car Castings, Railroad Forgings, Rolling-Mill Castings, Bridge Bolts and Castings.

☞We have, in connection with our Car Works, an extensive Foundry and Machine-shop, and are prepared to do a general Machine Business.

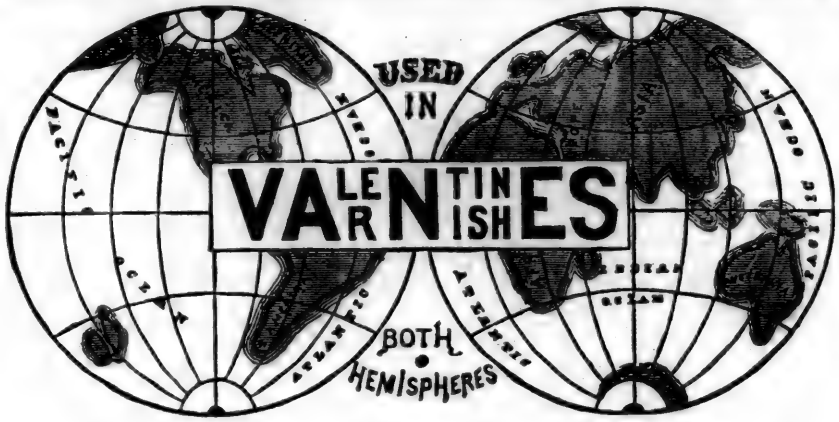
Chairman, ARIO PARDEE. *Treasurer and General Manager,* H. F. SNYDER. *Secretary,* N. LEISER.

NEW YORK CITY OFFICE: ROOM A, No. 137 BROADWAY.
C. W. LEAVITT, Agent.

STEEL CASTINGS

FROM 1-4 TO 10,000 lbs. WEIGHT.
True to pattern, sound and solid, of unequaled strength, toughness and durability.
An invaluable substitute for forgings or cast-irons requiring three-fold strength.
CROSS-HEADS, ROCKER-ARMS, PISTON-HEADS, ETC., for Locomotives.
15,000 Crank Shafts and 10,000 Gear Wheels of this steel now running prove its superiority over other Steel Castings.
CRANK-SHAFTS, CROSS-HEADS and GEARING, specialties.
Circulars and Price Lists free. Address
CHESTER STEEL CASTING CO.
407 Library St., PHILADELPHIA
Works, CHESTER, Pa.

NEW YORK, LAKE ERIE, AND WESTERN RAILWAY



TO THE TRAVELING PUBLIC.

During the Centennial season—six months closing September 10, 1876—the Erie Railway carried almost THREE MILLION passengers, without a singe accident to life or limb, or the loss of a piece of baggage.

And for a whole year the official records of the United States Post Office Department show the arrivals of Erie Railway trains in New York, on time, to be from 15 to 27 per cent ahead of competing lines.

Facts well worthy the consideration of travelers.

Leaves From Old Journals.

SOME RAILROAD INCIDENTS.

BY THE HON. JOSIAH QUINCY.

I SHALL merely glance at a great subject. The story of the inside management of our earlier railroads is aside from the purpose of the present papers. Students of finance would be interested in the perplexities which were surmounted, the expedients that were tried, the bitter opposition that was worked down; but for the general reader it is sufficient to say that the Massachusetts railroads were built by patriotic men for the public benefit. Few believed in them as investments, and the State, when her franchise was asked, burdened it with a condition most creditable to the foresight of her legislators. I quote the protective clause, which permits the people to foreclose on any one of the old railroads whenever they choose to do so:—

"The Commonwealth may at any time during the continuance of a charter of any railroad corporation, after the expiration of twenty years from the opening of said railroad for use, purchase of the corporation the said railroad and all the franchise, property, rights and privileges of the corporation, by paying them therefor such a sum as will reimburse them the amount of capital paid in, with a net profit thereon of ten per cent per annum from the time of the payment thereof by the stockholders to the time of such purchase."

There is statesmanship looking out for to-morrow as well as for to-day! Let us remember this when we are disposed to rail at the lack of intelligence in our democratic legislation. Proceeding upon the same line, Massachusetts, before giving her last installment of assistance to the road connecting her capital with Albany and the West, reserved the right to purchase the same by paying the par value of the shares, with seven per cent thereon. It would take many millions of dollars to measure the value of these morsels of legislation to the Bay State. It might be worth dollars to be reckoned by the hundred million had all our States similar writings upon their statute-books. It is not the actual use of such reserved rights, but their existence in terrorem which protects the interests of society against the greed of some small minority of its members. In 1867 I petitioned the Legislature of Massachusetts to exercise its power of purchase in the interest of the people, and to assume the ownership of the railroads connecting us with the West. The mighty corporations took the field like regular armies, well officered, well disciplined, and with a full commissariat. The people, so far as they could be heard from, were full of spirit; but they were an unorganized militia, without available funds to provide leaders and fee lawyers. The corporations managed to prevent a purchase which would have doubled the business of Boston, and, by its influence upon other roads, would have gone far to settle the question of cheap transportation. But the popular feeling was so strong that the legislature was compelled to give much that was wanted, though not all that was asked. The railroads were compelled to do something to earn the ten per cent which they exacted from the public; some of it, too, representing no legitimate outlay in stock. On the 19th of April, 1880, my journal records a chance meeting with the late Judge Colt, one of the able counsel who were retained for the railroads. He spoke of the revival of commercial interests and of the increase of general prosperity which had resulted from the compulsory union of the Western and Worcester roads, together with the fiat of the legislature, which obliged the tracks to be carried to deep water. "You would never have brought this about," he said, "had it not been for that power of purchase which the State had reserved. That was the fulcrum upon which the lever rested by which inert masses were moved aside for the benefit of the public." It was even so.

There was one question which could not be avoided after the establishment of railroads: "What are the rights of negroes in respect to this new mode of locomotion." And the general voice of the community replied in the usual chorus: "Neither here nor elsewhere have they any rights which a white man is bound to respect." The prejudice against persons of color can be but faintly realized at the present time. No public conveyance would carry them; no hotel would receive them, except as servants to a white master. The day in May when our State government was organized was universally called "Nigger'Lection," because on that day negroes were accorded the privilege of appearing on the Common; whereas, if one of this class of citizen's presumed to enter the Common on Artillery Election (which took place about a month later), he was liable to be pursued and stoned by a crowd of roughs and boys. After the Providence Railroad opened the shortest route to New York, it was found that an appreciable number of the despised race demanded transportation. Scenes of riot and violence took place, and, in the then existing state of opinion, it seemed to me that the difficulty could best be met by assigning a special car to our colored citizens. Some of our cars were then arranged like the old stage-coaches—there being three compartments upon a truck. These coaches communicated only by a small window at the top, and one of the compartments I assigned for the exclusive use of colored persons. One morning at Providence I entered the middle carriage, and was presently attracted by voices in the next division—that allotted to travelers of the black race. I arose and looked through the little window just mentioned, and saw that a Southern gentleman (if by a stretch of courtesy he may be so called) had entered the compartment, which was occupied by a well-dressed negro, who wore spectacles. The Southener was evidently much excited at finding a Negro taking his ease in a first-class carriage. There had been some words between them, which I did not perfectly hear. What I did hear, upon taking my position at the little window, was this:—

Southerner: "You black rascal, so you're a voter here, are you?"

Negro: "Yes, I am a free citizen and a voter."

Southerner: "Well, I have taken just such fellows as you and tied them up by their thumbs and whipped them till the blood ran down to their heels."

Negro: "Then, sir, you shed your brother's blood."

Southerner: "Why, you —— nigger, you don't mean to say that I'm your brother?"

Negro: "Yes; for it is written that He made of one blood all nations of men for to dwell on the face of the earth."

The effect of this quotation was as the last straw upon the burdened camel. It fairly broke the patience of the knightly personage who had entered the carriage. He instantly sprang upon the negro, catching him by the collar; and almost as quickly I entered the compartment and ordered him to desist.

"Well, who are you?" said the assailant, with a mighty oath. I replied that I was the president of the road, and should see that he was arrested if he did not immediately leave the carriage; and, having said this, I added a few words of measureless contempt for his conduct. Muttering some profanity, the man left the compartment, while I called the conductor to show him to the proper coach. At that time the trains made quite a stop at Mansfield, during which most of the passengers left the cars. I was standing upon the platform of that way-station, when the Southerner approached me, with a beaming face and all the suavity of manner which was characteristic of slaveholders when upon their good behavior at the North. He gracefully apologized for his conduct, saying that he was not accustomed to see negroes treated as white persons, and that the sudden introduction to such a spectacle had caused an excitement that he was unable to control. Before he had finished speaking, we were joined by the negro, who, in a manner no less gentlemanly, thanked me for my interference, and, producing a handsome pocket-book, offered me his card. The amazement with which the gentleman from the South regarded this proceeding is altogether indescribable. His blank and helpless astonishment was of the sort which might be succeeded by a burst of indignation or a burst of laughter. Fortunately, the comic side of this latter-day warning at length succeeded in making itself predominant.

"Well, take me home!" he said. "I've seen all I came for. Spectacles are good; but a nigger with a visiting-card. It just knocks me down and makes me as weak as a baby. A 'nigger with a visiting-card!' Well, I am surely dreaming, and that's a fact."

The above incident is an extreme illustration of a state of feeling which has happily passed away. Its inhumanity was only equaled by its vulgarity. The existence of slavery in the Southern States presented a difficult problem to thoughtful and patriotic citizens, and good men were unable to agree upon the path of duty.

The sources from which mighty rivers take their rise have always been interesting to explorers. They find some petty rivulet, which oozes out of the mud, and marvel its feeble current should swell till it bears the commerce of a nation. The beginnings of great departments of human enterprise have something of the same interest, and I have just found an old letter, addressed to me on the 27th of October, 1838, which led to results quite overpowering in their magnitude. The writer is William F. Harnden. He tells me that he has applied for a post of conductor upon the Western Railroad, and solicits my influence, as treasurer of the road, "should you think me worthy of the office." Harnden had been selling tickets at the Worcester Railroad depot, but found this occupation much too sedentary for his active nature. He was a man who wanted to be moving. For some reason, which I do not recall, Harnden did not get the conductorship; but his application brought me in contact with this lithe, intelligent young fellow, who wished to be on the go, and I suggested to him a new sort of business, which in the hands of a bright man I thought might be pushed to success. As director and president of the Providence Railroad, I was compelled to make weekly journeys to New York, where the bulk of our stock was held. The days of my departure were well known, and I was always met at the depot by a bevy of merchants' clerks, who wished to entrust packages of business papers, samples of goods, and other light matters to my care. The mail establishment was at that time utterly insufficient to meet the wants of the public. The postage was seventeen cents upon every seperate bit of paper, and this was a burdensome tax upon the daily checks, drafts, and receipts incident to mercantile transactions. I was ready to be of service to my friends, though some of them thought my good-nature was imposed upon when they found that I was obliged to carry a large traveling-bag to receive their contributions. I kept this bag constantly in sight on my journey, and, upon arriving in New York, delivered it to a man whom the merchants employed to meet me and distribute its contents. Now, it occurred to me that here was an opportunity for somebody to do, for an adequate compensation, just what I was doing for nothing. I pointed out to Mr. Harnden that the collection and delivery of parcels, as well as their transportation, might be undertaken by one responsible person, for whose services the merchants, would be glad to pay. The suggestion fell upon fruitful soil. Harnden asked me for special facilities upon the Boston and Providence road, which I gladly gave him, and with the opening year he commenced regular trips (twice a week, I think he made them), bearing in his hand a small valise; and that valise contained in germ the immense express business—contained it as the acorn contains the forest of oaks that may come from it; but many generations are required to see the magnificence of the forests, while the growths of human enterprise expand to their wonderful maturity in one short life. Harnden's fate was that too common with pioneers and inventors. He built up a great business by steady industry, saw all its splendid possibilities, tried to realize them before the time was ripe, and died a poor man at the age of thirty-three. In attempting to extend the express business to Europe, he assumed risks that were ruinous, and the stalwart Vermonter, Alvin Adams, took his place as chief in the great industry which had arisen under his hands.

[To be continued].

A Lecture on the Telegraph.

The Rev. Edward S. Gregory, rector of one of the Episcopal churches at Lynchburg, Va., delivered a lecture in that city recently on "The Tongue of Fire," alias the telegraph. The lecture was heard by a large and attentive audience, and the discourse, being humorous from first to last, the lecturer carried the crowd with him. The Lynchburg News gives the following summary of the interesting facts stated by Mr. Gregory in his lecture:

"It began with a hasty glance at the various devices for communicating at a distance before the invention of the electric telegraph. Dean Stanley was authority for the statement that the Jews used a system of signals to herald their return to Jerusalem at the close of the Babylonian Captivity, 536 B. C. Polybius gave an account of the use of signaling by the glancing of the sun on waving shields of brass. Signals were used at the siege of Vienna by the Turks, and in connection with the same expedient as employed by Captain John Smith at Olimpach the speaker defended the memory of the founder of Virginia against recent assailants in a brief episode. An extract was read from Carlyle's History of the French Revolution, giving an account of Chappe's telegraph, so-called, in the year of 1795. Leaving the subject of signals, which he called the suburbs of the telegraph, the speaker spoke of Ben. Franklin's identification of lightning and eltricity as the first step in the progress of electrical discovery. There had been prophecies before, however, of the telegraph, or rather of sympathetic magnets for the correspondence of friends at a distance. Galileo had described such an instrument, and in the 241st Spectator was another account. The discovery of chemical electricity by Galvani was the next step, and the voltaic file was even more important, resulting now in the modifications of Daniell's and Grove's batteries, which were still in use. Oersted's demonstration of the relation between electricity, magnetism and galvanism led immediately to the grand discovery, of which the main credit was accorded Prof. Morse, though Bain and Sir Charles Wheatstone were the original patentees, in England. The story of Morse's struggle to get an appropriation from Congress, and of his success, when he had already despaired, was told in detail. After the experiment of the first line between Washington and Baltimore was successful, Congress refused to make further appropriations, and Morse, who had undertaken to extend the line to New York, and whose first company had placed but $15,000 of stock, was in despair, out of funds, and not having completed the line between Baltimore and Philadelphia. In this crisis the funds were advanced by Messrs. A. S. Abell, of the Baltimore *Sun*, Wm. M. Swain, Philadelphia, Col. R. M. Hoe, the press manufacturer, Mr. Alfred Vail, of New Jersey, Hon. B. B. French and Hon. Amos Kendall. The Legislature of Maryland organized a new company, with Kendall for president, and the others served as officers and directors, agreeing to take no compensation. Morse was thus enabled to carry out the project, and the telegraph became a national institution. It was to the credit of the South that the discovery by Commodore Maury, of Virginia, of the telegraphic plateau between Newfoundland and Ireland, made the cable under the Atlantic a possibility, and the patronage of a Southern journal gave the first assistance to the original inventor. For the Baltimore *Sun* had received the first telegraphic report of a President's message in 1846, and the only press special that crossed the Atlantic over the ill-starred cable of 1858.

"The lecturer described the process of the Morse system, and closed with a general survey of the influence of the telegraph in civilization, the abolition of minor languages, as prophesied by Prof. Mueller, &c. Reference was made to the sympathy expressed in Mr. Garfield's sufferings by the whole world through the wires, and the purchase of the telegraph by government, as in England, was advocated."

A Lecture on Iron.

A lecture was delivered at the rooms of the Young Men's Christian Association, Montreal, on the 28th ult., by Mr. Donald on the subject of Iron. He spoke first of the vast quantities of iron, in a gaseous state, which had been discovered by the spectroscope to exist in the sun. The earth had probably been in the same condition, but, as it cooled, the iron solidified and was gathered into masses. Iron is often found in water—in running streams as the protoxide of iron, and in stagnant pools as the peroxide. Iron ore is formed by water using up that part of vegetable matter which goes to make coal, so that coal and iron are not found next to each other. Among the different forms in which iron is found are—bog iron ore, which contains a good deal of organic matter and water; hemitite, from which the volatile matter had been driven off by great heat; magnetic iron, a compound of the peroxide and the protoxide, yielding a large quantity of iron, and found in the Laurentian rocks and other places in Canada; spathic iron or iron stone, containing about 30 per cent. of iron, and found in England together with coal and limestone, which were used in smelting it; and there is iron pyrites, containing a good deal of sulphur and found in great quadtities in Canada. Manufactured iron is to be had as cast iron, malleable iron or steel. The pig cast iron of commerce contains from 3 to 5 per cent. of carbon. To make wrought iron the process of puddling is resorted to, driving off the carbon, and the iron is then rolled. Steel contains about one per cent. of carbon, cast iron is first produced; the carbon is driven off, and then iron ore is added till the requisite quantity of carbon is obtained in the steel.

The Indiana, Bloomington and Western Railroad Company has leased the Indianapolis, Decatur and Springfield Railroad for fifty years, agreeing to pay it 30 per cent of the gross earnings of the leased line. It is further agreed that this percentage shall not fall below $200,000 a year. The purpose of this arrangement is to extend the leased line westward from Springfield to some point on the Mississippi River, where connection may be made with lines to Kansas City. The increase of business that will be brought to the leased lines by these connections is considered of great advantage to it.

AMERICAN Railroad Journal. ESTABLISHED 1831.

PUBLISHED WEEKLY BY THE

AMERICAN RAILROAD JOURNAL CO.,

At 23 Liberty Street, New York.

Subscription, per annum, in advance..... $5 00
Foreign Subscription, including postage..... 6 00

Purchases for the AMERICAN RAILROAD JOURNAL Co. are authorized only by the written order of Geo. F. Swain, Treasurer; and the Company will not be responsible for the payment of bills unless accompanied by such order.

Subscribers are requested to report to our office any irregularity in receiving the JOURNAL.

Contributed articles relating to Railroad matters generally, Mining interests, Banking and Financial items, Agricultural development, and Manufacturing news, by those who are familiar with these subjects, are especially desired.

Payments for advertising and subscriptions should be made by check payable to order of the Treasurer.

BRANCH OFFICE:
53 Devonshire St., Boston, Mass.

Mr. FREDERIC ALGAR, Nos. 11 and 12 Clements Lane, Lombard Street, London, E. C., England, is the authorized European Agent for the JOURNAL.

New York, Saturday, December 17, 1881.

Entered at the Post Office at New York City as Second-Class Mail Matter.

EMINENT RESPECTABILITY.

THE above heading represents a disease. What barnacles are to a ship, this disease is to progress. A ship whose bottom is covered with barnacles can plough through the water at a much less speed than if her copper was clean and bright. Just so progress is slow where eminent respectability is at the bottom. There are men who are good and capable but are always poor. Their poverty is not the result of any lack of ability; neither for want of an opportunity to make their abilities felt. The trouble is, that the opportunities coming to them are a little one side of the regular groove in which they were drilled, and they dare not launch out. They have rich and influential friends, and they are afraid of losing caste with these if they step one side of the regular beaten path. These men of eminent respectability accomplish nothing, and when reproved for their lack of results, claim that they have not tried, and blame some one as an obstacle, or the business in which they are engaged as not being up in their standard.

There are business firms in every large community who once led the van. They were at the head of the line in their particular branch and all the rest in the same branch were lesser lights. There came a time when some young, enterprising firm felt the public pulse and made a new departure. The old firm watched the young firm grow with rapid strides and at last take the lead, forcing them to the rear. This result was not the work of a minute, nor an hour, nor a day. It was the result of years, and during many of these years they could have held their own simply by burying their ancient notions and keeping pace with modern ideas. But no, they were a firm of too eminent respectability to do anything of the sort, and preferred to be out-stripped than to lead if the old familiar tracks must be forsaken for new ones. They are like the man who for years barely kept from starving to death in Nevada, when one day a friend sent him funds to come East and then provided him with a paying position on his arrival. He worked for some months, but the society was so different, and this thing and that thing was such, that at last he came to the conclusion that he would rather bury his bones beneath the sage brush of Nevada than live like a gentleman in Massachusetts. His bones are buried beneath the sage brush of Nevada.

A few weeks ago the successors of an old established house made a new departure in their method of advertising. This house dates its origin farther back than the memory of the writer of this article, but during the memory of the writer, other houses have commenced business, and by stepping aside from the old ruts have with energy and push taken a financial position far ahead of this old established house.

This old established house has a new partner who is alive on the issues of to-day and dares forsake the beaten path for the new. He does so, and hands are lifted in holy horror, while the agonizing cry is heard, "Shades of the departed, what do you think of this new departure!" Wait and see the result. We are no prophets, but there is no harm in stating that we expect to see this firm take its old time place in the race and the others falling into line.

But there is a department in which this eminent respectability disease works a far greater injury than in the case of the individual or the firm in business. This is the department of church work. Here we have an institution claimed by its adherents to have been founded by Him who created all things. We are told that He instituted His church for the benefit of all men. Now in this city, as in all other cities, there are multitudes of churches, and the eloquent sermon of the pastor is delivered to a congregation of a hundred, when it should be listened to by thousands. What is the matter? The churches are well warmed, the seats well cushioned, the choir well trained. Look at the members, the leading members, and the reason is made plain. They are eminently respectable men, too respectable to touch other than a gloved hand, or brush against other than a broadcloth coat. The minister preaches, the choir sings, the church is warmed and lighted, and these eminently respectable people use it as a Pullman Palace Car and ride to Heaven, as they suppose. What becomes of the multitude outside?

Now there is an eminent respectability which is truly so, a respectability too eminent to lie or practice deceit, to steal or defraud, a respectability which looks upon man as a brotherhood, and realizes it individually, in business and in church. This is the respectability which comes to the front and leads the van. But the eminent respectability of which we have been writing takes receding steps until at last it tumbles into the grave. Look at the individuals, firms, churches, that are now sleeping, and over whose forms we can write—Died of eminent respectability.

NEW ROUTES AND THEIR TENDENCY.

THERE is a strong probability that the ensuing year will see important changes in the course which the products of the central grain-growing sections, as well as those of some parts of the Southwest and the Pacific coast, will take in seeking ports for European shipment. Extensive preparations are being made at Newport News for the handling of the business that it is expected will be turned in that direction by the completion of the Chesapeake and Ohio Railway extensions. At the same time, most active measures are on foot for pushing the Mississippi river grain-carrying trade, which last season exhibited such wonderful development. The Chesapeake and Ohio Railway, through arrangements being perfected for its connections with the Southwest, will assume, with its Pacific allies, the position of a through transcontinental route ere long, and by the coming spring that part of this great line connecting the Mississippi with the Atlantic will be completed so that through cars can be run from Memphis to Newport News.

These two great routes, the trans-continental railroad system and the Mississippi valley water route, are important influences in transportation matters and are already recognized as such. But there seems to be little uneasiness in this direction, among the long established lines. It is not so much the railroads that are to be affected by this change of grain routes as it is the commercial importance of their termini, for the growth of the transportation demand upon the main lines is likely to be proportionate to the growth of the transportation capacity. The incentive given to local enterprises by the opening of railroads and improvement in their management stimulated by competition, together with the enormous increase of our western productions promised in the near future, by the unprecedented immigration and settlement of the past year, give a reasonable guarantee for a fair amount of business for all the lines in question, at least during prosperous and busy times.

The railroads may safely be relied upon to do their part toward controlling the current of traffic and directing it into channels most desirable for their own purposes and those of the local interests with which they are connected. There is no need of avoiding the accusation that railroads are prone to cater to the local interests of most value to them. It is a natural law that forces them to do so. There are marked differences in the manner with which sea ports encourage the railroad to come to their assistance in developing their commerce. Terminal facilities and the expense of maintaining them after they are obtained are of course among the greatest considerations affecting the selection of shipping points, and when there is a competition between different parts of the country for the maintenance of commercial supremacy it remains for the people to come to the assistance and encouragement of the railroads working for their interest. The railroads will naturally turn with the most zeal toward the source from which the most substantial encouragement comes.

ACCORDING to the report of the Bureau of Statistics there were exported from the United States during the ten months ending October 31, 422,213,216 gallons of petroleum, valued at $40,017,980, against $295,520,798 gallons, valued at $28,829,945, for the corresponding ten months of last year. The quantity exported last October was $54,244,846 gallons, an increase of 20,179,592 gallons over October, 1880.

CONSOLIDATION.

A CONSOLIDATION agreement between the Rabun Gap Short-line Railroad Company, the Clayton Railroad Company and the Knoxville and Augusta Railroad Company has been registered with the Secretary of State in Nashville, Tenn. This agreement is made to consolidate the above roads into one company and under one management.

THE agreement recently entered into by the directors of the Midland Railway Company of Canada, for the amalgamation of that company with the Toronto and Nipissing, the Victoria, the Whitby, Port Perry and Lindsay and the Grand Junction Railway companies, was ratified at a special meeting of the share and bond holders, held at Port Hope on the 13th inst. The general plan is a through line from Toronto to Ottawa, with feeders to Georgia Bay and the Pacific Railway, and a connection with the Atlantic seabord by means of existing railways.

CONSTRUCTION.

THE Missouri Pacific Railroad was completed on the 10th inst. to within ten miles of Waco, Texas.

THE ceremony of turning the first sod of the Lachute and St. Andrews Junction (Ca.) Railway took place on the 8th inst.

FROM Puerto Plata, November 29th, we learn that the building of the railroad from Santiago to Samana is making rapid progress.

THE first regular schedule trains ran through to and from Newburg and Boston on the 8th inst. on the New York and New England Railroad.

IT has been decided to change the track of the Cincinnati and Eastern Narrow Gauge Railroad from the narrow to the standard gauge, and to extend the road to Portsmouth, with a branch to Gallipolis.

THE California Southern Railroad has been completed from San Diego for a distance of 35 miles. There are 35 bridges upon this section, the largest 65 feet high and 250 feet in length. The heaviest grade is 116 feet per mile and the deepest cut 40 feet.

THE last rail on the New Orleans Pacific Railway, between Shreveport and Cheneyville, was laid on the 11th inst. This gives an all-rail route thence to New Orleans, by connecting with Morgan's line at Cheneyville. Forty-two miles of the New Orleans Pacific remain yet to be completed below Cheneyville.

THE Chinese Government has decided to lay a railway line, formerly between Shanghai and Woosung, from the coast of Formosa to the sugar districts. The line originally laid by foreigners was bought by the Chinese, torn up by the Mandarins, and the material and rolling stock transported to Formosa, where it has been allowed to remain idle until now.

THE last rail on the Marquette and Mackinaw Railroad was laid on the 9th inst., thus completing the line from the Straits of Mackinaw to Marquette. There were a few miles of track still to be laid, between Cheboygan and the straits. When finished there will be a continuous line between Detroit and Marquette, the only break being at the straits, where a powerful iron ferry boat is already on hand to ferry trains across the intervening four or five miles. The line will soon be opened the entire length for business.

CONNECTION was made between the New York and New England and the New York, Lake Erie and Western Railroad, on the 12th inst., and the first regular passenger train left Fishkill on the Hudson for Boston on that day. The first car to cross the Hudson River without breaking bulk was loaded with live turkeys, shipped from Livonia on the Rochester Division of the New York, Lake Erie and Western Railroad, and consigned to Providence, R. I. An official of the latter company is said to have facetiously remarked that the character of this first cargo is symbolical of the fact that they will be able hereafter to "talk turkey" to all competitors for New England business.

IN order to accommodate persons coming into the city from points a short distance away—say from Tarrytown and Irvington—who do not receive much advantage from rapid transit when all the trains stop at all the stations in the city, it is proposed to build a third track on the Ninth Avenue Elevated Railway on which the trains will not stop at more than three or four stations from the Battery to the Harlem River. In the middle of the day 'shopping' trains will probably be run. People coming by the New England road, if these arrangements should be carried out, would change cars at One hundred and fifty-ninth st., and be brought to the city by the fast line on the third track. It is intended to put up three more stations on the Sixth avenue line at Eighteenth, Twenty-eighth and Forty-seventh streets.

INCORPORATION.

ARTICLES of incorporation were filed at Albany, N. Y., on the 10th inst. of the San Bartoil Mountain Mining Company, capital $50,000,000. Operations are to be carried on at Tepic, State Jalisco, Mexico, and the business is to be transacted in New York. Charles Imbourg, James D. Sands and Charles R. Callahan, of New York, are the incorporators.

THE Shawnee, Hocking Valley and Columbus Railroad Company was incorporated at Columbus, Ohio, on the 6th inst. with a capital stock of $800,000, by Frank B. McElhinny, W. O. Henderson, Josiah D. Cotton, Frank B. Baird, Carl H. Bunham, John C. Donovan and A. H. Wilson. It is to run from Columbus to Shawnee through the counties of Perry, Hocking, Fairfield, Pickaway and Franklin, with offices in Columbus. This route contemplates the use of the berme bank of the canal as far as Lockbourne or Lancaster, from which points it is but a short distance to Shawnee and the heart of the coal and iron regions. It is claimed that the road on this line can be built very cheap.

THE Arizona and Nevada Railroad and Navigation Company has been formed at San Francisco, Cal. The object of the company is to construct a line between Callville, Nev. and Yuma, with extension by rail or water, as may hereafter be determined, to Port au Sable and Libertad on the Gulf of California. The com-

pany has been incorporated under the laws of Arizona, but has its principal business offices in San Francisco. The capital stock is $20,000,000. The San Francisco directors are P. Peckham, John N. Risdon, John Lloyd, Robert N. Risdon and J. W. Smith. The Arizona directors are Paul Breon, John J. Gasper, Frank Staple and W. P. Stymus, of New York. The road will pass through a line of mining districts on the eastern bank of the Colorado river. From Port au Sable the line will continue to Altar and through a rich mining district to Libertad.

THE Cincinnati, Selma and Mobile Railroad Company was incorporated at Selma, Ala., on the 12th inst. by Frederick Wolffe, the financial manager of the Erlanger syndicate, who recently bought the Selma and Greensboro Railroad, Theodore Cooke, President of the Cincinnati, New Orleans and Texas Pacific Railroad, George F. Doughty, Secretary, Edgar M. Johnson, Attorney, Louis Krohn and Thomas T. Gaff, directors. Those gentlemen incorporated the company and elected Frederick Wolffe, President, Theodore Cooke, Vice-President, Maximilian Culm, Sec'y and Treasurer. Frederick Wolffe, of Montgomery, Ala.; Theodore Cooke, Edgar M. Johnson, George F. Doughty, Louis Krohn and Thomas T. Gaff, of Cincinnati; Samuel A. Carlton, of Boston, Mass.; C. M. Shelley, of Selma, Ala., and Thomas R. Roulhac, of Greensboro, are the directors. The company will work the Cincinnati Southern to Chattanooga, the Alabama, Great Southern from Chattanooga to Eutaw Springs, and thence the old Selma and Greensboro to Selma. Connection with Mobile will be secured. This is an important link in the lines of the Erlanger syndicate. Selma is thus placed on another of the leading avenues of communication of the South, being already upon the East Teneessee, Virginia, and Georgia and the Louisville and Nashville systems.

THE charter of the Salina and Northwestern Railroad Company was filed at Topeka, Kansas, on the 8th inst. This road is designed as a feeder to the Union Pacific and Missouri Pacific Railroads. The capital of the company is $5,000,000. The main line runs from Salina by way of Lincoln Centre to the west line of the State at a point on the west of Sherman County. The company also intend to build a branch line from Lincoln Centre to the west line of Cheyenne County by way of Delphi, Osborne County, passing through the counties of Lincoln, Osborne, Rooks, Norton, Decatur, Rawlins and Cheyenne. The estimated length of the main line is 300 miles and that of the branch 275 miles. The directors are Sidney Dillon and Jay Gould, of New York; S. H. H. Clark, of Omaha; S. T. Smith, of Kansas City; J. P. Usher, of Lawrence; O. L. Williams and H. P. Dillon, of Topeka. The principal object of this new line is to obtain possession of some smaller lines and meet all in a sytem which will permit the deflection of trains from the Pacific at Kearney, running over the St. Joe and Denver to Maryville, then to Irving on the Central branch, thence to Manhattan and Burlingame, and then by building a road from Burlingame to Ottawa, a distance of only thirty miles, direct connection is made with the Missouri Pacific for St. Louis. This route is a very direct one and avoids all pools at Kansas City, Atchison and Leavenworth.

ARTICLES of association of the Tonawanda, Wiscoy and Genesee Valley Railroad Company were filed on the 10th inst. The route which it is proposed to cover is from Caneadea, Allegheny County, N. Y., via Hume, Alleghany, Pike and Eagle, to Arcade, in Wyoming County, a distance of 26 miles. This is a narrow gauge line and a link of the chain from Coudersport, Penn., to State Line, Wellsville, and Arcade, a distance of 94 miles. The directors are Asahel L. Cole, Wellsville; George H. Blackman, Belmont; James M. Davis, Belfast; John H. Selkreg, Ithaca; Alfred D. Linsely, New York; Marsena Drake, Carlos Stebbins, Addison Beebe, George A. Green, G. A. Van Gorder, Pike, N. Y.; J. P. Manchester, M. W. Skiff, John S. Minard, Hume, N. Y. The survey will commence immediately and the road will be built early in 1882. It will be a valuable feeder to the Rochester and Pittsburg, one of the tributaries to the New York, Chicago and St. Louis. It connects with the Genesee Valley, the Buffalo, New York and Philadelphia, the Tonawanda Valley and Cuba, and the New York, Lake Erie and Western. This is one of four different railroads now proposed between Wellsville and the Pine Creek country—the Wellsville, Coudersport and Pine Creek, the Tonawanda, Genesee Valley and Pine Creek, and the Tonawanda, Wiscoy and Genesee Valley. The routes are feasible, having no excessive grades or heavy curvatures, and can be built at moderate expense. The proposed road will traverse a rich, fertile country, without railroad facilities today which furnish much local traffic. The stock is largely being taken by local capitalists. Tne Tonawanda, Wiscoy and Genesee Valley will be the ninth railroad in Wyoming County.

ORGANIZATION.

THE Long Branch Railroad Company, has been reorganized, with H. S. Little as President.

THE directors of the Richmond, York River and Chesapeake Railroad Company, elected on the 13th inst., are: Thomas Clyde, President, William P. Clyde, A. G. Buford, T. M. Logan, W. H. Gwathmey and Reuben Foster, directors.

THE John P. King Manufacturing Company, with a capital of $1,000,000, will be organized at Augusta, Georgia, December 28. The stock has been subscribed, over $400,000 in Boston, New York and Philadelphia, and the balance in Augusta.

THE directors of the European and North America Railway Company, elected on the 16th ult., are: Noah Woods, President, N. C. Ayer, T. J. Stewart, S. H. Blake, F. A. Wilson, Chas. P. Stetson, H. N. Fairbanks, Sprague Adams, John S. Ricker.

AT the annual meeting of the Richmond and Alleghany Railroad Company, held in Richmond, Va., on the 13th inst., the following board of directors was elected: W. H. Barnum, Lime Rock, Conn.; John P. Branch, Richmond, Va.; C. S. Brice, Lima, Ohio; Daniel Pettis, Cleveland, Ohio; F. O. French, New York; J. H. Gray, Boston, Mass; John J. McCook, New York; William L. Scott, Erie, Pa.; G. I. Seney, New York; Samuel Sheehar, New York; S. W. Simpson, New York; Samuel Thomas, Columbus, Ohis; C. E. Wortham, Richmond.

THE directors of the Providence and Springfield Railroad Company, elected on the 7th inst., are as follows: William Tinkham, Albert L. Sales, John L. Ross, James O. Inman, Horace A. Kimball, Sidney Dillon, Edward Pearce, Jr. William Tinkham was re-elected President.

PERSONAL.

W. P. HARRIS has been appointed Division Superintendent on the Chespeake and Ohio Railway.

M. H. SMITH has been elected Third Vice-President and Traffic Manager of the Louisville and Nashville Railroad Company.

SAMUEL FINLAY, has been appointed General New England Agent of the Pennsylvania Railroad, with headquarters in Boston.

J. H. TENNEY has been appointed Superintendent of the New York and Greenwood Lake Railroad, vice W. P. Harris, resigned.

W. W. BORST has been appointed General Superintendent of the Denver and Rio Grande Railway, vice G. W. Cushing, resigned.

GENERAL BENJAMIN F. TRACY, of Brooklyn, has been appointed Associate Judge of the Court of Appeals, in place of Judge Andrews, promoted to Chief Judge.

THE Railroad Conductors' Convention at New Orleans have elected R. B. Brown of the Louisville and Nashville Railroad, President for the ensuing year. The next annual meeting will be held at Milwaukee.

W. R. THOMPSON, who succeed John B. Jones in the banking firm of Semple & Jones, Pittsburg, Pa., is a son-in-law of Mr. Thaw. Mr. Thompson was elected not long since President of the Mechanics' Saving Bank of that city.

JOHN W. JONES, President of the Buffalo, Pittsburgh and Western Railroad Company, has been elected President of the Buffalo, New York and Philadelphia Railway Company, including its narrow gauge lines and coal properties.

THE four additional directors authorized at the meeting of the New York and New England Railroad Company, on the 6th inst., will be chosen at the first regular meeting of the board of directors, one from Rhode Island, one from Connecticut, and two will represent New York connections.

C. F. MCCOY, who was for many years Chief Clerk to the Superintendent of the Eastern Division, Pittsburgh, Fort Wayne and Chicago Railway, has been appointed Assistant Superintendent of the Sioux City and Pacific Railway, with headquarters at Blair, and in charge of all that Company's lines west of the Missouri river.

Mr. F. W. Huidekoper has resigned the office of President of the Chicago and Eastern Illinois Railroad Company, and Mr. Franklin H. Story, of Boston, Mass., Vice-President of the company, has been elected in his place.

The Coal Trade.

THE leading coal carrying companies make the following reports of their tonnage for the week ending December 3, and for the year to same date, compared with their respective amounts carried to the same date last year:

	Week.	1881.	1880.
Reading Railroad	75,921	75,921	85,168
Schuylkill Canal	9,722	9,722	.....
Lehigh Valley	60,864	60,864	68,602
Delaware, Lackawanna and Western	102,466	3,980,652	3,284,143
Shamokin	23,859	995,535	860,478
Central R. R. of New Jersey	35,142	35,142	40,878
United R. R. of New Jersey	44,554	1,462,429	1,076,313
Pennsylvania Coal	32,103	1,319,565	1,054,378
Delaware and Hudson Canal	81,169	3,347,302	2,835,271
Huntingdon and Broad Top Mountain	9,267	482,083	394,225
Penn. and New York	16,425	16,425	15,448
Clearfield, Pa	55,135	2,226,413	1,598,495

The coal tonnage of the Lehigh Canal and Lehigh and Susquehanna Division of the Central Railroad of New Jersey, above given, is for two days ending December 2. The tonnage above given for the Reading Railroad, Schuylkill Canal, Lehigh Valley Railroad and Pennsylvania and New York Canal and Railroad is for three days ending December 3. The following statement shows the coal tonnage of the various companies whose fiscal years ended November 30, compared with the previous year:

	This Year.	*Last Year.*	*Increase.*
Reading Railroad	8,072,440	7,179,298	893,042
Schuylkill Canal	600,447	524,989	75,458
Lehigh Valley Railroad	5,791,376	4,606,415	1,184,981
Central New Jersey	4,052,692	3,494,216	558,476
Penn. & New York Road	1,527,607	1,140,981	386,626

The total tonnage of anthracite coal from all the regions for the week ending Dec. 3, as reported by the several carrying companies, amounted to 658,536 tons, against 581,987 tons in the corresponding week last year, an increase of 76,549 tons. The total amount of anthracite mined for the year is 26,974,014 tons, against 22,632,502 tons for the same period last year, an increase of 4,341,513 tons. The quantity of bituminous coal sent to market for the week amounted to 114,759 tons, against 92,125 tons in the corresponding week of last year, an increase of 22,634 tons. The total amount of bituminous mined for the year is 4,609,583 tons against 4,007,798 tons for the corresponding period last year, an increase of 601,785 tons. The total tonnage of all kinds of coal for the week is 773,295 tons, against 674,112 tons in corresponding week last year, an increase of 99,183 tons, and the total tonnage for the coal year is 31,583,597 tons, against 26,640,300 tons to same date last year, an increase of 4,943,297 tons. The quantity of coal and coke carried over the Pennsylvania Railroad for the week ending November 26 was 176,454 tons, of which 131,917 tons were coal and 44,537 tons coke. The total tonnage for the year thus far has been 8,213,062 tons, of which 6,059,666 tons were coal and 2,153,396 tons coke. These figures embrace all the coal and coke carried over the road east and west. The shipments of bituminous coal from the mines of the Cumberland coal region during the week ended December 3 were 59,054 tons, and for the year to that date 2,041,244 tons, an increase of 76,157 tons as compared with the corresponding period of last year. The coal was carried to tidewater as follows: Baltimore and Ohio Railroad—week, 36,328 tons; year, 1,295,990 tons; increase compared with 1880, 134,584 tons; Chesapeake and Ohio Canal—week, 17,482 tons; year, 485,653 tons; decrease compared with 1880, 114,164 tons. Pennsylvania Railroad—week, 5,078 tons; year, 256,531 tons; increase compared with 1880, 52,667 tons. The coal was brought from the mines as follows: Cumberland and Pennsylvania Railroad—week, 46,397 tons; year, 1,773,761 tons. George's Creek and Cumberland Railroad—week, 4,757 tons; year, 64,017 tons. Baltimore and Ohio Railroad—week, 4,757 tons; year, 64,017 tons. West Virginia Central and Pittsburg Railway—week, 1,272 tons; year, 3,531 tons. The Reading Railroad shipment for last week, ending December 10, was 175,000 tons, of which 35,900 tons were sent to and 42,500 tons shipped from Port Richmond, and 19,300 tons sent to and 21,200 tons shipped from Elizabethport.—*Phil. Ledger, Dec.* 12.

Pennsylvania Railroad Company's New Station.

THE new station of the Pennsylvania Railroad Company at Filbert and Merrick Streets, Philadelphia, which is claimed to be the most convenient and the finest in the world, was opened for general traffic on the 5th inst., and all trains are now run over the elevated road into the heart of the city. As described by the Philadelphia Record it is "imposing in appearance, without being heavy, and the eastern front is a mass of tasteful ornamentation. The lower story of the building is built of massive blocks of rough-dressed Fox Island granite, with an open arcade upon the Broad street front, supported by columns of polished granite. The second floor, which is in reality the main one, is on a level with the tracks of the elevated extension. Here the walls above the granite base are of smooth pressed brick and terra cotta. At the northeast corner is a square clock tower, surmounted by a pyramidal roof, which rises to a height of 176 feet. The southern corner is terminated by a gable and pinnacles, while the cornice line of the Broad street facade is broken by two smaller gables, which surmount the alternate bays or divisions of the wall, and which are marked on the main story by lofty windows of a pointed pattern, with columns and traceries of terra cotta, elaborately molded. These large windows light the waiting room and restaurant upon the front. The facade is further ornamented by a wide oriel window at each end and by a great variety of terra cotta ornament in high relief, including five medallion heads above the large windows, representing the five races of man. The Filbert street front corresponds in color and in general character, but is not so ornamental. Four stone-paved carriage ways, separated by fluted iron pillars, with footwalks on either side, pierce the middle of the lower story of the Broad street front, and extending under the building open on Fifteenth street under the covered bridge. The space set apart for carriage ways is flanked on the Filbert street side by the main entrance to the depot and on the Market street side by the main exit.

"In its interior arrangements the station is a model of luxurious convenience. The monster entrance doors open into an apartment which can comfortably contain 500 people. This is the ticket room, and passengers who arrive in carriages may gain access from the side nearest the drives. Tickets are obtainable at a half-circular shaped office in the centre of the wall, and the travelers may then ascend to the second story by means of two elevators in the west end of the room. The space fronting on Broad street is divided into two magnificent rooms, that on the north being a ladies' waiting room and that on the south a dining room. Dressing rooms for both sexes, bath rooms, a barber shop and other offices fill up the corner block of space bounded by the dining room. The means of exit are admirable, as thirty men can walk abreast down the two short and straight flights of stairs. The kitchen, pantries and storerooms are on the third floor, which, like the fourth, does not extend over the main waiting room. The rooms on the fourth story are occupied entirely by officers of the railroad company. The ventilation is all that could be desired, the most approved steam-heating apparatus is used, and the entire building is lighted by electricity. The entire structure covers a space 122 feet 10 inches on Filbert street and 193 feet 5 inches on Merrick street. The height from ground to eaves is 75 feet, and to the roof top 93 feet. The style of architecture is Italian Gothic, and is from designs by Joseph M. Wilson, Chief of the Department of Bridges and Depots, and Chief Engineer W. H. Brown."

Commerce of New York.

THE foreign imports at New York for the month of November were:

	1879.	1880.	1881.
Ent. for cons	$14,219,064	$12,684,476	$16,638,860
Do. for warehousing	5,782,839	5,965,112	6,122,466
Free goods	12,550,632	11,968,093	11,683,306
Specie and bullion	18,941,262	9,248,677	1,350,239
Total ent. at port	$51,493,797	$39,866,358	$35,794,871
Withdrawn from warehouse	5,311,972	8,368,898	6,222,609

The foreign imports at New York for eleven months from January 1 were:

	1879.	1880.	1881.
Ent. for cons	$147,720,887	$210,528,514	$206,086,807
Do. warehouse	63,986,877	106,178,308	78,547,401
Free goods	89,352,672	116,386,458	115,403,613
Specie and bullion	77,444,790	59,007,649	54,266,132
Total ent. at port	$378,505,226	$492,100,929	$454,303,453
Withdrawn from warehouse	62,739,630	85,833,430	90,913,900

The duties received at New York for the eleven months ending with November were:

	1879.	1880.	1881.
Six months	$48,176,921 66	$71,038,523 16	$68,641,439 07
July	9,329,895 17	13,360,394 37	12,079,573 95
August	10,562,138 82	14,492,361 87	15,204,469 51
September	11,790,902 26	12,856,636 10	14,104,647 58
October	10,952,554 48	10,574,333 53	13,011,426 27
November	8,460,050 08	9,079,082 36	9,711,039 46
Total	$99,272,462 47	$131,401,331 39	$132,752,595 84

The exports from New York to foreign ports in the month of November were:

	1879.	1880.	1881.
Dom. produce	$29,478,814	$33,618,018	$26,203,570
For. free goods	92,118	267,066	26,203,570
Do. dutiable	512,834	687,404	722,689
Specie and bullion	667,908	682,491	1,006,320
Total exports	$30,751,675	$35,254,979	$28,569,342
Do. exclusive of specie	30,083,766	34,572,488	27,563,013

The exports from New York to foreign ports for eleven months from January 1 were:

	1879.	1880.	1881.
Dom. produce	$316,344,985	$373,335,491	$329,049,618
For. free goods	1,807,454	2,580,607	7,193,496
Do. dutiable	4,216,563	4,892,500	5,662,910
Specie and bullion	14,184,240	7,702,310	11,519,071
Total exports	$336,553,242	$388,510,848	$353,425,095
Do. exclusive of specie	322,369,002	380,808,538	341,906,024

Railway Progress in Greece.

THE new condition of things in Greece is giving rise to much activity in the direction of improving communication. Not only is the cutting of the Isthmus of Corinth in hand, but railways are projected and will no doubt soon be begun between Athens and Larissa, and between Arta and Vola, in Northern Greece, while in the Peloponnesus one line is to run along the coast of the gulf from Corinth to Patras; another starting from Corinth will run south to Mycenæ and Argos, and then turning westward through Arcadia, passing Andritzena, Tripolis and Megalopolis, will again turn southward through the old Messina and end at Kalamata on the Gulf of Koron. This line, besides opening up the peninsula for purposes of commerce, will traverse country of the highest interest to travelers, both from its associations in the past and its great natural beauty. A short line is to connect the little port of Katakolo on the coast of Elis with the thriving town of Pyrgos, which is not more than ten miles from Olympia. If these enterprises are well carried out an immense stride will have been taken by the Greek kingdom on the road to civilization. The history of the four mile railway which connects Athens with the Piræus is encouraging to the projectors of the new lines. Constructed originally at an outside cost of £800,000.—*Pall Mall Gazette.*

Storing Electricity.

A LECTURE was recently delivered before the Society of Arts by Prof. Sylvanus Thompson, of Bristol, England, upon the above subject. "The room," says the Pall Mall Gazette, "which was crowded, was lighted during the lecture by two groups of suspended Edison lamps connected with 40 Faure cells brought to the building ready charged. Prof. Thompson after explaining the scientific principles upon which the storage of electric energy was based and the various accumulators which had been invented, gave some anticipations of the possible use of the discovery. First, in regard to lighting, secondary batteries would serve for portable supplies of electricity, for accumulated supplies, and for equalizers of electric currents. The value of accumulation was evident in the case of a theatre, which might by accident be plunged in darkness if dependent on external source. A possible application was the firing of torpedoes and blasts in mines. Another was the perfection of the telephone in increasing the power of the transmitter by employing a multiple microphone. A hundred microphones united would produce loud and distinct speech. By far the most important of all the possibilities opened out by the storage battery was the utilization of wind and water power. Differing from Sir W. Thompson in his address to the British Association, he believed there were cases where no great expense would be incurred in utilizing tidal areas as basins. The Avon at Bristol required but a few yards of embankment to be turned into such an area. A tenth part of the tidal energy in the gorge of the Avon would light Bristol. A tenth part of the tidal energy in the channel of the Severn would light every city and turn every loom, spindle, and axle in Great Britain. Electrical railways and electrical tramways, Prof. Thompson said, were now existing facts, and "many months will not elapse—or it will be an eternal disgrace to the first city in the world—before the fetid and poisonous atmosphere of the Metropolitan Railway is replaced by a pleasant and salubrious air, rich in fragrant ozone; and the like revolution will not long be delayed in many quarters where reform is far less imperative. In all these changes the accumulator will have its part to play." In reply to a question, Prof. Thompson expressed the opinion that the cost of the electric lights in the room was less than the cost of gas would be for a mansion which had to provide its own apparatus for the making of gas."

Illinois Central Railroad.

DURING the month of November, 1881, the traffic on the lines operated by this company was (estimated):

In Illinois	$585,326 00
In Iowa (leased lines)	162,409 00
Total	$748,235 00

The traffic for the same month in 1880, on the same mileage, was (actual):

In Illinois	$606,905 40
In Iowa (leased lines)	176,214 36
Total	$783,119 76

During November, 1881, the land sales were 1,212.30 acres for $6,521.38, and the cash collected on land contracts was $9,414.14.

L. A. CATLIN, *Secretary.*

Cincinnati Iron Market.

OFFICE OF E. L. HARPER & Co.
Cincinnati, Dec. 13, 1881.

THE market continues about the same as last week, and, if anything, has hardened a little. Prices are strong and Furnaces as a rule are declining to sell for anything but early delivery. Taking all things into consideration the outlook is very promising. The demand for Car Wheel Iron has been very brisk during the past week. There has also been a large number of inquiries for Soft Foundry and Neutral Forge Irons, the latter being very scarce and none offering

We quote as follows:

	No.		Mos
FOUNDRY.			
Hanging Rock Charcoal	1	29 00@30 00	4
Strong Neutral Coke	1	26 00@27 00	4
American Scotch	1	25 00@26 50	4
GREY FORGE.			
Neutral Coke	23	50@24 50	4
Cold Short	22	50@23 50	4
CAR WHEEL AND MALLEABLE.			
Hanging Rock Cold Blast	36	00@38 00	4
" Warm Blast	30	00@32 00	4
Lake Superior 1 and 2	32	00@33 00	4
Lake Superior 3 to 6	34	00@36 00	4
Southern Car Wheel	36	00@40 00	4

Railroads in Tasmania.

Of all the railways I have ever trusted my life to—and I have crossed from New York to San Francisco—I take the line which connects Launceston and Hobart, the northern and southern sides of the island, as the most boldly defiant of engineers' misgivings touching the sharpness of curves. When, half-expectant of being hurled by centrifugal force down some of the Tasmanian gullies, we, with more or less rapid, snake-like motion, wind our way round the steep sides of heavily wooded hills, and look down into apparently bottomless deeps, and are occasionally whisked round such bends that we can look out of the window and every now and then see the locomotive as if about to come back to us, the experience may be regarded as exciting rather than pleasant. Nevertheless, the Tasmanians are able to boast their exemption hitherto from serious accident, and, therefore, they rather pride themselves than otherwise in possessing a railway which seems to go round corners, and which, eccentric as it is, can so confound the wisdom of the scientific. The run across the island in seven hours brings us to Hobart, the capital (for some æsthetic reason the inhabitants have abandoned the old name of Hobart town), and here we find—*non obstante* the alleged general slowness—that the Hobartians are little behind the rest of the world in the comfort of their hotels, and not at all behind them in their charges.

IN the United States Supreme Court at Washington on the 12th inst., a decision was rendered in the patent case of Frances L. Egbert, executrix, against Philip Lippman and August Seligman, error to the United States Circuit Court for the Southern District of New York, in which the Court holds that the original inventor of the improvement by allowing it to be generally used for two years before he made application for a patent, abandoned it to the public and cannot now complain of infringement. The decree of the Circuit Court dismissing the complaint is, therefore, affirmed.

FROM an advance summary of the quarterly report of the Kansas Board of Agriculture we learn that the total value of the twenty-two field crops raised in 1881 is $91,910,439 27, or more than 30 per cent. greater than in any previous year in the history of the State. The two that contribute the largest share of this immense total are wheat and corn; the former making $21,705,270 80, and the latter $44,859,963 29. In production, average yields were not so large as in 1880, but the increased price of farm products made the harvest of this year much more valuable. The report says: "While it is true that the long-continued dry weather and the armies of chinch bugs did immense damage to the crops of the State during 1881, yet there need be no immediate apprehension that the farmers are in want, when it is ascertained that the value of $122,450,406 95 is divided among them this year."

DURING the ten months ending Nov. 1, 1881, the Allen Paper Car Wheel Company turned out of their Hudson works 7,729 wheels. They are still adding to their machinery, and hope to increase the output at Hudson to 10,000 wheels the coming year. They are also pushing forward their improvements at the Chicago works as rapidly as machinery can be procured. When fully completed, these works are expected to have double the capacity of those at Hudson. The extensive paper mill, lately erected by this company at Morris, Ill., is very nearly ready for operation, and is expected to be running by the first of January. It will have a capacity of from 4,000 to 5,000 tons a year. This company is now working on orders for the Mexican companies, the Atlantic and Pacific, the Central of New Jersey, the Delaware, Lackawanna and Western, the Delaware and Hudson Canal Company, the Lehigh Valley, and the Atchison, Topeka and Santa Fe.

New York Stock Exchange.

Financial and Commercial Review.

THURSDAY EVENING, Dec. 15, 1881.

During the forenoon the ruling rate for call loans on stocks was 6 per cent, and on United States bonds 4@4½ per cent ; time loans were 6 per cent and prime mercantile paper 6@7 per cent. In the afternoon the quotation for call loans at the Stock Exchange was 6 per cent, but at the close fell to 4 per cent.

The posted rates of the leading drawers of sterling were 4.81@4.85 ; the actual rates were 4.80@4.80¼ and 4.84@48.4¼, with cable transfers 4.84¼@4.85, and prime commercial bills 4.78½ @4.78¾. The actual rates for Continental bills are as follows : francs, 5.20⅜@5.21¼ and 5.25⅝ @25.26¼ ; marks, 94@94⅛ and 94⅞@95 ; and guilders, 39⅜@40.

The Treasury Department accepted on Wednesday all the bonds offered under the 106th call, aggregating $5,489,500. The total redemption under the 105th call to that date amounted to $15,521,200.

A decision which is of interest to all National Banks, and one which deals with another phase of the usury and interest besides that noted in our issue of the 3d inst., was rendered by the Supreme Court of the United States at Washington on the 12th inst. in the case of the National Bank of Gloversville, N. Y., against James H. Johnson. This was a suit brought by Johnson to recover from the bank, under sections 5,197 and 5,198 of the Revised Statutes, the penalties described for the exaction of usurious interest upon a large amount of commercial paper, of which Johnson was not the maker, but which he transferred to the bank, and the bank discounted for him in the regular course of business. This court is unanimously of opinion that the prohibition of the National Banking Act extends not only to paper of which the customer of the bank is the maker, but also to the paper of other persons offered by the customer for account. The judgment of the court below is affirmed with costs.

The Supreme Court of Missouri has decided the application of the Hannibal and St. Joseph Railroad Company for a writ to compel the Secretary of State to give the company a receipt releasing them from all indebtedness to the State, inasmuch as they have paid $3,000,000 into the State Treasury. The State holds that this money was received on account. The railroad company claims it covers their entire indebtedness to the State, and they ought to receive a receipt in full for it.

The Assistant Treasurer at New York will, in conformity with instructions from Washington dated December 8, 1881, redeem on Wednesday of each week, commencing with the 14th inst., until further notice, United States bonds (continued 6s, 1881) embraced in the 106th call, to the amount of $5,000,000, paying interest from July 1, 1881, to the maturity of the call—January 29, 1882. In the event of an offering on any of the days mentioned, of an amount in excess of $5,000,000, a pro rata distribution will be made; otherwise the redemption will be continued from day to day until the requisite amount is obtained. The bonds will be paid for subject to the examination of the Department, and all sellers will be required to deposit 1¾ per cent cash, the amount of the January, 1882, interest.

In January, 1882, interest falls due on the outstanding six per cent bonds, amounting in the aggregate to about $2,780,000 ; on the outstanding four per cent bonds, amounting to about $7,387,000; and on the currency sixes outstanding amounting to about $1,938,000. To pay the interest on these loans requires the filling out of about 75,000 checks. The Treasurer expects to have these checks ready for mailing by the 24th or 25th inst.

The Director of the Mint has caused an examination to be made of the accounts of the United States Coinage Mints from the 1st of July, 1878, to June 30, 1881, to ascertain the exact amount and cost of the silver purchased by the Government and the profits on the coinage of silver during the three fiscal years named. The profits have been $9,752,210.54 which, with the profits on hand at the mints, July 1, 1878, $424,725.47, and $4,560.30 profits on trade dollars and surplus bullion credited to the same account, make a total of $10,181,496.31. Of this amount $8,774,374.81 has been deposited in the Treasury, $221,124.78 paid for expenses of distribution and $84,351.29 paid for wastages and losses by sale of sweeps, leaving in the mints July 1, 1881, $1,101,645.43 which was verified by actual count on the 30th of June last by representatives from the Treasury Department.

A consolidated first mortgage for $5,000,000 on the property and franchises of the Long Island Railroad Company, including its leased lines and branches—Hempstead, Locust Valley, Northport, Port Jefferson, Sag Harbor, Valley Stream and Far Rockaway, Brooklyn Rapid Transit, Smithtown, Flushing and North Shore, and Montauk railroads, was filed in the Queens County Clerk's office, at Jamaica, N. Y., on the 10th inst. This mortgage, which takes the place of all prior mortgages, is executed to the Central Trust Company of New York as Trustee. The principal is payable in gold in 1931, while the rate of interest is 5 per cent, payable quarterly. The mortgage will cover all franchises that may hereafter come into possession of the Long Island Railroad Company.

A contract has been agreed to between the Philadelphia and Long Branch Railroad Company, which is controlled by the Pennsylvania Railroad Company, and the Central Railroad of New Jersey for an interchangeable use of tracks between Sea Girt and Long Branch. The adoption of this agreement obviates the necessity of building a new line between the points named, as was recently contemplated.

The President has approved the recommendation of the Secretary of the Interior, and has accepted an additional 25 mile section of the Northern Pacific Railroad in the Territory of Idaho, which was pronounced satisfactory by the Government Commissioners. Within a month the Northern Pacific Railroad Company has had 325 miles of new road accepted by the United States Government—100 miles in Dakota and Montana, and 225 miles in Washington and Idaho Territories. By this acceptance the company acquires 5,760,000 acres of agricultural and timber lands in Washington and Idaho and 2,560,000 acres of farming and grazing lands in Western Dakota and Eastern Montana—in all 8,320,000 acres.

A formal transfer was made on the 6th inst. of the Buffalo, New York and Philadelphia Railroad, together with its narrow-gauge connections in the oil country, and the Buffalo Coal Company, to the Buffalo, Pittsburg and Western Railroad Company, who purchased the property last April through a syndicate of New York bankers, of which Archer N. Merton was at the head.

The assets of the Missouri Pacific Railroad, in addition to its railway and equipment, are : St. Louis and Iron Mountain stock, $22,000,000, Texas and Pacific stock, $3,000,000 ; Missouri, Kansas and Texas stock, $1,640,000 ; Omaha extension, cash cost, $3,000,000; Pacific stock, $160,000—total, $29,800,000.

The New York and Manhattan Beach Railroad Company have executed a lease of their

road for 99 years to the Long Island Railroad Company, receiving therefor 35 per cent of the gross receipts—the lessor company retaining 65 per cent for operating expenses. It also guarantees that the 35 per cent shall be equal every year to the fixed charges of the former company. The reason given for the union of the two companies is the fact that they can be run much cheaper under one management than under two, especially as they have, to some extent, the same routes. By this connection the Long Island Railroad Company obtains a terminus at Green Point, an object it has long been endeavoring to accomplish.

The stockholders of the Richmond, York River and Chesapeake Railroad Co., at their annual meeting on the 13th inst., ratified and confirmed the lease made to the Richmond and Danville Railroad Company in July last for the term of 999 years, the latter company to assume the bonded indebtedness and guarantee to the stockholders 6 per cent annually on the the capital stock.

The thirtieth report embracing the sixteenth audit of the accounts of the receivers of the Philadelphia and Reading Railroad and Coal and Iron companies for the month of September, which was filed by the master on the 13th inst., shows that the balance on hand in the treasury of the railroad company on September 1 was $364,795.05. The receipts during the month were $3,320,251.60 and the payments, including a balance of $557,623.92, were $3,685,046.65. The balance on hand in the treasury of the Coal and Iron Company on September 1 was $10,292.11. The receipts during the month were $1,528,147.54. The payments, including the balance, were $1,538,439.65. This balance was $52,867.40.

Address MUNN & CO., Patent Solicitors, Pub's. of SCIENTIFIC AMERICAN, 37 Park Row, New York. Hand book about Patents free.

Established in 1831.

AMERICAN RAILROAD JOURNAL.

PUBLISHED WEEKLY BY THE

American Railroad Journal Company,

No. 23 Liberty Street,
NEW YORK.

The AMERICAN RAILROAD JOURNAL, the oldest railroad paper in the world, was established during the construction of the first 100 miles of railroad in this country. Its files of the past fifty years furnish a complete record of the development of American railroads and faithful chronicles of the kindred financial interests. It contains features of special value to investors and others desirous of being readily acquainted with values and transactions connected with the development and working of our railroad systems, and much of interest to the general reader. It is taken by leading railroad men, investors and banking houses in this country and Europe, where it has long been a recognized authority in its special field, being recommended as such by "Chambers' Encyclopædia" and other standard foreign and domestic publications. We give below a few extracts from opinions of the press:

From "Herapath's Railway Journal," London.

The AMERICAN RAILROAD JOURNAL, one of the most honest and outspoken of American papers.

From the "Journal of Commerce," New York.

The AMERICAN RAILROAD JOURNAL, a most valuable weekly newspaper. Is now half a century old.

From the "Cincinnati Price Current."

The AMERICAN RAILROAD JOURNAL's list of patrons is composed largely of the oldest and heaviest financial houses in the United States, Great Britain and the Continent, and of railway companies, manufacturing establishments and banking and commercial houses in this country.

"From the "Pittsburg (Pa.) Chronicle."

The AMERICAN RAILROAD JOURNAL is authority on railroad news.

From the "Washington (D. C.) Law Reporter."

The AMERICAN RAILROAD JOURNAL is a most valuable publication, and to all persons interested in American railroads, earnings, dividends, etc., etc., it is almost invaluable.

OFFICE OF

AMERICAN REFRIGERATOR LINE,

New York, Oct., 1881.

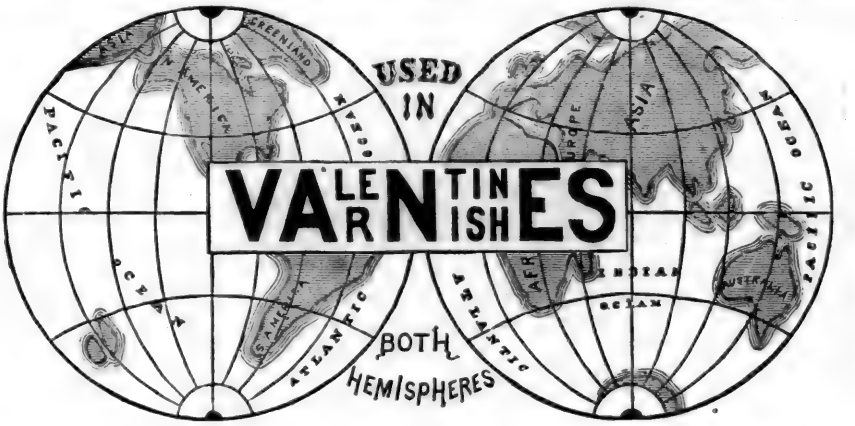
NEW YORK, LAKE ERIE, AND WESTERN RAILWAY



TO THE TRAVELING PUBLIC.

During the Centennial season—six months closing September 10, 1876—the Erie Railway carried almost THREE MILLION passengers, without a singe accident to life or limb, or the loss of a piece of baggage.

And for a whole year the official records of the United States Post Office Department show the arrivals o Erie Railway trains in New York, on time, to be from 15 to 27 per cent ahead of competing lines.

Facts well worthy the consideration of travelers.

ESTABLISHED 1831.

Steam Navigation, Commerce, Finance, Banking, Machinery, Mining, Manufactures.

SECOND QUARTO SERIES.—VOL. XXXVII., No. 52.] NEW YORK, DECEMBER 24, 1881. [WHOLE No. 2,383.—VOL. LIV.

Leaves From Old Journals.

SOME RAILROAD INCIDENTS.

BY THE HON. JOSIAH QUINCY.

[Continued.]

"WHEN you speak of the opposition that our early railroads encountered," said a young man to me, the other day, "you refer, of course, to the difficulty of inducing people to take stock in them. Nobody could have objected to the increase of facilities for transportation, provided he was not asked to pay the bills." But it happened that I did mean just what I said; and perhaps the most singular phenomenon in the history of early railroads was the bitter opposition they encountered from leading men, whose convenience and pecuniary interests they were directly to promote. The believer in railroads was not only obliged to do the work and pay the bills for the advantage of his short-sighted neighbor, but as Shakespeare happily phrases it, "cringe and sue for leave to do him good." Can I furnish proof of this incredible statement? Yes, I have it before me at this moment, and it is worth giving with some detail.

The old town of Dorchester, which some years ago was annexed to Boston, has within its ancient limits nine railroad stations, and at those most frequented about fifty trains stop daily. The main road, known as the Old Colony, passes over a route which I caused to be surveyed at my own expense, with the view of providing cheap transportation for the towns of Dorchester and Quincy and others to the south of them. I need not say that the land made accessible by this railroad has become very valuable, and that the business and population of the old town of Dorchester cluster about the stations. If any tyrant could tear up these tracks and prevent them from being relaid, his action would paralyze a prosperous community, and might well be called a *calamity* by those most careful in weighing their words. Now, can the reader believe that the very word I have italicized was chosen so late as 1842 by the inhabitants of the town of Dorchester, in regular town meeting, assembled to express their sense of the injury that would result to them and their possessions by laying a railroad track through any portion of their territory? No, there can be no mistake about it. Here is the report of their meeting, authentic in contemporaneous type, and duly attested by Mr. Thomas J. Tolman, town clerk. A leading business man was chosen moderator and a committee of six prominent citizens was appointed to oppose the passage of a railroad through the town. The resolutions are worth reporting with some fullness. The first declares it to be the opinion of the inhabitants of the town of Dorchester that a railroad upon either of the lines designated by those asking for a charter "will be of incalculable evil to the town generally, in addition to the immense sacrifice of private property which will be involved. A great portion of the road will lead through thickly settled and populous parts of the town, crossing and running contiguous to public highways, and thereby making a permanent obstruction to a free intercourse of our citizens, and creating great and enduring danger and hazard to all travel upon the common roads." The second resolution declares that, if, in spite of the protest of the inhabitants of Dorchester, their town must be blighted by a railroad, "it should be located upon the marshes and over creeks," and by thus avoiding all human habitations and business resorts "a less sacrifice will be made of private property and a much less injury inflicted upon the town and public generally." The concluding resolution is one of those jewels (rather more than five words long) that must suffer by any curtailment:—

"*Resolved*: That our representatives be instructed to use their utmost endeavors to prevent, if possible, *so great a calamity to our town as must be the location of any railroad through it*; and, if that cannot be prevented, *to diminish this calamity as far as possible* by confining the location to the route herein designated."

The Italics are, of course, mine. They are quite irresistible. But when "calamities" threaten, the good man does not do his whole duty by protesting in town meeting. There is the powerful agency of the press, through which oppressors may be rebuked and their horrible projects brought to naught. Let me quote a few extracts from a newspaper article. It was written by a citizen of Dorchester and appeared shortly after the meeting. The writer has been speaking of existing facilities for water transportation, which he thinks should content certain inhabitants of the town of Quincy who are petitioning for a railroad:—

"What better or more durable communication can be had than the Neponset River or the wide Atlantic? By using these, no thriving village will be destroyed, no enterprising mechanic ruined, no beautiful gardens and farms made desolate, and no public or private interests most seriously affected. Look at the rapid growth of Neponset village, through which this contemplated road is to run (the citizens of which are as enterprising and active as can be found, many of whom have invested their *all* either in trade, mechanics, manufactures, or real estate), and all, all are to be sacrificed under a car ten thousand times worse for the public than the car of Juggernaut! Look at the interests, for instance, of the public house in this place, kept by a most estimable citizen, who has ever—"

But I have no heart to copy further. In the wreck of an entire community we can spare no tears for the woes of a single tavern-keeper. The ruins of that once prosperous village of Neponset are, even to this day, visited by reflective tourists. I think I mentioned that the Old Colony Company has a way of stopping some fifty trains there, in order to accommodate moralists, who take a melancholy satisfaction in musing among them.

Yes, of all the difficulties that were met in establishing locomotion by steam, the obstruction offered by blind, stolid, unreasonable conservatism was not the least. It required not only men of foresight, but those of strong enthusiasm, like my old friend, Mr. P. P. F. Degrand, to tunnel through these craggy prejudices. There is a certain vital energy which thrills in French nerves in greater plentitude than in those of other nationalities, and this Boston broker had enough of it to run a Napoleon. I used to enrich an old lecture, entitled "Our Obligations to France," with a sketch of Degrand, a man not famous as the world goes, but one to whom the public is far more indebted than to many of the politicans who get their column in the biographical dictionaries.

To the older railroad men of Massachusetts her iron thoroughfares are consecrated ground, consecrated by the labor, the anxieties, the sacrifices which they cost. They are monuments to the public spirit of the dead; not vulgar instruments for extorting a maximum of money for a minimum of service. There is probably no short and precise solution to the difficult problem which the private control of these arteries of the body politic presents to thoughtful men. The railroads have come to hold a power which should only be committed to the State, unless, indeed, some way can be devised of holding their managers to strict accountability. I have said elsewhere what I have had to say upon this subject, and will avoid the temptation of mingling prophecies and suggestions with the uncontroversial matter which belongs to reminiscences.

WOLLASTON, MASS.

THE Pittsburg and Lake Erie Railand is to be double-tracked.

Transporting Ships by Land.

Sir Edward Reed, for many years Chief Constructor of the British Navy, has written a letter to Admiral Ammen, giving his views in regard to the proposed ship railway across the Isthmus of Tehuantepec, in which he takes strong ground in favor of the scheme. He says :

"The suggestion to transport ships loaded with cargoes from one ocean to another over a railway more than one hundred miles long is one which was certain at first to excite many doubts and suspicions, both among those who do and among those who do not understand the construction of a ship or of ship railways. But first impressions upon a matter of this kind are of little value. Let us investigate the matter closely, and in the light of existing knowledge and experience. In the first place I feel obliged to express surprise at the contention of Captain Phelps that the ship railway across the Isthmus of Tehuantepec must be adapted for transporting the heaviest vessels used anywhere. On the contrary, the primary requirement clearly is that the railway should be fitted for carrying the vessels engaged in ordinary commerce, and more particularly such as are employed in distributing to the world the corn and other products of California and the neighboring States. To Americans the quick and economical interchange of products between the Eastern and Western States, by means of their own mercantile vessels, would, I think, be the first object to attain ; for this purpose it would certainly not be necessary to provide for the transport of such ships as the City of Rome, the Servia, and other immense vessels now building in England expressly and solely for improving the intercourse between America and Europe. I should anticipate that a ship railway across the Isthmus of Tehuantepec would be a great stimulant to the employment of American-built vessels, of wood as well as of iron; and it is obvious that there would be no demand for vessels of immense size. The trade of the world, and assuredly American home trade, would be amply provided for if provision is made for transporting ships of a maximum displacement of 6,000 tons."

Sir Edward Reed disagrees with Captain Phelps regarding the weight of the car and cradle necessary to carry the ships, and says : "I am of the opinion that the weight of a car and cradle, of ample strength to carry a ship of 4,000 tons weight, need not exceed 500 tons ; if to carry a ship of 6,000 tons, it need not exceed 750 tons." In regard to raising and transporting the ships, Sir Edward says : "In so far as the lifting of the ships bodily out of the water is concerned, this process is in repeated operation at the Victoria docks, on the Thames, at Malta, at Bombay, at Sebastopol, and several other places; while the process of hauling ships up out of the water upon a wheeled carriage, on an inclined plane laid with rails, is a very common one. No engineer can doubt that either process is perfectly applicable, with increased power, to ships of larger size, although I should myself prefer the process of direct lifting for several reasons, the chief of which is that it furnishes the readiest and best opportunities for supporting the ship upon the cradle as she leaves the water."

Sir Edward thinks that laden ships can be raised and transported without injury, and says that the thing chiefly to be guarded against is not general structural strains, but local strains resulting from the unequal distribution of weights and more especially of cargo. "I affirm," he says, "that the general structural strains which are liable to be brought upon a ship by lifting and transporting her, presuming, of course, that reasonable skill and care are applied to these processes, are inferior, much inferior, to those strains to which every ocean-going ship is continually liable at sea. Indeed, the only structural strains which would have to be very specially guarded against is that which exhibits itself in and in connection with the beam-knees of wooden ships; and even this, with proper bilge support, would be less than the like strain which occurs at sea." Of local strains he says: "I apprehend that an engineer of the skill and eminence of Captain Eads, with all the experience of ship-builders at his command, would not undertake the work of lifting and transporting loaded ships without making full provision, as may be readily done, for applying ample local support to every ship's bilge at every part. The hydraulic lift at Malta has raised numerous ships with cargoes on board without the slightest injury of any description.

"In the next place it seems to me quite certain that the appliances which would secure ample and fine support to a ship when lifted high and dry, would also be such as would effectually keep her upright in storms and preserve her from injury on the road. I take it for granted that the railroad constructed for the purpose would be of the most solid kind, and so laid as to have its double or triple sets of rails as nearly as possible in the same plane, and also that the carriages would be made with equal care in all their parts. With these precautions taken, and considering that a comparatively low speed is all that is required, I am at a loss to see in what way danger to the ship would arise."

Sir Edward completely disposes of the statement of Captain Phelps that a well-constructed ship undergoes little or no strain when tossed about by the waves, by citing the case of her Majesty's yacht, the Victoria and Albert, which, it has been demonstrated, is liable at sea to undergo a change of breaking strain at a given section of no less than 47,400 foot tons. This is nearly one-half the greatest breaking strain that she could possibly undergo if left high and dry upon two rocks, one at the bow and one at the stern. "It is stated that at a low rate of speed," he adds, "good engines would draw 800 tons. They can, in fact, draw more; but let us accept these figures. Sixty engines would, therefore, draw 48,000 tons, or seven times the maximum weight which, as I estimate, it is at present requisite to provide for. Instead of sixty locomotives, therefore, nine or ten of the ordinary type would be sufficient for the large majority of the ships to be transported, extra power being, of course, applied over short distances where the gradients are exceptional. Again, Captain Phelps gives five tons as pressure per wheel as the limit which may be properly applied; but this is only about one-half the pressure which is sometimes allowed for the wheels of our fast running locomotive engines. Instead of 4,800 wheels being required, as he estimates, I should think that the 800 (without the 4,000) would be ample for the largest carriages to be employed on the railway."

Further on Sir Edward says: "As regards the comparative economy of transporting a ship's cargo by canal or railway, I am inclined to believe that the railway would prove the more economical of the two." Sir Edward estimates that the cost of transporting a ship's cargo across the Isthmus would at the very most be $1.50 per ton.

Western Union Telegraph Company.

Executive Office,
Western Union Telegraph Company,
New York, December 14, 1881.

In the report presented by the Executive Committee at the last quarterly meeting of the board, held September 14,1881, the net revenues for the quarter ending September 30 (August being partially and September wholly estimated) were stated at $1,949,894.61.

The official returns for the quarter (ended September 30) showed the net revenue to be $2,104,635.75, or $154,741.14 more than the estimate.

The following revised statement, based upon complete returns, will show the condition of the company at the close of the quarter ended September 30, 1881:

Surplus July 1, 1881, as per last quarterly report		$127,258 76
Net revenues, quarter ended September 30, 1881		2,104,635 75
Total		$2,231,894 51
From which deduct appropriations for—		
Dividend of 1½ per cent paid October 15	$1,199,708 70	
Interest on bonded debt	107,000 00	
Sinking funds	20,000 00	
Construction	202,290 51	
Telegraph stocks, &c	113,135 39	
	$1,642,134 60	
Less portion of the sinking fund for the bonds of 1900 [which was set aside previously], returned to the company by the Union Trust Co. trustees, because of the drawn bonds not having been presented for redemption	$40,000 00	
		1,602,134 60
Leaves a surplus, October 1, 1881		$629,759 91
The net revenue for the quarter ending Dec. 31 instant, based upon officials returns for October, nearly complete returns for November, and estimating the business for December, will be about		$2,010,527 27
Add surplus, October 1, as above		629,759 91
Total		$2,640,297 18
From which appropriating for—		
Interest on bonded debt	$107,000 00	
Construction and purchase of telegraph stocks & properties	300,000 00	
Sinking funds	20,000 00	
		427,000 00
Leaves a balance of		$2,213,287 18
It requires for the payment of a dividend of 1½ per cent on the capital stock		1,200,000 00
Deducting which, leaves a surplus, after paying dividend, of		$1,013,287 18

In view of the preceding statements the committee recommend the adoption by the board of the following :

Resolved, That a dividend of 1½ per cent be and is hereby declared payable on the 16th day of January next to stockholders of record at the close of business on the 20th day of December instant.

Resolved, That for the purpose of such dividend the stock books of the company be closed at three o'clock on the afternoon of the 20th day of December instant, and be reopened on the morning of the 17th of January next.

Respectfully submitted,
Norvin Green, President.

AMERICAN Railroad Journal. ESTABLISHED 1832.

PUBLISHED WEEKLY BY THE

AMERICAN RAILROAD JOURNAL CO.,

At 23 Liberty Street, New York.

Subscription, per annum, in advance..... $5 00
Foreign Subscription, including postage..... 6 00

Purchases for the AMERICAN RAILROAD JOURNAL Co. are authorized only by the written order of Geo. F. Swain, Treasurer; and the Company will not be responsible for the payment of bills unless accompanied by such order.

Subscribers are requested to report to our office any irregularity in receiving the JOURNAL.

Contributed articles relating to Railroad matters generally, Mining interests, Banking and Financial items, Agricultural development, and Manufacturing news, by those who are familiar with these subjects, are especially desired.

Payments for advertising and subscriptions should be made by check payable to order of the Treasurer.

BRANCH OFFICE:
53 Devonshire St., Boston, Mass.

Mr. FREDERIC ALGAR, Nos. 11 and 12 Clements Lane, Lombard Street, London, E. C., England, is the authorized European Agent for the JOURNAL.

New York, Saturday, December 24, 1881.

Entered at the Post Office at New York City as Second-Class Mail Matter.

CONSIDERABLE interest is manifested in the proposed line of American steamers, intended to shorten to six days the time required to cross the Atlantic. It is proposed by Mr. Lorillard and Mr. Corbin to use Fort Pond Bay, near Montauk Point, Long Island, as a landing place, and by bringing passengers by rail to New York to greatly reduce the time in this manner, while another great reduction is to be made in using a class of vessels of higher rate of speed than those intended equally for passenger and freight traffic, it being understood that the new line is to be more strictly a passenger line, and to the ordinary ocean line what an express train is to a mixed freight and passenger train. There are merits in the idea which are readily recognized in these days of rapid transit. There is a question, however, as to how extended a demand there is for this necessarily more expensive method of ocean travel, or if it is extended and rich enough in the traveling season to make up for the idle months of winter. The class of people who are especially urgent as to speed are not as a rule the swarms of pleausure tourists and summer idlers, but rather that class of business men who are quite as apt to desire a quick passage across the ocean in the winter, as in the summer. But the number of ocean travelers is increasing, and the experiment may show that it is sufficiently large already to warrant the establishment of an express passenger line of steamers. As might be supposed from its aim, the line is intended to be distinctively American in its ownership and management.

THE Western grain-producing sections would seem to present good fields for trying the "agricultural tramways," which are about to be experimented with by the Great Eastern Railway, of England. The plan proposed in England is, to build cheap tramways as feeders out into different producing sections which the main line does not reach, using in many cases the ordinary wagon road for its course. The plan would doubtless prove a decidedly beneficial one in some cases in our Western country, where the question of distance from the railroad is the all important one affecting land values and the return of agricultural work. Feeders of this kind, provided in some practical and economical manner, with deserved encouragement from the land owners, or towns and counties directly benefited, would tend to greatly equalize settlement, and give value to lands now considered merely worthless, because not touched by the railroad. They would act like a network of veins distributing the business life and enterprise which the railroad creates and naturally deserves to locations along its route.

THE most definite action which has developed as yet from the vast amount of talk that has been indulged in concerning the regulation of interstate commerce, is the introduction of a bill this month into the House of Representatives at Washington, for the establishment of a board of commissioners upon whom would devolve, according to the requirements of the bill, a variety of duties the faithful performance of which ought to prove of service alike to the railroads and the people. The bill was introduced by Mr. Henderson, of Illinois, and provides for the appointment by the president, with the advice and consent of the Senate, of three commissioners, who shall hold office two, four, and six years respectively, and of whom one shall be experienced in the law and one in the business of operating and managing railways. The salary of each of the commissioners is to be $8,000 per annum, payable quarterly, with an allowance for all necessary traveling expense. The board shall have supervisory jurisdiction over that part of the business of all railroads which passes from one State or Territory to another or to a foreign country, and over the transportation of all property from one State or Territory to another. It shall report annually to the Secretary of the Treasury, and recommend from time to time such measures as may be necessary to the establishment of a just and practical system of national legislation for the regulation of interstate railroad commerce.

Land Grant Railroads.

THE report of Mr. Joseph K. McCammon, Commissioner of Railroads, which has just been transmitted to the Secretary of the Interior, after treating upon the subject of the substanial improvements made in all the railroad properties during the past year, goes on to say:

"The construction of new and the extension of old railroads in the West, and notably the leasing and rapid building of new lines by the Central and Union Pacific Companies since the last report are marked features of railroad history. The Union Pacific is building an extension from Granger, a station on their main line 156 miles east of Ogden, to Baker City, Oregon, via Port Neuf, on the Utah Northern Railroad, which will connect at Baker City with the Oregon system of railroads, and thus acquire an outlet to the Pacific coast independent of the Central Pacific Railroad. This extension when completed will be about 600 miles long, and steel rails to lay the entire length have been contracted for. It is represented that the work will be completed at an early date. The Central has this year, by leasing the Southern Pacific of Arizona and New Mexico, which is now completed to Deming, New Mexico, and there connecting with the Atchison, Topeka and Santa Fe Railroad, secured a through route from the Pacific coast, independent of the Union Pacific Railroad. The Atlantic and Pacific Road is being extended toward the Pacific coast at a rapid rate, and is expected to reach there at an early date. The Northern Pacific is being rapidly constructed from both the east and west. The indications are that within a short time there will be five different routes to the Pacific coast, where, less than a year ago, there was but one. The railroads have been instrumental in developing the country at a rapid rate; capital has been invested in immense sums, and still the tendency is toward increased developments, principally in the West and Southwest. It is believed that the operations in railroad construction this year will exceed those of any previous year, and, in consequence, large tracts of mineral and agricultural lands will be made accessible."

The Commissioner then takes up the question of compensation to Land Grant Railroads for transmission of troops and Government supplies, and says :

"I would recommend that Congress consider the question whether provision should not be made to establish permanently, or for a stated period, the rate of compensation to be paid by the Government to the railroads mentioned. After due consideration of the subject, I have reached the conclusion that 50 per cent of the tariff or ordinary rate of the companies would be a compensation just to the railroads and the Government, and proper for permanent application."

A supplemented report of Mr. H. Blackstone, Railroad Engineer, accompanies the report of the Commissioner. The document shows that a careful examination has been made of the tracks, bridges, rolling stock, etc., of the Land Grant Railroads. The Engineer says :

"It is gratifying to find these roads in such general good condition, they having recently possed through a rather severe Winter season without sufficient time and opportunity for any general repair and surfacing of track, &c., showing that the improvements spoken of by my predecessor were of substantial character. However, the favorable condition of these railroads, under all the circumstances, still leaves much to be done in order to bring them to that standard condition that true economy in their maintenance and operation suggests."

Mr. Blackstone criticizes severely the faulty construction of many of the bridges, and says that comparatively few of them are supplied with proper safeguards against accident.

In conclusion, the attention of Congress is called to the fact that there is no uniform system of railroad signals in use, which is a source of confusion, and should be remedied by appropriate legislation.

INCORPORATION.

The Troy and Chatham Railroad filed articles of incorpor tion at Albany, on the 15th inst.; capital, $1,000,000.

Articles of incorporation of the Chicago, Mount Vernon and Southern Railroad Company were filed in the office of Secretary of State of Illinois on the 19th inst. The capital stock is $3,000,000. It is proposed to construct a railroad through Effingham, Fayette, Marion, Jefferson, Franklin and Williamson counties from Altemont to Marion, with a branch from Mount Vernon to Tamawa.

A charter was granted at the State Department, Harrisburg, Penn., on the 16th inst. to the Red Bank and Youngstown Railroad Company, with a charter capital of $3,875,000. The new road will run from a point one mile east of Red Bank, Clarion County, to a point on the boundary line between Pennsylvania and Ohio, near where the Mahoning River crosses the line in Warren County, a distance of 65 miles.

The Richards Copper Mining Company has been incorporated at Luray, Va. The mine is situated about one and a half miles southwest of Stony Man, Page co., and has been pronounced by experts to be the richest vein of copper anywhere known in the United States except the famed Michigan mines. The company has now a force at work and will begin shipments at an early day. For the present the ore will be shipped in its crude State, but the company purpose very early in the spring erecting a furnace near Luray. The president of the company is Dr. McIllahaney, of Washington.

The Newark and Edgewood Railroad Company have filed a certificate of incorporation with the Secretary of State of Ohio. The capital is $50,000. The road is intended to be a branch of the Ohio Central Railroad, and will be about four miles in length. The incorporators are Samuel Thomas, G. G. Hadley, J. W. Boyles and A. W. Scott, of the Ohio Central, and John S. Fleck, A. G. Ashbrook, I. W. Bigelow, Waldo Taylor, J. W. Collins, George M. Grasser, F. S. Wright, James E. Thomas and A. W. Bradley, of Newark.

Articles of incorporation were filed at Albany, N. Y., on the 16th inst. of the New York and East River Railroad Company. The road is to run from New York by the most feasible route through Westchester County to a point on the boundary line in the town of Rye, near the village of Port Chester, and by connecting lines to the city of New Haven, Conn. The length of the road will be 30 miles. The capital is $2,500,000. Joseph Pool, George W. Nash, Sheldon Collins, and two others are the directors.

The Central Tunnel Railway Company of New York filed articles of association on the 7th inst. The capital is $5,000,000. The road, which is to begin near the City Hall Park and terminate near the Grand Central Depot, will be five miles long, and is to be connected with the Fourth avenue Improvement. It will run under Chambers, Reade, Elm, Spring and Great Jones streets, Lafayette place, Astor place, Eighth and Ninth streets and Fourth avenue. This is the same company which filed articles in May last. This second filing was in consequence of some clerical errors in the first articles. The officers are General John Cochrane, president; William Kent, secretary ; H. C. Stetson, treasurer ; and Gouverneur Tillotson, counsel.

Judge A. D. Dickinson, of the Farmville (Va.) Circuit Court, has granted a charter incorporating the London and Virginia Development and Industrial Company. The capital stock of the company cannot be less than $1,500,000 or more than $30,000,000, divided into shares of $100 each. According to the terms of the charter the company cannot own at any one time in any one county in Virginia more than 100,000 acres of land. The three principal offices of the company will be in London, Lynchburg and Farmville. The company is authorized to make contracts for any work of public or private improvement, to issue bonds, &c., and has for its object generally the development of the mining and agricultural interest of Virginia. In addition its operations are not confined by the terms of its charter to Virginia only, but it has the power to branch out in other States. The incorporators include some wealthy Virginians and several London capitalists.

ORGANIZATION.

The directors of the Walkill Valley Railroad Company, recently elected, are : Edward F. Winslow, Conrad N. Jordan, Theodore Houston, George H. Sharp, Samuel D. Coykendall, John L. Nisbet, Horace Porter, Charles Bard, Alexander Taylor, Charles Payne, Howard Mansfield, Walter Kattie and F. E. Worcester.

The directors of the Providence and Stonington Steamship Company, elected on the 14th inst., are : D. S. Babcock, S. D. Babcock, Henry Morgan, S. M. Miller, Amos N. Beckwith, E. P. Taft.

The Rhode Island and Massachusetts Railroad Company held its annual meeting on the 14th inst., and elected directors as follows : D. Goff, H. Conant, A. B. Chace, Jonathan Chace, G. L. Litflefield, Jesse Boynton, James P. Ray, Joseph G. Ray, Edgar K. Ray.

The stockholders of the Ft. Worth and Denver City Railway Company, elected on the 13th inst., are : J. M. Eddy, J. P. Smith, Wm. H. Lawrence, C. L. Frost, Max Eser, R. E. Montgomery, W. A. Ross, W. A. Hoffman and Morgan Jones. The officers are : J. M. Eddy, president; W. W. H. Lawrence, vice president; W. A. Ross, secrerary; C. L. Frost, treasurer.

The following gentlemen have been elected directors of the Boston and Maine Railroad Company for the ensuing year : Nathaniel G. White, Lawrence ; George C. Lord, Newton; Amos Paul, South Newmarket, N. H.; Nathaniel J. Bradlee, Boston ; James R. Nichols, Haverhill ; John Felt Osgood, Boston; Samuel E. Spring, Portland, Maine; Nathaniel W. Farwell, Lewiston, Maine; Wm. S. Stevens, Dover, N. H.

At the annual meeting of the New York, Providence and Boston Railroad Company, held at Providence, R. I., on the 14th inst., the following directors were chosen : Samuel D. Babcock, Henry Morgan, J. B. Johnston, D. S. Babcock, Geo. M. Miller, Edward Morgan, of New York city, Henry Howard of Coventry, Chas. H. Salisbury of Providence, Nathan M. Dixon of Westerly, John A. Burnham of Boston and A. S. Matthews of Stonington.

At the annual meeting in Boston on the 14th inst. of the stockholders and the holders of certificates of indebtedness of the Eastern Railroad Company, the following gentlemen were elected directors: on the part of the stockholders—John Cummings of Woburn, Samuel C. Lawrence of Medford and Charles Houghton of Boston; on the part of the certificate holders —Elijah B. Phillips of Boston, Jacob C. Rogers of Peabody, George P. King of Boston, George S. Morrison of New York, Richard Olney of Boston, and Alfred P. Rockwell of Boston, the newly elected directors met and organized by the election of E. B. Phillips president and F. I. Amory, clerk.

PERSONAL.

George C. Lord has been elected President of the Boston and Maine Railroad Co., vice H. G. White resigned. The office of Vice-President, hitherto filled by Mr. Lord, has been abolished.

Hiram A. Blood, of Fitchburg, Mass., has been chosen President of the Texas and Great Western Railroad Co.; A. W. Boardman, of Boston, Treasurer; and T. H. Wood, of Denton, Tex., Superintendent.

John Thomas, has resigned the office of Superintendent of the Cleveland and Pittsburg

Railroad (with which company he has been for the past 18 years), to take charge of the Chicago Division of the Baltimore and Ohio Railroad, with headquarters at Chicago.

A. C. ANDRUS, late of the Northern Pacific Railroad, has been appointed General Passenger Agent in New York City for the Chicago, Milwaukee & St. Paul Railway Company.

THOMAS CLYDE has been elected President and William P. Clyde, A. S. Buford, T. E. Logan, Dr. W. H. Gwathmey and Reuben Foster, directors of the Richmond, York River and Chesapeake Railroad Company.

CONSTRUCTION.

THE track of the International and Great Northern Railroad was completed to Laredo on the 16th inst.

THE first through car from Cincinnati to Newport News passed through Staunton, Va., on the 13th inst.

THE Montreal & Sorel Railway is approaching completion and is expected to be opened about the 1st of January.

THE track of the St. Paul, Minneapolis and Manitoba Railway has been completed to Minto, 116 miles from Fargo.

THE branch of the Chicago, Milwaukee and St. Paul Railway from Mazamanie, on the Prairie du Chien Division, North 11 miles, to Sauk City, is completed.

WORK on the Valley (Va.) Railroad is progressing favorably, and, with an open winter, cars will be running from Baltimore to Lexington certainly by June, 1882.

THE Massachusetts Central Railroad between Oakdale and Jefferson, the junction with Boston, Barre and Gardner Railroad, 48 miles from Boston was opened for traffic on the 21st inst.

THE citizens of Wooster, Ohio, have formed a company for the purpose of building a railroad from that town to Millersburg, where it will connect with the New York, Pittsburg and Chicago Railroad.

THE survey of the Gatineau Valley, (Ca). Railway has been completed. The total length of line is over 100 miles. The actual length of the proposed railway from the desert to Hull Station is 75 miles.

THE Leamington & St. Clair Railway Company have closed negotiations with the Canada Southern Railway Company, to complete and operate their road from near Comber Station, to the village of Leamington, on Pigeon Bay, Lake Erie.

THE Dallas and Whichita Railroad 38 miles in length, was formally transferred to the Missouri, Kansas and Texas Railroad Company, on the 15th inst. It is expected that the extension of the road into Northwestern Texas, will soon be commenced, the stockholders having authorized the directors to make such extension at their discretion.

THE Denver extension of the Chicago, Burlington and Quincy Railroad is now completed to within 180 miles of Denver, and the grading for the entire distance is done. Large shipments of steel rails to Denver are made, in order to enable the company to also commence laying rails from Denver, East. It will take about six months more, however, to complete the new road all the way to Denver, as some very heavy work remains to be done within 100 miles East of that city.

The Coal Trade.

THE leading coal carrying companies make the following reports of their tonnage for the week ending December 10, and for the year to same date, compared with their respective amounts carried to the same date last year:

	Week.	1881.	1880.
Reading Railroad	177,665	253,586	220,243
Schuylkill Canal	14,597	24,319	.....
Lehigh Valley	135,486	196,350	172,905

The total tonnage of anthracite coal from all the regions for the week ending Dec. 10, as reported by the several carrying companies, amounted to 613,824 tons, against 491,745 tons in the corresponding week last year, an increase of 122,079 tons. The total amount of anthracite mined for the year is 27,588,552 tons, against 23,210,629 tons for the same period last year, an increase of 4,377,923 tons. The quantity of bituminous coal sent to market for the week amounted to 115,291 tons, against 76,491 tons in the corresponding week of last year, an increase of 38,800 tons. The total amount of bituminous mined for the year is 4,724,874 tons, against 4,144,289 tons for the corresponding period last year, an increase of 580,585 tons. The total tonnage of all kinds of coal for the week is 729,115 tons, against 568,236 tons in corresponding week last year, an increase of 160,879 tons, and the total tonnage for the coal year is 32,313,426 tons, against 27,354,918 tons to same date last year, an increase of 4,958,508 tons. The quantity of coal and coke carried over the Pennsylvania Railroad for the week ending December 10 was 206,610 tons, of which 148,228 tons were coal and 58,382 tons coke. The total tonnage for the year thus far has been 8,633,702 tons, of which 6,372,519 tons were coal and 2,261,183 tons coke. These figures embrace all the coal and coke carried over the road east and west. The shipments of bituminous coal from the mines of the Cumberland coal region during the week ended December 10 were 59,261 tons, and for the year to that date 2,100,525 tons, an increase of 109,487 tons as compared with the corresponding period of last year. The coal was carried to tidewater as follows: Baltimore and Ohio Railroad—week, 41,560 tons; year, 1,337,550 tons; increase compared with 1880, 152,063 tons; Chesapeake and Ohio Canal—week, 12,667 tons; year, 498,320 tons; decrease compared with 1880, 103,096 tons. Pennsylvania Railroad—week, 4,876 tons; year, 261,327 tons; increase compared with 1880, 57,251 tons. The Reading Railroad shipment for last week, ending December 17, was 184,500 tons, of which 49,000 tons were sent to and 41,500 tons shipped from Port Richmond, and 22,000 tons sent to and 21,300 tons shipped from Elizabethport.—*Phil. Ledger, Dec.* 19.

The Business of the Fairbanks Scale Company in 1881.

A CORRESPONDENT of the *Boston Journal*, writing from St. Albans, Vt., under date December 12th says: "During a recent visit to the Fairbanks Scale Works, at St. Johnsbury I learned the following interesting facts relative to the business of the company for the year 1881. The twelve months now drawing to a close have been the most prosperous of any year since the establishment of this great industry. The number of scales ordered since January 1, has exceeded 63,000, or 8,000 more scales than were sold in 1880. The company has made 4,000 hay scales and 400 iron frame railroad track scales. The number of Post Office scales made under contract with the United States Government the current year was 2,500. In the manufacture of a hundred varieties of scales weighing from half an ounce to 60,000 pounds, there have been used the past year 5,000 tons of pig iron, 500 tons of bar iron, 175,000 pounds of steel, 25,000 pounds of brass castings and 2,000,000 feet of lumber. The Fairbanks Scale Company employs 600 men, to whom it pays in wages $350,000 per annum. The business done by the company approximates the sum of $5,000,000 a year. Its scales have been shipped to all parts of the civilized world during the year 1881. The Messrs. Fairbanks are the principal owners of the St. Johnsbury and Lake Champlain Railroad, and during the past season over 5,000 tons of coal were brought over the line and used at the scale works. The men employed by the company are intelligent and skillful to a marked degree, and most of the workmen own pretty cottage homes. The liberal management of the Messrs. Fairbanks in their great industry, as well as their munificent public gifts to the educational, religious and literary institutions of St. Johnsbury, has done much to make the town what it is to-day.

Forfeiture of Life Insurance for Non-payment of Premium.

IN the United States Supreme Court at Washington on the 19th inst., a decision was rendered in the case of Ruth E. Thompson vs. the Knickerbocker Life Insurance Company, a case presenting again the question of forfeiture for non-payment of premium. The Court holds:

1. That the failure to pay a premium punctually when due forfeits the whole policy.

2. That if the company accepts a note in part payment of the premium with the express stipulation that the note shall be paid at maturity upon penalty of forfeiture, the penalty must be enforced.

3. That sickness or incapacity is not a valid excuse for non-payment.

4. That the company is not bound to give the insured notice of the maturity of the note or the falling due of the premium.

5. That a parole agreement to waive forfeiture cannot stand against the express terms of the policy or note.

6. The previous acts of leniency on the part of the company cannot be construed as a permanent waiver of the forfeiture clause. Judgment of the Circuit Court is affirmed.

Financial and Commercial Review.

THURSDAY EVENING, Dec. 22, 1881.

THE rate for call loans during the day to the stock brokers was 6 per cent to that rate plus a commission of 1-32 and 1-16 of 1 per cent per day. On Governments the same class of loans could be made at 3½@4 per cent. In the last hour the rate fell to 4@5 per cent.

The posted rates for prime bankers' sterling were 4.80½@4.81; and 4.84½@4.85. The actual rates were 4.79¾@4.80¼, and 4.83¾@4.84¼, with cable transfers 4.84⅞@4.85¼, and prime commercial bills 4.78¼@½. Continental bills are as follows: francs, 5.25⅝@5.26¼ and 5.20⅝@5.21¼; marks, 94@94⅛ and 94⅞@95; and guilders, 39⅝@40⅛.

From the Report of the Comptroller of the Currency it appears that in addition to the Mechanics' National Bank of Newark and the Pacific National Bank of Boston, there have been since the institution of the National Bank system, 86 failures of national banks, or, to speak in the terms of the report, 86 have been "placed in the hands of receivers prior to November 1, 1881." The claims proved against these banks aggregated $25,966,602, of which $18,561,698, or about 80 per cent, has been repaid to creditors. Of the $7,601,750 of assessments levied on shareholders for the purpose of enforcing their individual liability, but $3,000,000 has been collected. The affairs of twelve banks which failed prior to November 1, 1880, have during the year just past been closed with this result: that one of them was able to pay 60 per cent of its obligations, another 63.6 per cent, another 84.83 per cent, another 100 per cent, without interest, and the remaining eight principal and interest. There are sixteen, besides the Newark and Boston banks, still in the hands of receivers credited with dividends paid to their creditors of from 25 to 100 per cent.

The Supreme Court at Nashville, Tenn., on the 17th inst., granted the petition of the State Funding Board to have advanced on the docket the motion of the Board to dissolve the injunction against funding the State debt at par 3 per cent interest, and the coupons to be receivable for taxes. The case will, therefore, by order of the court, come up for a hearing on the 17th of January, 1882.

Judge Prentiss, of Cleveland, Ohio, has decided that a railroad company cannot hold property in cars for demurrage penalty. The decision is an important one.

The treasurer of Clarke county, Va., has been instructed to purchase bonds issued in aid of the Shenandoah Valley Railroad Company, to the extent of his surplus funds, if they can be had at par.

A mortgage covering all the property, franchises, etc., of the Cincinnati and Eastern Railway Company and its various branches, given to P. F. Swing, a trustee, to secure the issue of $2,000,000 of bonds of said company, has been filed in Cincinnati. The mortgage is given for the purpose of funding the entire debt of the company, and provides for the redemption of all bonds heretofore issued by them, and the payment of all other indebtedness of said company.

Geo. W. Easley, attorney of the Hannibal and St. Joseph Railroad Co., has filed in the Supreme Court of Missouri a motion for a rehearing in the mandamus case recently decided against the railroad company.

The plan for reorganization of the Ohio and Mississippi Railway, which has been sent to England, has not been definitely acted on there, but will be in due time. The physical condition of the Ohio and Mississippi and Marietta and Cincinnati is good, especially the latter, which is said to be above the average of Ohio railroads at this time.

The government has decided that imported steel-hammer moulds are liable to an ad valorem duty of 45 per cent as partly manufactured articles of steel, and are not subject merely to three cents per pound duty as steel in bars.

Stockholders of the Panama Railroad Company who have deposited their stock with the United States Trust Company will receive six months' interest on Jan. 3 on the unpaid installments due from the canal association.

The Chief of the Bureau of Statistics reports that the total values of the exports of domestic provisions, tallow and dairy products, during the month of November, 1881, were $8,621,521; November, 1880, $12,075,864; eleven months ended November 30, 1881, $120,340,387; eleven months ended November 30, 1880, $128,007,783. The total values of the exports of provisions and tallow during November, 1881, were $7,795,818, and during November, 1880, $10,514,596. The exports of dairy products for the seven months ended November 30, 1881, amounted to $14,336,308, and for the corresponding period in 1880, to $18,052,787.

The Wabash, St. Louis and Pacific Railway Co. have appointed the Gt. Western Railway Company of Canada as fiscal agents in London for the purpose receiving certificates of the preferred and common stock, with a view to effecting a transfer thereof upon the books of the company in New York—all charges incident to the transmission of the stock to be borne by the owners.

The Comptroller of the Currency has authorized the following National Banks to commence business; the Garfield National Bank of New York City, capital $200,000; the First National Bank of Wallingford, Conn., capital, $100,000; the Lancaster National Bank of Lancaster, N. H., capital, $125,000; the Chicago National Bank, capital $300,000; the National Bank of Stamford, N. Y., capital, $50,000; and the Manufacturers' National Bank of Neenah, Wisconsin, capital, $65,000.

The Secretary of the Treasury has ordered to be taken to the Supreme Court the case of Kennedy, an importer of hoop iron, cut and punched, against the collector of customs of Philadelphia, recently decided by Judge McKennan in favor of the importer. This case involves the question of duty on hoop iron used as cotton ties, on which Assistant Secretary French rendered a decision that a specific duty of 1½ per cent per pound should be charged instead of 35 per cent ad valorem.

The Chief of the Bureau of Statistics at Washington reports that the total value of domestic breadstuffs exported from the United States during the month of November, 1881, was $18,025,880, against $22,053,198 during the month of November, 1880; for the five months of the fiscal year ending November 30, 1881, $98,337,515, against $134,874,360 for the corresponding five months of 1880; and for the eleven months of the calendar year ending November 30, 1881, $210,318,432, against $257,231,045 for the corresponding eleven months of 1880. In the export of wheat there was a falling off of 24,000,000 bushels; Indian corn, 39,000,000; rye, 1,300,000 bushels, and barley, 900,000 bushels. In wheat flour there was an increase of about 500,000 barrels.

The Commissioner of the General Land Office has ordered the sale of about 5,000 acres of public lands lying near Toledo, on Lake Erie. The sale will take place on the 13th of February next, at the Land Office in Washington.

Solid Petroleum.

According to a St. Petersburg paper, a German, Herr P. N. Dittmar, has practically solved the problem of rendering petroleum solid—a problem considerably studied by chemists of late in view of the large question of transport. A company has been formed in Russia to work the patent when completed. The transformation of the substance will not cost more than about ten cents per thirty-six pounds. The mode of treatment is not yet disclosed, and chemists to whom small samples of the solid petroleum have been sent have not been able to make out the nature of the foreign substances that are added in a proportion of 2, or at most 3 per cent, to solidify the petroleum. The reporter of the St. Petersburg paper saw the product, says it is of a wine-yellow color, and has the consistency of very stiff gelatine; it can be kneaded with the fingers like wax, and is yet somewhat breakable. A small piece of the thickness of a lead pencil and about an inch long could be lit at one end and held with the fingers. It melted like wax, and it was only after a little, when hot drops ran down, that the flame had to be blown out. The danger of fire is considerably less than with liquid petroleum. The product can easily be liquified when required by the addition of vinegar, and the process is rapid. The vinegar in time separates out below and the petroleum above. It is not stated whether the same vinegar can be used repeatedly.

An Improved Railway Car.

The relative merits of the English and American patterns of railway car have been discussed of late on both sides of the Atlantic, and it has been clearly brought out that while the American system gains in safety to the traveler from attack and robbery, it loses in point of privacy. A pair of first-class carriages, which appear to combine both of these advantages, are, however, now being tried on the London and Northwestern Railway. As described by *Cassell's Magazine*, they arec onnected together by a covered passage, and a gangway runs from end to end of both. Small compartments open out of this gangway on each side, and at the extremities of the two cars there are single compartments having four seats, which are available as couches for sleeping in at night. Two sleeping-berths are also suspended from the roof for use if necessary. Each of these compartments occupies the whole breadth of the vehicle, and opens by a door into a room where an attendant is waiting. The side compartments opening on the gangway are also provided with sleeping accommodation, in the form of couches which fold against the wall when not in use. Care has been taken to provide good ventilation and facilities for viewing the scenery; lavatories are attached; and the cars are lit and heated by means of oil and coal gas. In this way the freedom and convenience of the Pullman car is to a certain extent combined with the personal independence of the ordinary railway carriage.

Wrongful Application of Money.

A decision was rendered in the United States Supreme Court, at Washington, on the 19th inst., in the case of William Libby and others, survivors of A. T. Stewart and Francis Warden, against Lewis C. Hopkins and others, brought here by appeal from the Supreme Court of Ohio. This was a suit to foreclose certain mortgages upon real estate in the city of Cincinnati, given by Hopkins to A. T. Stewart & Co., as security for the payment of promissory notes. Hopkins sent Stewart & Co., before he became insolvent, money enough to pay these notes and release the real estate from the lien of the mortgages, and gave specific directions that the money should be so applied. Stewart & Co., however, used the remittances to pay other and unsecured debts of Hopkins for merchandise bought of them and then, after Hopkins became insolvent, sought to have the mortgages declared a first lien upon the property which they covered. The court below refused to allow this to be done, declaring that Stewart & Co., had no right to set off the unsecured debt due them against funds intrusted to them for an entirely different purpose. This court affirms the judgment of the Supreme Court of Ohio, and holds that as Stewart & Co. refused to apply the money as Hopkins directed, they held it subject to his order, and continued so to hold it until the rights of the Trustee in bankruptcy attached. If, therefore, Stewart & Co., enforced the lien of the mortgages, they must satisfy the counter-claim of the Trustee in bankruptcy of Hopkins to the money which they wrongfully applied.

The Sutro Tunnel and the Speculators.

The great Sutro tunnel, four miles long, pierces Mt. Davidson, Nevada, 2,000 feet below its summit. It cuts the Comstock vein some 1,500 feet below the surface working-shafts of all the celebrated Bonanza silver mines, which, by being thus drained of water, are now being worked 1,000 feet deeper than before. "This costly tunnel," says the San Francisco correspondent of the *Baltimore Sun*, "was a speculation got up in Europe by Adolph Sutro, when the mines were producing millions every month, not from the vein itself, which never paid dividends of any account, but from irregular masses of extremely rich ore, found in a few instances beyond the vein itself. These lie like isolated nest-eggs, hidden from human search, deeply buried in barren porphyritic rock, leaving no signs by which they could be traced. It was and it is now assumed by speculators and by some geologists and experienced miners that these contingent excressences are a law of the formation and accompany the Comstock vein to its greatest depths. Millions have been spent in the past four years on the faith of this theory, diamond drilling from the dark gangways of a score of mines on this celebrated vein, through porphyritic rock encasing the vein, guided only by guess, without any signs of a bonanza. As these holes are not over one and a half inches in diameter, they may be within an inch of a bonanza and miss finding it.

"This will convey a conception of the gambling chances on which speculators are putting their money at risk. Of a thousand holes in four years, not one has found anything! Just now it is rumored that Sutro himself has sold out his stock, and the market is demoralized. Yet, ere you receive this letter, you may receive a dispatch announcing that the diamond drill in one of the mines has struck rich ore. However small the extent which a drill hole can reveal, the thirty mining stocks on the whole line of the Comstock vein will boom aloft twenty millions, probably. Though only one may own the bonanza, all will be advanced in value by this confirmation of the theory that bonanzas are accompaniments of the regular formation throughout its whole extent. The volume of water now flowing from the Sutro tunnel is six millions of gallons every twenty-four hours, which confirms the assumption that every hill in Nevada and California is a reservoir of water preserved from evaporation and available for irrigation, thus making providential compensation for the scanty flow of surface-streams.

Wabash, St. Louis and Pacific Railway.

Like the New York Central, the Erie, and one or two others, the Wabash have opened a London registration for their Common and Preferred stocks. The Great Western of Canada act for the Wabash, and the event, important to the Wabash, is not without interest to Great Western of Canada Proprietors, indicating, as it does, an intimate connection between the two companies.

The Wabash is so vast an undertaking that its length is measured by thousands of miles of railway. It is a combination of a number of railways, and forms in the whole quite a network of railways within itself, terminating at Detroit, where it unites with the Great Western of Canada. It embraces within its extensive system Toledo, Butler, Fort Wayne, Logansport, La Fayette, Decatur, Altamont, Peoria, St. Louis, Quincy, Burlington, Columbia, Moberly, Brunswick, Lexington, Kansas City, Council Bluffs, Omaha, with a fork to Chicago, etc.

Different opinions prevail as to the value of

the stock of this large amalgamated railway, but whatever its value to its own proprietors there can be no doubt that it will throw an important traffic on the Great Western of Canada.—*Herapath's Railway Journal.*

Cincinnati Iron Market.

OFFICE OF E. L. HARPER & CO.
Cincinnati, Dec. 20, 1881.

THE market continues about the same as at last writing. The demand for all grades is good and prices strong. We quote as follows:

Southern Car Wheel		36 00@40 00	4

Plumbago not Dutiable.

A DECISION of importance to importers of plumbago was rendered in the United States Supreme Court at Washington on the 19th inst. in the case of Josiah H. Gautier and others against C. A. Arthur, Collector. This was a suit brought to recover duties paid on 800 barrels of plumbago imported by a French vessel from Ceylon. The importers contended that the goods were exempt from duty under the fifth section of the act of June 6, 1872, to reduce duties on imports, which places plumbago on the free list. The collector held that the goods were liable to duty under the seventeenth section of the act of June 30, 1864, which imposes a discriminating duty of 10 per cent ad valorem upon goods imported by foreign ships. This court holds that the discriminating section of the act of 1864 was repealed by the act of June 6, 1872, so far as the free list in the fifth section of the last mentioned act is concerned, and that, consequently, plumbago, whether imported in foreign ships or American ships, is free from duty, as are also the other articles named in the said fifth section. The judgment of the Circuit Court is reversed, with directions to enter judgments in favor of the importers for the amount of duties paid, with interest and costs.

Suspicious Symptoms.

A MINISTER who was perhaps not too careful in his habits was induced by his friends to take the teetotal pledge. His health appeared to suffer, and his doctor ordered him to take one glass of punch daily.

"Oh!" said he, "I dare not. Peggy, my old housekeeper, would tell the whole parish."

"When do you shave?" the doctor asked.

"In the morning."

"Then," said the doctor, "shave at night; and when Peggy brings up your hot water, you can take your glass of punch just before going to bed."

The minister afterwards appeared to improve in health and spirits. The doctor met Peggy soon after and said:

"I'm glad to hear, Peggy, that your master is better,"

"Indeed, sir, he's better, but his brain's affected; there's something wrong with his mind."

"How?"

"Why, doctor, he used to shave at night before going to bed, but now he shaves in the morn, he shaves before dinner, he shaves after dinner, he shaves at night—he's aye shavin'."

The symptons were indeed, very suspicious.

THE PERFECTED

REMINGTON

TYPE-WRITER.

PATENTS

We continue to act as Solicitors for Patents, Caveats, Trade Marks, Copyrights, etc., for the United States, Canada, Cuba, England, France, Germany, etc. We have had **thirty-five years' experience.**

Patents obtained through us are noticed in the SCIENTIFIC AMERICAN. This large and splendid illustrated weekly paper, **$3.20** a year, shows the Progress of Science, is very interesting, and has an enormous circulation. Address MUNN & CO., Patent Solicitors, Pub's. of SCIENTIFIC AMERICAN, 37 Park Row, New York. Hand book about Patents free.

Established in 1831.

AMERICAN RAILROAD JOURNAL.

PUBLISHED WEEKLY BY THE

American Railroad Journal Company,

No. 23 Liberty Street,
NEW YORK.

The AMERICAN RAILROAD JOURNAL, the oldest railroad paper in the world, was established during the construction of the first 100 miles of railroad in this country. Its files of the past fifty years furnish a complete record of the development of American railroads and faithful chronicles of the kindred financial interests. It contains features of special value to investors and others desirous of being readily acquainted with values and transactions connected with the development and working of our railroad systems, and much of interest to the general reader. It is taken by leading railroad men, investors and banking houses in this country and Europe, where it has long been a recognized authority in its special field, being recommended as such by "Chambers' Encyclopædia" and other standard foreign and domestic publications. We give below a few extracts from opinions of the press:

From "Herapath's Railway Journal," London.

The AMERICAN RAILROAD JOURNAL, one of the most honest and outspoken of American papers.

From the "Journal of Commerce," New York.

The AMERICAN RAILROAD JOURNAL, a most valuable weekly newspaper. Is now half a century old.

From the "Cincinnati Price Current."

The AMERICAN RAILROAD JOURNAL's list of patrons is composed largely of the oldest and heaviest financial houses in the United States, Great Britain and the Continent, and of railway companies, manufacturing establishments and banking and commercial houses in this country.

"From the "Pittsburg (Pa.) Chronicle."

The AMERICAN RAILROAD JOURNAL is authority on railroad news.

From the "Washington (D. C.) Law Reporter."

The AMERICAN RAILROAD JOURNAL is a most valuable publication, and to all persons interested in American railroads, earnings, dividends, etc., etc., it is almost invaluable.

OFFICE OF

AMERICAN REFRIGERATOR LINE,

New York, Oct., 1881.

Shippers of Foreign, Domestic, and Fresh Fruit, Imported Liquors, Patent Medicines, Essential Oils, Mineral Waters, Lager Beer, Ales and Porters, Oysters, or, in fact, any class of goods that needs protection from heat or cold while in transit to the West and Southwest, either in Summer or Winter, will do well to ship the same by the new and elegant cars of the

AMERICAN
REFRIGERATOR TRANSIT COM'Y.

Guaranteed Bills of Lading given.

Time as quick and rates as low as by any first class fast freight line.

NEW YORK, LAKE ERIE, AND WESTERN RAILWAY

TO THE TRAVELING PUBLIC.

During the Centennial season—six months closing September 10, 1876—the Erie Railway carried almost THREE MILLION passengers, without a singe accident to life or limb, or the loss of a piece of baggage.

And for a whole year the official records of the United States Post Office Department show the arrivals o Erie Railway trains in New York, on time, to be from 15 to 27 per cent ahead of competing lines.

Facts well worthy the consideration of travelers.

E. S. BOWEN, *General Superintendent.* JNO. N. ABBOTT *Gen. Passenger Agent.*

THE CALIGRAPH.

NO. 2 CALIGRAPH.

NO. 2 CALIGRAPH.

Weight 20 Lbs.

THE CALIGRAPH is a machine invented to take the place of the pen. It is operated by touching keys as in playing the piano. The writing, which is always neat and legible, and can be copied in a letter-press like ordinary pen writing, is done with wonderful ease and about three times faster than with the pen. Its use is learned in from two weeks to two months' time. It manifolds, giving from three to twenty copies at one impression. It aids composition, does away with bad penmanship, and saves time, labor and money. It is the best-known means of teaching spelling and punctuation. These qualities render it indispensible to business men, or all who have writing to do or children to educate.

THE CALIGRAPH is the invention of Mr. G. W. N. Yost, who was mainly instrumental in placing the TYPE-WRITER before the public, and who for the past seven years has given his entire attention to to writing machines. His long experience and thorough knowledge of the defects of the old style of Writing Machines, have enabled him to combine in the CALIGRAPH all the good, and to leave out all the bad elements of Writing Machines, as heretofore made.

The No. 1 machine is furnished with capital letters, figures, and punctuation marks only. Its key-board contains forty-eight characters, which are arranged in six rows of eight each.

No. 1 Caligraphs are made with four different styles of type, as follows: Large and small Gothic, and large and small Roman.

The No. 2, or upper and lower case Caligraph, is like the No. 1 in all respects, except that it is furnished with both capital and small letters, and is made larger to admit of the use of extra keys, type-bars, etc., for the additional characters. Both machines are operated in the same manner, and are about equal in speed.

The key-board of the No. 2 machine is arranged as follows: It contains, in all, keys for seventy-two characters. Forty-eight of these, occupying the centre of the board, are lower-case letters, figures, and punctuation marks, and are arranged precisely as in the No. 1 key-board. They are black on a white back-ground. At each end of the above, to the right and left, are thirteen capitals, which are white on a black back-ground. The whole key-board is arranged in six rows of twelve characters each.

It will be remembered that the old style of No. 2 Type-Writer has two letters on each type-bar, and one set of keys for both capital and small letters, an arrangement which necessitates a complicated carriage movement and a great loss of speed, as, in order to print a capital, a special key must be depressed with a finger of one hand while the capital is being struck with a finger of the other.

The No. 2 Caligraph has an independent key and type-bar for each letter, thus avoiding all complication and greatly enhancing speed. The Caligraph is constructed of the most durable materials. There is no cast or even malleable iron used. Every part is made of cast or rolled steel or brass, by skilled mechanics. It is finely finished, and with proper care will, like the Sewing Machines, last a lifetime.

The Caligraph is a great boon to Ministers, Lawyers, Manufacturers, Editors, Authors, Stenographers, Insurance Companies, Bankers, Government Officials, Copyists, Teachers, Private Families, and all who have writing to do or children to educate.

Many young men and women have already found pleasant and profitable employment, using the Caligraph; any intelligent young man or woman can, by buying a Caligraph and becoming expert in its use, secure a pleasant and profitable position. The demand for laborers in this field of enterprise is practically unlimited.

Address

THE AMERICAN WRITING MACHINE COMPANY.

213 WEST 31st STREET, - - - NEW YORK.

Weight 10 Lbs.

No. 1,

195 Broadway, New York, Dec. 2d, 1881.

A. W. M. Co.

Gentlemen:—The two No. 2 Caligraphs purchased of you for use in the law office of Dillon & Swayne, are giving excellent satisfaction. We prefer the large to the small Roman type. I have used the Type-Writer for several years, but the Caligraph is much superior. I cannot enumerate all the points of superiority, but will refer to some of them. Its lightness and portability is a great improvement. It is also a great advantage to have a separate lever for each type. This avoids the necessity of shifting from Upper to Lower Case, and the memory is not so taxed to remember the kind of type you are writing with.

The arrangement of the letters on the key-board is the best I have ever seen. The alignment is perfect, and the arrangement for retaining it, excellent.

The ribbon movement is sure and easy, and the shifting of the ribbon requires but a single touch of the fingers.

The arrangement for carrying the paper is simply perfect, doing away with the rubber bands, which were continually breaking or getting weak; drawing the paper sideways, and spoiling the regularity of the spaces between the lines.

The pace-keys on either side is a great convenience, and much better than the old way of having a space bar in front.

The carriage movement is very uniform, and has no hitches or sluggish points, as in the Type-Writer. The trip which disengages the carriage, and enables the operator to move it at pleasure is invaluable.

Changing the line spacing is done instantaneously and with a single movement of the hand. The bell and stops are in front, and the parts which require tension are all accessible.

The Caligraph does not get out of order. It is easily cleaned. The new machines have a very strong stroke, which makes them very desirable for manifolding. As many as four to six good copies can be taken at once, on thick paper.

Paper of any width can be used, also envelopes or postal cards, without changing the machine.

The variety of type used in the Caligraph is another great advantage. The large Roman letters used in your No. 2 are especially admired by all who have seen the machine or its work.

I use the machine personally, several hours daily, and find it all that could be desired. You are at liberty to refer any one to me you may desire.

Respectfully yours.

E. H. SMITH, Stenographer.

Country—City.

IT is a common saying in the Country that the City is the place in which to make money. In this saying one great truth is generally overlooked, that money is worth no more than what it will buy. Now, if a person in the country receives food, lodging and clothing, and money enough to pay necessary bills, that person is well off—comparatively rich. But the person does not think so, and so gives up a certainty for an uncertainty and enters a large city. If successful in procuring work the pay received is in money, and perhaps more money than the party ever handled before. Here now is the much sought change. Instead of receiving food, lodging and clothing, the person receives money, the hard earned, much coveted money. But the person cannot live on money. Money has no life imparting power. It cannot satisfy hunger, nor thirst. It cannot clothe nor warm. All of these things a person must have, and so is obliged to exchange hard earned money for them, and in this City by the time a party has done this, it is generally found that the money has not as comfortably fed, clothed, housed and warmed as the same amount of labor formerly did in the country. This is a very favorable view of the situation of the many who come from the country to the city, and all observing men know that a large class are in precisely this condition. Now add to this class, the number that were dependent on charity in this city last winter, 1,200,000—or 1 out of every 13 inhabitants, and it can readily be maintained that the great majority of persons here are not as comfortable as are the persons of the working class in the country.

The other day a large and influential firm advertised for a young lady to fill an ordinary position where the compensation was very limited. Some 250 applications were received and perhaps a dozen of the best penmen were invited to call. Out of the dozen calling only one was considered to be any where near what was required. These applicants all had histories. Mrs. S., was a young married woman of about 23 years of age. Some months before her application she had contracted what was considered a first-class marriage. Her husband was a buyer in a large wholesale house, commanding a good position in society as well as a good salary. Considering himself pretty smart, he concluded to go into business for himself, and gave up his position. He was not long in business before he failed. Thrown upon the world he experienced that which befalls all high salaried men when out of employment. He found that high paying positions were all filled, and poorer salaried places were beneath his acceptance. Step followed step until at last he became so much reduced financially, that he was obliged to give his consent allowing his wife to earn what she could, to help make both ends meet. With tears in her eyes she offered to work for $8 per week and was refused.

Mrs. P., was the best penman of the whole number. She was a young married woman about 26 years old. She was of very respectable family, her ancestors having formerly owned very valuable estates in this City. She married at 15, against the wishes of her parents, and for 10 years had endured poverty and abuse for the sake of clinging to her husband. At last weary and discouraged and almost starved she separated from her husband, who was only too glad to be rid of her, and sought to support herself. In a little room in the upper ward of this City, she just managed to keep soul and body together by covering buttons, etc. Almost in rags and tatters she applied to this firm only to be rejected. She could starve, but could do nothing menial such as housework.

A man answered the advertisement in person. He was in reduced circumstances and had an idea that if he was willing to work for what a girl was to receive the firm would employ him. Other men followed him all with apparently the same story, and all seemingly respectable men. Most all the applicants at any of our large business houses are men and women who as boys and girls had good homes and fair opportunies in the Country, but desiring more money left the Country for the City. They received more money truly, but the money would not buy the home and living and comfort left behind in the Country. Thus by these homely illustrations we see the necessity of teaching our children to learn the value of money and its uses, for multitudes of men and women can be mentioned who have never roved from their Country towns, and have never known what it is to be without a good home, good society and solid comfort. It is much to be regretted that the diaries of business men cannot be made more open to the inspection of the public. That boys and girls growing into manhood and womanhood cannot have the privilege of looking beneath the show and tinsel of a City life and see the sorrows and sufferings of those who apparently are successful. It is a great calamity that the vast multitudes who have left Country homes to be lost in the great City, cannot be made to pass in mournful array clad in tatters, hungry and forlorn, that the discontented ones in Country homes may behold them, and pause before leaving well enough in their attempt to do better. We have no sympathy with the statement that men must leave home to be successful, but all faith in the doctrine that it is best for most to build over against their own wall.

Railway Station Indicator.

A VERY simple but useful contrivance, gotten up for the purpose of indicating to passengers on the train the name of the next station, has been adopted by the Pennsylvania Railroad Company. At each end of the car is an oblong box containing the names of all the stations on a ribbon. Over the top of the box is printed "next stop," and the name of the station at which the next stop is to be shows through an opening in the door of the box. Thus when the train leaves Philadelphia, the next stop indicated is Abbotsford, but as the train nears that place, and no stop is necessary, the station is changed to Angora. The shifting of the names is controlled by the engineer on the locomotive, and in this case is done by means of the vacuum brake. There is a small rubber bellows in each box which is contracted when the engineer makes a vacuum; this works a lever that raises a platform on which the band containing the names of the stations rests. An ingenious catch prevents the band from slipping backward, so when the platform falls again by the bellows filling with air the band must fall to the front, thus shifting the name of the stations passed to the next one above it. The engineer has a small indicator in the locomotive cab, bearing the names of the stations, and he thus knows whether the apparatus is set right. The indicator can also be worked by the Westinghouse automatic brake-cylinders or by a bell cord. The device does away with the train hands calling the names of the stations; and the names being printed in legible letters, are more easily made out—by a person who can read—than some of the almost unintelligible ejaculations of a brakeman. The cost of the apparatus is about one per cent of the cost of a car, and the inventor says the cost of maintenance will be very small.

Lake Shore and Michigan Southern Railway.

THE following statement was presented at the annual meeting of the Lake Shore and Michigan Southern Railway Company held on the 23 inst., December, 1881, being partly estimated:

	1881.	1880.
Gross earnings	$17,970,000	$18,749,461
Operating expenses and taxes	11,286,000	10,418,105
Percentage of earnings	[62.80]	[55.56]
Net earnings	$6,684,000	$8,331,356
Interest, rentals and dividends on guaranteed stock	2,710,000	2,750,374
Balance	$3,974,000	$5,580,982
Equals per share	[8.03]	[11.28]
Dividends, 8 per cent	3,957,320	3,957,320
Leaving	$16,680	$1,623,662

The passenger, mail and express business shows a gain of about half a million of dollars. While the freight tonnage increased about 8 per cent the reduction in rates caused a falling off of over a million and a quarter dollars in earnings therefrom. Had the freight rates of last year been obtained for this, there would have been a gain of about half a million of dollars in gross earnings instead of the loss of over three quarters of a million now shown—and the net result would have been increased by the sum of these two amounts. Upon the same basis expenses would have been somewhat under 59 per cent of earnings. This would be about 3 per cent more than last year, and is due to an advance in the price of labor, and of most materials; such advance being common to all the railroads. The road and equipment has been fully maintained at its best standard. Expenses include the cost of 11,000 tons of steel rails.

E. D. WORCESTER, Treasurer.

Compressed Air Locomotive.

ON he Stratford and Epping Forest Branch of the North Metropolitan Tramway Company, cars are now being daily drawn between Stratford and Leytonstone, by the Beaumont compressed air locomotive. The distance is two and a quarter miles, and as there are gradients amounting in the whole distance to a rise of 82 feet, and at least one "nasty curve" in the course of the journey, the new locomotive is fairly well tested. The air is transmitted by a flexible hose laid underground, the compressing station at the depot of Tramway Company to the engine on the rails in the street. The air pressure at the commencement of each journey is brought up to 1,000 pounds to the square inch. The journey to Leytonstone, performed once an hour at the moderate pace necessary to make the journey alternate properly with the horse cars, was done yesterday by the expenditure of 325 pounds of this pressure, while the return journey, which is down hill, only reduced the pressure 125 pounds further. The horses traveling on the road have become familiar with the locomotive. The Board of Trade regulations require the engine to be clothed, so to speak, with long skirts, so that no wheels are seen, and as the engine travels along the road like a moving house, the sight to some horses seeing it for the first time is a little, but apparently not seriously, disquieting. In the event of the Beaumont engine being utilized generally for tramway traffic, a combined car and locomotive would be constructed which would not seem so unfamiliar to passing horses. The communication direct to the locomotive of the air at such high pressure is an interesting achievement, and the safety of the storage of such high pressure is obviously assured if the maximum strength of the cylinder is proved originally and by periodic inspections to be well above the pressure it is called upon to bear. From the commencement of the journey every foot of progress implies a reduction in the pressure. To keep the temperature of the air up during its expans on enough heat is provided by steam jacketing of the cylinders. The high pressure is obtained at an expenditure of from 8 to 10 pounds of coal per tram mile, which is said to be sufficiently satisfactory from an economical point of view.—*London Daily News.*

Canada Southern Railway.

THE following is the statement of the Canada Southern Railway Company for the years 1880 and 1881—December, 1881, being partly estimated:

	1881.	1880.
Gross earnings	$3,372,305 52	$3,705,679 19
Operating expenses & taxes	3,675,853 16	2,406,341 39
Per cent of earnings	[79.35]	[64.94
Net earnings	$696,452 36	$1,299,337 80
Receipts from other sources	10,673 65	15,386 22
Total receipts, net	$707,126 01	$1,314,724 02
Less interest on bonds	678,624 70	407,799 61
Rate	[5 per cent]	[3 per cent]
Balance	$28,501 31	$906,924 41
Equals, per share of stock	19	6.04

Decrease in gross earnings, $333,373.67. equal to 9.0 per cent; increase in operating expenses, $269,511.77, equal to 11.2 per cent; decrease in net earnings, $602,885.44, equal to 46.4 per cent.

The increase of 11.2 per cent in operating expenses was caused by a somewhat unusual expenditure for renewals and maintenance of the road and equipment, an increase in the freight movement of 10 per cent over that for the year 1880 and the greater cost of materials and labor referred to in the statement of June 30 last. In addition to other items of maintenance and repairs, the following have been charged to operating expenses during the year: 169,681 ties, equal to 64.27 miles laid, and 1,460 tons steel rails, eqnal to 15.53 miles laid, $112,757.56; 61 new cars of various classes built and 184 cars of various classes rebuilt, $57,342.55. The loss in revenue arises chiefly from the decrease in rates obtained on through freight business, in which the average reduction was 20.2 per cent. If the average rate of 1880 had been obtained on the tonnage of 1881, more than $500,000 would have been added to the net revenue for this year. The passenger traffic shows an increase of 30 per cent in the number of persons carried, but the low rates received from through passengers caused a falling off of 4 per cent in the gross earnings as compared with 1880. Had the rates of that year been maintained through 1881 they would have added more than $100,000 to the revenue from this source. It will be observed that the increase in the rate of interest on bonds from 3 per cent to 5 per cent has been fully met, notwithstanding the exceptional decrease in earnings shown above.

C. VANDERBILT, Treasurer.

New York Central and Hudson River Railroad.

THE following is a comparative statement of the operations of the New York Central and Hudson River Railroad Company for the fiscal years ending September 30, 1880 and 1881:

Gross earnings:	1879-80.	1880-81.
From passengers	$6,611,159 51	$6,958,038 32
From freight	22,199,965 94	20,736,749 54
From miscellaneous	4,364,787 78	4,653,608 92
Total earnings	$33,175,913 23	$32,348,396 78
Expenses	17,849,894 38	19,464,786 54
Net earnings	$15,326,018 85	$12,883,610 24
Interest, rentals & taxes on earnings and capital	4,756,799 34	4,990,783 13
Profit	$10,569,219 51	$7,892,827 11
Dividend, 8 per cent	7,141,512 95	7,138,343 51
Surplus	$3,427,706 56	$754,483 60
Profit per share	11.82	8.82
Expenses, per cent	53.80	60.17

Included in the operating expenses for this year are 9,014 tons of steel rails, 44 locomotives, 45 passenger cars and 478 freight cars.

Michigan Central Railroad.

THE following statement of the business of the Michigan Central Railroad Company for the years 1880 and 1881, was presented at the annual meeting of the company held on the 23d inst. The month of December, 1881, is partly estimated:

	1881.	1880.
Gross earnings	$8,936,000	$9,085,749
Operating expenses and taxes	6,752,000	5,738,751
Percentage of earnings	[75.56]	[63.16]
Net earnings	$2,184,000	$3,346,998
Interest and rentals	1,693,000	1,586,410
Balance	$491,000	$1,760,588
Equals per share	[2.62]	[9.39]
Dividends 1881, 2½ per cent. Dividends 1880, 8 per cent	468,455	1,499.056
Leaving	$22,545	$261,542

There was a gain of about $250,000 in passenger business, but in freight, although the tonnage was 4½ per cent greater than last year, the earnings therefrom were about $550,000 less, owing to reduced rates, affecting both gross earnings and net to that extent, which loss was reduced to $150,000, as shown above, by the earnings of the Detroit and Bay City line (145 miles), which this company has operated since 1st of April last. The net earnings of that line have more than met the interest on the bonds issued on its account. Operating expenses include the cost of 10,250 tons of steel rails (an increase of 4,550 tons over last year), eight new locomotives and four new iron bridges. The increase in percentage of expenses is mainly owing to the reduced rates on freight, and partly to increased cost of labor and the principal items of supplies.

C. VANDERBILT, Treasurer.

THERE are indications of more railroad building in New Hampshire next season than for quite a number of years. In addition to the proposed Pemigewasset Valley line, it is expected that there will be a route built from Portsmouth to York (Me.) Beach, and an extension from Littleton to Franconia village. There are also rumors in relation to the completion of the Manchester and Keene and concerning the building of several links in the Connecticut Valley. The extension of the Franconia branch is stimulated by the fact that work will soon be resumed at the iron mines at that place.

AMERICAN Railroad Journal. ESTABLISHED 1831.

PUBLISHED WEEKLY BY THE
AMERICAN RAILROAD JOURNAL CO.,
At 23 Liberty Street, New York.

Subscription, per annum, in advance..... $5 00
Foreign Subscription, including postage..... 6 00

Purchases for the AMERICAN RAILROAD JOURNAL Co. are authorized only by the written order of Geo. F. Swain, Treasurer; and the Company will not be responsible for the payment of bills unless accompanied by such order.

Subscribers are requested to report to our office any irregularity in receiving the JOURNAL.

Contributed articles relating to Railroad matters generally, Mining interests, Banking and Financial items, Agricultural development, and Manufacturing news, by those who are familiar with these subjects, are especially desired.

Payments for advertising and subscriptions should be made by check payable to order of the Treasurer.

AMERICAN RAILROADS OF HALF A CENTURY AGO.

FIFTY years ago this week the AMERICAN RAILROAD JOURNAL published a list of railroads then being constructed in this country, some of which were in part built and being operated. Of the proposed 250 miles of the Baltimore and Ohio Railroad, 60 miles were completed and in operation January 1, 1832; the Albany and Schenectady had 12 of its fourteen miles in operation. The road next in importance to the Baltimore and Ohio at that time, the old Charleston and Hamburg, which was to be 135 miles in length, had 20 miles in operation and was carrying the United States Mail, it being one of the first, if not the very first railroad to have a contract with the government for carrying the mail. The Mauch Chunk had 9 miles completed and in use, and the Quincy, a stone quarry road near Boston, generally known as the first railroad in the country, had 9 miles in use. Work was begun upon the Ithaca and Oswego, 29 miles; the Lexington and Ohio, 75 miles; the Camden and Amboy, 50 miles, and the Lackawaxen 16 miles. Among other railroad enterprises about being undertaken were the Boston and Albany, the Boston and Providence, and the Philadelphia and Norristown.

The JOURNAL mentions in its issue of January 1, 1832, that notice had been given that application would be made to the Legislature of New York at its ensuing session for charters for twenty-five railroads in different parts of the State, with an aggregate capital of $42,000,000. The most important of these projects were the Lake Erie and the Hudson River roads, the proposed route for the former being described as "from Lake Erie through the Southern tier of counties, to the Hudson River, crossing a ferry and then down on the East side to the city of New York." There was considerable opposition to the construction of railroads in this State, and of this road in particular, the opposition coming largely of course, from those who looked upon the railroad as the destroyer of the canal, then one of the chief prides of the State. The bill incorporating the New York and Erie Railroad was passed April 24, 1832, and the earliest meetings of the incorporators were held in the office of the JOURNAL then located at 35 Wall street.

Concerning the urgent demands for a better method of transportation and the advantages of such a railroad as the promoters of the Erie route were advocating, the JOURNAL in its New Years issue, 1832, says:—"With such a railroad, intersected at convenient distance by other railroads, running from the Erie canal and one from Ogdensburgh to Syracuse or Utica, almost every county in the State would be brought within *twenty-four hours' ride* of New York. It would prevent a recurrence of the state of things which now exists in this city. There would not then be, as there now are thousands of barrels of flour and other kinds of produce in proportion, frozen up in canal boats and in sloops on the Hudson; salt would not be now selling in Albany for $2.50 per bushel, and pork at $2 per hundred for want of salt to save it, whilst it is worth from $5 to $7 in this city. Coal would not then sell here for $15 or $16 per ton; nor oak wood at $9, and hickory at $13 per cord, as has been the case for two or three weeks past, if railroads were in general use; but all kinds of business would move on regularly and be more equally divided throughout the year. Produce could come to market as well in January as in July; and the farmer would not be obliged, in order to get his crop to market in the fall, to neglect preparing for the next."

Comparing the condition of the markets in the mid-winter of 1832 with that of 1882; the widely differing prices then in Albany and New York with the comparative equality of quotations to-day in the markets in all parts of this vast continent, and one of the greatest results that the railroad has affected is strikingly illustrated- It may not be untimely for those who are prone to look with a spirit of ensmty and unjust criticism upon the railroad, to take a retrospective glance at the condition of transportation, and the markets fifty years ago. There are errors of management to-day to be remedied and no one realizes it more clearly than the railroad men themselves, but, it is not a bad idea at this season to have brought to our mind the great work which the railroad has performed during the past half a century for the development of commerce, the enhancement of personal comfort and the advancement of national prosperity.

Covering Boilers with Silk.

EXPERIMENTS were recently made in Germany for the purpose of obtaining the relative merits of silk and felt as a covering for boilers, it being a well-known fact that silk is an excellent non-conductor of heat. In one trial three boilers of the same size and make were ranged in order, one covered with the ordinary felt, another with a coating of silk of only five-eights of the thickness of the felt, while the third was left altogether uncovered. They were all filled with water having a temperature of 100 degrees Centigrade, and examined at intervals. After the lapse of three hours it was found that the unprotected boiler had lost 12 degrees of heat, and the other two each two degrees. After a further lapse of 33 hours, the felt covered boiler had lost thirteen and a half degrees, and that covered with silk only 14, so that there was no appreciable difference between the protective powers of the silk and those of a casing of felt nearly twice its thickness. With regard to the cost of the material, it is said that in all silk manufactories

there are waste scraps which it would be difficult or impossible to utilize in the trade. These can, it is asserted, be made up into bands and rolls, costing comparatively little, and sold at a profit to the makers and users of boilers. As to the lasting and wearing powers of silk, as compared with felt nothing is said, and there has not, perhaps, been time to apply an adequate test ; but it is at the least possible that in this respect the finer substance may possess great advantage over the coarser and cheaper.

PERSONAL.

W. S. Baldwin has been appointed General Ticket agent of the Buffalo, Pittsburg and Western Railway and all lines under its control.

Daniel B. McCoy, late Superintendent of the Ashtabula and Pittsburgh Railroad, has been appointed Assistant General Superintendent of the Chicago and Northwestern Railway, in place of James McCabe, resigned.

S. M. Felton, Jr., has resigned his position of General Superintendent of the Pittsburg, Cincinnati and St. Louis Railway to assume that of General Superintendent of the New York and New England Railroad.

George W. Boyd, who has just been appointed Assistant General Passenger Agent of the Pennsylvania Railroad Company, has been connected with the Passenger Department of the road in positions of responsibility for many years, and is regarded as a very efficient officer.

C. R. Kinnan has been appointed Assistant General Passenger Agent and J. L. Charlton Assistant General Ticket Agent of the Missouri Pacific Railroad and leased lines, in place of O. W. Ruggles, who recently resigned to take the General Passenger agency of the Michigan Central.

Frederick N. Finney, General Manager of the Wisconsin Central Railroad has resigned his position to accept the presidency of the Continental Construction Company, which is building the new line between Boston and Buffalo, N. Y. The resignation is to go into effect January 1, 1882.

Augustus R. Griffin, of Hempstead, N. Y., has been appointed receiver of the Southern Hempstead Branch Railroad Company, in the suit of William F. Wood and others to foreclose a mortgage of $75,000. The road runs from Valley Stream to Hempstead, six miles, but has not been operated for several years.

Justice Pratt in the Supreme Court, Brooklon, has granted an order directing Alexander Cameron, to sell the New York, Greenwood and Coney Island Railroad, to satisfy the judgment obtained by Mary Hayes against it. The road is about a mile long, and extends from the long pier, at the foot of Thirty-sixth st., to Fifth avenue, Brooklyn.

Dr. Isaac I. Hayes, the arctic explorer, died at his home in this city on the 17th inst., in the 49th year of his age. He was a native of Chester, Penn. and graduated at the University of Pennsylvania with the degree of Doctor of Medicine. In the same year he sailed with Dr. Kane in the brig Advance, on the famous voyage in search of Sir John Franklin, and was surgeon of the expedition. After his return he delivered a number of lectures on the polar regions, and in July, 1860, he started on another voyage of arctic discovery. He reached latitude 81 deg. 37 min. and then was obliged to return on account of having exhausted his supplies. In 1869 he explored the southern coast of Greenland in the steamer Panther. He was a member of the New York Legislature from 1875 to 1880.

When Mr. John W. Garrett, who has just been re-elected President of the Baltimore and Ohio Railroad Company for the twenty-fourth term, first entered upon his duties as such the road was in anything but a prosperous condition and the securities of the company were way below par. Under his management the road has become one of the leading trunk lines of the country. He displays a great deal of independence in his conduct of the road. He maintains a telegraph system of his own, runs sleeping and parlor cars only which belongs to his company, and has organized an association something on the order of a life insurance company for the benefit of the employes of his road, which is now a pronounced success.

INCORPORATION.

The Paris, Montezuma and Northeastern Railroad Company filed articles of incorporation with the Secretary of State of Illinois on the 24th inst. The principal office is to be at Paris, Ills. The capital is to be $250,000. The road will extend from Peoria, Ills., in a northeastern direction, to the Indiana State line.

Articles of incorporation have been filed with the Secretary of State of Oregon for the Salem and Waldo Hills Railroad Company. Capital stock, $100,000. The object is to build and operate a railroad and telegraph line from Salem through Howell's Prairie, the most fertile and beautiful spot in the Willamette valley, to connect with the narrow gauge road near Silverton. The principal office will be at Salem.

The Chicago, Mt. Vernon and Southern Railroad Company, with headquarters at Mt. Vernon, have filed articles of incorporation with the Secretary of State of Illinois. The capital stock is $3,000,000. Incorporators, Seth F. Crews, George H. Varnell, George M. Haynes; of Mount Vernon; Bluford Wilson, James A. Creighton and Jonathan Merriam, of Springfield. The proposed route is through Effingham, Fayette, Marion, Jefferson, Franklin and Williamson counties, from Altamont to Marion with a branch from Mount Vernon to Tamaroa.

The stockholders of the New York and Long Branch, the New Egypt and Farmingdale, the Long Branch and Sea Girt, the New York and Long Branch Extension, and the Long Branch and Barnegat Bay Railroad Companies have adopted articles of agreement for the consolidation of the roads and the formation of a company to be known as the New York and Long Branch Railroad Company, with a capital of $2,000,000, in shares of $100 each. The officers named are : President. Henry S. Little ; vice president, George G. Haven; secretary and treasurer, Anthony Reckless.

Articles of incorporation of the St. Paul, Minneapolis and Chicago Railroad Company have been filed for record in the office of the Secretary of State of Minnesota. The capital stock is $4,000,000, consisting of 40,000 shares of $100 each. The indebtedness is limited to $6,000,000. The proposed route is from a point in the city of Minneapolis, running east, westerly and southerly, to a point upon the eastern boundary line of Minnesota, in Houston County. The general office of the corporation is to be in the city of Minneapolis. The incorporators and directors are M. J. Briggs, Aloro Jenks, C. J. Thomas, Adam Eulberg and Thomas Kennedy, of Dodgeville, Wis.

The papers of organization of the Central Pacific Railroad of Wyoming have been filed with the Secretary of Wyoming Territory by Charles Crocker, Charles F. Crocker and W. V. Huntington, incorporators and trustees. The capital stock is $13,500,000 in 135,000 shares. The office is at Evanston, Wyoming. The road will begin on a point of the north and south boundary line between the Territories of Wyoming and Utah, where the Bear River crosses the boundary line; running thence through the counties of Unitah, Sweetwater, Carbon, Albany and Laramie, in Wyoming, to a point on the eastern boundary line of Wyoming where the Niobrara River crosses the same. The length will be 450 miles. The capital stock represents the actual contemplated cost of construction and of the right of way. Each trustee takes 33,750 shares.

CONSTRUCTION.

A railroad is being surveyed between Chico, Cal., and Magalia.

The recently completed railroad between Bodie, Cal., and Mono Lake is running successfully.

The Chicago, Portage and Superior Railway Company announces officially that it will commence laying its track on Jan. 1.

The survey of the Eureka and Colorado River Railroad has been completed from Snake Valley to Shackles station, South of Hamilton, Nev.

The Humeston and Shenandoah Railroad, now building through the Southern tier of Iowa counties, will be ready for business in June next.

The Guerdon and Camden Branch of the St. Louis and Iron Mountain Railroad has been completed to Camden, on the Ouachita river, a distance of 35 miles.

The Harrisburgh *Telegraph* states that a narrow-gauge railroad is to be built from the vicinity of Singlestown, Penn., to Jonestown, and that it will ultimately have important connections.

Track laying on the Baltimore and Delta Narrow-gauge Railroad has been completed to within a mile and a half of Towsontown, and will reach the county seat about the second week of January.

The Washington, Penn., *Observer* says that the Baltimore and Ohio Railroad Company intend to push the construction of the Hempfield Railroad vigorously to completion, double-

track it with steel rails, make it first-class in every respect, and use it as their main line from the East and West.

THE Canadian Pacific Air Line between Winnipeg and Portage la Prairie was completed on the 20th inst., and inspected by Gen. Rosser. The first regular train passed over it on that day, and all traffic has been transferred to it.

FROM Santo Domingo, December 18, we learn that Emilio Zeller, the agent of the Samana Railroad Company, and two engineers have opened about a mile of the road at Yuna, above Samana, employing 160 men. Mr. Crosby and Chief Engineer Wood, with a cargo of rails from England, were daily expected.

ABOUT one-half of the track of the Lehigh and Hudson River Railroad, between Belvidere and McAfee has been laid, and all the line is graded, and ready for the track layers, except about 9 miles between Woodruff's Gap and Hamburgh Junction, the grading of which will be completed during the present winter.

TRACK laying is progressing on the Shenandoah Valley Railroad South from Waynesboro' and North from Roanoke, and soon an intermediate section of fifteen or twenty miles will be put down from the junction on North river with the Lexington Branch of the Richmond and Alleghany Railroad towards Waynesboro'.

TRACK laying has commenced at Atchison, Kanasas, on the Omaha extension of the Missouri Pacific Railroad. It is expected that the new line will be completed to Hiawatha by the middle of March. The Central Branch railway will commence running regular trains to Leonard, Norton county, on the 1st of January prox. Leonard is 295 miles West of Atchison and 25 miles West of the present terminus of the road.

A DESPATCH from Plymouth, N. H., says that the grantees of the Pemigewasset Valley Railroad have decided to commence the construction of their road immediately. Work will be begun on that end at once, and probably the entire winter will be occupied in making cuts upon the first three miles of road. The remainder will occupy but little time, owing to its being almost a level country for the next fifteen miles.

THE contract for the construction of 40 miles of track on the Toledo, Cincinnati and St. Louis Railroad between the lines of the Illinois Central Railroad, have been let to Capt. Henry McPherson, of Boonville, Mo., who agrees to have it ready for operation on the first day of June. The company expects to make a similar contract on the road West of Ramsey, Ill., so there will be no doubt of the final completion of the entire road by the 1st of June.

THE Locust Valley Branch of the Long Island Railroad is to be extended through Oyster Bay and Cold Spring to Huntington. The company also proposes to tear up the track on the Syosset branch, from Hicksville to Greenlawn, and as soon as practicable the Middle Island, or main line track, from Hicksville to Manor Station, and extend the North side branch from Port Jefferson to Riverhead. This will give a North side and South side road, and do away with the numerous branches.

THE Commissioners appointed by the Supreme Court to examine the route of the New York, West Shore and Buffalo Railroad through Syracuse, have reported unanimously affirming the line adopted by the company. This line enables the company to locate its stations for the transaction of its traffic with Syracuse and the vicinity as favorable as those of any other line are now placed, and finally settles the definite location of the entire line from New York through Syracuse. The route is now definitely located to a point about 40 miles beyond Syracuse, and the company's engineers are running various lines between that point and Buffalo. Two or more favorable routes have been found, and the final location upon one of them will be decided upon in a short time.

ORGANIZATION.

AT the annual meeting of the Maine Central Railroad Company, held at Augusta, Me., on the 21st inst., the following Board of Directors was elected: A. Coburn, Darius Alden, Arthur Sewall, William G. Davis, Alfred P. Rockwell, George S. Morison, George P. King, George E. B. Jackson, Wm. B. Bacon, Willard P. Phillips, Elijah B. Phillips, Stephen J. Young, Horatio N. Joy. At a meeting of the newly-chosen board George E. B. Jackson, of Portland, was elected President and Josiah H. Drummond, Clerk.

AT the annual meeting of the Warwick Valley Railroad Comyany, held on the 20th inst., the following gentlemen were elected directors for the ensuing year: Grinnell Burt, Richard Wisner, C. H. Demarest, John L. Welling, Jas. Burt, Geo. W. Sandford and H. B. De Kay, of Warwick; W. C. Sheldon, John H. Seed, John S. Martin, Thos. P. Fowler and D. B. Halstead of New York City; Alfred Ely, of Newark, N. J. The new Board organized by the election of Grinnell Burt, President and Superintendent; W. C. Sheldon, Vice-President; C. H. Demarest, Secretary; Thos. Burt, Treasurer, and John Sayer, Asst. Treasurer.

AT a meeting of the stockholders of the Alabama, New Orleans and Texas Railroad Company, limited, better known as the Northwestern Railroad, held at New Orleans on the 23d inst., the following Board of Directors was elected: J. H. Oglesbey, Emile Carrier, James M. Seixas and Henry Abraham, of New Orleans; John Scott, of Cincinnati; Frederick Wolffe, Otto Plock and Charles E. Lewis, of New York, and W. H. Hardy, of Meridian Miss. The officers chosen were: Frederick Wolffe, president; W. H. Hardy, vice-president; John Scott, general manager; Max Calm, secretary and treasurer; John Glynn, jr., general resident agent, and Robert Mott, attorney. The construction of the Northwestern line will now be pushed forward very rapidly, as the contract provide that the road must be completed within twelve months, including the bridge across Lake Pontchartrain. This company has also purchased property—ten squares with a river front—in the Third District of the city, known as the Levee Steam Cotton Press, for a depot, etc. The price paid was $360,000.

The Coal Trade.

THE leading coal carrying companies make the following reports of their tonnage for the week ending December 17, and for the year to same date, compared with their respective amounts carried to the same date last year:

	Week.	1881.	1880.
Reading Railroad	188,573	442,160	323,080
Schuylkill Canal	3,336	27,655	.....
Lehigh Valley	141,367	337,718	240,020
Delaware, Lackawanna and Western	100,655	4,174,134	3,425,858
Shamokin	22,422	1,041,935	894,109
Central R. R. of New Jersey	100,781	4,288,476	3,681,629
United R. R. of New Jersey	46,738	1,550,441	1,138,309
Pennsylvania Coal	28,964	1,378,438	1,093,042
Delaware and Hudson Canal	77,877	3,500,338	2,958,177
Huntingdon and Broad Top Mountain	8,468	498,282	403,556
Penn. and New York	30,916	77,766	62,660
Clearfield, Pa	45,279	2,318,885	1,681,911

The total tonnage of anthracite coal from all the regions for the week ending Dec. 17, as reported by the several carrying companies, amounted to 647,865 tons, against 371,251 tons in the corresponding week last year, an increase of 276,614 tons. The total amount of anthracite mined for the year is 28,236,427 tons, against 23,581,580 tons for the same period last year, an increase of 4,654,547 tons. The quantity of bituminous coal sent to market for the week amounted to 103,087 tons, against 92,611 tons in the corresponding week of last year, an increase of 10,476 tons. The total amount of bituminous mined for the year is 4,827,961 tons, against 4,236,900 tons for the corresponding period last year, an increase of 591,061 tons. The total tonnage of all kinds of coal for the week is 750,952 tons, against 463,862 tons in corresponding week last year, an increase of 287,090 tons, and the total tonnage for the coal year is 33,064,388 tons, against 27,818,780 tons to same date last year, an increase of 5,245,608 tons. The quantity of coal and coke carried over the Pennsylvania Railroad for the week ending December 17 was 182,742 tons, of which 133,147 tons were coal and 49,595 tons coke. The total tonnage for the year thus far has been 8,816,444 tons, of which 6,505,666 tons were coal and 2,310,778 tons coke. These figures embrace all the coal and coke carried over the road east and west. The shipments of bituminous coal from the mines of the Cumberland coal region during the week ended December 17 were 53,693 tons, and for the year to that date 2,154,198 tons, an increase of 126,925 tons as compared with the corresponding period of last year. The coal was carried to tidewater as follows: Baltimore and Ohio Railroad—week, 43,406 tons; year, 1,380,956 tons; increase compared with 1880, 162,792 tons; Chesapeake and Ohio Canal—week, 5,483 tons; year, 503,753 tons; decrease compared with 1880, 97,781 tons. Pennsylvania Railroad—week, 4,699 tons; year, 265,096 tons; increase compared with 1880, 59,520 tons. The Reading Railroad shipment for last week, ending December 24, was 179,700 tons, of which 50,500 tons were sent to and 33,000 tons shipped from Port Richmond, and 21,500 tons sent to and 22,000 tons shipped from Elizabethport.—*Phil. Ledger, Dec.* 26.

A CONSERVATIVE old man said he didn't like the way his youngest daughter celebrated the wooden wedding, because she celebrated it by marrying a blockhead.

New York Stock Exchange.

(Thursday's quotations follow money article.)

AMERICAN RAILROAD JOURNAL.

Financial and Commercial Review.

THURSDAY EVENING, Dec. 29, 1881.

IN the money market this morning 5@6 per cent was the quotation for call loans on stocks and 3@3½ per cent on United States bonds. Time loans on stocks were 6 per cent. Prime mercantile paper was 6@6½ per cent for 60 days to 4 months date. In the afternoon the rate to the stock brokers advanced to 1-32 of 1 per cent per day plus 6 per cent. Few loans, however, were made above 1-64, and the fair ruling rate for the day on this class of loans was 6 per cent; the closing rate was 5 per cent.

The posted rates for prime bankers' sterling were this morning advanced to 4.80½ and 4.81½. The actual rates were 4.79½@¾ and 4.83½@¾, with cable transfers 4.84½@4.85 and prime commercial bills 4.77½@4.78¼. The actual rates for continent bills are as follows: francs, 5.25⅝@5.26¼ and 5.20⅝@5.21¼; marks, 93⅞@94⅛ and 94⅜@95; and guilders, 39⅝ and 40⅜.

IN accordance with the act of the extra session of the Minnesota Legislature for the settlement of the old contested railway bonds, the new twenty year bonds to the amount of $4,000,000 have been signed and sealed, and will be put in use on Jan. 3. It has been determined that some $30,000 of the internal improvement land fund, $20,000 of the permanent university fund, and about $500,000 of the permanent school fund shall be invested in the new bonds. In pursuance of this understanding, some of the Missouri 6s, and United States 4 per cents in these funds have been sent East to be sold at the market price, the proceeds to be invested in the new State 4½ per cent bonds. The State will realize a large premium on these and other bonds to be sold, and a profit of from $80,000 to $100,000 will inure to the several funds from the transaction. No difficulty is likely to be encountered in placing all these 4½ per cent bonds at par. About $1,000,000 of the $4,000,000 will be absorbed in the several trust funds above mentioned, and the remainder will go to the bondholders, $2,000,000 or more to Selah Chamberlain, and the rest to other creditors.

THE Albany and Greenbush Bridge Company has taken up the two mortgages, one given in 1875 and the other in 1880, to cover bonds to construct the bridge, and has given a new mortgage to the Mercantile Trust Company of New York to secure bonds to the amount of $900,000 in denominations of $1,000 each payable November 1, 1931, in gold coin, with interest at the rate of 6 per cent per annum, also payable in gold.

THE Mercantile Trust Company will issue certificates of first preferred stock of the Manhattan Railway Company for the temporary receipts already issued and for the stock of the New York Elevated Railroad Company, to be exchanged for first preferred stock of the Manhattan Railway Company in accordance with the agreement between the Manhattan Railway Company, the New York Elevated Railway Company and the Metropolitan Elevated Railway Company, dated Nov. 14, 1881. Upon the delivery of the certificates to the Trust Company it will pay $10 a share in cash. Upon the delivery of the certificates of the Metropolitan Elevated Railway Company the Trust Company will issue certificates of second preferred stock of the Manhattan Railway Company therefor.

A TRAFFIC arrangement has just been concluded between the New York, Lake Erie and Western and the New York and New England Railroad Company, by which the former is to take its business for Boston and New England points over the New York and New England line, and the latter will give its business for the West to the New York, Lake Erie and Western. The new arrangement goes into effect Jan. 1.

CHECKS for the payment of the interest due January 1, 1882, on the public debt of the United States will not be mailed from the Treasury, at Washington, until the 31st inst.

THE railroad debt of Watertown, N. Y., amounting to $300,000, will be refunded January 1, 1882. The old bonds were issued in 1870, and bear 7 per cent interest. The new bonds, which will bear 4 per cent interest, have all been subscribed for at par by residents of the city and town. They fall due yearly in amounts of $10,000 each.

AT a meeting in London, Eng., on the 22d inst., of the shareholders of the Grand Trunk Railway Company of Canada, Sir Henry Tyler, president, proposed a supplementary traffic agreement with the Chicago and Grand Trunk Railway, with the Michigan Air Line, and with the Midland Railway of Canada. He gave a favorable account of the prospects of the road, and said he believed that at the half-yearly meeting he would be able to recommend the payment of the second preferred dividends in full. The statement of the president was favorably received, and the policy he recommended approved.

THE Missouri State Fund Commissioners have remitted to the Bank of Commerce, New York, sufficient funds to pay the interest on the State debt falling due January 1, 1882; but have instructed the Bank not to pay the interest claimed to be due on the bonds, issued in aid of the Hannibal and St. Joseph Railroad. The Governor also threatens in case the company should fail to pay the interest on these bonds to order the sale of the road under the law which authorizes him to do so whenever interest is in default. Referring to the above announcement the President of the Hannibal and St. Joseph Railroad Company is reported to have said that the "Company will not pay interest on Missouri State Aid bonds, and that the road will not be sold for that interest. The company paid into the State treasury, June last, the full amount of State loan for which those bonds were issued. The State received the money and assumed payment of interest and principal of bonds. The State paid interest on bonds at Bank of Commerce last July and will continue to pay it or dishonor its obligations. The company has plenty of money to pay these coupons, but it has paid its debt in full and does not intend to continue paying interest on a debt that is paid. The company intends to pay its own obligations promptly and its regular February dividend and has the money in hand for that purpose."

THE amount of interest on the public debt of the United States, falling due January 1, 1882, is more than $10,000,000, of which amont $7,387,000 is on account of the 4 per cent bonds, and the remainder on account of the extended 6 per cent bonds, which now bear 3½ per cent per annum. On the 4 per cent bonds one quarter's interest, and on the extended 6's one-half year's interest will be payable on the date above named.

THE report of the Warwick Valley Railroad Company for the year ending September 30, 1881, shows that the total earnings were $55,547.74, the expenses of operating, maintaining road, etc., were $31,353.53, and the net earnings $24,204.21. Of this amount $12,600 was paid for interest, and $6,800 for dividends, leaving a surplus of $4,804 21, out of which a dividend of 2½ per cent was declared payable January 10, 1882.

THE San Francisco Stock Board has declared a dividend of $100 to each member, payable immediately.

THE Mercantile Trust Company is prepared to issue first preferred stock of the Manhattan Railway Company, and to pay $10 per share in cash, in exchange for temporary receipts already issued for the stock of the New York Elevated Railway Company; also, to issue second preferred stock of the Manhattan Railway Company, in exchange for certificates of the Metropolitan Elevated Railway Company.

IN the United States Circuit Court, Pittsburg, on the 27th inst., Judge McKenna granted the petition of Samuel Dickson, of Philadelphia, asking that the injunction against the Lehigh and Wilkesbarre Coal Company be dissolved, and that the business be taken out of the hands of the receivers.

THE State treasurer of Alabama, has forwarded to New York and Mobile the necessary funds to meet the interest due January 1, on the Alabama bonds. The interest will also be paid at Montgomery on any bonds presented. More than half the bonded debt of the State is held by Alabamians.

Finances of Indiana.

From the report of the Treasurer of the State of Indiana for the fiscal year ending October 31, 1881, we learn that the total receipts into the State Treasury during the year (including $888,865.37 on hand November 1, 1880,) were $4,167,025, and the disbursements $3,426,374.28, leaving a balance on hand of $740,650 72. The total receipts for the general fund, (including a balance of $504,894.94 on hand at the commencement of the year) were $1,192,920.02. The foreign indebtedness of the State is as follows:

Five per cent stock outstanding	$14,469 99
Two and one-half per cent stock outstanding	2,335 13
Five per cent bonds held by Brooklyn Savings Bank, due on April 1, 1884	200,000 00
Five per cent bonds payable to Winslow, Lanier & Co., of New York	385,000 00
Five per cent non-negotiable bonds held by Purdue University, due 1901	340,000 00
Twenty-four internal improvement bonds, Coghlan claim, past due	24,000 00
Six per cent internal improvement bonds, due 1866	6,000 00
Total	$971,825 12

The domestic debt, which consists of six per cent non-negotiable bonds, due the common school fund, amounting to $3,904,783.22, interest payable semi-annually, can h rdly bc regarded as a debt, in so much as it merely takes the place of an annual appropriation and is paid by the State to itself. The report shows a decrease of $121,570 in the total debt of the State. The total amount of appropriations subject to draft at the beginning of the year was $1,872,929.75; unexpended balance, $243,533.76; merged into the general fund, $160,733 08.

Track laying on the Lehigh and Hudson River Railroad has been completed between Belvidere and Danville, New Jersey, 13 miles, and in a few weeks the cars will be running to Andover, where a Y has been placed to connect with the Sussex Railroad. This is expected to be a great coal route from the Lehigh Valley to New York and New England.

Statement of the Public Debt of the United States, December 1, 1881.

BONDS ISSUED TO THE PACIFIC RAILROAD COMPANIES, INTEREST PAYABLE IN LAWFUL MONEY.

	Amount Outstanding.	Accrued Interest not paid.
Central Pacific bonds, 1862-64	$25,885,120 00	$647,128 00
Kansas Pacific bonds, 1862-64	6,303,000 00	155,575 00
Union Pacific bonds, 1862-64	27,236,512 00	680,912 80
Cent. Branch Union Pacific bonds, 1862-64	1,600,000 00	40,000 00
West'n Pacific Bonds, 1862.64	1,970,560 00	49,264 00
Sioux City & Pacific bonds, 1862-64	1,628,320 00	40,708 00
Totals	$64,623,512 00	$1,615,587 80

Interest paid by the United States, $51,467,272 02: interest repaid by transportation of mails, &c., $14,708,886 34; interest repaid by cash payments: 5 per cent. net earnings, $655,198 87; balance of interest paid by United States, $36,104,186 81.

The foregoing is a correct statement of the public debt, as appears from the books and Treasurer's returns in the Department at the close of business, November 30, 1881.

CHARLES J. FOLGER,
Secretary of the Treasury.

Pennsylvania Railroad.

The statement of the business of all lines of the Pennsylvania Railroad Company east of Pittsburg and Erie for November, 1881, as compared with the same month in 1880, shows

An increase in gross earnings of	$265,302
An increase in expenses of	199,034
An increase in net earnings of	$66,268

The eleven months of 1881, as compared with the same period in 1880, show

An increase in gross earnings of	$2,680,188
An increase in expenses of	1,977,779
An increase in net earnings of	$702,409

All lines west of Pittsburg and Erie for the eleven months of 1881 show a surplus over liabilities of $2,828,121, being a loss, as compared with the same period in 1880, of $31,441.

A Boston editor recently wrote that the hotel and restaurant keepers were organizing to abolish "beats," but the printer set it up "beans," and a double-leaded supplement was necessary to quell the riotous mobs that collected about the hostelries.

Northern Central Railway.

THE following is a comparative statement of the gross earnings, operating expenses and net earnings of the Northern Central Railway Company for the month of November—

	1881.	1880.
Gross earnings.....	$487,160 10	$459,053 68
Operating expenses.....	313,702 93	302,450 79
Net earnings	$173,457 17	$156,602 89

—showing an increase in gross earnings of $28,106.42, in operating expenses of $11,252.14, and in net earnings of $16,854.28.

For the eleven months ending November 30, the gross earnings, operating expenses, and net earnings were:

	1881.	1880.
Gross earnings.....	$4,967,076 74	$4,556,076 81
Operating expenses.....	3,465,812 25	2,984,864 09
Net earnings.....	$1,501,264 49	$1,571,212 72

—showing an increase in gross earnings of $410,999.93, with an increase in operating expenses of $480,948.16, making a decrease in the net earnings of $69,948.23.

A WOMAN who can take a mental inventory of another's attire in half a minute will occupy an entire morning in telling her neighbor the details.

A POOR old rheumatic lady said to her physician, "O, doctor, doctor, I suffer so much with my hands and feet!"—"Be patient, dear madam," he soothingly responded; you'd probably suffer a great deal more without them."

We continue to act as Solicitors for Patents, Caveats, Trade Marks, Copyrights, etc., for the United States, Canada, Cuba, England, France, Germany, etc. We have had **thirty-five years' experience.**

Patents obtained through us are noticed in the SCIENTIFIC AMERICAN. This large and splendid illustrated weekly paper, **$3.20** a year, shows the Progress of Science, is very interesting, and has an enormous circulation. Address MUNN & CO., Patent Solicitors, Pub's. of SCIENTIFIC AMERICAN, 37 Park Row, New York. Hand book about Patents free.

Established in 1831.

AMERICAN RAILROAD JOURNAL.

PUBLISHED WEEKLY BY THE

American Railroad Journal Company,

No. 23 Liberty Street,
NEW YORK.

The AMERICAN RAILROAD JOURNAL, the oldest railroad paper in the world, was established during the construction of the first 100 miles of railroad in this country. Its files of the past fifty years furnish a complete record of the development of American railroads and faithful chronicles of the kindred financial interests. It contains features of special value to investors and others desirous of being readily acquainted with values and transactions connected with the development and working of our railroad systems, and much of interest to the general reader. It is taken by leading railroad men, investors and banking houses in this country and Europe, where it has long been a recognized authority in its special field, being recommended as such by "Chambers' Encyclopædia" and other standard foreign and domestic publications. We give below a few extracts from opinions of the press:

From "Herapath's Railway Journal," London.

The AMERICAN RAILROAD JOURNAL, one of the most honest and outspoken of American papers.

From the "Journal of Commerce," New York.

The AMERICAN RAILROAD JOURNAL, a most valuable weekly newspaper. Is now half a century old.

From the "Cincinnati Price Current."

The AMERICAN RAILROAD JOURNAL'S list of patrons is composed largely of the oldest and heaviest financial houses in the United States, Great Britain and the Continent, and of railway companies, manufacturing establishments and banking and commercial houses in this country.

"From the "Pittsburg (Pa.) Chronicle"

The AMERICAN RAILROAD JOURNAL is authority on railroad news.

From the "Washington (D. C.) Law Reporter."

The AMERICAN RAILROAD JOURNAL is a most valuable publication, and to all persons interested in American railroads, earnings, dividends, etc., etc., it is almost invaluable.

OFFICE OF

AMERICAN REFRIGERATOR LINE,

New York, Oct., 1881.

Shippers of Foreign, Domestic, and Fresh Fruit, Imported Liquors, Patent Medicines, Essential Oils, Mineral Waters, Lager Beer, Ales and Porters, Oysters, or, in fact, any class of goods that needs protection from heat or cold while in transit to the West and Southwest, either in Summer or Winter, will do well to ship the same by the new and elegant cars of the

NEW YORK, LAKE ERIE, AND WESTERN RAILWAY

TO THE TRAVELING PUBLIC.

During the Centennial season—six months closing September 10, 1876—the Erie Railway carried almost THREE MILLION passengers, without a singe accident to life or limb, or the loss of a piece of baggage.

And for a whole year the official records of the United States Post Office Department show the arrivals o Erie Railway trains in New York, on time, to be from 15 to 27 per cent ahead of competing lines.

Facts well worthy the consideration of travelers.

E. S. BOWEN, *General Superintendent.* JNO. N. ABBOTT *Gen. Passenger Agent.*

THE CALIGRAPH.

NO. 2 CALIGRAPH.

Weight 20 Lbs.

NO. 2 CALIGRAPH.

THE CALIGRAPH is a machine invented to take the place of the pen. It is operated by touching keys as in playing the piano. The writing, which is always neat and legible, and can be copied in a letter-press like ordinary pen writing, is done with wonderful ease and about three times faster than with the pen. Its use is learned in from two weeks to two months' time. It manifolds, giving from three to twenty copies at one impression. It aids composition, does away with bad penmanship, and saves time, labor and money. It is the best-known means of teaching spelling and punctuation. These qualities render it indispensible to business men, or all who have writing to do or children to educate.

THE CALIGRAPH is the invention of Mr. G. W. N. Yost, who was mainly instrumental in placing the TYPE-WRITER before the public, and who for the past seven years has given his entire attention to to writing machines. His long experience and thorough knowledge of the defects of the old style of Writing Machines, have enabled him to combine in the CALIGRAPH all the good, and to leave out all the bad elements of Writing Machines, as heretofore made.

The No. 1 machine is furnished with capital letters, figures, and punctuation marks only. Its key-board contains forty-eight characters, which are arranged in six rows of eight each.

No. 1 Caligraphs are made with four different styles of type, as follows: Large and small Gothic, and large and small Roman.

The No. 2, or upper and lower case Caligraph, is like the No. 1 in all respects, except that it is furnished with both capital and small letters, and is made larger to admit of the use of extra keys, type-bars, etc., for the additional characters. Both machines are operated in the same manner, and are about equal in speed.

The key-board of the No. 2 machine is arranged as follows: It contains, in all, keys for seventy-two characters. Forty-eight of these, occupying the centre of the board, are lower-case letters, figures, and punctuation marks, and are arranged precisely as in the No. 1 key-board. They are black on a white back-ground. At each end of the above, to the right and left, are thirteen capitals, which are white on a black back-ground. The whole key-board is arranged in six rows of twelve characters each.

It will be remembered that the old style of No. 2 Type-Writer has two letters on each type-bar, and one set of keys for both capital and small letters, an arrangement which necessitates a complicated carriage movement and a great loss of speed, as, in order to print a capital, a special key must be depressed with a finger of one hand while the capital is being struck with a finger of the other.

The No. 2 Caligraph has an independent key and type-bar for each letter, thus avoiding all complication and greatly enhancing speed. The Caligraph is constructed of the most durable materials. There is no cast or even malleable iron used. Every part is made of cast or rolled steel or brass, by skilled mechanics. It is finely finished, and with proper care will, like the Sewing Machines, last a lifetime.

The Caligraph is a great boon to Ministers, Lawyers, Manufacturers, Editors, Authors, Stenographers, Insurance Companies, Bankers, Government Officials, Copyists, Teachers, Private Families, and all who have writing to do or children to educate.

Many young men and women have already found pleasant and profitable employment, using the Caligraph; any intelligent young man or woman can, by buying a Caligraph and becoming expert in its use, secure a pleasant and profitable position. The demand for laborers in this field of enterprise is practically unlimited.

No. 1.

195 Broadway, New York, Dec. 2d, 1881.

A. W. M. Co.

Gentlemen:—The two No. 2 Caligraphs purchased of you for use in the law office of Dillon & Swayne, are giving excellent satisfaction. We prefer the large to the small Roman type. I have used the Type-Writer for several years, but the Caligraph is much superior. I cannot enumerate all the points of superiority, but will refer to some of them. Its lightness and portability is a great improvement. It is also a great advantage to have a separate lever for each type. This avoids the necessity of shifting from Upper to Lower Case, and the memory is not so taxed to remember the kind of type you are writing with.

The arrangement of the letters on the key-board is the best I have ever seen. The alignment is perfect, and the arrangement for retaining it, excellent.

The ribbon movement is sure and easy, and the shifting of the ribbon requires but a single touch of the fingers.

The arrangement for carrying the paper is simply perfect, doing away with the rubber bands, which were continually breaking or getting weak; drawing the paper sideways, and spoiling the regularity of the spaces between the lines.

The pace-keys on either side is a great convenience, and much better than the old way of having a space bar in front.

The carriage movement is very uniform, and has no hitches or sluggish points, as in the Type-Writer. The trip which disengages the carriage, and enables the operator to move it at pleasure is invaluable.

Changing the line spacing is done instantaneously and with a single movement of the hand. The bell and stops are in front, and the parts which require tension are all accessible.

The Caligraph does not get out of order. It is easily cleaned. The new machines have a very strong stroke, which makes them very desirable for manifolding. As many as four to six good copies can be taken at once, on thick paper.

Paper of any width can be used, also envelopes or postal cards, without changing the machine.

The variety of type used in the Caligraph is another great advantage. The large Roman letters used in your No. 2 are especially admired by all who have seen the machine or its work.

I use the machine personally, several hours daily, and find it all that could be desired. You are at liberty to refer any one to me you may desire.

Respectfully yours.

E. H. SMITH, Stenographer.
